The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

NOTICE TO SUBSCRIBERS

When changing your mailing instructions be sure and give your old address in full as well as your new address.

THE MONETARY TIMES IN MONTREAL

In pursuance of the policy of THE MONETARY TIMES to strengthen still further its position in all parts of Canada, as well as abroad, a larger and more convenient Montreal office of this journal has been opened at Rooms 617 and 628, Transportation Building, in that city. The importance of Montreal in the financial, commercial and business life of Canada cannot be overestimated. Our realization of that fact prompts the present provision of greater service by this journal to Montreal interests. Mr. T. C. Allum, well known throughout the city, will continue as editorial representative of the paper and will, as heretofore, keep our readers in the closest touch with all important developments. A file of THE MONETARY TIMES has been provided for the use of citizens and visitors, who are also invited to make every reasonable use of this branch office. Its telephone number is Main 8436.

CONGESTION IN LONDON MARKET

All authorities are agreed as to the existence of a congestion of securities in the London market. Divergence of opinion is apparent respecting its degree of acuteness and its causes. A correspondent, for instance, says it is quite true that certain Canadian and other loans have had to be taken in part by the underwriters, but those who know the market intimately do not largely ascribe this to the scarcity of money in London or Paris, or to the lack of interest on the part of investors. In London and Paris banks there is probably more money on deposit than ever before. "There is" he continues,

"the psychological time when an offering should be made, but just now the average English investor wants a higher rate of interest for his money and is not content with 4 or 4½ per cent. Even the large insurance and financial corporations overseas are looking for better returns than formerly, and the effect is, for example, seen in prices of English Consols and English railway securities, which for so long had been favorites. This higher rate of interest appears to be the chief reason why our recent government, city and railway 4 per cent. loans have not been an immediate success."

Our correspondent correctly points out that it is not always right to term loans a failure where the public, in response to the advertisement, only takes a portion of the securities. As a matter of fact, the underwritings are, as a rule, gradually placed throughout the Kingdom by the underwriters through their brokers. For instance, the latest Vancouver loan had only a small proportion at first taken by the public, but sometime afterwards the whole balance was placed with nine or ten insurance companies. Further, it often happens that the issuing house does not expect an entirely successful flotation at the start, but secures a quotation on the Stock Exchange and gradually gets rid of the bonds.

While these contentions are true, the reports received by The Monetary Times regarding a large number of Canadian issues in London show that not only were large amounts left with the underwriters, but the underwriters have had considerable difficulty in getting the securities absorbed, even when allowed many weeks to do so. That is good proof of market congestion. Our contemporary, "Canada," thinks that it looks very much as if we may be on the eve of a return to the conditions obtaining thirty years or so ago—that is, so far as high-grade investments are concerned. That the demand is incapable of keeping up with the supply is

proved conclusively by recent experience. There have been a few exceptions, but these only prove the rule. "The position, so far as the Canadian bond market is concerned, is distinctly disconcerting," it continues. "Loan follows loan in rapid succession, and the mischief of it is that most of these are left on the hands of the underwriters, who, of course, have to nurse their holdings with the best patience they can command. But each fiasco only serves to increase the trouble, and there must now be an enormous amount of undigested stock. Both Montreal and Toronto are largely responsible for the present position. In the opinion of leading financiers, had these two prominent cities acted on the advice tendered them as to the most suitable opportunity for financing their requirements, the present state of affairs would have been much less acute. Now, it is common knowledge that large sums have to be provided, the greater portion of which will have to be raised by means of short-dated bills. Whilst we shall, of course, continue to finance the requirements of Canadian municipalities, the terms will undoubtedly be increasingly onerous. We can only repeat what we have previously said, viz., that Canadian cities will do well to restrict their expenditure, for the present at all events, to the lowest possible limits. No one questions that this country must for many years to come finance the Dominion, but the persistence with which appeals for funds have been made of late has made it increasingly difficult for those charged with the necessary financial arrangements to ensure their success. Canadian cities and other borrowers are certainly running a great risk of wearing out their welcome in the London market."

Municipalities cannot be too careful in keeping their expenditure within the smallest possible limits. It is a good sign to see the local press advocating this policy. The Calgary News Telegram, as an example, recently asked whether it would not be wise to postpone action regarding some of the proposed improvements for a few months, or until market conditions are more encouraging than they are now—a very proper question with only one answer. Municipal financing has assumed large proportions during the past few years. Although it is inconvenient to put on the brakes at this time, the attitude of the country lending us most money must be taken as a significant warning.

Representatives of the city of Toronto are in London endeavoring to market \$6,000,000 of the Queen City's securities. Not long ago, we understand, that city received an excellent offer for every debenture it had on hand. The offer was refused, and we fear that Toronto must now suffer with the rest of those making a pilgrimage to the London market. The city of Montreal has to float loans amounting to about \$13,000,000. That it has borrowed temporary loans amounting to over \$5,500,000, and that these latter loans may at any time be a source of heavy loss for the corporation are facts that both the city treasurer and the city auditor have brought before the board of control. They are considering another attempt to place a loan of seven or eight millions on the London market through the Bank of Montreal. If it should happen that 95, or even less, is offered the controllers, owing to the large temporary loans which have been contracted, they may be compelled to accept the tenders.

The signs are plain that Canada should keep out of the London market entirely, and for several months.

REGINA

The city of Regina, Saskatchewan, knows that it has world-wide sympathy at this time of disaster. The tragedies of climate in Canada grow less numerous and less severe. Heartfelt condolence goes to those bereaved. The cyclonic incident must not be exaggerated as a typical Saskatchewan event. That province, rapidly becoming one of the finest wheat and grain-growing

areas in the world, will, with Alberta, receive a large new population during the next few years. It has generally a genial climate. The cold spell which comes now and again only reminds how civilization has mitigated the old-time terrors of a northern clime. The cyclone was almost an expression of annoyance by the pre-confederation climate, annoyance at Regina's persistence in pushing, year by year, the outskirts of a splendid city further north, south, east and west. The immigrant and the capitalist need not fear that the city of Regina and the province of Saskatchewan will fail to give careers and an adequate yield on investment.

CANADA AND THE WEST INDIES

The reciprocal agreement between Canada and the West Indies will provide a basis for a much larger trade between the parties directly concerned. Mr. E. S. H. Flood, the Canadian Trade Commissioner at Barbados, states that the merchants of the West Indies are looking forward with interest to an extension of trade with Canada, and Canadian agencies might advantageously be placed in these islands in advance of the favored tariff that will follow the enactment of the reciprocity agreement. There will be undoubtedly at that time a considerable extension of the trade, and firms that are desirous to obtain a share of it will do well to consider the matter early. Representatives of Canadian firms will be received in the West Indies. Canadian exporters should be prepared to quote c.i.f., if required. West Indian houses having established connections with London and New York already know the landed cost of goods from these centres, and might at first delay placing orders where there was any uncertainty as to the landing charges. The long-established importing houses are generally of good financial standing, and buy for cash or on short credits. Quotations from Canadian exporters are recommended to be on a net cash basis, remittances to be made on arrival of the goods or at the end of the current month.

During the ten fiscal years ended March, 1911, Canada's imports from the West Indies increased from \$2,173,000 to \$9,035,000 a year, and those from South America (largely British Guiana) increased from \$1,695,000 to \$7,344,000. The increase in exports to the countries included in the divisions was from about \$5,000,000 to \$11,716,000. The trade thus represented is a growing one, due largely, so far as imports are concerned, to the preference given by Canada to British-grown raw sugar, which in 1910-11 was imported from British Guiana and the British West Indian islands to the value of over \$8,500,000.

All the islands did not desire to become parties to the present agreement. Those included are Trinidad, British Guiana, Barbados, St. Lucia, St. Vincent, Antigua, St. Kitts, Dominica, and Monserrat. The population concerned is over 850,000, about 280,000 being in Trinidad and some 305,000 in Guiana. There stayed out of the negotiations the Bahamas, Honduras, Bermuda, Grenada, and Jamaica, with a population combined of about 1,080,000. These colonies, the chief of which is Jamaica with about 870,000 inhabitants, now enjoy the advantages of the Canadian preferential tariff, and, with Newfoundland, are for three years to be accorded like privileges with those given to the negotiating islands and Guiana. At the expiration of that time, Canada, so far as the agreement is concerned, will be free to put them on the same footing as they have put Canada, and the preference in favor of their products may be withdrawn.

When the Panama Canal is open for navigation and our Western provinces are brought within easier market distance of the West Indies, the other islands may find it profitable to take advantage of the terms of the agreement. The parliament of Canada will undoubtedly ratify the arrangement made by their delegates. The other colonies through their legislative houses, will presum-

ably also sanction the agreement. Emissaries of United States interests have been active in the West Indies, working against its ratification, but it seems unlikely that this work will make any impression upon those who think for themselves, or upon the good effects which may be achieved by the treaty.

LIFE INSURANCE IN CANADA

The amount of life insurance in force in Canada, according to the government returns recently published, increased last year by almost \$100,000,000. The total for 1911 was \$950,000,000, and for the previous year \$856,000,000. There was an increase of 162,922 policies in force. The number of new policies taken up last year was 27,239 greater than in 1910. The premiums during 1911 exceeded by \$1,847,723 those of the previous year. Claims paid during 1911 totalled \$11,043,274, a gain of \$146,804 over the figures of 1910. These included matured endowments.

From the figures appearing on another page, it will be gathered that the Canadian companies obtained the greater share of premiums for the year. Of the total, \$31,619,000, they got \$20,736,000. The American companies' share was \$9,202,000 and the British companies', \$1,680,000. In the matter of new and taken-up policies, the American companies led in 1911, their number being 223,354. Canadian companies were responsible for 193,341, and British companies for 2,117. Examining the amount of policies, new and taken up, it is seen that the Canadian companies are first with \$111,000,000 compared with \$61,000,000 for the American companies and \$5,000,000 for the British companies.

The American companies at the end of last year had 691,508 policies in force, as against 619,508 of the Canadian companies and 24,031 of the British companies. Of the net amount in force, our own companies have \$627,000,000, the British companies \$50,000,000, and the American companies \$272,000,000.

The following companies appear in the list, but have ceased doing new business in Canada: Edinburgh Life, Life Association of Scotland, London Assurance, Scottish Amicable, Scottish Provident, Connecticut Mutual, National Life of United States, Northwestern Mutual and Phoenix Mutual. In the same order they have the following amounts of life insurance in force in Canada: \$50,899, \$564,044, \$20,192, \$112,525, \$76,378, \$970,958, \$45,108, \$156,002, and \$393,436.

Eight Canadian and four American companies took premiums exceeding \$1,000,000 during 1911. The highest figure of a British company under this heading was \$798,000.

A large amount was represented in industrial business. The following are the figures:—

Company.	Amount of new and taken-up policies.
London Life	\$ 4,035,729
Union Life	18,921,723
Metropolitan	16,208,772
Prudential	11,592,891

The net amount of industrial insurance in force divided among these four companies is approximately \$100,000,000.

The premiums for the year of the British Columbia Life Insurance Company, one of the latest to the Canadian ranks, totalled \$15,636. The number of policies, new and taken up, was 293, representing \$857,843. The number of policies in force at the end of last year was 329, representing \$646,195.

The Canadian Guardian Life, which has been repeatedly criticized by *The Monetary Times*, had, at the end of 1911, 155 policies in force amounting to \$123,430. The premiums for the year were \$7,959.

The total assets of twenty-six Canadian life companies last year amounted to \$190,717,031. They are classified as follows:—

Nature of assets.	Amount.
Bonds and debentures	\$68,475,565
Loans on real estate	63,565,830
Cash loans and premium obligations on policies in force	22,960,040
Stocks	14,328,471
Real estate	7,945,156
Outstanding and deferred premiums	4,807,238
Interest and rents due and accrued	3,402,292
Cash on hand and in banks	2,492,960
Loans on collaterals	2,389,178
Other assets	350,296

Bonds and debentures still constitute the backbone of the assets, although mortgages are a very close second.

PANAMA CANAL CONFERENCE

The Panama Canal Conference at Calgary is one of the first practical signs that Western Canada and British Columbia will prepare to meet the Canal half way. President Taft has predicted that it will be completed by July 1st, 1913. Even if the date be later, there is not too much time for our Pacific coast ports to prepare the way for new trade channels. If the Pacific coast of America were all Canadian, anxiety would be less necessary. As it is, there will be keen competition between the Canadian and United States outlets on that coast. Those harbors which afford the greatest facilities will naturally attract the largest amount of trade and shipping.

One of the resolutions adopted by the Conference urged that the Dominion government should give direct attention to any plans the cities of the Pacific coast may present for the betterment of their facilities for waterway transportation. The Dominion cannot give too much attention to that important matter, nor can it be too liberal with financial assistance. Canada's Pacific ports, which have admirable natural advantages and generous possibilities, should be raised to their proper level at one of the psychological moments in the commercial world—the opening of the Panama Canal. *The Monetary Times* proposes to deal adequately with this question in its forthcoming series of articles on its relation of Western Canada to the new waterway.

OFF TO LONDON TOWN

After administering a severe curtain lecture to the newspaper men present at a meeting of the Catholic School Board at Montreal this week, Alderman Giroux hinted that they might in future be excluded therefrom, presumably on account of the critical attitude adopted by some of the papers they represented. This was one of the side issues of a heated discussion respecting a trip to Europe to negotiate a loan for the Board. Commissioner Giroux pointed out that there was already a tendency in municipal circles to have a delegation go in person to attend to the flotation of loans, as, in this way, it was possible for such loans to be effected at a saving of all middlemen's commission charges. Incidentally, better rates were often obtained. Toronto had tried the method and had found it successful, and Montreal would quite possibly follow suit.

The confidence of amateur financiers in negotiating loans overseas, is amusing. Experts, versed in every market method, cannot cleave their way through the present London congestion. That does not discourage Alderman Giroux and several of his confreres. We are inclined to take the same view as Alderman Lapointe,

who at the meeting, sketched the humorous picture of the "Bon Canayens" arriving in London, with their carpet bags and umbrellas, bent on interviewing money lenders. Alderman Lapointe hinted that the delegates would cut quite a swath walking down the streets sizing up the "Money to Lend" signs.

Certain Canadians apparently think that the London money market is like an Italian banana stand—exposed to view, available for all comers, the fruits easy to obtain. It might be worth while to send some of the Montreal aldermen to London to acquire a few modern ideas of finance.

SMALL CHANGE

A street railway system for Bassano is as necessary as a razor for a three-year-old boy.

* * * *

Both Montreal and Toronto are in need of a corporation counsel. The best men available, at their own price, are not too expensive.

* * * *

Canada's fire waste during June was at the rate of \$97.90 per minute. That is an appalling record, and one which every Canadian citizen should help to efface.

* * * *

The brilliancy of ideas of Mr. Thomas L. Church, Toronto, acting mayor, is exceeded only by the strength of his rumored mayoralty ambitions. These have as much chance of life as a snowball at 90 in the shade.

* * * *

New York authorities are discussing the probable effects of the withdrawal of our call loans in that market due to a panic here. We are far distant from that economic halting point. New York can use those Canadian funds for a while yet.

* * * *

"Under Canadian law, the formation of a new bank is no easy matter. All sorts of rules and regulations have to be complied with and endless rolls of red tape unwound." So says a Western paper. It is better to unwind red tape and have a strong bank than to wind up a bank in the cords of deceit.

* * * *

Mr. Travers, the ex-general manager of the defunct Farmers Bank, should make sure that his memory is doing proper service, especially in view of the unqualified denial by Mr. Ryan of the statement that he (Mr. Ryan) received the mysterious cheque for \$3,000. We hope Sir William Meredith will level flat contradictions into a name about which there can exist no doubt whatever.

* * * *

The appointment of Mr. H. L. Drayton, K.C., as chairman of the Dominion Railway Commission has been received with general satisfaction. This is one of the most important positions in the country, and requires, in every sense of the term, a big man to fill it. It calls for a man of sterling character, without political or other bias, of judicial mind, ability in weighing evidence, a fine sense of fairness, a proper appreciation of the rights of the people, and of the just claims of capital. The former chairman fulfilled these and the many other necessary qualifications to a high degree. We believe that no better successor to the late Judge Mabee than Mr. H. L. Drayton could have been named.

The Northwestern National Insurance Company, of Milwaukee, Wis., has been registered to do business in Manitoba.

The Imperial Trade Commission invites communications from those who have suggestions anent the improvements of empire trade, faults of the present legislation, and concrete instances of injury to trade in recent years. Address Scotland House, Thames Embankment.

WEST INDIES TRADE AGREEMENT

Text of Important Commercial Treaty is Published— How Canada Will Benefit

The text of the agreement entered into in April between the Canadian government and a number of the islands in the British West Indies, has been published. It provides for a preference of 20 per cent. of the existing rates of duty on a large number of articles specified in a schedule annexed, with a minimum preference in the case of flour and sugar.

Provision is made for taking in the islands of the West Indies not parties to the agreement, as well as Newfoundland, within three years from the time it comes into force. Any of the parties to the agreement may provide that the concessions granted shall not be applicable unless conveyed by ship direct between the two countries concerned, provision being made in this connection for the regulation of freight rates by the Canadian government. The agreement is to come into force by proclamation after it has been ratified by the parties concerned and the Secretary of State for the Colonies, and may be terminated at the end of ten years on a year's notice.

Schedule of Canadian Goods.

Schedule of Canadian goods to enjoy the benefits of the Customs preference tariff when imported into the colony:—Fish, canned; fish, dried, salted, or smoked; fish, pickled. Meats, salted or cured; meats, canned; meats, fresh and poultry (dead); wheat, flour; Indian meal; rolled oats and oatmeal; cereal foods; bran and pollard; bread and biscuits of all kinds; oats; beans and peas, whole or split; coal, bituminous; butter; cheese; lard; hay; brooms and brushes; horses, cows, oxen, bulls, sheep, swine and poultry (living); boots and shoes and slippers; cordage; agricultural machinery and implements of all kinds, iron and steel nails, spikes, rivets and clinches; wire (including barbed wire), woven wire fencing and metal gates; machinery (including motor and other engines), steam boilers, electric machinery and electric dental appliances of all kinds; vehicles, including automobiles and motor cars; manufactures of India rubber, paints, colors and varnishes; paper of all kinds and manufactures of paper; vegetables of all kinds, including potatoes, onions, and canned vegetables; soap; house, office, cabinet or store furniture of wood, iron or other material, including cash registers, coffins, caskets, casket robes and linings and casket hardware; planks, deals, joists, scantling, shingles, shooks, staves and headings; doors, sashes and blinds; pianos and organs; starch; trunks, valises, travelling and tool bags and baskets of all kinds; cement; glass bottles, lamps, lamp chimneys and table glassware; nickel-plated, gilt or electro-plated ware; calcium carbide; linseed oil, cake and linseed oil cake meal; fresh fruits; canned and bottled fruits; condensed milk.

Benefits for the Indies.

Schedule of West Indian products to enjoy the benefits of the Customs preferential tariff when imported into Canada:—

Sugar, molasses and syrups, shredded sugar cane, fresh fruits of all kinds, cocoanuts, asphalt and manjak, coffee, cotton, raw, cotton-seed and cotton-seed meal, cotton-seed oil, rice uncleaned, rice cleaned, rice flour, rice meal and rice bran, crude petroleum, oils, coal and kerosene, distilled, purified or refined petroleum, copra and coconut oil, rubber, raw and balata; bulbs, logwood and logwood extract, annatto, turtleshell, unmanufactured ginger, nutmegs and spices unground, arrowroot, salt, sponges, vegetables (fresh) of all kinds, tapioca and cassava, tapioca and cassava flour, honey and beeswax; oils essential, including bay oil and otto of limes; tamarinds fresh or preserved, cattle-food containing molasses, peanuts and kolanuts; diamonds uncut; timber or lumber of wood not further manufactured than sawn or split timber or lumber of wood dressed; vanilla beans; bay leaves; papine, lime juice, fruit syrups and fruit juices, non-alcoholic.

New Duties to be Imposed.

Included in schedule C are cocoa beans, not roasted, crushed or ground; lime juice raw and concentrated, not refined; and fresh limes. These are all to enter Canada duty free. On cocoa from foreign sources entering Canada a duty of not less than 75 cents per hundred pounds is to be imposed, on lime juice one of not less than five cents a gallon, while on fresh lime from foreign countries the new duty is to be not less than ten per cent. ad valorem.

There is talk of retaliation by the United States.

Mr. A. F. Campbell of Fort William has been appointed secretary of the new government grain commission.

Lord Montague of London, while in Toronto, announced that National Life Assurance Society of England would materially increase its investments in Canadian railways and industrials which now amount to \$10,000,000.

HAPPENINGS AT MONTREAL

Canadian Pacific Railway's New Station—Quebec and Succession Duties

Monetary Times Office,
Montreal, July 3rd.

The Canadian Pacific Railway's new Windsor Street station which, it states, is the largest in the British Empire, will compare favorably with any station in the world. The stonework is now complete and the workmen are engaged on the interior finishing, and the work of joining the new building with the old is in progress. Some of the staff have taken up offices in the new building and removal is going on gradually.

There will be a main south entrance at the corner of Windsor and St. Antoine Streets. Here will be a large vestibule 40 feet square with walls of Indiana limestone and huge columns, with a vaulted ceiling. The general waiting room will be nearby and will have dimensions of 52 by 132 feet, with walls and pilasters of marble, and a ladies' waiting room 35 feet by 60 feet, with panelled walls, marble doorways and vaulted ceiling. The nursery will be 13 feet by 34 feet. A smoking room for men, dining room and lunch rooms will be conveniently situated, the former having a seating capacity of 150. In the space devoted to the arrival and departure of trains will be accommodation for ten tracks, this being nearly 50 per cent. more than at present available. A fine entrance will also be provided on Windsor Street. Somewhere in this vicinity will be located the offices of the president and the different officers of the line.

Death of Mr. A. D. Durnford.

Local banking circles were grieved at the receipt of the news, on Tuesday morning last, of the death of Mr. A. D. Durnford, superintendent of branches of the Molsons Bank. Mr Durnford has been well known in banking circles here for many years. Mr. Durnford was about sixty years of age. He was born in the vicinity of Montreal and was the youngest son of the late Captain Durnford. After being educated in Montreal institutions and in France he entered the Quebec Bank as a clerk. After receiving some experience he joined the Molson's Bank and remained there, he has been forty years with that institution. For fifteen years he has been superintendent of branches with headquarters in Montreal. He was a member of the board of trade and a governor of the Montreal general hospital. His death took place on Sunday night.

Levying of Succession Duties.

An effort is at last about to be made to settle definitely whether or not the Province of Quebec has the right to levy succession duties on property situated outside its confines, and the progress of the action will attract much attention. A case is being taken to the Privy Council, leave to appeal having just been received. The estate concerned is that of the late Henry H. Cotton who died in 1907 after having made a will 2 years previously, the plaintiff, Mr. C. S. Cotton, having been named executor, took possession. The wife of the testator, however, had pre-deceased him at Boston in 1902, having previously made a will leaving her whole estate to Henry H. Cotton, her husband. The estate was valued at \$259,441, only \$24,490 of which was located in Quebec. Henry H. Cotton's personal estate in Quebec netted only \$6,414. From his wife's property was to be deducted \$3,000 as exempt from succession duties. Upon the death of the wife, the province claimed from the husband and legatee the sum of \$11,193 for succession duties and forced him to pay this sum. Upon his death the province made another claim upon the estate, this being for the amount of \$21,360, and again succeeded in collecting the amount. The plaintiff from whom the second claim was collected now protests that these sums were excessive and asserts that on the estate of the wife there should have been paid only \$654, and on the other estate the sum of \$415, there being thus a total sum of \$31,492 collected unduly. The provincial authorities answer that at the time of their decease the donors of the property were domiciled in Quebec and that consequently their estates were governed by the laws of the province. The plaintiff bases his appeal on the case of Woodruff vs. the Attorney-General of Ontario wherein it was declared that the sister province did not have the right to levy succession duties on estates situated outside the limits of the province.

A branch of the Royal Bank of Canada has been opened at Snowden Junction, Montreal, and the branch at Port Morien, N.S., was closed on July 29th.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Halifax, N.S.—July 2.—Mr. A. L. Wood's residence. Loss and origin unknown.

Magrath, Alta.—June 21.—Mr. R. Toomer's residence. Loss \$1,000. Origin unknown.

Sarnia, Ont.—June 27.—Electric Light Company's plant. Loss \$300,000. Origin unknown.

Thornloe, Ont.—June 30.—Neely's mill with 550,000 feet lumber destroyed. Loss \$15,000.

London, Ont.—July 1.—Mrs. W. Dawson's residence. Loss about \$5,000. Origin unknown.

Ottawa, Ont.—June 30.—Mr. A. H. Coplan's brass foundry. Loss \$3,000. Origin unknown.

Haliburton, Ont.—July 1.—The William Laking lumber mill. Loss \$20,000. Origin unknown.

Windsor, Ont.—June 30.—The historic "nunnery." Loss unknown. Origin, struck by lightning.

Oshawa, Ont.—July 1.—Mr. W. J. Trick's car load of shingles. Loss \$1,000. Origin unknown.

Cobalt, Ont.—June 30.—Three hotels, two stores and a laundry destroyed. Loss \$30,000. Origin unknown.

Whitby, Ont.—June 30.—Ontario Ladies' College damaged. Loss \$1,000. Origin unknown.

Ottawa, Ont.—June 27.—Ottawa Electric Company's gasoline truck. Loss \$9,000. Origin unknown.

Hillbank, B.C.—June 28.—Mr. J. Dougan's barns and out-buildings destroyed. Loss \$8,000. Origin, supposed incendiary.

Three Rivers, Que.—June 30.—Messrs. J. Dufour and P. Baumier's residences. Loss \$5,000. Origin, children playing with crackers.

Saskatoon, Sask.—June 30.—The J. F. Clairn's department store. Loss \$500,000. Insurance amounts to \$300,000. Origin unknown.

Kenora, Ont.—June 30.—Rat Portage Lumber Company's mill and power plant. Loss \$100,000. Insured with Lloyds, London. Origin unknown.

Hortland, N.B.—Commercial Hotel destroyed. Loss, contents, \$2,000. Insurance \$800 in Sun Company. Building \$3,000, partly insured in Queen Company.

Fort William, Ont.—Great damage has been done along the line of the National Transcontinental Railway, under construction east of Superior Junction, by forest fires. Several bridges have been destroyed and thousands of ties have been burned.

Halifax, N.S.—June 26.—Moirs' Foundry. Loss unknown. The insurance on the foundry buildings and machinery was:—\$5,000 in Nova Scotia Fire Insurance Company; \$4,000 in W. R. MacInnes & Company's office; \$2,000 in Acadia Fire Insurance Company; \$2,000 in Atlantic Mutual Company, on brick building adjoining; \$750 in Nova Scotia Fire Insurance Company, on dwelling No. 13 Hurd Street. Origin unknown.

St. Scholastique, Que.—June 26.—Two acres devastated. Loss includes the following properties:—Mr. Max Galant, residence and bakery, \$5,000; Mr. Gedeon Sarrazin, brick house, \$2,500; Mr. Isaie Dupras, residence, \$2,500; Mr. Alcide Desjardins, carriage maker, \$1,500; Mr. Rod Legault, carter, \$2,000; Mr. Arthur Legault, barber, \$1,500; Mr. Esrom Laurin, V.S., Montreal, \$1,300, and lessee's \$400 with his furniture; Mr. O. Lacombe, tailor, \$1,000; Mr. Joseph Robert, blacksmith, \$3,000; Mr. Nelson Raymond, Montreal; Mr. Euchariste Raymond, \$2,500; Mr. Jos. Clement, \$1,000; Mr. F. Horace Barsalo, buildings and contents, \$3,000. The total loss being about \$28,000. Origin unknown.

Montreal, Que.—June 28.—Fifty houses were burned at Pointe aux Trembles, a suburb of Montreal, with a loss of \$100,000, including Mr. Joachim Dulude, bakery, \$4,000, partially covered by insurance. Laplante Hotel, \$7,000, partially covered by insurance. Madame A. Lachapelle, \$2,000, partially insured. Dr. A. Pare, \$6,000, covered by insurance. Mr. Jos. Desroches, dry goods store, \$5,000, complete loss; small insurance. Mr. H. Macduff, carter, total loss estimated at \$1,000. Madame J. Lachapelle, \$1,500, partially insured. Mr. J. Trudel, residence, \$20,000, part covered by insurance. Mr. Theodule Archambault, residence, loss \$4,000, partially covered by insurance. Miss Adele Mathieu, \$1,000, partially covered by insurance. A vacant house belonging to Mr. J. Beaudry, total loss estimated at \$900. Mr. Hornisdas Monette, residence, \$2,500; one-third covered by insurance. Mr. F. Lapointe, tenant, household effects, all lost, \$400. Mr. George Gervais, loss \$5,000, partially covered by insurance. Mr. Chas. Renaud, \$3,000; Mr. Ephrem Robert, \$2,000, partially covered by insurance. Mr. Jos. Beauchamp, \$3,000, for the most part covered by insurance. Mr. A. Dagenais, residence, \$1,300, partially insured. Mr. J. Galipault, residence, \$2,000, partially insured. Mr. Adolph Desroches, residence, \$3,000, said to be covered by insurance. Mr. J. Larin, residence, \$1,200, partially insured. Mr. A. Beauchamp, \$1,300, partially insured. Origin, overflowing of a pot of soap grease.

CONCERNING CROPS

Conditions Generally Are Favorable—Farmers Are Optimistic—Moisture Was Opportune

During the fourteen days which have elapsed since the last report was published on June 13, states the Manitoba Free Press, the crop has passed through four days of extreme cold and five days of extreme heat. On this account more than usual anxiety has been expressed as to actual conditions. It is very gratifying, therefore, to be able to report wheat conditions on the whole good, and no damage which good rains within the next week will not repair. Coarse grains are not quite so satisfactory as wheat, owing mainly to the late seeding and the using of damaged seed. As was to be expected, the flax crop is the latest, and much of it is apparently not more than 4 or 5 inches high, while, on the other hand, a few points report flax in bloom.

The great heat has certainly produced some wonderful growth. Two weeks ago the average height of the wheat was 6 inches. The present report shows:

65 points were from 50 to 70 per cent. of the wheat is in the shot blade.

Well Advanced in Saskatchewan.

In Saskatchewan grain is well advanced, and is from one to one and a half feet high.

The acreage as reported shows 15 per cent. in wheat and large increase in other grains, 25 per cent. in all.

The new breaking will add 25 per cent. to present acreage.

Ten per cent. of land is under summer fallow.

Moisture is said to be sufficient. Labor though is somewhat scarce.

Mr. Seagar Wheeler, of Rosthern, the producer of the world's best wheat, has a plot of prelude wheat fully headed out. Dr. Saunders, of Ottawa, is the originator of Prelude, which is a new variety. The grain is twenty-six inches high.

Alberta may Have Record Crop.

The excellent feature of the Alberta crop reports from all over the province are the splendid growth made in every district following the recent timely rains and the increased acreage under cultivation. Given propitious weather during the next two months, there will probably be a record crop in Alberta. Both in the north and south, spring wheat is heading out, and has reached a growth varying from eight to twenty-four inches.

There is every indication also of a very good hay yield, the majority of points reporting excellent grass crops.

Alfalfa will far exceed any previous year. All crops are about two weeks ahead of the same period last year, and it is estimated that in Southern Alberta the yield will be 60 per cent. greater than last year. Winter wheat is averaging thirty inches and will be ready for harvesting within three weeks. Both oats and barley appear well advanced and in splendid condition.

Damages Not Extensive.

In some wheat fields in the south, where cut-worms have done damage, flax has been substituted, and is coming fast. Damage from any source has been slight and none is reported north due to cut-worms.

So far there has been no loss through hail, though light showers have fallen here and there. Farmers everywhere appear particularly optimistic as to the prospects of a bumper crop, for, up to the present, the amount of moisture from rains and spells of heat following, have been most opportune.

The crops generally in New Brunswick, with the exception of hay, are likely to be smaller than usual this year, because of the continued cold and wet weather, which continued up to a couple of weeks ago. This is said to be especially true with regard to potatoes, oats and other grains. The fruit crop promises to be good.

"There will be a Canadian crop of at least 250,000,000 bushels" said Mr. G. T. Smith, Messrs. Smith, Murphy and Company, the largest coarse grain dealers in Winnipeg and one of the largest grain firms in Canada in an interview to-day.

Mr. F. J. J. Stark, who for several years has been assistant manager of the London and Lancashire Guarantee and Accident Company of Canada, with head office in Toronto, is severing his connection therewith and will become manager for Canada of the Dominion Gresham Guarantee and Casualty Company, a subsidiary of the Gresham Life Assurance Company. Mr. Stark, whose headquarters will be at Montreal, will assume his new duties about August 1st.

NEW BRUNSWICK

Trade is Active—St. John is Making Many Improvements—Wheat Shipments

(Staff Correspondence).

St. John, N.B., July 2nd.

Wholesale trade generally throughout the province is active, with a larger demand than usual for most lines of goods, although the retail dry goods trade has been somewhat affected by the cold and wet weather of the early summer. With the large amount of railway construction and other heavy construction work in progress there is a great demand for both labor and supplies.

Mr. W. G. Pine-Coffin, an Englishman, lately visited New Brunswick and purchased seven farms, aggregating 1,061 acres, in three different counties. This is the largest purchase of New Brunswick farms by any outside investor for very many years. A company has been formed in London to purchase a large farm in this province where training may be had in the agriculture of the province. There is a steadily growing interest being shown by the old country in New Brunswick.

St. John Considering Electricity Supply.

An engineer has stated that a head of 100 feet of water could be got at Silver Falls on the line of the city water-works system, and a constant pressure secured by the construction of storage dams. The city council is considering the question of generating electricity at this point, in order that the city might provide its own electric light system. The council has awarded contracts for permanent paving on portions of several streets, and this policy will be continued from year to year. City government under the commission plan is thus far working out satisfactorily in St. John, and much more so than the old city council system with ward representation.

Mr. D. McNicoll, general manager of the Canadian Pacific Railway, visited St. John last week and stated that the plans for the new million-bushel elevator had been completed, and the contract would be awarded very soon. A crib-work has been constructed, and the Maritime Dredging Company has been awarded the contract to fill in a section of the shore flats at West St. John, where the elevator will be built.

Harbor Equipment and Construction.

At East St. John the sub-contractors for the breakwater and the excavation for the drydock have just installed the heaviest construction plant ever seen in St. John. It was brought from Ohio and includes a steam shovel weighing 110 tons. Hundreds of men are now employed there. At West St. John Contractor Michael Connolly has brought from Quebec a complete modern plant for concrete wharf construction, and has the heavy crib-work foundations for the new wharves which he is to build well under way.

The Furness steamer Rappahannock has just taken from St. John a shipment of fifty thousand bushels of grain for London. It is expected that each steamer of this line during the summer will take about the same quantity, and this will be a test of the suitability of St. John as a summer port for grain shipments.—W.E.A.

Mr. Lewis M. Wood, of the firm of Messrs. J. & L. M. Wood, has been elected a member of the Montreal Stock Exchange. Mr. Wood was formerly manager in Toronto for the Dominion Bond Company. The firm of J. & L. M. Wood have opened their Montreal office in the Dominion Express Building.

The next congress of the chambers of commerce of the empire will be held in Toronto. It is nine years since a congress of the chambers of commerce of the empire was held in Canada, the last one having been held in Montreal in 1903. The congresses are held every three years, and the one immediately preceding that held in London, England, this month, was held in Australia.

The following insurance companies have been licensed to do business in British Columbia:—Manitoba Assurance Company, of Montreal, with L. U. Conyers, Victoria, as attorney; Palatine Insurance Company, Limited, of London, with A. T. Von Etlinger, Vancouver, as attorney; New Jersey Fire Insurance Company, of Newark, with H. G. Lawson, Victoria, as attorney; North British and Mercantile Insurance Company, of London, with C. R. Gilbert, Vancouver, as attorney; Commercial Union Fire Insurance Company of New York, with A. T. Von Etlinger, Vancouver, as attorney; Norwich Union Fire Insurance Society, Ltd., of Norwich, England, with B. S. Heisterman, Victoria, as attorney; Equity Fire Insurance Company of Canada, Toronto, with W. S. Holland, Vancouver, as attorney.

REVIEW OF THE MONTH

Flotations in London—Investment Offerings—Bank Branches Opened and Closed

NEW STOCK LISTING

Ten thousand additional shares of Standard Bank of Canada have been listed on the Montreal Exchange.

CANADIAN FLOTATIONS IN LONDON (JUNE)

The following flotations of interest to Canadians were made in London during June:—

Canadian Northern Railway.—£1,438,356 4 per cent. perpetual consolidated debenture stock at 95.

Calgary Brewing and Malting Company.—£246,500 5 per cent. first mortgage sinking fund gold bonds at 86.

City of Edmonton.—£595,000 4½ per cent. debentures at 99½.

Riordon Pulp and Paper Company, Limited.—£158,436 6 per cent. first mortgage debentures at 97; and £158,436 7 per cent. cumulative preference shares at 95.

North Vancouver, B.C.—£126,100 4½ per cent. debentures at 97½.

Cape Breton Coal, Iron and Railway Company.—£300,000 6 per cent. first mortgage gold bonds.

Southern British Columbia Land Company.—£30,000 6 per cent. first mortgage debentures at par.

Canadian-British Engineering Company.—£100,000 7 per cent. preferred ordinary £1 shares.

The following flotations were omitted from the May list:—

Algoma Steel Corporation.—£1,130,000 5 per cent. 50-year sinking fund bonds at 93.

Scottish and Dominions Trust, Limited.—£250,000, shares of £10 each at par.

BANK BRANCHES OPENED AND CLOSED DURING JUNE

Twenty-one branches of Canadian chartered banks were opened during June and seven closed; during May, 50 were opened and 6 closed; during April, 24 opened and 8 closed; during March, 38 opened and 6 closed; during February, 16 opened and 3 closed; during January, 20 opened and 5 closed. Houston's Bank Directory gives the following particulars for for June:—

Branches Opened.

Boucherville, Que. ...	Bank of British North America.
Brantford, Ont.	Merchants Bank of Canada.
Clive, Alta.	Quebec Bank.
Edmonton, Alta., First Street	Dominion Bank.
Gravelbourg, Sask. ...	Bank of Toronto.
Grouard, Alta.	Royal Bank of Canada.
Leeville, Sask.	Weyburn Security Bank.
Montreal, Que., Ahuntsic	Bank Provinciale du Canada.
Montreal, Que., Park and Bernard Ave. . .	Molsons Bank.
Notre-Dame-du-Lac, Que.	La Banque Nationale.
Odessa, Sask.	Bank of Toronto.
Plum Coulee, Man. ..	Bank of Montreal.
Port Stanley, Ont.	Canadian Bank of Commerce.
Rosetown, Sask.	Quebec Bank.
St. John's, Nfld.	Canadian Bank of Commerce.
Sayabec, Que.	La Banque Nationale.
Springside, Sask.	Bank of Toronto.
Sudbury, Ont.	Canadian Bank of Commerce.
Toronto, Ont., Carlton and Yonge	Sterling Bank of Canada.
Toronto, Ont., Earls-court Branch	Canadian Bank of Commerce.
Westmount, Que., Victoria Ave.	Bank of Nova Scotia.

Branches Closed.

Creelman, Sask.	Bank of Hamilton.
Morrin, Alta.	Traders Bank of Canada.
Parkland, Alta.	Bank of Hamilton.
Parrsboro, N.S.	Bank of Nova Scotia.
Rosenfeld, Man.	Bank of Montreal.
Stellarton, N.S.	Royal Bank of Canada.
Winnipeg, Man., Higgins Avenue	Banque d'Hochelaga.

DIVIDEND CHANCES

The Guelph and Ontario Savings Society has increased its dividend from 9 to 10 per cent. per annum.

The Maritime Telegraph and Telephone Company declared an initial dividend on the common stock of 1 per cent. for the quarter ended June 30th.

The Cuba Railroad Company has increased its semi-annual dividend from 2½ to 3 per cent.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during June:—

Eastern Car Company, Limited.—\$1,000,000 6 per cent. first mortgage bonds at par.

Gillis Leather Company, Limited.—\$100,000 of capital stock at par.

Yonge Street Cafeterias, Limited.—\$50,000 7 per cent. cumulative preference participating shares with 25 per cent. bonus in common shares, at par.

Canada Brick and Fireproofing Company, Limited.—\$300,000 6 per cent. preferred stock at par, with 50 per cent. bonus of common shares.

Canada Tea Company.—\$125,000 7 per cent. preference stock at par, with 25 per cent. common stock bonus.

Maritime Nail Company, Limited.—Balance of issue of \$150,000 6 per cent. 10-year sinking fund gold bonds at par.

BIG GATHERING OF LIFE INSURANCE MEN

Convention to be Held at Montreal in August—Notable Addresses

Arrangements are being completed rapidly for the annual convention of the Life Underwriters' Association of Canada, to be held at Montreal on August 21st to 24th. A large gathering of underwriters from all parts of Canada is anticipated. A reception will be given the delegates on the first day and the next two days will be devoted to strenuous business sessions. The president's address and the reports of the secretary, treasurer, executive committee and special committees will be received on Thursday, August 22nd. On the morning of that day, Mr. L. Brackett Bishop, of Chicago, president of the National Association of Life Underwriters, will deliver an address.

Five minute discussions on "Is a Pension for Long Service Desirable?" "What are the Best Means of Retaining Agents with the Company?" are to be held on Thursday afternoon. These will be in charge of Mr. W. D. Keddie, Ottawa. During the same afternoon Mr. Haley Fiske, New York, will give an address on "Life Insurance and Social Welfare." Among the speakers at the banquet at the Windsor Hotel, Thursday, evening, will be Honorable W. T. White, Sir Wilfrid Laurier, Honorable G. T. Graham-Mr. G. A. Somerville, vice-president of the Life Officers Association, and Honorable S. P. Stearns.

Insurance Literature and Advertising.

Discussion of various committees' reports will open proceedings on Friday, August 23rd. "Insurance Literature and Advertising" will form the subject of a five minute discussion in charge of Mr. E. R. Machum, St. John, N.B.

The following points in this connection will be considered:—

(a) To what extent should circulars be used in canvassing? (b) Newspaper advertising. (c) How can local associations best interest the press in insurance information?

Mr. E. W. Owen, Calgary, will be in charge of a five minute discussion on "How Best to Increase Our Business by Adopting New Forms," divided into (a) Partnership or corporation insurance. (b) Income insurance.

Prize Essays and Cups.

The election of officers, selection of next place of meeting and award of various cups will conclude the business sessions. The entertainment committee of the Montreal Life Underwriters' Association is providing a long social programme.

There are three prize essay contests, and at least three essays must be submitted in each before a prize can be awarded. The contests and subjects are as follows:—Allen Purse. Subject:—"A Practical Plan of Co-operative Pub-Cup. Subject:—"A Practical Plan of Co-operative Publicity of Life Insurance." Stuart Cup. Subject:—"The Service Rendered by the Life Underwriters' Association to the Public and to its Members."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Niagara Navigation Company.—A payment of \$10 a share on the new stock of the Niagara Navigation Company was due this week.

Sovereign Bank.—The annual general meeting of the shareholders of the Sovereign Bank will be held at Toronto on July 9th. The bank statement for May shows that Sovereign's total assets are \$4,660,654, an increase of about \$45,000 since January, and liabilities \$3,825,791, a decrease of about \$152,000. The meeting on July 9th will be for the election of officers and "the transaction of such other business as may come before the meeting."

Nova Scotia Steel and Coal Company.—The June output of the Nova Scotia Steel and Coal Company was the largest for the year for coal, pig iron and steel ingots. The amount of coal was 71,900 tons, that of pig iron 7,074 tons, and that of steel ingots 7,450 tons.

The new hydraulic fluid compression plant at Sydney Mines was started on July 1st, and proved efficient. By it four fluid ingots were simultaneously produced by the application of 1,250 tons pressure. The plant worked satisfactorily.

Black Lake Consolidated Asbestos Company.—The National Trust Company, Limited, trustees for bondholders of the Black Lake Consolidated Asbestos Company, Limited, announces that sealed tenders will be received up to August 10th next for the purchase of the company's properties. These consist of the Union Mine, containing about 104 acres; the Southwark mine, various undeveloped lands, and 7,935 shares of the capital stock and \$188,000 first mortgage bonds of the Imperial Asbestos Company, Limited.

Laurentide Paper Company.—The Laurentide Paper Company will carry out a hydraulic power development very shortly, which will give a total of 50,000 horse-power. This will give largely increased earnings, it is hoped, and the expectations in this direction are largely responsible for the recent strength of the stock. It is claimed that the development will be one of the least costly and most effective developments in the province, when the amount of power obtainable is taken into consideration.

Union Bank of Canada.—Colonel John Carson, of Montreal, was elected to the vacancy on the board of the Union Bank of Canada at a meeting of the directors in Quebec. He takes the place of the late E. J. Hale.

Honorable John Sharples, who has been president for many years, was appointed honorary president, and Mr. John Galt, of Winnipeg, succeeds to the presidency.

Mr. William Price, Quebec, and Mr. R. T. Riley, Winnipeg, are vice-presidents.

International Milling Company.—The report of the International Milling Company (of Minnesota) for the year ended February 29th, 1912, shows net profits of \$194,461. Bond interest amounted to \$35,556. Cash on hand, as shown by the balance sheet, was \$569,938.

At Moose Jaw the company is rebuilding a concrete mill, and has recently acquired the Calgary Milling Company, with elevators, and a valuable site at Port Mann, to be used in connection with the Pacific export trade.

Illinois Traction Company.—Illinois Traction earnings and expenses for May and for five months to date are:—

	May, 1912.	May, 1911.	Increase.
Gross earnings	\$577,021	\$535,213	\$41,807
Total expenses and taxes..	374,194	343,606	30,589
Net profits	\$202,826	\$191,606	\$11,220
	1912.	1911.	
	5 months.	5 months.	Increase.
Gross	\$2,930,888	\$2,714,140	\$216,749
Total expenses	1,790,303	1,691,735	104,568
	\$1,134,584	\$1,022,405	\$112,179

Canadian Consolidated Rubber Company.—Mr. D. Lorne McGibbon, president of the Canadian Consolidated Rubber Company, has announced that the company have decided to enlarge the scope of the business by erecting an additional factory for the exclusive manufacture of automobile tires. The president stated that the present plant turned out a certain quantity of tires, but business was so rapidly

increasing that a daily output of five hundred will be provided for when the projected factory is completed. The production will be increased from time to time. Mr. McGibbon said that the new plant would involve an expenditure of a million dollars. The exact location has not yet been decided upon, but the company will decide this matter in the near future.

Twin City Railway Company.—The comparative weekly statement of the passenger earnings of the Twin City Railway interests, shows increase over the same periods in 1911 as follows.—

	Increase.	Decrease.	
First week	\$ 155,163.30	\$ 105.36	
Second week	160,760.86	5,689.58	
Third week	156,404.48		\$5,267.62
Month to date	472,390.64	527.32	
Year to date	3,667,508.42	135,489.67	

Cool weather prevailed, which accounts for small increase in earnings last month up to date.

Imperial Steel and Wire Company.—At the annual meeting of the Imperial Steel and Wire Company, the old board of directors was re-elected.

The members are: President, Major J. A. Currie, M.P., Toronto; vice-presidents, S. H. Lindsay and J. T. Duguid; secretary-treasurer, Dr. McKay, and directors, W. H. Whipp, George Royal and C. L. Currie, all of Collingwood.

A stock dividend of twenty per cent, was declared on the preferred stock.

The directors reported a considerable increase in the company's business during the past year and expressed themselves as optimistic as to the future.

Crown Reserve Mining Company.—The Crown Reserve Mining Company's general report for five months from January 1st, 1912, to May 31st, 1912, is as follows:

Gross production, 1,143,142 ounces; value.....	\$699,847.20
Less all expenses and depreciation	140,407.61
	\$559,439.59
Royalty for five months.....	\$ 64,346.25
Dividends for five months.....	442,203.50
Net surplus for five months ending May 31, 1912	52,889.84
Surplus December 31, 1911.....	764,851.76
Surplus as above	52,889.84
Total surplus, May 31, 1912.....	817,741.60

Tooke Brothers, Limited.—The annual general meeting of the shareholders of Tooke Brothers, Limited, was held recently, when satisfactory reports for the year's operations were presented, the profits for the year being \$106,064.94, from which have been written off for depreciation and reserve, \$11,728.36, and after paying dividends on the preferred stock, the sum of \$45,746.18 was carried forward to the credit of profit and loss account. Last year's profits were \$105,762.31, and those of the previous year \$109,406.10.

The president in his remarks, stated that the outlook for the coming year was good, orders on hand being largely in excess of those of a year ago.

The old board of directors was re-elected as follows: Messrs. B. Tooke, W. A. Tooke, A. J. Brown, W. F. Heney, G. P. Grant, A. B. Edgar, E. Foster and Dr. F. T. Tooke.

At the subsequent meeting of the new directors the following officers were elected: President, Mr. B. Tooke; vice-president, Mr. W. A. Tooke; managing director, Mr. E. Foster; secretary-treasurer, Mr. W. S. Barker.

Crow's Nest Pass Coal Company.—The net loss from all sources of the operations of the Crow's Nest Pass Coal Company for the year 1911 was \$200,654.

The coal mined during the time the mines were in operation—and there was a strike during the greater part of the year—amounted to 359,456 tons, as compared with 1,209,762 tons the previous year. The coke produced during the same period was 60,659 tons, which compares with 194,498 tons in 1910.

The amount spent on improvements during the year was \$22,122. Development work was carried on during the strike, and the amount charged to this account during the year was \$11,573.

The net loss from the operations of the Morrissey, Fernie and Michel Railway Company for the year amounted

to \$18,299. The company's outstanding bonds have been reduced from \$37,500 to \$27,500.

The Crow's Nest Pass Electric Light and Power Company paid to the parent company a dividend of \$5,998.

Canada Bread Company, Limited.—The Toronto Stock Exchange have listed the following securities of the Canada Bread Company:—Bonds, \$1,250,000; common, \$2,500,000.

The Crown, says a London cable, has approved the supplemental charter of the Hudson Bay Company, the details of which are now disclosed. If the shareholders assent the ordinary £10 shares of the company will be divided into ten shares of £1 each, the capital of the company to be increased by the creation of 200,000 new preference shares of £5 each.

The charter also alters the basis of provision for the repayment of the capital of the company. Instead of the old provision requiring the proceeds of the sale of the last million and a half acres of the company's land to be applied to repayment, the company now offers to set aside not less than \$2 for every acre possessed, say \$10,000,000.

The company further secures power to issue debentures up to £2,000,000 sterling though it is not intended to use this power at present.

The new preference shares will probably be wholly offered to the present shareholders. The total remuneration to the board of directors is to be increased from £3,500 to £5,500, in view of the onerous character of the work and the increase in the number of directors. The special meeting of the shareholders is to be held July 12th.

Ames-Holden-McCready, Limited.—Net profits of Ames-Holden-McCready, Limited, were \$281,348 for the first year's operation of the amalgamated companies. After deducting the bond interest and preferred stock dividend, amounting to \$240,000, there remained \$41,348 to be carried to the credit of profit and loss. This was obtained notwithstanding the fact that the company's factories in Montreal were closed down for about two months undergoing reorganization. \$122,963 was written off for depreciation and expenses incurred in the reorganization, leaving a total balance to the credit of profit and loss of \$160,568.

Mr. D. Lorne McGibbon, the president, announced that much time had been devoted to reorganization of plants, with a view to effecting economies in operation, production and distribution, and at the same time improving the quality and style of the goods, thereby obtaining the full benefit of the amalgamation. This necessitated closing factories for nearly two months, and in consequence it was necessary to cancel orders for over \$500,000 of goods.

The value of real-estate holdings increased from \$143,740 a year and a half ago to \$326,433, but not added to assets.

The sales of boots, shoes, rubber and felt goods for the month of May of this year amount to the sum of \$337,937, showing an increase of \$144,949 over the corresponding month of last year. The factories are now turning out 8,000 pairs of shoes per day, and the orders on hand are largely in excess of previous years.

Last year's directors were re-elected, with Mr. W. S. Louison added to the board. At the subsequent meeting of the directors the old officers were re-elected, with the exception that Mr. H. B. Ames, M.P., takes the place of Mr. A. Congdon, as a vice-president.

Quebec Central Railway.—Statutory authority having been granted to the provisional agreement recently entered into between the Quebec Central and the Canadian Pacific Railway Companies, special meetings of the former company were held recently, when the sanction of the various security holders was obtained to the proposed lease. The terms of the agreement are that the Canadian Pacific shall lease the Quebec Central Railway and all its assets for a term of 999 years for a rental sufficient to provide for interest and dividends as follows:—

1. Payment of interest on the four per cent. debenture stock (preserving all existing rights).
2. Payment of 3½ per cent. per annum on the three per cent. debenture stock (which is to be converted into a 50-year debenture stock at the new interest rate). Payment of principal guaranteed by lessee.
3. Payment of 5 per cent. per annum half-yearly on the seven per cent. income bonds (these bonds being converted into new 50-year bonds at the new rate of interest), and a 10 per cent. cash bonus being given as compensation to the converting bondholders for reduction of interest. Payment of principal guaranteed by lessee.
4. Payment half-yearly of a dividend of 4 per cent. per annum on the shares for the first four years of the lease and a dividend of 5 per cent. per annum thereafter.

All these payments of interest and dividends will, in effect, be the direct obligation of the Canadian Pacific Railway. The company has, moreover, agreed that the guaranteed dividend on the shares at the rate of 4 per cent. per annum shall accrue from June 30 next instead of from December 31,

1912, and six months' interest at that rate will be paid on January 15, 1913, and thereafter dividends at that rate will be paid on January 15 and July 15 up to and including July 15, 1916. On January 15, 1917, and for the remainder of the term of the lease, the dividend will be at the rate of 5 per cent. per annum. The interest on the four per cent. debenture stock will be paid on the same dates as heretofore, namely, February 1 and August 1. The status of the other securities affected, namely, the three per cent. debenture stock and the seven per cent. income bonds, will remain unaltered until December 31 next. As soon as practicable after that date the bonds, stock, and share certificates will be called in and new certificates issued therefor. The cash bonus of 10 per cent. to be received by the seven per cent. income bondholders will be paid at the time of conversion. As regards the new three-and-a-half per cent. 50-year debenture stock and five per cent. 50-year bonds, the interest will accrue as from January 1, 1913, and the first payment in each case will fall due on July 15, 1913, and thereafter interest payments will be on January 15 and July 15 in each year up to the date of maturity.

Ontario Power Company.—The Ontario Power Company of Niagara Falls has issued its pamphlet report for the year ended December 31st, 1911. The combined income account of the Ontario Power Company of Niagara Falls and the Ontario Transmission Company, Limited, (inter-company payments eliminated) compares as follows:—

	1911.	1910.	Increase.
Gross earnings	\$868,052	\$721,901	\$146,151
Operating expenses	148,394	136,100	12,294
Net earnings	719,657	585,801	133,856
Other income	14,620	722,161	7,533
Total income	734,286	607,962	126,324
Charges	610,226	520,449	89,777
Surplus	*124,060	87,513	36,547

*Equal to 1.50 on \$8,215,000 stock of Ontario Power Company of Niagara Falls outstanding.

†Decrease.

The consolidated balance sheet of the Ontario Power Company of Niagara Falls and the Ontario Transmission Company, Limited, as of December 31st, 1911, follows:—

Assets.	
Property and plant	\$22,213,957
Stocks and bonds of other companies....	100,614
Prepaid insurance	15,693
Cash	123,664
Accounts receivable	270,497
Bills receivable	6,880
Cash in sinking fund	870
Contingent assets	16,938
Bills receivable—discounted (see contra) .	74,747
Cash in hands	500
Total	\$22,824,300
Liabilities.	
Capital stock Ontario Power Company, Niagara Falls	\$8,215,000
Stock Ontario Transmission Company, Limited	1,000,000
Funded debt	13,075,000
Accounts payable	9,022
Bills payable	30,841
Accrued interest, taxes and rental, not due	186,923
Discounted bills receivable (see contra) .	74,747
Reserves	37,335
Miscellaneous	500
Profit and loss surplus	194,930
Total	\$22,824,300

President J. J. Albright says:—

The growth of the business during the past year shows a very marked increase over the previous year, notwithstanding the fact that in most lines, business has decreased rather than increased. In every year since the company began business there has been an increase over the previous year, as shown by the following figures:—

Kilowatt hours generated:	K. W. H.
1906 (six months)	9,133,200
1907	60,837,700
1908	139,816,000
1909	226,744,100
1910	310,730,900
1911	382,180,200

The transmission lines over which the power generated have a total length of about 1,226 miles. The most distant point where the power is used is Oswego, which is 106 miles from the power house following the route of the transmission lines.

PIG IRON AND STEEL

Classification of the Production—Valuable Figures Showing Imports and Exports

An increase of 5.58 per cent. is shown in the production of pig iron in Canada in 1910 over the production of 1909, as compared with an increase of 20 per cent. in 1909 over that of 1908, according to the report of the Department of Mines, Ottawa.

At the close of the year Canada had seventeen completed furnaces and two under construction, grouped in ten separate plants and operated by eight separate companies or corporations.

The total production in 1910 was 800,797 short tons (714,998 long tons), valued at approximately \$11,245,622; as compared with 757,162 short tons (676,038 long tons), valued at \$9,581,864, in 1909, and 630,835 short tons (563,246 long tons), valued at \$8,111,194, in 1908. The Londonderry furnace was not in operation during either of the past two years. These figures do not include the output from electric furnaces making ferro-products which are situated at Welland and Sault Ste. Marie, Ont., and Buckingham, Que. Ferro-silicon was made at Welland during 1910, but the Sault Ste. Marie and Buckingham plants were not in operation during the year.

Of the total output of pig iron in 1910, 17,164 tons, valued at \$333,956, or \$19.78 per short ton, were made with charcoal as fuel, and 783,633 tons, valued at \$10,911,674, or \$13.92 per ton, with coke. The amount of charcoal iron made in 1909 was 17,003 tons, and in 1908, 6,709 tons; while the quantity made with coke in 1909 was 740,159 tons and in 1908, 624,126 tons.

Classification of the Production.

The classification of the production in 1910 according to the purpose for which it was intended was as follows: Bessemer 219,492 tons, basic 425,400 tons, foundry (including miscellaneous) 138,741 tons.

The classification of the production in 1909 was: Bessemer 221,931 tons, basic 400,921 tons, foundry (including miscellaneous) 116,307 tons.

The American Iron and Steel Association reported the production of Bessemer pig iron in 1908 as 126,348 short tons, as against 173,499 tons in 1907; and the production of basic pig iron in 1908 as 375,659 short tons, as against 382,208 tons in 1907.

In Nova Scotia a large proportion of the pig iron is directly converted to steel, and as a very small portion of the metal is sold as pig iron it is somewhat difficult to place a satisfactory valuation upon the output. For statistical purposes a value of \$12 per short ton has been placed upon this production in 1910. The Quebec production is entirely charcoal iron, which has for many years commanded a high price.

Prices of Pig Iron.

With respect to prices of pig iron in Canada during 1910, a firm of iron merchants in Montreal gives the following information. It is practically impossible to give information respecting iron prices in detailed form since much depends on the quantity purchased, brand of iron, prevailing freight rate, etc.; nevertheless it may be said that good average brands of Scotch iron sold in Montreal during the first three months of 1910 at about \$20 per gross ton. Later in the year, particularly after the opening of navigation, prices eased up somewhat and an average price would be \$19.50 per gross ton. On the other hand good foundry iron of English manufacture could have been purchased during the early part of 1910 at \$18 per gross ton, then shading down to \$17.25 per gross ton during the summer months. There was little competition from Canadian made iron in the Montreal district during 1910, the Sydney furnaces not marketing anything there during that period.

In Toronto the situation was somewhat different. It costs approximately \$2 per ton more to lay down Scotch and English iron at that point than it does in Montreal, and during the early part of the year such advance in price was obtained. Later in the year, however, the American situation seriously affected prices in Ontario, and United States pig iron competed very keenly in the Toronto-Hamilton district, practically cutting out Scotch and English iron and compelling the local furnaces to reduce their prices to an equivalent of \$18.50 and down to \$18, f.o.b. cars Toronto, for good average grades of foundry iron.

In Pittsburgh, Bessemer iron was quoted at \$19 per gross ton in January, 1910, falling to \$17.50 in March, \$17 in May, \$15.75 in June, and \$15 from the latter part of August to the close of the year. Basic iron ruled from \$1.75 to \$2 per ton less.

How Pig Iron is Made.

Previous to 1896 pig iron was made entirely from Canadian ore. Since that date, however, increasing quantities of imported ore have been used as well as imported fuels and fluxes, and in 1910 about 89 per cent. of the ore charged, 49 per cent. of the coke, and 18 per cent. of the limestone, were imported. This condition is due largely to questions of cost and transportation affecting each furnace. The Newfoundland iron ores can be cheaply and conveniently laid down in Sydney, N.S.; in fact the iron industry here has been built up on the basis of these ores and of the local coal supplies. In Ontario, also, large quantities of imported ores are used. In 1910 the im-

ported ores used in Ontario amounted to 681,918 tons and the Canadian ores 143,283 tons, the imported ores being derived from Michigan and Minnesota deposits; thus during 1910 about 83 per cent. of the ore used in the province was imported, as compared with 71 per cent. in 1909, and about 67 per cent. in 1908. The fuel used in Ontario was also almost altogether imported as well as a portion of the limestone flux.

According to returns made to the Department of Trade and Commerce in connection with claims for bounty, 84,759 tons only of the total pig iron production in Canada in 1910 were credited to Canadian ore and 659,891 tons to imported ore and bounty paid upon it as such. In 1909 bounty was paid upon 126,298 tons of pig iron from Canadian ore, and 607,718 tons from imported ore. No bounty is paid on the iron credited to the mill cinder, scale, etc., charged, so that the above figures do not represent the total output of the furnaces.

Imports and Exports of Pig Iron.

There has been comparatively little pig iron exported from Canada. During 1910, the exports were 9,763 tons, valued at \$296,310, or an average value per ton of \$30.35. The exports during 1909 were 5,063 tons, valued at \$186,778, an average of \$36.89; while during 1908 the exports were 290 tons, valued at \$10,614, an average of \$42.45 per ton. These exports probably include ferro-silicon as well as ordinary pig iron.

Considerable quantities of pig iron are annually imported into Canada. During 1910, the imports of ordinary pig iron were 227,753 tons, valued at \$3,122,695, an average of \$13.71 per ton, and of charcoal pig iron 16,106 tons, valued at \$242,152, an average of \$15.03 per ton; or a total importation of 243,859 tons, valued at \$3,364,847. During 1909 the imports were: ordinary pig iron, 147,925 tons, valued at \$1,798,172, and charcoal pig iron, 413 tons valued at \$5,727; and 1908, the imports were: ordinary pig iron 57,343 tons, valued at \$771,715, and charcoal iron 1,022 tons, valued at \$18,818. The duty, or general tariff, on pig iron is \$2.50 per ton.

GRAND TRUNK TERMINAL WAREHOUSE COMPANY

The Grand Trunk Terminal Warehouse Company has been organized at Montreal and will establish a chain of terminal warehouses from that city to the western coast in connection with the Grand Trunk and Grand Trunk Pacific Railway systems. Contracts have been made between the new company and the Grand Trunk concerns by which the company undertakes to establish and operate warehouses throughout Canada, the railroad, on the other hand, agreeing to give all its warehousing business at the various points for a period of 30 years. This arrangement is expected to help solve the car shortage problem.

The first chain of warehouses will include Montreal, Toronto, Fort William, Winnipeg, Calgary, Edmonton, Vancouver and Prince Rupert.

Mr. J. M. Greenshields, K.C., is prominent in the new company, the capital of which is \$16,500,000. Three well-known officials of the railroads will be among the directors.

LOSSES CAUSED BY ENGINE SPARKS

A heavy loss by fire each year is caused by sparks from locomotives. The United States district forester for Montana and Idaho estimated a loss to government and adjoining timber of 6,000,000,000 feet, or a total of \$21,500,000, caused by 1,679 fires, 56 per cent. of which started on the railroad rights-of-way and in spite of good co-operation by the railroads.

The great forest fires in Minnesota during 1910, which caused such loss of life and suffering in the towns of Spooner and Beaudette, with a million dollars worth of valuable property and timber, were due to four fires, three of which were started by locomotive sparks.

Four fire insurance companies which make a specialty of insuring flour mills and elevators paid more than \$160,000 in 1910 for losses due to this cause. The Cotton Insurance Association of Georgia has reported that 90 per cent. of cotton fires in transportation are due to locomotive sparks. A grain dealers' mutual fire insurance company reports each year from 17 to 28 per cent. of its losses due to the same cause.

The fire records of manufacturing risks which have been published in the quarterlies of the National Fire Protection Association show a very material percentage of fires from locomotive sparks, and yet, taken as a whole, we would not consider manufacturing risks as particularly susceptible to the spark hazard. The record of fires in 15 classes of manufacturing risks showed about 3 per cent. to be due to this cause.

A by-law to bonus the Eastern Car Company, by either the purchase of a site for their plant within the limits of the town of New Glasgow, or the alternative of extending a water service to the plant if land requirements necessitate the works being erected in the town of Trenton, together with free water for twenty years, was carried at New Glasgow.

MUNICIPAL ISSUES FOR LONDON

Patronage of Overseas Market Has Made Less Active the Domestic Market—Nine Flotations This Year

Aside from large issues, the municipal bond market is dull. Montreal cannot make up its mind as to the disposition of a loan approximating \$13,000,000. Toronto next week will endeavor to negotiate a loan of \$6,000,000 in London. Ottawa is advertising an issue of nearly \$1,000,000. These events recall what a large number of Canadian municipal loans are being made overseas as compared with similar issues a few years ago. This year, for instance, no less than nine of our municipalities have raised funds abroad. They are as follows:—

City of.	Amount.
Victoria	£ 308,623
Calgary	400,000
Regina	117,400
Vancouver	991,900
Saskatoon	229,726
Winnipeg	960,000
New Westminster	101,300
Edmonton	595,000
North Vancouver	126,100
Total	£3,830,049

Only one Canadian municipality, the city of Quebec, issued a loan in London in 1905, not one in 1906, and only three in 1907. Since January, 1905, to the end of June, 1912, Canadian municipalities have borrowed £19,174,161, or approximately \$95,870,805. The attention which growing towns and cities are paying to the London market has naturally had a tendency to make less active the domestic municipal bond market.

Ottawa's Bond Sale.

As previously noted in The Monetary Times the city of Ottawa has for sale 4 per cent. debentures totalling \$991,929. Tenders are to be opened on August 29th. The bonds will be payable at Ottawa unless otherwise specified by the successful tenderer, who is allowed to exercise his option in this regard before October 1st. The bonds are deliverable on November 1st, and all coupons previous to those payable January 1st, 1913, will be cut off before delivery, the purchaser to pay the accrued interest from July 1st, 1912, in addition to his tender price.

These bonds will not cover the entire outstanding indebtedness of the city, as the local improvements are always a year behind, those sold this year being for the latter part of 1910, and the first half of 1911. Owing to the intricacy of the work of dividing the cost of local improvements, it has been the custom to hold the bonds over until the succeeding year.

Ottawa's Debenture Debt.

The gross debenture debt of the city on December 31st, 1911, was \$9,156,313.21. Invested in the general sinking funds of 1909, and general sinking fund No. 2, and the local improvement sinking fund, the city has a total of \$2,603,048.67, so that the net debenture debt amounted then to \$6,553,264.54.

The amount of \$991,929.99 represents the expenditure in civic works and local improvements, such as the new aqueduct, extensions to mains, Bank Street bridge, Dow's Lake drainage system, electric light plant extensions, etc. Last year bonds to the amount of \$940,246.25 were sold, while \$99,060.81 was paid by the city in redemption of debentures. With the addition of this year's debentures the gross debenture debt of the city will stand at \$10,048,243.20, or about \$100 per head of population. The price secured by the city last year for its bonds was about 98, which price it is hoped to equal this year.

List of Bonds for Sale.

The following is a list of the bonds, term of years and the amounts:—Waterworks, 30 years, \$60,000; Bank Street bridge, 30 years, \$50,000; waterworks (aqueduct, etc.), 30 years, \$195,000; city's share local improvements, 20 years, \$65,563.55; local improvements, 20 years, \$110,966.44; electric plant, 30 years, \$70,000; waterworks, 30 years, \$74,000; hospital refrigerators, 20 years, \$2,400; public lavatories, 20 years, \$20,000; city hall, 30 years, \$3,500; Dow's Lake main extension, 30 years, \$90,000; machinery hall, Lansdowne Park, 30 years, \$60,000; fire stations, 20 years, \$30,000; Lansdowne Park debts, 20 years, \$5,000; tuberculosis hospital site, 30 years, \$12,500; Sussex Street driveway, 40 years, \$12,000; grand stand, Lansdowne Park, 30 years, \$11,000; smallpox hospital, 30 years, \$45,000; Preston Street bridge, 20 years, \$8,500; waterworks, 30 years, \$66,500.

The following is a record of the city's previous 4 per cent. issues:—

September.	Amount.	Sold at.
1909	\$419,420.60	Par.
1910	630,507.11	97.13
1911	589,000.00	97.57

An attractive list of municipal, school and corporation bond offerings has been published by Messrs. St. Cyr, Gonthier and Frigon, Montreal. Among these is a block of \$160,000 city of Sorel 5 per cent. debentures in denominations of \$100, \$500 and \$1,000. The assessed value of taxable real estate, 1911, of the city was \$2,249,275, and of the non-taxable property, \$1,245,700. The general debenture debt, (including present issue), is \$495,000. The municipality's assets total \$343,480, and the municipality's revenue \$59,548. The population is 8,727, and the rate of taxation $\frac{1}{2}$ per cent.

These debentures are part of an issue of \$210,000 made to pay \$160,000 of debentures due July 1st, 1912, the balance to be applied to local improvements. Sorel is an industrious city situated on the south shore of the St. Lawrence River, forty-five miles below Montreal, at the mouth of the Richelieu River, and is at the head of the only inland water navigation between Montreal and New York. The Richelieu and Ontario Navigation Company, the largest Canadian navigation company, the Sincennes McNaughton Company, who have control of all the towing of the local boats and ocean liners in the harbor of Montreal, and the Federal Marine & Fisheries Department have all their headquarters, repairs and construction yards at Sorel. The average monthly wages paid by the above-mentioned concerns, and several smaller ones, amount to \$76,000. The price of the bonds is 104.46, and they yield 4.75 per cent.

Notes of Municipal Bidding.

Six bond firms bid for the \$6,000 $5\frac{1}{2}$ per cent. 20-year road construction debentures. As previously noted, the award was made to Messrs. Nay & James, of Regina.

Four Toronto bond houses bid for the Virden, Man., \$8,000 5 per cent. 20-year municipal buildings debentures, which were awarded, as previously noted, to the Dominion Securities Corporation.

Of the \$30,000 5 per cent. 30 years water debentures of Stellarton, N.S., \$7,000 have been sold to J. B. Kenny, and \$5,000 to W. McLean at par. This leaves \$18,000 still for sale.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended June 28th:—LaRose, 333,774; Cobalt Lake, 128,100; Crown Reserve, 46,369; Lost and Found, 30,000; McKinley-Darragh, 51,036; total, 589,279 pounds or 294 tons. The total shipments since January 1st are now 21,481,140 pounds, or 10,740 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

CANADIAN ACTUARIES IN AMSTERDAM

Among the noted actuaries who will attend the seventh international congress of actuaries in Amsterdam, Holland, from September 9th to 14th, will be Colonel W. C. Macdonald, of the Confederation Life Association of Canada; Colonel Macdonald is president of the Actuarial Society of America. Mr. T. B. Macaulay, managing director of the Sun Life of Canada, will also probably attend the convention.

Mr. Robertson G. Hunter, associate actuary of the Germania, is preparing a paper on the subject "An American Method of Loading Premiums." Mr. Arthur Hunter, actuary of the New York Life, will read a paper on "Improvement in Mortality in Tropical Countries." Mr. Frederick L. Hoffman, statistician of the Prudential, will speak on "American Public Pension Systems and Civil Service Retirement Plans." Mr. Miles M. Dawson, consulting actuary of New York, will discuss "Governmental Methods of Providing Old Age Pensions."

In all there are about twelve well-known actuaries from Canada and the United States who will be present at the sessions, either to take part or act as guests. Among the number are also Messrs. Arthur Hunter, actuary of the New York Life; Archibald A. Welch, vice-president and actuary of the Phoenix Mutual Life of Hartford; George B. Woodward, third vice-president of the Metropolitan Life; James D. Craig, assistant actuary of the Metropolitan Life; Herbert N. Sheppard, assistant actuary of the Home Life of New York; L. H. Howe, actuary of the John Hancock Mutual Life, and Dr. Lee K. Frankel, manager of the industrial department of the Metropolitan Life.

The International Geological Congress on the joint invitation of the Canadian government, the provincial government, the department of mines and the Canadian mining institute, will hold its twelfth meeting in Canada during the summer of 1913. The congress will be in session for eight days at Toronto and an extensive series of excursions are being arranged to illustrate the typical geology and mineral resources of Canada.

JUNE MUNICIPAL BOND SALES

Eight Provinces Were in the Market—Majority of Sales Were in Small Blocks

The municipal bond sales for June, as compiled by The Monetary Times, amounted to \$1,690,344, compared with \$1,928,748 for May and \$3,983,670 for the corresponding period last year. Eight provinces were in the market.

The following are the particulars by provinces:—

Quebec	\$790,000
Saskatchewan	364,500
Ontario	165,344
British Columbia	110,000
Nova Scotia	100,000
Alberta	89,500
Manitoba	38,000
New Brunswick	33,000
	\$1,690,344

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$ 881,838	\$ 420,337	\$2,133,531
February	1,272,977	1,037,287	2,596,378
March	1,169,730	6,271,925	1,726,716
April	6,805,078	3,910,288	927,160
May	5,964,896	3,946,047	1,928,748
June	2,187,588	3,983,670	1,690,344
July	1,536,424	1,594,566	
August	1,312,953	1,493,507	
September	2,841,486	1,748,778	
October	2,211,461	1,730,975	
November	2,292,781	2,915,765	
December	566,113	1,243,593	
Total	\$20,043,325	\$30,295,838	\$11,002,877

The following are the details:—

DEATH OF MR. H. P. DWIGHT.

The death of Mr. H. P. Dwight, president of the Great North Western Company of Canada, closes a career of great interest and value. In 1849, a year or two after the introduction into Canada of Morse's electric telegraph, Mr. Dwight was stationed at Toronto in charge of it, and he was soon made Western Superintendent for Ontario and several of the United States for the Montreal Telegraph Company. It was his initiative and his persistent energy mainly which caused the growth of the remarkable network which before 1870 over-spread the two provinces of Ontario and Quebec. He was a believer in the future greatness of this country, and responded to almost every overture made for the erection of the wires.

Harvey Prentice Dwight served his day and generation well. One of the most upright of men, he liked to be served by upright people, who must, however, have capacity: no drones were allowed in his hive. For many years of his life his health was delicate, and he imposed upon himself most rigid rules of health and diet. But he lived to the age of 84 and lost surprisingly little time away from his work. In exercise he was most regular, and spent a part of each spring and autumn shooting or fishing among the Muskoka woods and lakes.

As a citizen, he took his full share in his duties. Singularly well-informed upon affairs everywhere, he had a keen eye for municipal delinquencies. And every now and then his old telegraphic signature, "D.W.," in an evening paper attested that he was keeping track of the blockheads or the smart-alecks in city hall circles. In the way of his business, Mr. Dwight was thorough. And although he was not given to boasting, he had a right to claim a high place for Canada in efficient and low-priced telegraphy, and personally held a high place in its arrangement. There will be few corners of the Dominion in which Mr. Dwight has not left a friend. His own employees, former and latter, would form a host, and the strong features of his character, his fairness, constancy, decision, kept friends as well as made them.

Mr. Edwin Gissing, foreign accident superintendent of the Norwich Union Fire Insurance Society, Limited, has been appointed accident manager for Canada with headquarters at Toronto. Mr. Gissing has travelled extensively for the company. In 1903 he visited South Africa in the company's interest and since then has travelled in Australasia and the United States. In 1907 he was appointed foreign superintendent of the Norwich and London which is incorporated with the Norwich Union. He visited Canada last year to report upon the desirability of extending the company's accident business in this country.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials.

Macklin Village, Sask.—Until July 22nd for \$5,500 6 per cent. debentures 15 years. Secretary-treasurer, Macklin.

Nelson, B.C.—By-laws to issue debentures for a new fire hall and for extensions to sewers and waterworks were passed.

Halifax, N.S.—Until July 15 for \$352,700 4 per cent. payable July 1st, 1945, to Mr. W. L. Brown, city treasurer.

Biggar, Sask.—Until July 13th for \$16,000 5½ per cent. 40-year sinking fund debentures. H. F. Turner, secretary-treasurer.

Burlington, Ont.—Until July 11th for \$33,000 30-year 4½ per cent. school debentures. O. T. Springer, municipal clerk and treasurer.

Galt, Ont.—By-laws to raise \$45,000 for completion of the hydro-electric system and \$135,000 for civic improvements were carried.

McTaggart S.D. No. 1143, Sask.—Until August 1st for \$4,000 20-year debentures. R. J. Jackson, secretary-treasurer, McTaggart.

Mitchell, Ont.—The property-holders of Mitchell will vote on a by-law on July 17th for the borrowing of \$10,000 for making a park.

Edson, Alta.—Edson debenture by-laws for electric light, street grading, town hall, and cement and plank walks, totalling, \$125,000, were passed.

Lloydminster, Sask.—Tenders are invited for \$5,000 debentures. H. C. Lisle, secretary-treasurer. (Official advertisement appears on another page).

Moose Jaw, Sask.—Until July 10th for \$65,000 5 per cent. 30-year school debentures. C. Kempton, secretary-treasurer. (Official advertisement appears on another page).

Strassburg Rural Municipality No. 220, Sask.—Until July 20th for \$7,500 6 per cent. debentures. S. L. A. Smyth, secretary-treasurer.

Duck Lake, Sask.—Until July 9th, for \$10,000 5½ per cent. 20-year debentures. F. Hopwood, secretary-treasurer. (Official advertisements appear on another page).

Pas, Man.—Tenders are called for \$200,000 20-year municipal improvement debentures. H. Finger, mayor. (Official advertisement appears on another page).

Ottawa, Ont.—Until August 29th for \$12,000 40-year, \$727,000 30-year, and \$292,429.99 20-year debentures; interest, 4 per cent. Charles Hopewell, mayor. (Official advertisement appears on another page.)

Saskatoon, Sask.—Saskatoon passed its \$500,000 by-law in accordance with the terms of which Stone & Webster, the prominent United States engineering firm, will construct the street railway and finance it for a year.

New Westminster, B.C.—The following by-laws were carried:—Street improvement by-law, \$250,000; waterworks extension by-law, \$75,000; municipal gas plant by-law, \$225,000; hospital by-law, \$100,000; parks by-law, \$25,000; storehouse, by-law, \$15,000; harbor by-law, \$500,000.

West Vancouver, B.C.—Until July 16th for \$75,000 50-year 5 per cent. road; \$25,000 5 per cent. 50-year school; and \$30,000 5 per cent. 20-year ferry debentures. G. H. Peake, C.M.C., 103 Mercantile Building, 318 Homer Street, Vancouver. (Official advertisement appears on another page.)

Saanich, B.C.—At a recent meeting of the Saanich council the by-law to raise the sum of \$33,500 for school purposes, (the government contributing \$50,000), was read a third time, the debentures to be for ten years, and paying four per cent. The vote by the ratepayers on the by-laws was fixed for July 11th.

Point Grey Municipality, B.C.—Until July 15th for \$349,908.50 4½ per cent. 50-year roads; \$501,259.80 4½ per cent. 50-year waterworks; \$50,125 4½ per cent. 50-year schools; \$164,890 4½ per cent. 50-year roads; \$257,933.33 4½ per cent. 50-year sewers; and \$41,366.66 4½ per cent. 25-year sidewalks debentures. H. Floyd, comptroller, Kerrisdale, B.C. (Official advertisement appears on another page).

North Vancouver, B.C.—The North Vancouver district council decided to place eleven money by-laws for amounts totalling \$322,823 before the ratepayers on July 13th. The by-laws are as follows:—Burrard Inlet Tunnel and Bridge Company aid by-law for \$150,000; sidewalk loan by-law, \$10,000; street loan, \$65,000; park loan, \$15,000; school loan, \$21,000; Dovercourt Road local improvement by-law, \$7,500; Peter's Road L. I., \$8,300; Carisbrook Road, \$5,940; Lynn Valley Road, \$32,243; Lynn Valley section number 3, \$7,840.

LIFE INSURANCE PAYMENTS

Twenty-one Million Dollars Paid in Canada Last Year
—Montreal Heads the List.

Life insurance organizations of the United States and Canada distributed \$592,640,000 in 1911, according to computations by The Insurance Press. The payments in the two countries to beneficiaries for death claims, matured endowments and other benefits under the policies of level-premium companies and the certificates of various life insurance organizations—assessment and the like—amounted to \$401,140,000. The estimated total of the amounts paid by regular companies in dividends to policyholders, for surrender values, to annuitants, and on claims in foreign countries was \$191,500,000.

Summation of life insurance payments of all kinds in 1911:	
Claims paid in the United States and Canada.....	\$401,140,000
Payments for dividends and for surrender values to annuitants and foreign policyholders (estimated)	191,500,000
Grand total	\$592,640,000

All Benefits Increased.

All benefits under policies—death claims, endowments, dividends—in the transactions of regular life insurance companies, increased in 1911. The amount of insurance written and revived, by the regular companies alone, was nearly \$3,000,000,000, or about \$400,000,000 more than in 1910.

Something of an index to the general business conditions of the country is the amount of life insurance that is surrendered or allowed to lapse. The disbursements in 1911 of the companies that report to the New York insurance department for lapsed, surrendered and purchased policies reached \$75,710,000, an increase of \$2,853,000 over 1910. This compares with a decrease of \$187,000 in 1910, an increase of \$3,059,000 in 1909 and an increase of \$14,543,000 in 1908. More persons found it necessary to let go of their life insurance policies in 1911 than in 1910, although financial pressure or the other causes that compel the surrender of life insurance were not so intense nor so generally operative in 1911 as in 1910.

Heavy Increase in Dividends.

Last year was remarkable for large distributions to policyholders in the form of dividends. The New York reports show that the sum of \$80,095,000 was distributed in dividends against \$72,875,000 in 1910, an increase of \$7,220,000. Millions of dollars of dividends were applied for the purchase of annuities and paid-up additions to insurance carried. In two years more than \$152,000,000 has been disbursed in dividends to policyholders by the life insurance companies whose annual statements are filed with the New York insurance department.

That the dividend payments to policyholders exceeded by several millions the amount of the disbursements for lapsed, surrendered and purchased policies is a notable and a wholesome feature of last year's operations of life insurance companies.

In addition to the more than \$80,000,000 paid in dividends in 1911, the large sum of \$84,897,000 was set aside to cover dividends declared or apportioned for payment in 1912.

On the ledgers of the companies the further sum of \$222,000,000 was credited to policyholders, on December 31, 1911, for dividends calculated or provisionally ascertained under deferred dividend policies.

The records of 1911 show a large increase in the amount paid in death claims but only a small increase of the total payments under endowment policies.

Policy Loans Show Smaller Volume.

Borrowing on life insurance occurred in smaller volume in 1911 than in 1910. On a larger amount of insurance in force the loans on policies increased only \$40,949,000, against an increase in 1910 of \$44,400,000. The use of insurance policies as collateral for loans negotiated with insurance companies was greatest in 1907, in which single year the policy loan account increased \$72,587,000. Loan liens at the close of 1911 amounted to \$482,345,000. This means that settlements under life insurance contracts have been anticipated in this vast sum; and to the extent that the insurance contracts call for payments upon the death of the insured, the loans secured by borrowers must be paid by widows and orphans. The moral is plain—Do not borrow on your life insurance policies if you can help it.

Of the \$482,345,000 of policy loans outstanding on December 31, 1911, \$275,620,000 was incurred in the six-year period 1907-1911, both inclusive; \$206,716,000 was incurred prior to 1906.

While the formation of new life insurance companies will take place whenever and wherever opportunity or demand for

such enterprises seems to exist, the reckless promotion of insurance companies is to be frowned upon. Indeed, the insurance departments of the different States have done their duty in warning the people against schemes that have no promise of advantage or profit in them except for the promoters. Twenty-five new life insurance companies began business in the United States in 1911 against 29 in 1910. In the two years, 1910-1911, Texas produced 8 new companies, Illinois 6, Oklahoma 4, California 3, Michigan 3 and Ohio 3. Arkansas, Colorado, Georgia, Indiana, Kansas, Minnesota, Pennsylvania, Washington and Wisconsin produced two each. Florida, Idaho, Kentucky, Missouri, Montana, Nebraska, North Dakota, Utah and Virginia produced one each.

Appreciation of life insurance for the protection of business interests showed a steady gain in 1911. Chief executives and managers of departments and corporations, on whose energy and experience successful transactions depend, took insurance against the contingencies of financial loss and interruptions of operations in the event of death.

Conservation of Life and Health.

Last year was a period of extraordinary progress in the social service which life insurance companies have now made a part of their work. The movement for the conservation of life and health is supported by insurance corporations. The medico-actuarial investigations and tabulations that have been going on for three or four years are nearing completion and surprising facts and valuable deductions may be announced in the near future—especially regarding the effects of climate and occupation upon longevity.

Fraternat insurance orders are passing through an epoch of stress and reconstruction and early disruption appears to be the fate of some of them.

Investments by Geographical Sections.

The geographical distribution of the investments of life insurance companies shows that the investments are heavily in excess of the amounts of the policy reserves in every section except New England and the Gulf and Mississippi Valley group of States. In New England the investments approximate 62 per cent. of the local reserves, while in the Gulf and Mississippi Valley the investments are 98 per cent. of the local reserve. The section most attractive for investments is the Northwestern group of States where the investments equal 204 per cent. of the local reserve. Nearly \$1,900,000,000 of life insurance funds are accounted for in tables showing the investments by groups of States.

Payments of \$100,000 or more on single lives were recorded in numerous instances.

The largest insurance payment during the year was in New Orleans. Frank T. Howard, a man of large wealth, carried life insurance policies amounting to \$720,288 at the time of his death. Although a very rich man, Mr. Howard was a believer in life insurance. He was prominent in the public affairs of New Orleans and was behind many movements for the welfare of the community. He gave to the city of New Orleans a valuable and extensive library, known as the Howard Library. He gave a building in a conspicuous part of the city to the Confederate veterans to be used as a museum.

Largest Insurances Last Year.

The list of large insurances matured in 1911 contains the names of prominent and influential men:—

Frank T. Howard, New Orleans, La.	\$720,288
Samuel C. Lawrence, Medford, Mass.	385,000
Edward Foerderer, Philadelphia, Pa.	350,000
W. G. Rodker, New York City	325,841
Paul Morton, New York City	301,814
Samuel Woolner, Peoria, Ill.	286,267
Gustav E. Kissel, Morristown, N.J.	275,000
George D. Webb, Worcester, Mass.	266,037
Walter B. Duffy, Rochester, N.Y.	255,322
Jacob Weidmann, Paterson, N.J.	220,157
John J. McCook, New York City	219,582
James M. Chittim, San Antonio, Texas	215,000
Julius E. French, New York City	215,000
Martin J. Breen, Chicago, Ill.	201,626
Joseph E. Burguières, New Orleans, La.	200,000
Millard F. Smith, Brooklyn, N.Y.	190,000
George S. McLaren, Seattle, Wash.	180,120
Michael Macheca, New Orleans, La.	164,362
William B. Worthen, Little Rock, Ark.	159,000
James F. Kaldenbaugh, New Philadelphia, Ohio....	155,323
William C. Allison, Rosemont, Pa.	152,500
Charles B. Korintze, Denver, Col.	145,076
Horatio V. Newcomb, Atlantic City, N.J.	142,630
Harry F. Frohman, Cincinnati, Ohio	139,000
William J. Carlin, Pittsburgh, Pa.	137,815
William N. Coler, Jr., Summit, N.J.	135,000
William E. Parker, Newton, Mass.	135,000
Abraham Abraham, New York City	128,073
Albert H. Funke, Flushing, N.Y.	126,000
Leopold Wolff, New York City	124,116

Frederick W. Hartwell, Providence, R.I.	117,720
John M. Carrere, New York City	115,000
James C. Brooks, West Chester, Pa.	110,000
John B. Dutcher, Pawling, N.Y.	108,370
Julius Debrovsky, New York City	108,000
Arthur W. Eager, New York City	106,000
George E. Matthews, Grand Island, N.Y.	105,256
William F. Ladd, Fort Worth, Texas	105,155
Ernest S. T. Richardson, Brooklyn, N.Y.	103,234
Frederick S. Mills, Gloversville, N.Y.	101,000
C. Will Chappell, Oneida, N.Y.	100,370
Winfield Scott, Fort Worth, Texas	100,190
Robert Buist, Philadelphia, Pa.	100,108
Leser Lehman, Newark, N.J.	100,000
William S. McKinley, Allegheny, Pa.	100,000
John Megraw, Philadelphia, Pa.	100,000
Max Schoenfeld, New York City	100,000

Liberally Insured Women.

Every year the insurances carried by women are coming more into evidence. Liberally insured women, whose policies matured last year, were the following named:—

Sarah J. Key, Helena, Ark.	\$11,000
Julia A. Richards, Modesta, Cal.	10,000
Ellen S. Baker, San Francisco, Cal.	15,000
Helena B. Walcott, Washington, D.C.	10,000
Donna Hale Wilson, Pensacola, Fla.	12,500
Stella Bristol Cowles, Woodhull, Ill.	10,000
Sallie S. McClelland, Lexington, Ky.	19,304
Emma Hoss, Hosston, La.	20,600
Matilda Burleigh, South Berwick, Me.	10,000
Anna T. Rowe, Boston, Mass.	71,000
Ann C. Ash, Chicopee Falls, Mass.	19,708
Farah A. Rice, Roxbury, Mass.	26,000
Emma L. Darling, Binghamton, N.Y.	50,000
Pauline Goldstein, Binghamton, N.Y.	10,000
Julia R. Santos, New Brighton, N.Y.	12,200
Margaret Ritchie, New York City	14,313
Margaret L. Kelly, New York City	10,000
A. Louise Gurley, Troy, N.Y.	15,000
Adelaide M. Lee, Oklahoma City, Okla.	10,000
Clara E. Stewart, Philadelphia, Pa.	35,000
Caroline Watmough, Philadelphia, Pa.	15,068
Hattie P. Kahn, Milwaukee, Wis.	14,500
Annie M. Hauter, Ripon, Wis.	10,000

Paid in Canada.

In the amount of claims paid by life insurance organizations in Canada during 1911, Montreal led the Dominion. The total amount paid in Canada was \$21,000,000, as follows:— Montreal, \$1,832,000; Toronto, \$764,500; Halifax, \$620,500; Quebec, \$367,000; Ottawa, \$270,870; St. John, \$213,500; Victoria, \$185,500; Vancouver, \$165,000; Winnipeg, \$128,000; Westmount, \$117,000; London, \$112,500; Hamilton, \$83,500; Guelph, \$64,500; Brockville, \$60,500; Calgary, \$59,500; Napanee, \$55,500; Sherbrooke, \$55,000; Dartmouth, \$47,000; Fort William, \$46,000; Prescott, \$45,500.

Less Than Forty Thousand.

The following amounts under \$40,000 were also paid in Canada:—Fort Erie, \$39,500; Edmonton, \$38,500; Sault Ste. Marie, \$38,500; Welland, \$37,500; Berlin, \$35,500; Peterborough, \$35,500; Neepawa, \$34,500; Richmond, \$34,500; Port Arthur, \$32,500; Frazerville, \$30,000; Charlesbourg, \$28,000; Fredericton, \$28,000; Arthabaska, \$26,000; Hull, \$26,000; Oshawa, \$25,000; Sussex, \$25,000; Three Rivers, \$25,000; Belleville, \$24,000; Brantford, \$24,000; Chateau Richer, \$24,000; Compton, \$24,000; Goderich, \$24,000; Gravenhurst, \$24,000; Louisville, \$24,000; Pointe aux Trembles, \$24,000; Alton, \$23,000; Amherstburg, \$23,000; Coaticook, \$23,000; Cobalt, \$23,000; Corn Hill, \$23,000; Drummondville, \$23,000; Harbor Grace, \$23,000; Kingston, \$23,000; Lachute, \$23,000; Lewis, \$23,000; Mahone Bay, \$23,000; Petite Riviere, \$23,000; St. Hyacinthe, \$23,000; St. Thomas, \$23,000; Stratford, \$23,000; Thetford Mines, \$23,000; Victoriaville, \$23,000; Moncton, \$22,000; Mount Forest, \$22,000; North Sydney, \$22,000; St. Roch, \$22,000; St. Stephen, \$22,000; Stoney Point, \$22,000; Tilsonburg, \$22,000; Brampton, \$20,500; Woodstock, \$20,500; Centreville, \$17,500; Charlottetown, \$17,500; Nelson, \$17,500; Scottstown, \$17,500; St. Jerome, \$17,500; Broughton, \$15,500; Campbells Creek, \$15,500; Grand Prairie, \$15,500; Listowel, \$15,500; Longueuil, \$15,500; New Glasgow, \$15,500; Rimouski, \$15,500; Robert L'Assomption, \$15,500; St. Andrews, \$15,500; St. Joseph, \$15,500; Trois, \$15,500; Coruna, \$14,500; Chrysler, \$14,500; Farnham, \$14,500; Nova Scotia, \$14,500; Berens River, \$13,500; Clinton, \$13,500; Ernestown, \$13,500; La Sallette, \$13,500; Lennoxville, \$13,500; Melbourne, \$13,500; Mere Side, \$13,500; Outremont, \$13,500; Plessisville, \$13,500; Port Moody, \$13,500; Rothesay, \$13,500; St. Anns, \$13,500; Simcoe, \$13,500; Sydney, \$13,500; Windsor Mills, \$13,500; St. Alexandre, \$12,500.

*These Companies have ceased doing new business in Canada.

BRITISH COLUMBIA

Power Company's Intention—Transportation Developments—Province's Financial Standing

(Staff Correspondence.)

Vancouver, June 29th.

Application is being made by the International Railway and Development Company for a water right on the Fraser River and for a license to dam that river at a point above Yale at what is known as the canyon. The company is a new one, and the idea is also new. Local men are interested, the names of Mr. H. H. Stevens, M.P., Mr. E. W. Leeson, of Vancouver, and Mr. H. T. Thrift, of Ladner, are mentioned, with Mr. D. M. MacDuff as the company's consulting engineer. It is stated that \$5,000,000 is immediately available for development purposes, and that capital up to \$20,000,000 will be supplied from Great Britain. The plan outlined is to construct lines of electric railway throughout the lower mainland.

Waterpowers abound at different points on the lower mainland, close to Vancouver the centre of activity and where the biggest market for electrical energy would be found. The promoters of the company must be optimistic, or are building on securing money from Great Britain and going ahead with the project for what there is in it. At present, the field seems covered by the British Columbia Electric Railway Company and the Western Canada Power Company. The British Columbia Electric Company is constantly increasing its supply and building reserve auxiliary plants to obviate any serious loss or inconvenience loss to its patrons through a breakdown of any of its units. Still it is aggressively in the field after business, indicating that it is able to furnish power for more customers. The Western Canada Power Company has its plant thirty-five miles east of Vancouver, considerably less than half the distance to the Yale canyon of the Fraser. This company has spent three million dollars developing the power on the Stave River and is now supplying electrical energy for industrial purposes. It has a very large amount yet to place before it will have exhausted its capacity. To secure use for its power, the company has agitated the construction of an electric tram line between Vancouver and Mission, paralleling the Canadian Pacific Railway. It was in connection with the financing of this that Mr. John Hendry sounded the London market when in the Old Country in the spring.

Many Sources of Power Available.

In addition to these operating plants close to the lower mainland market, or rather in it, there is power on the Lillooet River, this side of Stave River, which has often been suggested but as yet undeveloped. There is a magnificent power on the Squamish River, a little over thirty miles from Vancouver, at the head of Howe Sound. Then there is the big power at Powell River, 80 miles up the coast, where the pulp and paper mills of the Powell River Pulp and Paper Company are located. All these are easier of development than the Fraser canyon proposition, though there is no denying the fact that once a dam was built to withstand the turbulent flow of that mighty river at its flood a great amount of power would be available. To secure adequate returns on their money, the company must expect a large increase of population on the lower mainland. In the meantime, the companies already established will not have been inactive. There is no field north or east of the site, proposed, so that what power is placed would have to be utilized in the district lying between Yale and Vancouver. The scheme is no doubt feasible from an engineering point of view, though the construction of a dam to restrain the Fraser will be no easy task. The proposal is certainly ambitious.

Harbor Development and the Canadian Northern.

Less than a week ago Mayor Lee of New Westminster outlined the project of constructing an inland harbor on Annacis Island in the south channel of the Fraser River. Realty companies have exploited every other section, but that eastern portion of Lulu Island, while reckoned good property, had not attracted much attention. It is now the centre of notice. The people of New Westminster, have voted half a million dollars to start the harbor project, and the work will be carried out on a complete plan. It will bring New Westminster into Greater Vancouver, for the city of Vancouver has invited the municipalities of Point Grey and South Vancouver to join in a Greater Vancouver harbor proposition. This will mean the development of the north arm of the Fraser River, and the docks will come practically together.

In this connection, The Monetary Times was shown to-day the blue print outlining a Canadian Northern extension along the north bank of the Fraser Annacis Island and be-

yond to Woodward's Landing, just east of Steveston. This blue print was attached to an agreement between the Canadian Northern Railway and a property owner on Lulu Island appertaining to the transfer of land for a right-of-way. The agreement sets forth that the line must be completed by July 13th, 1913, so that no time is to be lost. A year ago real estate at Steveston and in the vicinity was active following a report that the Canadian Northern was seeking a location on the Island, and the story given by The Monetary Times on that occasion is now being corroborated. The supposition is that this extension is the first move to getting into Vancouver. If this is so, the route will doubtless lay through Point Grey. The Canadian Northern would cross the Fraser River bridge at New Westminster and proceed down Front Street through that city. The people voted Wednesday in favor of widening this street, and doubtless it is for this very purpose that more room is needed.

Conditions Generally are Bright.

Business men report that business was more satisfactory during the last week. Conditions generally are good. The lumber industry is brisk, mining is improving, much railway construction is being undertaken, and civic improvements are so many that Vancouver has exhausted its borrowing powers. Activity resulting from development on the Island will centre in Victoria. Some large schemes are in hand, all of which will mean much to the capital city.

Mr. William Farrell, president of the British Columbia Telephone Company, is back from a trip to England. He secured two million dollars for improvements contemplated by his company, which will include a cable to Nanaimo. Mr. Farrell states that British Columbia is regarded in London as one of the foremost if not the foremost province as regards finances. He states that financial men are chary of propositions which deal solely with the future, but well established business enterprises are accorded warm support.

FOREIGN EXCHANGE.

Glazebrook & Cronyn, Janes Building, (Telephone Main 7517), to-day report exchange rates as follows:—

		Between Banks.		Counter.
		Buyers.	Sellers.

DEBENTURES AWARDED.

Berlin, Ont.—\$89,100 4 1/2 and 5 per cent. to Messrs. H. O'Hara and Company, Toronto.
Tisdale Village, Sask.—\$5,000 5 per cent. 15 years, to Messrs. Nay and James, Regina.
Neudorf S.D., Sask.—\$10,000 6 per cent. 20 years, to Messrs. Nay and James, Regina.
Laura Village, Sask.—\$1,200 7 per cent. 15 years, to Messrs. Nay and James, Regina.
Colonsay Village, Sask.—\$2,500 5 per cent. 15 years, to Messrs. Nay and James, Regina.
Virden, Man.—\$8,000 5 per cent. 20 years, to Messrs. Dominion Securities Corporation, Toronto.
Indian Head, Sask.—\$15,000 5 per cent. 35 instalments, to Ontario Securities Company, Toronto.
Wingham, Ont.—\$10,750 5 per cent. 10 years, to Messrs. C. H. Burgess and Company, Toronto.
Thorah, Ont.—\$10,000 5 per cent. 20 instalments, to Messrs. C. H. Burgess and Company, Toronto.
Weston, Ont.—\$30,000 5 per cent. 30 instalments, to Messrs. Brent, Noxon and Company, Toronto.
Lochiel Township, Ont.—\$6,800 5 per cent. 15 instalments, to Messrs. G. A. Stimson and Company, Toronto.
Stellarton, N.S.—\$30,000 5 per cent. 30 years; \$7,000 to Mr. J. B. Kenny; \$5,000 to Mr. W. McLean. \$18,000 unsold.
Windsor, Ont.—\$69,500 4 1/2 per cent. 30 instalments; \$30,000 5 per cent. 10 instalments; \$17,000 5 per cent. 10 instalments; \$25,250 4 1/2 per cent. 3 instalments; \$68,801 5 per cent. 10 instalments, to Messrs. Wood, Gundy and Company, Toronto.

A branch of The Canadian Bank of Commerce has been opened at St. John's, Newfoundland, under the management of Mr. F. E. Dench, formerly of Charlottetown. P. E. I.

CANADA'S CULT OF THE AUTOMOBILE

Western Provinces Lead the Way—Heavy Imports of Cars—Canadian Manufacturers Busy—Displacement of the Farm and City Horse

One of the most striking signs of prosperity in Canada, and at the same time an indication of the irrepressible desire for speed, is the common use of the automobile in Canada. The increased employment of the motor vehicle has been forced against the unfortunate possession of poor roads. The good roads movement probably owes its inception largely to the universal motor habit. This has been acquired not only by the wealthy classes, the professional and business men, but also by the Western farmer who is now counted as one of the best buyers of the moderate priced machine.

The extent of the cult of the automobile in this country is clearly reflected in the following table compiled by The Monetary Times from the provincial government's figures:

Province.	Population.	No. of autos.	One auto to the number of persons as below.
Nova Scotia	492,338	578	852
New Brunswick	351,889	592	594
Quebec	2,002,712	2,500	801
Ontario	2,523,208	7,338	344
Manitoba	455,614	3,000	152
Saskatchewan	492,432	2,537	194
Alberta	374,663	3,000	124
British Columbia ...	392,480	2,375	165

Alberta Leads the Way.

In comparison to population, Alberta has the greatest number of cars. Last year 700 licenses were issued in Calgary and about 350 in Edmonton. Manitoba comes next with one auto to every 152 people in the province, and British Columbia third with one auto to every 165 persons. Nova Scotia has the smallest number of cars, and the ratio of autos to population there is the lowest. Ontario leads in the number of machines in use and has one car to each 344 of population. Western Canada generally is a far larger buyer than the East.

In addition to the licenses issued to residents of Ontario, 4,000 licenses were granted to tourists. In Manitoba, cars transient through the province are not registered and have 30 days for touring that part of the country. After that time they are considered resident and have to take out a license. Permits are being granted at such a rapid pace in the West that the above figures will likely be a little short of the correct number by the time this story is in print.

Prince Edward Island Bars the Cars.

Prince Edward Island is the only province which prohibits the use of motor vehicles on its highways and public places. This was thought necessary in the public interest and for the safety of the travelling public. The penalty for breaking this law is \$500 or six months in jail. Public highway, in the act, includes any highway, public street, square, alley, lane, park, or public place.

The commercial travellers representing automobile houses in the West this spring had the same story—big demand, Canada one of the best sales fields, factories cannot turn out cars rapidly enough. Where are the machines being purchased?

Where We Buy Machines.

The following table shows the value of our imports in this line:—

Year	From United Kingdom.	From United States.
1908	\$186,224	\$714,497
1909	70,954	480,785
1910	114,871	1,644,431
1911	314,182	3,798,589

These figures show an increase in the value of Great Britain's automobile exports to Canada in the four years of 68.7 per cent. and of the United States, 431.6 per cent. The number of cars purchased by Canada from these countries in the same years was as follows:—

Year.	From United Kingdom.	From United States.
1908	101	563
1909	48	469
1910	78	1,345
1911	240	3,207

Average Value of Cars.

This is a gain in number by the United Kingdom of 137.6 per cent, and by the United States of 469.6 per cent. The approximate average value of the machines purchased is tabulated as follows:—

Year	Average value of British car.	Average value of United States car.
1908	\$1,843	\$1,269
1909	1,063	1,026
1910	1,472	1,223
1911	1,309	1,887

We obtain a few cars from France and there are prospects of German cars being sold in Canada next year.

Exports of the United States.

The United States, therefore, is the chief source of our supply. It is interesting to know of its manufacturing strength in that direction. Twenty thousand automobiles will be the export record of that country in the fiscal year ended June, 1912, and their value, including parts and accessories, will approximate \$27,000,000. This statement is in very round terms, for the United States Bureau of Statistics, upon whose figures the estimate is based, has at present detailed figures covering but 10 months. They show, however, nearly 17,000 automobiles exported to foreign countries in the 10 months ended with April, valued at 16½ million dollars; parts thereof, 3¼ million dollars; tires, sent separately from machines under the head of exports of rubber manufactures, over 2 million, and automobile engines two-thirds of a million dollars, making a total for the 10 months of practically 22 million dollars and fully justifying the assertion that for the full 12 months the total will approximate and probably exceed \$27,000,000. This figure includes only the exports to foreign countries and is exclusive of the 900 machines sent to our non-contiguous territory, valued at about \$1,500,000.

This total of \$27,000,000 worth of automobiles sent out of the country in 1912 is in marked contrast with the figures of a decade ago, 1902, which, by the way, was the first year in which the Bureau of Statistics found the exports of automobiles of sufficient importance to justify a separate record, the total for that year being a little less than \$1,000,000, as against \$27,000,000 ten years later.

Big Production in United States.

The growth in exports of automobiles from the United States has been especially marked during the period since 1905, this growth being coincident with the expansion of the domestic industry and a corresponding decrease in imports of automobiles. Thus in the period from 1899 to 1904 the value of domestic manufactures of this class of articles increased about 25 million dollars, from 5 million dollars in 1899 to 30 million in 1904, an increase of 25 million dollars; while in the period from 1904 to 1909 the value of the output increased practically 220 million dollars, from 30 million dollars in 1904 to 249 million in 1909. Accompanying this notable growth in production, the imports of automobiles decreased from 4¼ million dollars in 1906 and 4¼ million in 1907 to approximately 2½ million dollars in 1912.

While France still leads the world in exports of automobiles, the United States surpasses that and all other countries in rapidity of growth of production and exportation. For example, their exports of that class of articles have increased from \$5,000,000 in the calendar year 1908 to nearly \$20,000,000 in 1911; while in the same period those of France increased from \$24,600,000 to \$31,700,000; those of the United Kingdom, from \$7,600,000 to \$15,500,000; those of Germany, from \$3,000,000 to \$11,000,000; and those of Italy, from \$5,500,000 to \$6,100,000. Thus in the brief three-year period from 1908 to 1911 there was an absolute gain of about \$15,000,000, or 300% in exports from the United States; of \$7,900,000, or over 100% in those from the United Kingdom; of \$8,000,000, or 266% in those from Germany; and of \$600,000, or slightly more than 10% in those from Italy.

Twenty-five Per Cent. to Canada.

Approximately 25% of the automobiles exported from the United States are shipped to Canada; about 40% to Europe, chiefly Great Britain; about 20% to British Australia; about 8% to South America; and smaller proportions to Mexico; the West Indies, and various countries in Asia, Oceania, and Africa. During the 10 months ending with April, the latest period for which figures of distribution are available in the Bureau of Statistics, 4,716 automobiles were exported to the United Kingdom, 4,424 to Canada, 3,034 to British Oceania, 1,282 to South America, 849 to Asia, and other Oceania, and 1,502 to all other foreign countries. There were also shipped, during the same period, 410 automobiles to Hawaii, 342 to Porto Rico, and 11 to Alaska.

Of the automobiles imported into the United States, France supplies about one-half. Of the 845 machines im-

ported during the 10 months ending with April, 339 were from France, 170 from the United Kingdom, 115 from Italy, 108 from Germany, and 113 from all other countries.

Decline in Average Price.

The fall in export price of automobiles is an especially striking feature of the United States Bureau of Statistics figures. They show an average valuation for all automobiles exported in 1909 of \$1,800 each, and in 1912 of \$980, the average export price in 1912 being thus but a little more than one-half that of 1909. This remarkable fall in the average valuation of the automobiles exported is due in part to a general reduction in the selling price of automobiles during the period in question, a disposition on the part of manufacturers to reduce the price of the machines to meet popular demand, but more especially to the fact that large numbers of partially used, or "second-hand" machines, are in recent years being exported to Canada, Mexico and the West Indies, thus reducing the average valuation of the entire number exported.

Production This Year.

Statistics compiled by American automobile manufacturers show that 210,000 cars will be produced in the United States in 1912, with a total value of \$321,930,000. They further state that the 1912 models are practically all cleaned out and that they are now concentrating their efforts upon the 1913 output. For the coming year manufacturers are producing more medium and low priced cars, but state that the total number sold, and their value will probably exceed those sold in 1912.

Makers of automobile tires have also had a prosperous season, it being estimated that about 4,000,000 tires will be sold this year, with an aggregate value of \$120,000,000. The Goodyear Company alone figures on producing over 1,000,000 tires this year.

During the past few seasons automobile production has varied according to following estimates:

	Cars Built.	Total Value.
1912	210,000	\$321,930,000
1911	140,000	175,000,000
1910	185,000	242,000,000
1909	82,000	98,400,000
1908	55,400	83,100,000
1904	20,100	40,200,000

Output in Canada.

Several United States manufacturers have established assembling plants in Canada and export the various parts from the parent factory. The manufacture of automobiles in Canada is brisk and anticipations for the coming year are optimistic. The Monetary Times has made inquiries among factories and assembling plants and the invariable reply is that the outlook is good. The plans of Tudhope Motor Company, Limited, of Orillia, for the present season embody an output of 700 to 800 cars, and for 1913 they expect to make from 1,000 to 1,200 cars.

The output of the Ford Motor Company of Canada, Limited, of Walkerville, for the years named was as follows:

Years.	Cars.
1905	114
1906	101
1907	327
1908	325
1909	484
1910	1,265
1911	2,675
1912	7,500

These figures show that the development of the automobile business from 1905 to 1909 was very slight. Coupled with that was the fact that conditions in Canada were not very good in 1907 and 1908. However, in 1910, 1911 and 1912 the people of this country apparently realized that the automobile has come to stay and is a necessity and while their output for the present year is 7,500 cars it would be safe to say that for next year it will probably be 15,000 cars.

These figures regarding the Ford output include export shipments and probably 25% of their output in each of the last three years has been used for export purposes.

Canadian Cars in New Zealand.

The Canadian Trade Commissioner in New Zealand, Mr. W. A. Beddoe, reports that Canadian made cars are popular in that country. In 1909, a Canadian firm exported to New Zealand 19 cars and in 1910, 95. "As an evidence of the expansion of trade," said Mr. Beddoe, "as exemplified by the experiences of this firm, they have landed in New Zealand during the year ended March 31, 1912, no less than 336 cars. The Karamea, just arrived, had on board 53 cars, and the Waimate, next to arrive, has on board 55 cars. The Whakatane, sailing from Montreal on May 15, has 84 cars for New Zealand of this make alone. These cars retail in

New Zealand for £230 (\$1,150) delivered, so that this shipment alone represents a value approximating \$100,000."

What About the Horse?

Motor traction is displacing the horse to a large extent both in the cities and on the farm. This spring, for instance, two men and five drills on a Saskatchewan farm were doing the work formerly done by five men and twenty horses. In another case, six disc machines (burrows) were doing the work of six men and twenty-four horses. Statistics recently compiled show that the horse as a factor in city traffic is declining. This is especially true in the large cities in both Great Britain and the United States, and to a lesser extent in Canada. In the United States there are upwards of 18,000 truck and delivery wagons in operation, but authorities agree that this number will be more than doubled within the next year. The use of the motor truck or motor delivery wagon has apparently only just commenced, but those used have proven so satisfactory that it is only reasonable to expect a rapid extension of the practice. In London, where the world's greatest street traffic prevails, the number of horses used has decreased from 450,000 to 110,000 within the past six years. In New York there are now only about 140,000 horses in daily service hauling loads. In Boston, the largest percentage of the freight which is shipped from the trains to boats and vice versa, is handled by motor trucks. The same story is found elsewhere, and those who are in close touch with the situation estimate that in a few years the delivery or truck horse will cease to be a factor in the streets of our large cities.

Another factor which is tending to make the horse disappear is the increasing cost both of horses and of horse feed. On the other hand, the prices of motor vehicles, gasoline, and electricity are declining. It is estimated that a motor truck can be operated at from 10 to 40 per cent. more cheaply than horse vehicles.

INVESTMENTS AUTHORIZED FOR TRUSTEES

In response to numerous inquiries from trustees and executors as to just what powers they have under a will where nothing is specified regarding investments, the Dominion Securities Corporation, Toronto, have compiled a summary of the law on the subject in the different provinces. This is an excellent pamphlet and will prove of great assistance and value.

FIFTEEN YEAR'S IMMIGRATION STATISTICS.

The immigration branch of the department of the interior has issued a pamphlet entitled "Immigration Facts and Figures," which contains statistics for the last 15 years. During the last 15 years 2,118,712 immigrants have come to Canada, apportioned as follows:—Maritime Provinces, 89,474; Quebec, 309,422; Ontario, 504,126; Manitoba, 353,100; Alberta and Saskatchewan, 608,965; British Columbia, 240,414; not shown, 13,211. Of these, 823,188 were British, 752,120 were from the United States, and 543,404 from Continental countries.

During the fiscal year which ended March 31 last, the immigration was 354,237, of which 138,121 was British, 133,710 from the United States, and 82,406 from other countries.

Since December, 1902, when the Medical Act went into force, 8,500 immigrants have been debarred at ocean ports; the number in 1911-12 was 972. In addition 5,626 have been deported after being admitted; the number of cases in 1911-12 was 959. Of these 227 were British and 174 Italians. Inspection of immigrants seeking admission to Canada from the United States was begun in April, 1908; rejections since that date have been:—1908-9, 4,580; 1909-10, 8,997; 1910-11, 15,404; 1911-2, 22, 034.

During the past fiscal year bonus was paid on 23,183 British immigrants, or 16.78 per cent.; on 3,613 American immigrants, or 2.7 per cent.; and on 2,111 continental immigrants, or 2.56 per cent. Eight years ago the proportion was:—British immigrants, .18 per cent.; American, 8.45 per cent.; Continental, 31.8 per cent. The immigration expenditure during 1911-12 was \$1,354,736. Of this \$578,809 was spent in Canada, \$376,726 in the British Isles, \$30,546 in Continental Europe and \$368,655 in the United States.

An interesting booklet entitled "The Hundred Best Investments," has been published by the British Foreign and Colonial Corporation, Limited, 57 Bishopgate, London E.C., England. Copies may be obtained on application to that firm. This house recently offered £101,300 city of New Westminster 4½ per cent. debentures at 98½. The issue was not underwritten but was, however, over subscribed by clients and the investing public.

VANCOUVER'S MAY FIRE LOSS.

The fire department responded to a total of 56 alarms during the month of May, divided as follows: fires outside city limits, 3; false alarms, 8; chimney fires, 2; fires where damage resulted, 27; rubbish piles, tar pots, and small fires where no damage occurred, 19. The total damage done was \$13,139, with insurance paid \$6,882, leaving the property loss above insurance paid \$6,257. The total value of property involved was \$631,695. The loss which occurred outside of the city limits and to which the department responded is not included in the above figures.

A list of fires where damage occurred follows:—

May 1st—Alarm from Box 843 at 3.20 a.m. Fire in a one story frame building in rear of 625 Fifteenth Avenue East, owned by Mr. Johnston and occupied by Mr. E. Oben, and used as a bakery. Both building and contents were destroyed. Cause of fire unknown. Damage \$1,300, partly covered by insurance.

May 2nd—Telephone alarm at 7.25 a.m. Small fire under the Main Street bridge, caused by electric wires. A hole three feet square was burned through the bridge. Damage \$20.00.

May 3rd—Verbal alarm at 8.31 p.m. to 717 Hamilton Street, a two story frame building occupied by Mr. A. M. Smith and used as a boarding house. The fire started at the back of the range in the kitchen and ran up the partitions to the top part of the house, considerable damage resulting to both building and contents before it was extinguished. Damage about \$1,250, covered by insurance. Telephone alarm at 9.10 p.m. Fire in dwelling at 1724 Third Avenue East, owned and occupied by G. J. Saunders. The blaze was caused by an overheated furnace and ran up the partitions between the first and second floors. Damage \$550, covered by insurance.

May 4th—Telephone alarm (Western Union) at 10.24 a.m. An electric motor on fire at the Vancouver Milling Company's elevator, Smythe and Cambie Street, caused by an overload of current. Damage \$300.

May 7th—Telephone alarm at 3.05 a.m. Fire in sewing machine which was stored in the basement at the Cambridge Apartments, 944 Bidwell Street. Cause of fire unknown. Damage \$15.00.

May 8th—Alarm from Box 332 at 7.15 p.m. Fire in wood-work at the side of boiler at Easthope Bros.' boat building plant, 1717 Georgia Street, cause unknown. Damage \$25.00, covered by insurance.

May 9th—Telephone alarm at 10.04 a.m. Fire on roof at 1357 Pender Street West, caused by flying sparks. Building occupied by Mrs. Thomas Middleton and used as a rooming house. Damage \$25.00, covered by insurance.

May 10th—Alarm from Box 6 at 6.04 a.m. Fire in a one story frame building at 830 Robson Street, owned by Passage and Tomlin and occupied by Mr. Archer and used as a bakery. The blaze started in the rear of the building from some unknown cause and did considerable damage before it was extinguished. Damage about \$1,600, covered by insurance. Telephone alarm at 7.48 p.m. Fire on roof at 157 Cordova Street West, owned by S. Gintzburger and occupied by the Cascade Gas and Electric Fixture Company, caused by flying sparks. Damage \$100.00, covered by insurance.

May 11th—Telephone alarm at 10.19 a.m. Fire near the elevator shaft at A. MacDonald & Company's wholesale grocery warehouse, 40 Powell Street; cause unknown. Building owned by A. MacDonald & Company. Damage \$150.00, covered by insurance.

May 13th—Telephone alarm at 6 p.m. Fire on roof at 547 Richards Street, caused by sparks from chimney. Building owned by Robertson & Hackett. Damage \$100, covered by insurance.

May 14th—Alarm from Box 324 at 11.56 a.m. Small fire at 2063 Pendrell Street, caused by paint brushes being placed too close to a gas stove. Building owned and occupied by Mr. Davidson. Damage \$15.00, covered by insurance. Alarm from Box 37 at 6.25 p.m. Fire on roof at 112 Harris Street, caused by flying sparks. Building owned by H. A. Stuart and occupied by G. Young and used as a rooming house. Damage \$420.00, covered by insurance.

May 16th—Alarm from Box 8 at 1.16 p.m. Fire in stable in yard at the Patterson Lumber Company's plant, at the north end of Cambie Street bridge, caused by flying sparks. Building owned by the Patterson Lumber Company and occupied by the Cascade Wood Company. Damage \$300, covered by insurance.

May 17th—Alarm from Box 25 at 7.15 p.m. Fire at 303 Cordova Street West, owned by The Trustee Company and occupied by D. A. McClelland and used as a furniture store. The blaze, which was of unknown origin, was confined to the room where it started. Damage \$1,400, covered by insurance. Alarm from Box 318 at 10.50 p.m. Fire at W. Turner's boat building plant, at the foot of Georgia Street. The blaze started from some unknown cause and, owing to their very inflammable nature, both building and contents were almost a total loss. Building owned and occupied by W. Turner. Damage \$4,500.

May 18th—Alarm from Box 42 at 2.50 p.m. Small fire at 867 Cambie Street, caused by gas stove being placed too close to the wall. Building owned by Mr. Todd and occupied by Mrs. Bradley. Damage \$45.00, covered by insurance.

May 20th—Alarm from Box 331 at 12.22 p.m. Fire in partition of dwelling at 948 Drake Street, caused by a defective furnace pipe. Building owned by Madame Gondeon and occupied by Mrs. Mortimore. Damage \$15.00, covered by insurance.

May 29th—Telephone alarm at 4.30 p.m. A tent on fire at the corner of Cypress and Short Street, caused by an overheated stove. Tent owned and occupied by W. R. Medill. Damage \$245.000. Telephone alarm at 6.30 p.m. An auto garage on fire at the corner of Second Avenue and Larch Street, caused by spontaneous combustion. Building owned by T. G. Moody. Damage \$60.00, partly covered by insurance. Alarm from Box 263 at 11.30 p.m. Fire in frame building at 1941 Main Street, owned by Mr. Moore and occupied by J. M. Davidson and used as a fish curing establishment. Cause of fire unknown. Damage \$427.00, covered by insurance.

May 30th—Telephone alarm at 7.37 a.m. Fire on roof of dwelling at 1073 Richards Street, caused by flying sparks. Building owned by Forbes & Mackinley and occupied by Mr. Cleland. Damage \$25.00, covered by insurance.

BUSINESS MEN AND REAL ESTATE.

Warnings Regarding Subdivisions and Speculation—Central Property Investments Are Sound.

The business man who speculates in real estate was dealt with in plain terms by R. T. Riley, managing director of the Northern Trusts Company, in the course of an address to the members of the Winnipeg branch of the Canadian Credit Men's Association. The occasion was the last monthly meeting of the association for the season, and took the form of an informal dinner in the grill room of the Royal Alexandra, Winnipeg, followed by a discussion, which was held in the ballroom upstairs.

Mr. Riley, whose remarks led the discussion, enumerated the causes of failure in business, and their relation to the regulation of credit. He estimated that out of Canada's population of between 7,000,000 and 8,000,000, 80,000 were in business for themselves. He said that in some years the failures were as high as one in 35, and that the loss, falling ultimately on the consumer, was, in effect, a heavy poll tax. "There is no question," he added, "that the man who pays helps to stand the loss to the wholesaler from the failure of the man who cannot pay."

Making Large Sums on Margins.

Although admitting that some businesses had been placed in a good financial position by fortunate real estate investments, Mr. Riley urged upon the credit men the importance of discouraging speculation on the part of their customers. "But before doing this," he said, "it would be well for you to go to the heads of your firms, many of whom have been, and are making large sums in margins on real estate, by the very methods which they condemn in those that owe them money."

Coming nearer home, Mr. Riley mentioned the name of a sub-division placed on the market some time ago by a prominent firm of real estate agents. He stated that before it was offered for sale he had said that it was five years ahead of the demand. If he had said fifteen years ahead, he would have been nearer the mark. At the present time there were only three houses on the sub-division. "When the various purchasers are tired of holding their lots, they will be thrown on the market, and it will be impossible to sell them for what they have cost. There is room on the sub-division I have mentioned for 80,000 people to live."

Are Such Advances Justified?

Mr. Riley said he did not wish to be understood as saying that central property investments were not good. He did not believe that it would be possible to buy Portage Avenue or Main Street frontage any cheaper in the future than they could be bought for to-day. What he did want to draw attention to were the hundreds of thousands of dollars which were going into all kinds of real estate investments, which the speculators (mostly wage earners) would not see again in the lifetime of most of those present. He gave an instance, from his personal knowledge, of a block of property in the west end which had been purchased for \$60,000, sold to a wealthy Englishman for \$85,000 a few weeks later, and sold again in a short time for \$110,000. "You cannot tell me," said Mr. Riley, "that when nothing has happened in the interval to enhance the value of this land, such an advance in price is justified."

NORTHERN CROWN BANK.

The statement of the result of the business of the Northern Crown Bank for the five months ended May 31st, 1912, shows net profits for that period of \$119,862. Adding to that sum, the balance at credit of profit and loss account on December 31st, 1911, viz.: \$214,932, there was available for distribution \$334,795. The dividend at 6 per cent. per annum paid on June 3rd, accounted for \$55,187. This left a balance of \$279,608 to be carried forward at credit of profit and loss account.

CANADA'S TRADE RELATIONS

Discussed in England by Mr. Foster—Visit of British Manufacturers.

Reuter's representative had an interview with the Hon. G. E. Foster, the Dominion's Minister of Trade and Commerce, who reached England recently as Canadian Commissioner on the Royal Commission on Imperial Trade.

Speaking of the objects and expected results of the Commission, the Minister said: "The people of Canada are interested in the work of the Commission. In a general way it has to do with examining into and marshalling the natural resources of the British Dominions, so far as they are included in the terms of reference, their productions and their interchange. The resolution of the Imperial Conference itself and the terms of reference do not contemplate any pronouncement upon or recommendations with regard to financial policy or legislation. The aim is rather to collect information for the consideration of the various countries concerned. The results of the work of the conference must be of great advantage, as they will form the basis for further action, legislation and otherwise. Public interest in Canada will naturally grow as the work goes on. It is, of course, clearly understood that the question of the fiscal policy of the Governments does not come within the scope of the Commission.

"Its purpose is to open up natural resources, and inquire into the supply of raw material used in the manufacturing processes of the Empire, and this will naturally lead to inquiry and interchange between the sources of supply and demand. The British Empire, taking in all its parts, is particularly rich in these varied natural resources and productions, and is probably the most self-dependent Empire in the world. In proportion as these exchanges take place between the different parts of the Empire, they work to the mutual advantage of each, and tend to swell the aggregate of Imperial trade. As a result, Imperial development, strengthening the wealth of production, will follow."

Closer Trade Relations.

Speaking of Canadian policy in the matter of closer trade relations with other parts of the Empire, the Minister said: "We are at present negotiating with Australia with a view to bettering our trade relations on the lines of preferential exchanges, and these negotiations, I am happy to say, are progressing satisfactorily. I had intended to visit Australia this year in connection with this question, but the Commission renders that at present impossible, but I shall probably go to Australia next year. We have concluded new trade arrangements with the West Indies. The particulars of these are not yet made public, but when they are they will be found to be very satisfactory to both countries. We already have a preference with South Africa, but this can probably be enlarged." **British Manufacturers' Visit.**

The departure of a large party of British manufacturers for a tour of Canada, as guests of the Dominion Government, seems to have passed with strangely little notice. This is the opinion of Commercial Intelligence, of London, which continues: "It is an event which may have considerable consequences for this country, if it be true that the majority of the party, which includes representatives of many of our biggest manufacturing firms, are looking out for sites on which to erect branch works in the Dominion. There is no occasion, of course, for lament at this natural development of British industrial emigration to the Dominion, but its importance might have been expected, nevertheless, to attract more notice at home.

"The phenomenal rate at which Canada is progressing makes the Dominion at the present time the most attractive field in the world for industrial enterprise, and it is not surprising that our manufacturers should be as alive to the opportunities offered there as are British laborers and capitalists. It is not only a market of great potentialities, but a field where British manufacturers are finding it increasingly difficult to compete from this side, and firms that still retain a considerable connection among Canadian buyers are undoubtedly consulting their interests in the best way possible by proposing to set up works on the spot. Most things are generally wanted in a hurry in Canada, which accentuates the American advantage of geographical proximity, and excludes British competition for important contracts which, but for the element of time, they might compete for successfully.

Railway Contracts and British Capital.

"This is especially true of railway contracts—often paid for out of British capital. Industrial development in the Dominion, too, is making headway rapidly, and a strong sentiment in favor of supporting local enterprise is everywhere observable in the Dominion; while industrial practices, being largely copied from America, are so different from those of this country that only manufacturers on the spot, familiar with the details of things and able to adapt their productions accordingly, have generally any chance of extending their connection in the Canadian market. Again, enterprising municipalities are offering substantial attractions for the establishment of factories, in the shape of free sites, exemption from taxation, and even loans of capital, so that the present is in an especial degree the time for British firms to start their

branch works in the Dominions, for these municipal offers will not last indefinitely. These branch works might with advantage serve not only the Canadian home market, but also Mexico and South America, the West Indies, Australia, and the Far East, to all of which the manufacturers would find Canadian shipping companies ready to carry their goods on favorable terms and anxious to encourage them in their enterprise in export trade.

"With the increase of British industrial emigration to the Dominions, as their markets develop, the demand for a bigger preference to British goods under their tariffs will grow weaker, and the Dominions will naturally be less inclined to entertain any such proposals. This is an important fact with which British manufacturers who hope to retain their Colonial connection for the home factories must reckon."

FINANCES OF NEW WESTMINSTER.

"While some heavy expenditures have been made in improvements, the property owner has been very materially compensated by increased property values and a general stimulus of trade conditions, making it possible to pay higher wages to the employees, and thereby increase the financial stability of the individual property owner," states Mayor Lee in his introductory remarks to New Westminster annual financial statement.

"Everything points to a most successful year during 1912, and the hope is that at the end of the year each and every citizen will feel that the money expended has resulted in no small degree to the advantage of the city generally, and the individual in particular."

The assessment for 1912, is as follows: Assessed value of land \$16,482,580, assessed value of improvements \$6,617,600, assessed value of land, exempt \$2,982,580, assessed value of improvements exempt, which includes all buildings and other taxable improvements on taxed land, which improvements are not taxed this year \$6,327,600. The balance as taxed this year being \$13,790,000, made up as follows: Land only \$13,500,000, buildings and improvements on the city's lands (principally on leased water front lots) \$290,000.

This is the second year in which this city had adopted this, a practically single tax system.

The General Revenue Account for the year ended 31st December, 1911, is as follows: Expenditure. Finance charges \$83,269, school board \$64,984, board of works \$26,157, water works \$14,114, electric light \$40,914, Lulu Island bridge \$4,457, fire department \$35,297, police department \$17,006, health department \$10,572, market department \$2,752, parks' department \$4,162, library department \$2,479, general debenture interest, less accrued interest \$89,323, general sinking fund \$25,536, local improvement debenture interest, less accrued interest \$11,270, local improvement sinking funds \$8,720. Total \$441,020.

Income, Taxes, for schools, general purposes, and uncollected \$190,575; local improvement taxes, received and uncollected \$20,208; interest on tax arrears \$771, police and pound (less dog tax) \$6,482, provincial government school grant \$20,260, water department \$67,996, electric light department \$105,372, sundry rentals, licenses, etc. \$40,040. Total \$451,707, giving a surplus of \$10,687.

ONTARIO'S MINERAL OUTPUT.

During the first three months of 1912 the output of the metalliferous mines and works of Ontario was as follows:

Product.	Quantity.	Value.
Gold oz.	573	10,266
Silver oz.	7,439,044	4,092,405
Copper tons	2,537	360,799
Nickel tons	4,722	1,009,702
Pig Iron tons	116,824	1,858,274
Cobalt and Nickel, Oxides, Crude		
Cobalt material, etc. lbs.	538,170	100,365

Compared with the first three months of 1911, silver production showed an increase in value of \$383,861, though the quantity was less by 91,443 ounces. Cobalt proper produced 7,006,842 ounces, South Lorrain 285,042 ounces, and Gowganda 147,103 ounces. Shipments were: Ore 4,346 tons. Concentrates 2,528 tons, Bullion 1,445,834 ounces. Of the total quantity of silver 4,197,161 ounces were obtained from ore and concentrates treated in Ontario plants. Adding bullion shipped by the mines themselves, over 75 per cent. of the total yield of silver was recovered in Ontario.

Gold shows a decrease of \$13,274. In the early part of 1911 the experimental stamp mills at Porcupine were at work. Later in the year they were destroyed by fire, and at neither the Dome nor the Hollinger had the new plants begun to produce during the first quarter of 1912. As a consequence Porcupine's contribution to the gold output was small.

Nickel shows an increase in quantity of 598 tons and in value of \$124,710. The output of copper is greater by 416 tons in quantity and \$57,559 in value.

There was an increase in pig iron of 1,370 tons in quantity and \$34,557 in value. In the first quarter of 1911 shipments of iron ore amounted to 11,621 tons; no shipments were reported during the corresponding period in 1912. Practically all the cobalt oxide now used comes from the mines of Cobalt district. Production has for the time being ceased in New Caledonia, whence large quantities of cobalt ore were formerly exported to Europe.

SEVERAL LARGE NEW COMPANIES

Windsor Hotel Company Incorporated—Another Bond Company—Charter Grants Extensive Powers

Company incorporation has not yet assumed its summer stride. Eighty new companies have been incorporated with an aggregate authorized capital of \$23,962,500. Classifying them according to the province in which the head office is situated, the following result is obtained:—

Head Office in	No. of Companies.
Ontario	28
Quebec	26
British Columbia	20
Manitoba	5
Alberta	1

British Columbia's twenty companies have combined authorized capital amounting to only \$1,769,600. Quebec's 26 companies have aggregate capital of \$10,133,900, and Ontario's 28 corporations \$8,864,000.

There are several companies with authorized capital exceeding \$1,000,000. They are as follows:—

Company.	Head Office.	Authorized Capital.
Windsor Hotel Company	Montreal ..	\$6,000,000
Espirito Santo Chartered Company ..	Toronto ..	5,000,000
Calgary Brewing & Malting Company ..	Calgary ..	2,000,000
Alexander Building	Montreal ..	1,250,000
Canadian Bond Company	Toronto ..	1,000,000

The Espirito Santo Chartered Company are given authority to construct and operate railway and steamship terminals, stock yards, grain elevators, flour mills, steamships, dry-docks, smelters and furnaces for the treatment of ores, railway equipment plants, cement brick, asphalt, paint, wood-works and power plants. They have also authority to engage in mining. The charter contains twenty-two clauses and gives very wide powers. Members of a Toronto legal firm are named as provisional directors.

The provisional directors of the Canadian Bond Company are Mr. Cawthra Mulock and members of his firm.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kelowna, B.C.—Clement-Riggs, \$20,000.

New Westminster, B.C.—Westminster Properties, \$125,000.

Prince Rupert, B.C.—Northern Brick and Tile Company, \$50,000.

Port Alberni, B.C.—Alberni Hydro-Electric Power Company, \$100,000.

Chatham, Ont.—Chatham Theatre Company, \$40,000. J. N. Massey, E. Massey, C. H. Massey.

Blyth, Ont.—Blyth Flax Company, \$2,000. O. Geiger, Hensall; G. Powell, J. McMurchie, Blyth.

Mr. H. G. Coleman, secretary of the Moose Jaw board of trade, has resigned and will act as the special western representative of several eastern papers and periodicals.

Mr. Norman S. Jarvis, of Messrs. G. A. Stimson and Company, bond brokers, Toronto, has just arrived in London where he will assist in the management of the company's office.

JUNE FIRE LOSSES

Over Four and Quarter Million Dollars — Fatalities
Were Considerably Less

The Monetary Times' estimate of Canada's fire loss during June amounted to \$4,229,412 compared with May loss of \$2,251,815, and \$1,151,150 for the corresponding period last year. The following is the estimate of the June losses:

Fires exceeding \$10,000	\$3,586,000
Small fires	91,750
Estimates for unreported fires.....	551,662

Total \$4,229,412

The following are the monthly totals of the losses by fire in Canada compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$1,275,246	\$2,250,550	\$3,002,650
February	750,625	941,045	1,640,153
March	1,076,253	852,380	2,261,414
April	1,717,237	1,317,900	1,355,055
May	2,735,536	2,564,500	2,251,815
June	1,500,000	1,151,150	4,229,412
July	6,386,674	5,384,300	
August	1,667,270	920,000	
September	894,125	1,123,550	
October	2,195,781	580,750	
November	1,943,708	1,506,500	
December	1,444,860	2,866,950	

Total \$23,593,315 \$21,459,575 \$14,740,499

Twenty-Seven Conflagrations.

During June there were many conflagrations, the largest being at Chicoutimi, Que.

The fires at which loss was estimated at \$10,000 and over were as follows:—

Cobalt, Ont.	Business section	\$ 160,000
Parkill, Ont.	Flour mill	15,000
Winlaw, B.C.	Lumber mill	50,000
Montreal, Que.	Rolling mills	15,000
Montreal, Que.	Hotel	20,000
Brantford, Ont.	Freight shed	20,000
Toronto, Ont.	Manufacturing buildings..	67,000
Portage la Prairie, Man.	Round house, etc.	50,000
Blind River, Ont.	Business section	100,000
Drummondville, Que.	Power house	30,000
Kamloops, B.C.	Lumber plant	60,000
Sarnia, Ont.	Gasoline container, etc. ..	150,000
Winnipeg, Man.	Soda water works	10,000
Sedgewick, Alta.	Residences, etc.	10,000
West Lohave, N.S.	Woodworking plant	60,000
Winnipeg, Man.	Church and seminary	68,000
Chelmsford, Ont.	Business section	75,000
Teulon, Man.	Business section	50,000
Edanfort, Sask.	Village nearly destroyed ..	200,000
Canning, N.S.	Business section	68,500
Chicoutimi, Que.	Business section	1,250,000
Cobalt, Ont.	Business section	30,000
Kenora, Ont.	Lumber mill	100,000
Saskatoon, Sask.	Department store	500,000
Montreal, Que.	Fifty residences	100,000
St. Scholastique, Que.	Business section	28,000
Sarnia, Ont.	Electric plant	300,000

\$3,586,000

Structures Damaged and Destroyed.

The structures damaged and destroyed were 70 residences, 9 business sections, 5 stores, 4 each lumber mills, factories, 3 foundries, 3 each stables, barns, 2 each churches, hotels, freight sheds, 1 each rolling mill, flour mill, railway depot, round house, power house, club house, ice-house, telephone exchange, pool room, barber shop, college, soda water works, grain warehouse, gasoline container, electric plant.

There were 500,000 staves, 15 tons hay, 6 horses, 2 miles wire fencing, 1 each buggy, motor launch, gasoline truck destroyed.

Of the presumed causes 4 were attributed to lamp explosions, 3 children playing with matches, 2 each cigarette stubs, incendiary, sparks, friction, 1 each oil stove explosion, defective chimney, overflowing of a pot of soap grease. Forest fires did much damage and many fires were reported as of unknown origin.

The number of deaths from fire is 6, (the lowest number for a considerable period) making 101 for the first six months of 1912.

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	27	27	27
February	15	12	11
March	20	18	24
April	37	20	15
May	15	28	18
June	52	13	6
July	15	110	..
August	11	22	..
September	10	13	..
October	16	17	..
November	19	20	..
December	19	17	..
Total	256	317	101

The fires at which fatalities occurred were as follows:—

Sault Ste. Marie, Ont.	Burning building	1
St. Thomas, Ont.	Clothes set on fire	1
Quebec, Que.	Burning building	2
Ridgetown, Ont.	Clothes set on fire	1
Amherst, N.S.	Clothes on fire	1
		6

PROMINENT STOCKBROKER PASSES

The death occurred on Saturday of Mr. John Stark, Toronto, of the firm of Messrs. John Stark & Company, stockbrokers. Mr. Stark had been ailing for some time. He was born in Tiverton, Devonshire, England, on June 15th, 1836, and came to Canada about 1854, settling first in Guelph, and afterwards, for brief periods, in Bayfield and Oshawa. In 1857 he came to Toronto, and after two years' experience as a bookkeeper he entered the office of Blaikie & Alexander, brokers. He continued in that business under the firm name of Blaikie & Alexander, Alexander & Stark, and now John Stark & Company, his sons, Charles T., Harry L., and his son-in-law, Mr. E. B. Freeland, being his partners.

Mr. Stark was a member of the Toronto Stock Exchange, of which he was president on two occasions, and was a life member of the Toronto board of trade. In charitable work he was a leader for many years, being connected with the Toronto City Mission, and for many years its president.

EDMONTON INVESTIGATES TOFIELD'S GAS SUPPLY

A heavy flow of natural gas has been struck at the town of Tofield, on the main line of the Grand Trunk Pacific, forty miles east of Edmonton. The town has been conducting boring operations as a municipal enterprise for about a year past. For some time strong indications of gas were evident, and it was obtained in comparatively small quantities, and could not be considered a commercial proposition until a few days ago, when there was encountered an enormous flow under very heavy pressure. The volume of the flow is variously estimated at from 1½ to 2 million feet per day. Edmonton city council has taken action with a view to obtaining expert information as to the practicability of piping this gas into the city. The city is about to embark on the installation of a municipal gas plant. The work will be immediately proceeded with so far as the mains are concerned; but action on the ordering of the generating plant will be suspended until the possibilities of the Tofield discovery have been investigated.

Practically at the same time a strike of gas in large volume and under heavy pressure was made at Pelican Rapids, about 175 miles north of Edmonton, on the Athabasca River. Boring has been going on there for oil in the interests of a syndicate of Edmonton capitalists, and will be proceeded with, with the expectation of finding oil in strata below.

Mr. W. F. Stevens, provincial live stock commissioner, who has just returned from a trip covering a large part of the province, reports live stock conditions as eminently satisfactory throughout Alberta. Pasture has been excellent and there is practical freedom from disease of any kind.

The Imperial Car Company, a branch of the Mager Car Works, Passiac, N.J., will erect a million dollar plant at Hamilton, Ontario, employing 800 hands.

The city of Quebec which was recently authorized to borrow \$800,000 for urgent needs, has found it impracticable at present to sell bonds as the English market is unfavorable.

The Bank of Montreal offered to advance the amount in treasury bills, payable in six months at a rate of 3¼ per cent., and the city has accepted this offer.

PANAMA CANAL CONFERENCE

Important Resolutions Adopted at Calgary—Western Grain Outlet

Several important resolutions were adopted at the Panama Canal conference held at Calgary the other day. These related to the appointment of a committee to effect a permanent organization; to alleged excessive railway freight rates; a request for provincial and federal aid in erecting grain elevators on the Pacific coast; and for the direct attention of the Dominion Government to any plans which our Pacific coast cities may present for the betterment of their facilities for waterway transportation. The full text of the resolutions is as follows:

Resolution No. 1. Whereas, there is urgent need that advantage should be taken of every opportunity in order that the possibilities of this route should not be lost too Western Canada, and

Whereas, the present system of endeavoring to exploit places instead of working for the complete plan is liable to result in a loss to the West, and

Whereas, it is advisable that steps should be taken to effect a permanent organization which will work to secure the full value of the western route to the people of Western Canada.

Therefore, be it resolved that a permanent organization be effected to carry on the work and to bring into force the wishes of this conference and any other matter relating to the development of Western Canada and of the western route;

Further, that a nominating committee be appointed by this conference, so that the executive having in charge the building up of this permanent organization shall be representative of the three western provinces.

As to Freight Rates.

Resolved that this convention, composed of boards of trade, municipal organizations, and farmers of Western Saskatchewan, Alberta and British Columbia, express its deep conviction that excessive freight rates between Saskatchewan and Alberta on the one hand and British Columbia on the other, are seriously hindering and diminishing the interchange of products under present conditions and retarding development in the three provinces.

And it is further the conviction of this convention that the time has now arrived when a substantial reduction in rates should be effected, which will not only be of greatest importance and benefit to the producers and consumers of these provinces but to the railway companies as well.

Want System of Elevators.

Whereas, steps have been taken by the various interests to inaugurate the western shipment of grain, and

Whereas, it is recognized that with the rapid development of the West through the present channels for marketing grain will soon be completely blocked, a conservative estimate giving the wheat crop alone of Western Canada for the present year at 250,000,000 bushels, and

Whereas, the development of the Pacific coast ports and all other western routes would tend to relieve the congestion in Alberta and Western Saskatchewan by providing facilities which would be available the whole year round, and

Whereas, the grain export business by the Pacific routes will materially help conditions providing the facilities are forthcoming, and

Whereas, it is essential that terminal facilities be erected at once if full advantage is to be taken of these routes,

Therefore, this conference of boards of trade, municipal organizations, and farmers of Saskatchewan, Alberta and British Columbia do strongly urge upon the Dominion Government and upon the Board of Grain Commissioners of Canada, the necessity of at once securing and proceeding with the erection of an up-to-date terminal elevator, with sacking and hospital facilities attached, which will be operated in the interests of the people as a public utility, and that the governments of the three western provinces be asked to assist in presenting this matter to the Dominion Government so that speedy action can be taken thereon.

Help from Dominion Government.

That in view of the export trade of wheat and the rest of the enormous traffic that will flow through western channels following the opening of the Panama Canal, and also in view of the congestion of the eastern route resulting in heavy loss to the farmers and to the whole population in Canada, the Dominion Government be urged to give its best attention to any places approved by its engineers and endorsed by the municipalities immediately interested that will tend to relieve the above situation.

A series of articles respecting the relation of Western Canada to the Panama Canal will commence in The Monetary Times on July 20th.

"Canada and the Panama Canal"

(With especial reference to Western Canada)

Series of Articles

(By THE EDITOR)

To begin in The Monetary Times on July 20th

- (1) History of the Canal
- (2) Canal Tolls and United States Preference
- (3) Tolls and Their Relation to Commerce
- (4) General Changes the Canal May Effect
- (5) Savings in Distances
- (6) The Canal and the Railroads
- (7) Western Canada Wheat and the Canal
- (8) British Columbia's Just Claims
- (9) Canada's Pacific Grain Ports
- (10) Canada's Pacific Ports, Their Facilities and Shipping.
- (11) Western Coal Resources
- (12) Western Canada's Lumber
- (13) Western Canada's Fisheries

The articles will be illustrated with maps and diagrams to give the reader a clear idea of the ways in which the Panama Canal will likely affect the world's shipping and commerce generally, and particularly its effect on Western Canada.

SPECIAL OFFER.

In order to introduce The Monetary Times, we offer the issues containing these articles, commencing July 20th, for Twenty-Five (25) cents, postpaid. Fill out coupon and return with Twenty-Five (25) cents in stamps or coin to

THE MONETARY TIMES,

62 CHURCH STREET,

TORONTO, ONT.

COUPON

Enclosed herewith is Twenty-Five Cents for which send to address below, The Monetary Times for specified issues commencing July 20th.

CAUSES THAT DIVERT WHEAT TRAFFIC

Montreal and New York—Market Conditions and Availability of Ocean Tonnage

Of the 63,641,000 bushels of Canadian wheat which were transported through the Canadian canal at Sault Ste. Marie during the past year, 43.8 per cent. went to Buffalo, states the annual report on canal statistics for 1911 prepared by Mr. J. L. Payne, comptroller of statistics. Wheat is supposed to follow the channel offering the lowest freight rates, other things being equal. In this instance, however, distance and freight rates were substantially in favor of Montreal, and yet other considerations caused nearly half of the wheat which came down last year from the Canadian West to find an outlet to the ocean through the port of Buffalo. The course of the wheat trade during the month of November, 1911, may be taken as illustrating the situation. In that month 18,021,300 bushels of Canadian wheat were passed through the Canadian canal at Sault Ste. Marie, or nearly one third of the total volume for the year. The all water freight rate from Fort William to Montreal in November was 4½ cents per bushel.

Comparison of Freight Rates.

The water rate from Fort William to Buffalo was 3½ cents per bushel plus 5½ cents by rail from Buffalo to New York. Montreal and New York are the essential points of comparison. Thus in November the freight rate from Fort William to Montreal was 4½ cents, as compared with 9 cents to New York. This would establish a controlling influence in favor of Montreal, and other things being equal it would be; yet in that month 48.3 per cent. of all the Canadian wheat which came down from the West, including that which passed through the American canal, went out by way of Buffalo, New York.

Careful inquiries were made as to the conditions which operated in November last and which in some degree operate in all seasons, as a countervail to the lake freight rates in favor of Montreal. They were ascertained to be: First, availability of ocean tonnage at New York; second, lower ocean rates between New York and foreign ports; and third, lower ocean insurance rates from New York.

These factors were obviously sufficient to divert, in November last, nearly half of all the Canadian wheat from the West into American channels.

November is the rush month in the wheat trade. Market considerations may under such circumstances, rise above the immediate question of rates. Delivery at a foreign port within a specified time may depend on the choice of the dearest available channel rather than the cheapest, and it is probable that this very situation caused the diversion of millions of bushels from the port of Montreal in 1911. Under such conditions, mere uncertainty as to ocean tonnage may turn the scale. Marine insurance rates remained unchanged during the year. In November they ran from 65 cents to \$1.10 per \$100 from Montreal as compared with 12½ to 15 cents from New York.

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks of July 6th, 1911; June 27th and July 4th, 1912, with percentage change:—

	*July 6, '11.	June 27, '12.	*July 4, '12.	Ch'g %

Denomination, \$500

Due June 1st, 1927

Interest payable semi-annually, June and December, at The Molsons Bank, Montreal and Toronto, and Kleinwort Sons & Co., London, England.

Debentures may be registered as to principal only.

Bankers: THE MOLSONS BANK

Trustees: MONTREAL TRUST CO.

CAPITALIZATION

	Authorized	Issued
Convertible 5% Gold Debentures	\$1,000,000	\$1,000,000
Common Stock	2,500,000	1,000,000

From a letter of the President of the Company and the Certificate of Price, Waterhouse & Co., we summarize the following salient points:—

1. Debentures are issued under a Deed of Trust to the Montreal Trust Company as Trustee and are direct obligations of the Company chargeable against its entire assets but without specific registration against real estate. The Company covenants, however, not to issue any further bonds or debentures secured by specific registration or otherwise ranking prior to this issue.

2. The Company's assets consist chiefly of revenue producing real estate situated in the City of Montreal, on commercial streets where values are constantly increasing. In every case, the present market values are in excess of the price paid for the properties when acquired.

3. Total net assets, as at May 31st, 1912, exceed \$2,110,000 behind the \$1,000,000 Debentures and \$1,000,000 Common Stock issued.

4. Net profits for the year ending December 31st, 1911, applicable for debenture interest, \$157,666.80—over three times amount required.

5. For The Four Months Ending April 30th, 1912, the net profits amounted to \$334,117.74—over 6½ times the annual Debenture interest.

6. Convertible at the option of the holder into common stock at par at any time during the life of the debenture upon fifteen days' notice being given to the Company. Debenture holders will be entitled to receive cash for the amount of accrued interest on their debentures up to the date of conversion.

7. One million dollars of the authorized Common Stock is specifically reserved against the conversion of the Debentures, and the Company further covenants not to issue the remaining \$500,000 Common Stock until such time as all the Debentures have been converted or redeemed.

8. Cumulative Sinking Fund of 2½% per annum commences June 1st, 1913, and if no Debentures are converted this provision is sufficient to retire over 45% by maturity at 105 and accrued interest.

9. Redeemable at 105% and accrued interest on any interest date upon two months' notice. In the case of debentures being called for redemption the holder has the right of converting the same into Common shares provided such right is exercised within sixty days following the first notice of the call.

10. The General Manager of the Company is Mr. Jas. E. Wilder, who is recognized as one of the foremost judges of real estate in Montreal.

Negotiable 5% interim certificates will be issued pending delivery of Definitive Debentures.

All legal matters relating to this issue have been approved by Messrs. Lafleur, MacDougall, Macfarlane & Pope, Montreal.

Copies of the Trust Deed, Balance Sheet and Statement showing valuations as made by Mr. Wilder may be seen at our office.

Descriptive Circular, Map showing properties owned and Application Form will be forwarded upon request.

All applications received will be subject to allotment.

DEBENTURES FOR SALE

TENDERS FOR PULPWOOD LIMIT.

Tenders will be received by the undersigned up to and including the 15th day of August next, for the right to cut pulpwood on a certain area situated on the Abitibi Lakes and River, tributary to the Grand Trunk Pacific Railway, and the Temiskaming and Northern Ontario Railway, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario,—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, Ontario, May 15th, 1912.

DIVIDENDS AND NOTICES

A. E. REA & COMPANY, OTTAWA, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a dividend of one and three-quarters per cent. upon the paid-up preferred capital stock of the company has been declared for the current quarter, being at the rate of seven per cent. per annum, and the same will be payable at the office of the company, or any branch of the Standard Bank of Canada, on and after the second day of July next.

By order of the board.

GEO. A. WANLESS,

Secretary-Treasurer.

Ottawa, June 29, 1912.

MEXICO TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of one and three-quarters per cent. (1¾%), (being at the rate of 7% per annum), has been declared on the capital stock of the **Mexico Tramways Company** for the quarter ending June 30th, 1912, payable on the 1st day of August, 1912, to shareholders of record at the close of business on the 13th day of July, 1912, and that the transfer books of the company be closed from 15th July to 31st July, 1912, both days inclusive. Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York, N.Y.; Mexico City, Mexico; London, England, and branches.

The holders of bearer share warrants on detaching from their share warrant coupon No. 13 and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York, N.Y., or London England, on and

Mr. W. D. Power, who has been traffic manager for the Vancouver board of trade, has joined the British Columbia Electric Railway Company as general freight agent. The company has been laying out freight yards and acquiring property for the purpose, the plan being to engage much more actively in this part of the transportation business.

Mr. C. W. Rowley, of Winnipeg, sends the following Dominion Day thoughts. "We believe in our Country—The Dominion of Canada. We believe in our King, our Flag, our Constitution, our Laws, our Institutions, and the principles for which they stand. We believe in our future—we believe in our vast natural resources from the Atlantic to the Pacific, our great possibilities—yea, our wonderful certainties. We believe in the Canadian people, in their honesty, integrity, reliability, genius, in their brain and brawn. We believe that nothing can stand in the way of our advancement and prosperity. The great thing to remember is that we are all Canadians—in our veins runs the blood of many an old and new world nation. We are kin to each and identical with one only. We should keep ever before our eyes the fact that we are a British Canadian people, with high ideals and standards. Let us be true to ourselves, for then we cannot be false to any man. We who live in Canada should be proud of the fact and live so that Canada will be proud of us."

after the 1st day of August, 1912, will receive in exchange for each coupon the sum of \$1.75, representing the amount of the dividend.

By order of the board.

W. E. DAVIDSON,

Secretary.

Toronto, Canada, 28th June, 1912.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend of one per cent. (1%) has been declared on the ordinary shares in the capital stock of **The Mexican Light and Power Company, Limited**, payable on the 15th day of July, 1912, to shareholders of record at the close of business on the 6th day of July, 1912;

THAT the transfer books of the company for the ordinary shares be closed from the 8th day of July to the 15th day of July, 1912, both days inclusive.

By order of the board.

W. E. DAVIDSON,

Secretary.

Toronto, Canada, 28th June, 1912.

THE SOVEREIGN BANK OF CANADA

Notice is hereby given that the Annual General Meeting of the Shareholders will be held at the Head Office, 928 Traders Bank Building, Toronto,

Tuesday, the Ninth Day of July Next,

for the election of Directors and for the transaction of such other business as may be brought before the meeting. The chair will be taken at 12 o'clock noon.

By order of the Board.

F. G. JEMMETT,

General Manager.

Toronto, 5th June, 1912.

The city clerk of North Vancouver is Mr. T. Shepherd, not T. Howard as printed in a recent issue of The Monetary Times.

Mr. G. T. Somers, president of the Sterling Bank, has left for his annual tour of Western Canada and British Columbia.

The shareholders of the Traders Bank at a meeting on Tuesday decided unanimously to accept the terms of agreement by which their institution may be absorbed by the Royal Bank. A meeting of the shareholders of the Royal Bank was held on Thursday in Montreal for the purpose of ratifying the agreement. Application will now be made to the Treasury Board for approval of the merger. The arrangement should be concluded by autumn.

The Edmonton Life Underwriters Association's president is Mr. J. Bert Morgan, Great West and Mr. Ernest is Reynolds secretary. The executive committee are Messrs. Richardson Young, Manufacturers; DeBlois, Thibadeau, Travelers; J. Kilgour, Excelsior; J. B. Edgett, Metropolitan. The membership at present is thirty and it is expected that the numbers will be increased before the August meeting of the L.U.A.C. Mr. N. T. Truell, Western vice-president, paid a visit to this association recently and was entertained at an informal dinner. Mr. W. L. Reid, of Ottawa, who is visiting the West was also a guest.

LONDON AND LANCASHIRE LIFE AND GENERAL ASSURANCE ASSOCIATION, LIMITED.

Unusual interest is attached to the latest report, for the year ended December 31st, 1911, of the London and Lancashire Life and General Assurance Association, Limited, of London, England, as that company will shortly celebrate its fiftieth anniversary.

The new life business of the association during 1911 amounted to \$4,092,565, being a large increase of \$800,000 over 1910. There was a total new premium income of \$156,833 compared with \$146,576 in 1910. The total net life premium income was \$1,623,450, showing a gain over that for 1910. Claims by death, with bonus additions, amounted to \$717,153. Matured endowments with bonus additions totalled \$489,342. After payment of all outgoings, the life and annuity fund exhibited an increase of \$513,433, raising it to an aggregate of \$13,469,745. The total assets of the company exceed \$14,500,000. This is a good showing and the chairman of the company at the annual meeting held in London recently, congratulated the Canadian branch upon the result of its operations last year.

An exceptionally satisfactory feature of the company's forty-ninth annual report is that, coincident with an increase in the life insurance business, there was also a reduction of 1½ per cent. in the expense ratio. That is not only a pleasing but also a strong feature of the report.

The London and Lancashire Life was established in 1863 and is regarded as one of the substantial companies of our time. Two years ago, the Canadian management, which has its head office at Montreal, was taken over by Mr. Alex.

Bissett, who had been associated with the company for many years previously. The London and Lancashire Life has a good organization throughout the Dominion, under the able management of Mr. Bissett. The office for Ontario is at 79 Adelaide Street East, Toronto, where the branch manager is Mr. Walter J. Morris. Mr. Morris has been keenly alive to the interests of his company in that province.

The directors of the Canadian organization are: Lord Strathcona, H. Stikeman, A. J. Daws, Hugh Paton and E. L. Pease. The directors of the central Canada branch, Winnipeg, are: W. R. Allan, C. C. Chipman, A. L. Johnson, D. E. Sprague.

To encourage mixed farming in the prairie provinces and prove to the farmers generally that this class of agricultural industry can be made to pay handsomely, and incidentally to start every farmer in Alberta, Saskatchewan and Manitoba along the line of mixed farming, the Canadian Pacific Irrigation Department has inaugurated a campaign of locating mixed farming demonstration farms in the three prairie provinces. These farms have already been located. Work has commenced on the breaking of the ground and building of houses, and in Calgary, Mr. James Hart, superintendent of improved farms for the C.P.I. announced that ten of the new demonstration farms would be located in Alberta, ten in Saskatchewan and five in Manitoba.

The International Railway Company has applied to the government for permission to dam the Fraser River near Yale, B.C., to develop power for the operation of tramways on the lower mainland. United States capital is behind the project.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

GRAND TRUNK WAREHOUSE BONDS

New Company is Making Large Issue—Land Company Places Debentures in London.

The Grand Trunk Terminal Warehouse Company, Limited, with headquarters at Montreal, which will establish a chain of terminal warehouses from that city to the Pacific Coast, in connection with the Grand Trunk and Grand Trunk Pacific Railway systems, has capital of \$16,500,000. Of that sum \$10,000,000 is bonds and the remainder common stock. The first offering of the bonds was made privately this week by the Quebec Savings & Trust Company, and it was stated that although there had so far been no public announcement of the issue, upwards of \$1,000,000 of the issue had been taken during the first day.

More Issues in London.

The Southern British Columbia Land Company has offered in London at par £30,000 six per cent. first mortgage debentures, redeemable at 105 per cent. The company proposes to acquire as a going concern the Baynes Lake Estate, East Kootenay, and develop by irrigation fruit and other crops.

Leading British engineering firms are making a serious and united effort to secure a larger share of Canadian contracts. The prospectus was issued last week of the Canadian-British Engineering Company, offering £100,000 seven per cent. preferred ordinary pound shares. The firms for whom the new concern will hold the sole agency in Canada are Armstrong-Whitworth, Cammell-Laird Company, Dorman-Long Company, Power Gas Corporation, Ransomes, Sims & Jeffries, Sandy Croft Foundry Company, Williams & Robinson Company. The managing director in Canada is Mr. William A. Martin, Toronto, and in London, Mr. Leonard Andrew.

An issue of £200,000 five per cent. refunding general mortgage bonds of the Porto Rico Railway Company was recently offered in London at 92½ by the Royal Securities Corporation, Limited, (of Canada).

Applications have been made to list the following on the London Stock Exchange: Central Railway Company of Canada £162,000 fives, City Estates of Canada £155,000 sixes.

Realty Debentures Offered.

A million dollars 5 per cent. convertible gold debentures of the City Realty Investing Company of Montreal, Limited, are being offered by the Royal Securities Corporation, Limited, at 97½ and interest. The company has an authorized capital of \$3,500,000, of which \$2,500,000 is common stock and the remainder debentures. One million of each has been issued. This company was incorporated last year and subsequently acquired the assets and liabilities of the City Realty Investing Company, Limited, which began operations in 1910. The old company had met with success and it was thought advisable to operate with additional capital on a much larger scale. One million dollars of the authorized common stock is specially reserved against the conversion of the debentures, and the company further covenants not to issue the remaining \$500,000 common stock until such time as all the debentures have been converted or redeemed.

Commencing on June 1st, 1913, and annually thereafter, a cash sinking fund of 2½ per cent. on all debentures issued, with the exception of those converted into common stock plus an amount equal to the annual interest on all debentures redeemed through the action of the sinking fund or converted, is to be paid to the trustees and used by them to purchase and retire the outstanding debentures at a price not exceeding 105 per cent. and accrued interest and debentures will be called for redemption at that price if not otherwise purchasable on the market at a lower price.

Assets and Earnings.

The company's assets consist chiefly of revenue producing real estate situated in the city of Montreal, on commercial streets where values are increasing. In every case, the present market values are in excess of the price paid for the property when acquired. The company has, since December 31st, 1911, sold one of its properties at a profit of \$310,000, which was \$100,000 in excess of its appraised value by the company. The total net assets of the company including real estate, mortgages, and unpaid balances on properties sold, cash on hand, etc., as at May 31st, 1912, together with the proceeds of the present debenture issue, and after deducting liabilities, including mortgages outstanding, amount to over \$2,110,000.

The net earnings of the City Realty Investing Company, Limited, for the twelve months ended December 31st, 1911, after providing for the payment of commissions, taxes, insurance and all other expenses, but before charging bank interest, as certified by Messrs. Price, Waterhouse & Co.,

amounted to \$157,666.80. For the four months ended April 30th, 1912, the net earnings amounted to \$334,117.74, which is equal to over 18 per cent. on the common stock, after paying all salaries and the entire annual bond interest and sinking fund. The proceeds of this issue will be used for retiring current liabilities and for further purchases which can be profitably made at the present time.

The directors are: Messrs. J. E. Wilder, president, Wilders, Limited; F. P. Jones, general manager, Canada Cement Company, Limited; A. R. Doble, director, Western Canada Power Company, Limited; R. A. Dunton, notary; V. M. Drury, secretary.

Sale of Maritime Nail Company's Bonds.

The balance of a block of \$150,000 6 per cent. 10-year first mortgage gold bonds of the Maritime Nail Company, Limited, are being offered at 100 and interest by Messrs. J. G. MacIntosh and Company. Their denomination is \$500. They are redeemable at 105 per cent. The company finds it impossible to take care of its orders with their present equipment and the money from the sale of their bonds will allow for betterments and extension of plant. The company earned in 1911 over three times the bond interest and amount required for sinking fund each year. Their net earnings for the first five months of 1912 show an increase of 25 per cent. over the earnings of the same period of 1911.

INDUSTRIAL ACCIDENTS IN MAY

Industrial accidents occurring to 331 individual work people in Canada during the month of May, 1912, were recorded by the Department of Labor. Of these, 90 were fatal and 241 resulted in serious injuries.

In the preceding month there were 62 fatal and 227 non-fatal accidents recorded, a total of 289, and in May, 1911, there were 52 fatal and 121 non-fatal accidents, a total of 173. The number of fatal accidents recorded in May, 1912, was, therefore, 28 more than in the preceding month, and 38 more than in May, 1911. The number of non-fatal accidents recorded in May, 1912, was 14 more than in the preceding month and 120 more than in May, 1911. Altogether there were 42 more industrial accidents reported in May, 1912, than in the preceding month and 158 more than in the same month of the preceding year.

GENERAL CROP DATA

A cablegram received from the International Agricultural Institute, Rome, gives the following data respecting the 1912 cereal crops:—

	Area sown, 1912, acres.	Estimated production, 1912, bus.
All wheat winter and spring.		
Spain	9,582,000	117,374,000
France	16,180,000	
Hungary	9,404,000	
India	20,387,000	366,371,000
Japan	1,248,000	24,453,000
Algeria	3,372,000	
Tunis	1,263,000	
All rye—		
Belgium	642,000	
Spain	1,994,000	27,960,000
France	2,998,000	
Hungary	2,949,000	
All barley—		
Spain	3,614,000	63,481,000
France	1,869,000	
Hungary	2,804,000	
Japan	3,123,000	95,590,000
Tunis	1,102,000	6,146,000
Algeria	3,160,000	
All oats—		
Spain	1,230,000	23,630,000
France	9,896,000	
Hungary	2,724,000	
Algeria	506,000	
Corn—		
Spain	1,147,000	
France	732,000	
Hungary	7,188,000	
Italy	4,066,000	

Crop conditions in a percentage of a condition promising an average yield per unit of area. All wheat, Hungary 105, Roumania 133, Tunis 100. All rye, Belgium 107, Hungary 102, Roumania 120. All barley, Hungary 100, Japan 116. All oats, Hungary 100. Corn, Spain 100, Hungary 110, Roumania 120.

BANK AMALGAMATIONS

The President of the Royal Bank took occasion at the special general meeting last week to give his views on the subject of bank amalgamations. He thought that there would never be any lack of competition between banks in this country as a consequence. As an illustration, he stated that already one or more competing banks have announced their intention to open in the towns where the Royal Bank and Traders Bank are duplicated, so that it would appear that deserving borrowers will have no difficulty in obtaining their requirements. He also stated that when Canada was a country of small affairs, small banks sufficed, but that we must have banks with large resources to handle the large operations of the present day; that from the standpoint of the shareholders amalgamations tend to economy in administration and to the elimination of waste from the duplication of branches, and, most important of all, they make for financial security and stability. It is well known, he said, that bank amalgamations are widely favored in England and Scotland, where the resources of powerful banks have been considerably built up through this generally approved medium.

These considerations, as described by Mr. Holt, are important. While there have occurred many bank amalgamations in recent years, several new banks have at the same time commenced business. Another will open its doors, with headquarters at Moose Jaw, early this fall. There is talk, too, of the formation of a large banking institution at Vancouver.

Whenever business men in any particular district feel a really serious pressure through lack of credit or imagine that banking facilities are insufficient, they do one of three things—complain, change their banking

connections or start a new bank. Facilities generally being adequate, complaint is rare, the switching of bank accounts becomes a matter of competition, and new banks are few and far between. No obstacle exists to the organization of more banks in Canada. Strong and capable men may be able to operate a sound and successful banking institution. Inexperienced or unscrupulous men, who imagine a bank operated under their charge will solve alleged grievances, will come to grief, as in the past. A substantial bank can always find room, although how much good business it will get depends upon what is offering, the enterprise of its officials, and the drawing of a sharp line between banking business and bank gambling.

We hear little grumbling regarding the manner in which the banks serve the country. Complaint usually comes when certain classes are short of money and their credit is curtailed before their appetite is satisfied. Usually, that is a good sign. It means that the banks have properly checked the speed of the economic machine. If those who lament most as to banking facilities had all the money desired, the country would rapidly experience serious disaster. If the number of our banks is reduced still further by amalgamation and an opportunity is opened for Canadian, British or foreign capital to establish a new bank, it will be established. Nothing will stop capital seeking satisfactory outlets.

STEEL INDUSTRY FOR BRITISH COLUMBIA

The opening of the Panama Canal will develop the coal industry in British Columbia. That in turn may draw greater attention to the iron deposits in the province, and later mean the establishment of iron and

steel works on our Pacific coast. Important bodies of high-class magnetite are known to exist, the most familiar being Texada Island, Bugaboo Creek, on the west coast of Vancouver Island; at Quinsam, near Campbell River, and on Louise Island, of the Queen Charlotte group. Of these, Texada Island is considered the most important, as the quality is high grade and as the quantity is large. Its situation is such that with moderate equipment it could deliver ore on ship at tide water at a very low figure, possibly not to exceed 70 cents per ton. At Quinsam a crew has been kept on development all winter. Little has been done on the other properties, but mining engineers had spoken highly of them, both with respect to quality and quantity.

In the opinion of Mr. R. R. Hedley, one of the foremost mining experts in Canada, and a particular authority on British Columbia, the building of a plant on our Pacific Coast to manufacture iron and steel is not only justified, but required. There is a large increase in the use of structural steel and reinforced concrete. Railway construction and maintenance and the general rapid progress of the country are also good reasons for the construction of such a plant. During the last quarter of a century the Union Iron Works of San Francisco have made the best of pig iron at Irondale, Wash., from Texada ores. More recently the Western Steel Corporation, with modern plant at the same place, made pig iron, using Fernie coke costing \$10 per ton. This was intended as the nucleus of structural iron and steel works, but it was found that Chinese pig iron could be laid down at a cost of \$10 per ton, and smelting of local ore was abandoned. With equipment none too good from the economy point of view, the costs were reasonable, but the enterprise was not properly financed, and operations ceased. Given a good quality of metallurgical coke costing not more than \$5 per ton, which it is reasonable to expect in the near future, there is no reason why British Columbia pig iron should not take the place of Chinese, and a profitable industry be established on our own side of the line. Cheap power is also available.

FIRE INSURANCE IN CANADA

Fire insurance in Canada has assumed large proportions. The net amount at risk at the end of 1911 was \$2,278,000,000 as compared with \$2,034,000,000 in 1910. The British companies have more than half of that total, viz., \$1,270,000,000. The Canadian companies have \$548,000,000 and American companies \$459,000,000. Last year \$27,000,000 represented the gross cash received for premiums. Of that sum, British companies claim \$13,000,000; Canadian companies, \$8,000,000, the remainder going to American companies and to the Union Assurance, of Paris, France, one of the most recent additions to Canadian underwriters.

Reinsurance and return premiums last year totalled \$6,649,251, as compared with \$5,424,258 in 1910. These amounts were divided as follow:—

Companies.	1910.	1911.
Canadian	\$2,774,053	\$3,661,466
British	1,935,701	2,156,920
American	714,504	830,865

It will be seen from figures printed on another page that the net amount of losses incurred during 1911 by the 24 Canadian, 21 British, 16 American companies, and one French company, totalled \$10,839,464, as compared with \$10,931,918 in 1910. The net amount paid for losses in 1911 was \$10,937,159, against \$10,292,393. That was an average payment of \$176,405 by each company. The losses in Canada continue at an alarming rate. The fire waste during the first six months of the current year have exceeded \$14,000,000 as compared with \$21,000,000 for the whole of 1911. The losses in

June totalled more than \$4,000,000, a waste that month at the rate of \$97.90 per minute. Fire insurance companies have paid losses since 1869 amounting to \$201,000,000.

The gross amount of policies, new and renewed, last year was \$1,487,000,000 compared with \$1,817,000,000 in 1910. British companies obtained of that sum \$998,000,000; Canadian companies, \$572,000,000, and American companies, \$417,000,000. This makes interesting the following table referring to other phases of fire underwriting in Canada during a similar period:—

1869 to 1911	Canadian Cos.	British Cos.	American Cos.	Total
Premiums received...	\$ 71,495,492	\$ 200,455,922	\$ 48,086,765	\$ 320,038,179
Losses paid	45,849,954	127,500,113	28,145,453	201,495,520
Net cash premiums received	71,495,492	200,455,922	48,086,765	320,038,179
Policies taken during year	7,643,053,866	18,302,780,743	4,116,932,681	30,062,767,290

The total assets of the Canadian companies exceed \$14,000,000. The largest item in their assets is bonds and debentures of nearly \$7,000,000. Agents' balances and premiums outstanding amount to \$1,522,000; cash on hand and in banks, \$1,513,000, and loans on real estate, \$1,050,000. The total liabilities, not including capital stock, amount to \$6,503,000.

The bonds and debentures of British companies amount to \$12,724,000 of total assets of \$34,000,000 in Canada. Their loans on real estate approximate \$15,752,000. They hold real estate in Canada valued at \$2,396,000. The American companies have no real estate in this country. Of their total assets, amounting to \$5,175,000, \$4,028,000 is represented by bonds and debentures.

ISLAND SMELTERS

Judging by the publicity given the Island smelting process, the promoters have no lack of faith or hope. Sir Donald Mann gave them an opportunity to treat a car of zinc lead ores from British Columbia. No results were secured, and Sir Donald relinquished his option upon the process. Shareholders of the company have just received a circular announcing an issue of 100,000 shares of treasury stock at 25 cents a share—Island Smelter stock is selling around 6 cents a share in Toronto—to provide funds to erect a plant for the manufacture of nitric acid. The circular states that the experiments being made for the benefit of Sir Donald Mann failed because of an irregular electrical power supply.

This company's stock has fluctuated considerably in the past, according to the reported movements of Sir Donald Mann in regard to the test. There was far too much publicity before the actual test. The heavy or light breathing of Sir Donald almost caused the price of the stock to go up or down. More bulletins were printed daily about Island Smelters stock and the much-discussed test than the fussy wife of a millionaire soap manufacturer would issue respecting the health of her pet canary.

SMALL CHANGE

Put some of your faith and some of your money in Northern Ontario.

* * * *

Western Canada and British Columbia must meet the Panama Canal. That is what United States Pacific ports will do.

* * * *

The geographical board has changed the spelling of Temiskaming to Timiskaming—more eyes on the famous Northern Ontario clay belt.

The so-called "big interests" at the time of Regina's disaster, have again proved that they have a heart.

* * * *

A striking indication of the general demand for higher interest bearing securities was the establishment of new low records last week of British consols, French rentes and German consols.

* * * *

"Farmers from all parts of the county were in with produce, including butter, eggs, poultry, new potatoes, beets, carrots, fruit and green stuff. Producers and consumers dealt with each other direct. Nearly every housekeeper in Chatham must have attended with basket on arm, and there was enough produce on the market to satisfy all." This is a picture of the market at Chatham, Ontario, one which should impress itself upon Western Canada.

* * * *

The hot weather is taking the starch out of the mining promoter. Sales of shares of the Penniac Reef Gold Mines, Limited, with head office at Winnipeg, are apparently not as rapid as the officers and directors desire. In connection with their stock selling, a guessing contest has been started. The first thirty who guess nearest the correct number of shares sold on Monday, July 22nd, and on two other days to be selected by a committee, will receive an award of from \$10 in gold up to 2,000 shares in the company. The latter award is said to be worth \$1,000, with an anticipated value of \$3,000. We prefer the \$10 in gold. To make the guessing contest still more exciting, \$5 will be refunded out of the first envelope containing a remittance opened in the company's office every day from June 22nd to July 22nd. More than a year ago, the company's advertising literature stated what a wonderful mine Penniac Reef would prove. The wonder and the proof are still in the future tense.

* * * *

After patronizing home industries, there is every good reason that Canada should give surplus business to the countries of the British Empire. This matter has been raised in Melbourne. The Victorian cabinet has further considered the fact that the Krupp Importations

Committee found the material produced by British firms, which was refused by the Victorian Railway Commissioners, is used on British and Colonial railways throughout the Empire. They think that the commissioners were unjustified in granting to Krupps so large a proportion of the annual orders for tyres, wheel centres, axles and steel blooms. Premier Watts has announced that British firms sending tenders will receive substantial preference, besides more time in which to prepare tenders, and that the testing-place will be the place of manufacture. The commissioners, when recommending foreign goods, must in future submit an explicit memorandum to the government, giving their reasons, and the ministers will then review the proposal. This is fair. Too often in Canada it is made impossible for British firms to tender. The \$1,020,000,000 of British capital invested in Canada should entitle them at least to an equal opportunity with foreign countries.

* * * *

Canadian fire insurance agents are sometimes inclined to complain of restrictions put upon their business. These are by no means as rigorous as in many of the States. The State Insurance Commissioner of Oregon, for instance, calls the attention of agents to provisions which must be observed by them in that State, otherwise their licenses will be revoked. The agents must not solicit insurance for any company for which they are not licensed; must not solicit any other kind of insurance than fire insurance unless licensed by companies transacting such other class of insurance; must not accept business from or exchange with anyone but a licensed Oregon agent; must not pay commission or any remuneration whatever to any broker or anyone except a licensed agent; must not allow any rebate or any other valuable consideration to the assured or anyone representing him or employ per diem or monthly salaried men to solicit or write growing grain or hop insurance during the grain or hop season. The commissioner also makes the following suggestions: "General or special agents of companies may not solicit insurance except in company with their resident local agents. Agents should report violations of the law to which the above instructions pertain to this department, with such evidence of the violation as can be obtained."

TRANSPORTATION AND THE WEST

Interesting figures were given by Professor Odium, a Vancouver delegate, at the Panama Canal conference at Calgary recently. Discussing transportation facilities for Western Canada, Professor Odium said there were not enough men or money to build railroads and rolling stock, to keep pace with the agricultural development of Western Canada. "The three Prairie Provinces have an area of 432,000,000 acres," he continued. "Let us lay aside 32,000,000 acres for waste lands and lakes, and 200,000 acres for purposes other than raising grain for export. This would still give us an area of 200,000,000 acres. Now let us suppose that each acre would give 15 bushels on an average. The annual yield would be 3,000,000,000 bushels of grain. This is 90,000,000 tons of grain which would have to be moved out of the prairies every year. Suppose one railway hauled one train every hour for 300 days every year, it would move 7,200 trains in the year. If we divide 7,200 into 200,000 we find that 27.7 railways would be needed to remove the grain of a single crop.

"Let six railways run to Eastern Canada, 6 to Hudson Bay, 6 to the United States, 6 to British Columbia, and the balance to haul grain to the many prairie flour mills which will be erected in the future, and still the problem exists. Now turn your attention to the six westbound railways. These would carry exactly 144 trains daily on the above figures. Let four of these railroads go to Vancouver and two to Prince Rupert. The four going to Vancouver would have 96 trains daily. This gives us 43,200 tons of grain going to Vancouver every day for 300 days during the year. From this we can see that it would take four ships of over 10,000 tons each to keep the grain from blocking up our elevators. But this is not all. The 27.7 railways would have to double their tracks to return their empty cars, and the 200,000,000 acres left for stock raising and other purposes would demand many more railways, as would also the increased passenger traffic that would result with this increased freight traffic."

QUALIFICATIONS OF INSURANCE AGENTS

The qualifications of insurance agents is discussed in the annual report of Mr. C. A. Palmer, the State Insurance Commissioner of Michigan. The life insurance business, he says, has assumed the proportions of a profession and requires something more than a mere convincing talker to present it to the public.

"Because the average man cannot or will not attempt to analyze an insurance contract," Mr. Palmer continues, "he must depend more or less upon the understanding and honesty of the agent selling the contract for his information; hence it follows that the agent must not only be honest, but must be sufficiently educated to be able to understand at least the true meaning of a contract that has had the combined efforts of statisticians and lawyers to formulate. The one thing that is most essential of all in an agent is absolute honesty. Because of the nature of the insurance contract, it is very easily misrepresented, and while it is deplorable, it is, nevertheless, true that a great many agents do not confine themselves to strict and unvarnished truth.

"This evil is to some extent being eliminated by the co-operation of the better class of agents with the department in an effort to elevate the standard of the profession and to drive out of the business that agent whose only aim is the dollars that it brings him. A law setting forth certain qualifications for agents to be met before they receive a license from the department and empowering the commissioner to order an agent to show cause why his license should not be revoked, when it appears that he has been rebating, twisting or misrepresenting, would have a salutary effect upon the crooked agent and materially assist the honest agent in his effort to exterminate the twister and the rebater. I would recommend the abolishment of the criminal element of the law, and in its stead, confine the penalty to revocation of the agent's license, by the commissioner, after a proper hearing."

CANADA'S RELATION TO THE PANAMA CANAL

Canadian Produce for Latin America's Consumption—Direct and Indirect Effects of the New Waterway Upon Canadian Trade and Shipping

The following article, replete with interest, has been specially prepared for *The Monetary Times* by Mr. John Barrett, the Director-General of the Pan-American Union. This was written shortly before his departure for Europe

The Pan-American Union, of which Mr. Barrett is the capable Director-General is an international organization and office maintained by the twenty-one American republics, controlled by a governing board composed of the Secretary of State of the United States and the diplomatic representatives in Washington of the other American nations, administered by a director-general and assistant director chosen by this board and assisted by a staff of statisticians, compilers, trade experts, translators, editors, librarians and clerks, and devoted to the development and conservation of commerce, friendly intercourse and good understanding among all the American republics.—[Editor, *The Monetary Times*.]

The effects on Canadian commerce will naturally be twofold: direct and indirect. In considering the direct effects the first question which presents itself is, what does Canada produce that Latin America consumes? This in turn divides itself into the two questions:—(1) What can western Canada sell to eastern Latin America? and (2) What can eastern Canada sell to western Latin America?

For the present we will consider South American countries only, since this trade will be more directly affected by the new commercial routes, leaving the indirect effects on the trade with Mexico, Central America, and the West Indies, which will unquestionably receive a wonderful stimulus, for later consideration.

Canada's Trade With South America.

According to the Statistical Abstract of the United Kingdom, for 1911, Canada's trade with South American countries during the year ending March 31st, 1911, amounted to £1,740,632, of which £810,075 were imports and £930,557 were exports. Now let us consider for a moment just a few of the products which Canada sold to the world during this year, products which Latin America buys from the commercial nations.

Agricultural implements	£1,219,344
Bacon and hams	1,752,913
Cheese	4,271,756
Coal	1,283,910
Fish (salted, pickled and canned)	2,432,470
Flour (wheaten)	2,847,945
Wheat	10,256,590
Iron in pigs	61,353
Machinery (including sewing machines)...	213,372
Wood, lumber, etc.	8,795,690

What has this to do with the Panama Canal? Merely that these are all products which South America buys and that Canada will be placed in such shipping proximity to these countries by the opening of this new waterway that she will be enabled to compete with Europe and the United States in many of these articles of commerce. To illustrate: Chile, one of the leading South American countries on the Pacific Coast, enjoyed a foreign trade in 1910 of \$228,604,198, of which \$108,582,279 were imports and \$120,021,919 exports. Among the imports which may be of interest for Canada's future consideration we find:—

Mineral products	\$18,825,139
Coal and oils	18,778,313
Machinery, hardware, etc.	9,512,876
Paper and manufactures thereof	3,360,852

Under the mineral products imported we find:—

Steel and iron	\$12,242,739
Other metals	1,995,750
In steel rails alone	45,154 tons.
“ structural steel	1,873 “
“ corrugated iron	4,395 “
“ corrugated iron, galvanized	18,888 “
“ sheet iron	2,873 “
“ sheet iron, plain	4,564 “

Has Canada any interest in the iron and steel trade of Chile? It would seem so if the following excerpts from an article which appeared in *Cassier's Magazine* are true:—

“It is now known positively that iron ores abound in practically every province of Canada. * * * At present the chief Canadian blast furnaces draw most of their ore from Belle Isle, in Conception Bay, near St. Johns, Newfoundland. Newfoundland is very rich in iron ores, and nearly 1,000,000 tons are raised annually, most of which is used in Canada. But enormous and rich reserves of hematite ore have been found in New Brunswick, within easy distance of large coal fields. Deposits of huge quantity and high quality have also been proved in Ontario, Quebec and Nova Scotia in the east, and in Vancouver and British Columbia in the west. Recent investigations conducted by the Department of Mines, coupled with private prospecting, inspire the hope that Canada is as rich in iron and steel-making materials as the United States.” Again we read: “Already iron ore from Newfoundland is landed at Sydney, within 10 miles of the Cape Breton coal mines, at a trifle less than 10 shillings a ton, and pig-iron is being produced at little more than 30 shillings a ton. The manager of one of the Canadian steel mills claims that he can now make rails at \$6 a ton less than they can be produced in Pittsburgh.” It is said that steel rails have been imported into England from Canada.

East Canadian Products Via Canal.

Be it remembered that we are building for the future in the construction of the Panama Canal. Can the value of this waterway to the future iron and steel industry of Canada be estimated when we consider that Chile, Peru, Ecuador and Bolivia are just beginning to really want railroads, bridges, steel buildings, machinery, etc.? Draw a line—or better still—trace the 71st meridian of west longitude directly south from Quebec and see how close it comes to Valparaiso, the great port of Chile, and how little the deviation from this line to the other ports of the almost 5,000 miles of Pacific Coast of South America. You will then appreciate the enormous saving in distance for the transportation of east Canadian products to western South America via the Panama Canal.

The foreign commerce of Peru for the year 1910 amounted to 11,039,562 libras (the libra being practically the same as the English pound sterling), of which 4,631,280 libras represented imports. Details for 1910 are not available but coal, machinery, iron and steel products, wood and manufactures, dairy products, paper, etc., are among the leading articles. Did Canada sell very much to Peru in 1910? Ecuador's foreign trade amounted to \$21,690,476 (United States currency) in 1910. The people of that country needed foodstuffs to the value of \$1,286,553, hardware worth \$548,310, machinery \$459,727, and many other things which Canada has to sell. Did she sell them much of it? Bolivia, which is reached from the Pacific ports of Chile and Peru, had a foreign commerce of \$47,215,957, and she bought over \$2,500,000 worth of goods from Germany alone, and when you stop to think of it Germany is some distance from Bolivia—via the Strait of Magellan or the Horn. Eastern Canada, which successfully carries “coals to New Castle” in selling steel products in English markets, will have something like 2,000 miles advantage of her European competitors when the Panama Canal is opened up. Is she preparing for it?

New Markets for Canada.

Western Canada, too, has something to sell, and with the development of her agricultural resources; the great fish industry of British Columbia, whose catch for 1909 was valued at \$10,314,755; the opening of the great coal fields of British Columbia; the increasing wheat production of Alberta; the enormous production of wheat in Saskatchewan which doubtless may be shipped to either coast for export; all of this immense production of Canada will need new markets. The opening of the Panama Canal brings the markets of Brazil, Argentina, and Uruguay within the comparatively easy reach of ocean shipments of the products of British Columbia while the continually growing wants of the Pacific countries of South America may be supplied by the eastern States of the United States and eastern Canada instead of by continental Europe.

Among food products cheese, salted and canned fish, flour, etc., are imported in great quantities by South American countries. The great demand for lumber, especially yellow and spruce pine, iron and steel and their thousands of manufactures, is constantly increasing as the wonderful development of Latin America progresses and promises in the near future to test the productive power of both Canada and the United States to supply it. The following statistics, taken from official reports of only two of these countries should convince the most skeptical that this is no Utopian dream.

I take only a few of such products in which Canada can compete with the world in these markets.

Brazil imported in 1910:—

Coal	\$11,737,701
Pine lumber	2,040,730
Steel rails, couplings, etc.	6,571,588
Other iron and steel manufactures	3,015,802
Codfish	5,430,734
Other preserved fish	1,391,863
Flour	10,101,820
Condensed milk, butter, and cheese .	3,675,743

Argentina imported in 1910:—

	Pesos Gold.*
Food products	27,141,259
Timber, wood and its manufactures	8,670,726
Paper and manufactures	8,307,701
Iron, steel and manufactures	43,119,488
Other metals and manufactures	12,870,455
Agricultural implements	18,921,823
Railway cars, rails and equipment	35,095,183
Building materials	29,237,334

*(The gold peso of Argentina is worth 97 cents in United States currency).

Are We Getting Our Share?

Is Canada getting her share of this trade? Will she get her share when the present population of Brazil of 20,000,000 shall have expanded to the number her vast territory and resources can easily support—200,000,000?

Argentina has only about 7,000,000 people and can easily support 100,000,000. What will this trade be worth in the future is just as pertinent a question as what is it worth now.

Now as to the indirect effect on Canadian commerce of the opening of the Panama Canal. If Canada sees fit to enter into the world's competition for this expanding South American trade her steamship lines will necessarily increase their facilities. The number of their vessels and the frequency of their sailings will be increased. Ships on the way from British Columbia to Brazilian and Argentine ports will have the western coast of Mexico and Central American republics to pass en route. Important ports of call will be established along the route and thus the increased facilities will open new markets which are at present being neglected. The same will be true of ships sailing from your great ports on the St. Lawrence en route to Ecuador, Peru, and Chile. The trade of the West Indies, Venezuela, Colombia and the eastern coast of Central America will be looked after. But this is not all. New York is preparing to cater to the wants of Australia, New Zealand, Japan, and China via the Panama Canal. Contrast the two routes from New York:

To.	Via Panama, (miles).	Via Good Hope, (miles).
Adelaide	10,367	12,514
Melbourne	9,944	12,830
Sydney	9,659	13,306
Wellington	8,522	14,034

Products of Latin America.

Do Montreal, Ottawa, Quebec and Toronto propose to go to sleep because New York will have a slight advantage in distance to these ports? Their advantage over continental Europe will be almost as great as will be that of New York.

Chicago is getting ready to use the Panama Canal via the Lakes and the St. Lawrence—can Canada doubt that she will be equally benefited?

Another very important phase of the question must be considered. Canada needs some of the products of Latin America. In 1910 she had to buy:—

Sugar and molasses	\$14,256,007
Cotton wool and waste	9,384,801
Fruits and nuts	9,176,885
Tobacco and manufactures therefrom ...	4,030,670

Exchange Is Valuable.

These are but four items that occur to me that would go to make up a return cargo for ships that carry your products to Latin American markets. You need many of their products and the result of the exchange is valuable to both for both make a profit on what they sell and save on the transportation charges both ways when the trade is directly between the principals.

This sets forth in a crude way the unbiased views of an American who desires the advancement of all America and who hopes to see the opening of the Panama Canal inaugurate an era of wonderful prosperity in the Western Hemisphere, a prosperity to be shared by all of its countries from Bering Strait and Baffin Bay to the southernmost tip of The Horn.

PROGRESS OF TRANSCONTINENTALS

Both the Grand Trunk Pacific and Canadian Northern Will Likely be Completed in Two Years

Some time during 1914, the Grand Trunk Pacific and the Canadian Northern will be completed across the continent. With three transcontinental railroads, Canada should experience another impetus to further development. At the same time, freight congestion should be relieved and there may also be some adjustment in Western freight rates.

The Grand Trunk Pacific may possibly be finished next year, with the exception of the Quebec bridge, which cannot be completed for at least three years.

President E. J. Chamberlin, of the Grand Trunk, stated at Winnipeg, that the Grand Trunk Pacific's end of the National Transcontinental will be finished before the end of 1914, and sooner if labor troubles do not interfere. There will be no increased passenger service for the head of the lakes until rights-of-way have been fixed up. The company is getting ready to handle a lot of this year's crop, and to this end elevators and yard facilities are being augmented.

Western advices state that men are working continuously on the big 70-ton steam shovel on the route of the Grand Trunk Pacific from Tofield to Calgary—by the light of the sun in the day time and under the glare of two powerful search-lights at night. It is estimated that the Grand Trunk Pacific will have reached the city limits of Calgary by the end of August, and that steel will be to the waters of the Bow River less than 30 days later.

The bridge over the Skeena, near Hazelton, which has caused delay in laying the rails east of the Skeena crossing, will, it is hoped, be completed by the end of this month. This has been a difficult bridge to construct, the foundations having had to be sunk 25 feet below the bed of the river.

The survey for the Grand Trunk Pacific line from Talmage into Weyburn and continuing southwesterly, has been completed, and grading will begin without delay, the object of the company being to run trains into Weyburn this year if possible.

Work has commenced on the large terminals of the Canadian Northern Railway at Montreal, including the tunnel under Mount Royal, and it is officially announced that the Montreal terminal will be completed in 1914. The terminal works are under way at the Pacific coast terminal, Port Mann.

Plans at Port Mann.

Plans have been completed for the harbor and terminal improvements at Port Mann and work is to be started next month on the first installation of the terminal shops and yards there, the initial cost to be \$500,000. The International Milling Company has secured a site on the water front at Port Mann and will begin construction of terminal elevators and a large flour mill on the water front to cost \$1,000,000. Mackenzie & Mann have under consideration an application from an English concern for the construction of a dry dock and shipbuilding yards there.

The Canadian Northern's western line is being rapidly extended into the Rocky Mountains this year, and next year will witness the completion of the work in the Yellowhead Pass. Work is proceeding rapidly at all the other points on the system, so as to insure the linking up of the whole road by 1914.

This year 1,053 miles of new road are to be constructed, including several new branches, as follows:—

	Miles.
Montreal to Hawkesbury	58
Ottawa to Ottawa River	32
West from Ruel, Ontario	100
East from Port Arthur	108
Branch lines and extensions in Alberta and Saskatchewan	400
British Columbia	75
Sydenham, Ont., to Ottawa	80
Relaying track on main line west	200

Two thousand men are employed in the construction work, and the approximate amount paid in wages is \$1,800,000 a month. In addition to this, 62,000 tons of new steel will be used in laying tracks this year. The probable cost of the tunnel and terminals at Montreal is put at not less than \$25,000,000, while \$9,000,000 is being spent for new equipment.

Have Been Heavy Borrowers.

All this work is being financed with British capital, as has practically the entire railroad system of Canada. Since January, 1905, the Grand Trunk has borrowed in London, through the medium of public flotations no less than £20,670,500, or about \$100,000,000. During the same period, the Canadian Northern Railway has obtained from the same source £24,213,065, or about \$120,000,000, in addition to \$5,000,000 raised by a private sale of securities early this year.

SASKATCHEWAN HAIL INSURANCE

Explained for Benefit of the Agriculturist—By-laws Must be Passed by Twenty-five Municipalities

In order that the recently passed Saskatchewan Hail Insurance Act may be understood by the farmers, an explanatory pamphlet has been issued by the government. It gives the grain-grower every possible instruction as to procedure under the Act in the form of a catechism.

A farmer who wishes to secure the benefits of the Act proceeds by becoming one of a group of farmers to ask their rural municipal or local improvement district council to submit the matter of hail insurance to a vote of the ratepayers at the next municipal elections.

After describing the ordinary procedure of the passing of a by-law by a council the pamphlet states what is to be done if a council refuses or fails to give the hail insurance by-law for first and second readings in August or September. It explains that if before September 1st, a petition signed by not less than 25 per cent. of the resident ratepayers of the municipality or district asking that the necessary steps be taken to submit the by-law to a vote, is received by the council, the council must give the by-law first and second readings and submit the question to a vote of the ratepayers.

Must Be Twenty-five Municipalities.

Then comes the question. If the hail insurance by-law passes, are all the crops within the municipality or district insured against hail the next season?

The answer is: Not unless the ratepayers of twenty-four other municipalities or districts shall also have passed the hail insurance by-law. These other twenty-four may be scattered all over the province.

The necessity for having twenty-five municipalities or districts pass the hail insurance by-law is explained as follows:—Because it is necessary that the risk be distributed over a large area of land if a low tax rate is to be maintained and the payment of losses made reasonably secure. If only a few of the municipalities were in the scheme, and a good deal of hail should occur in them, the tax would not yield enough funds to pay the losses.

Appointment of Hail Insurance Commission.

As soon as 25 municipalities or districts—if more than 25, so-much the better—have passed the hail insurance by-law, the hail insurance commission is created. This is a body of three commissioners who are to be responsible for the undertaking.

The government selects and appoints the chairman, and the other two commissioners are selected by the Reeves of all the municipalities or districts that have passed the hail insurance by-law. The chairman holds office during the pleasure of the Lieutenant-Governor-in-Council, and the two other members hold office for two-year terms, one retiring each year.

The duties of the commissioners are as follows:—1. Appointing all necessary officers, such as secretary-treasurer, inspectors or adjusters, etc. 2. Receiving all moneys raised under the hail insurance by-law of the various municipalities. 3. Receiving, inspecting and determining all claims for hail losses. 4. Paying all approved claims and all expenses of inspection, etc. 5. Determining the basis on which additional municipalities shall come into the scheme after the first year. 6. Fixing the special rate or tax for hail insurance purposes for the next year.

Special Rate or Tax Levied.

Then comes an important question:—How will the money for the payment of losses be raised? The answer given is:—By a special rate or tax levied on the land of every municipality that has passed the hail insurance by-law. No hail insurance tax is to be levied on municipalities or districts that do not pass the hail insurance by-law.

The amount of the hail insurance tax in the administrative areas where it is to be imposed is fixed, for the first year, at four cents per acre, or \$6.40 per quarter section, or \$25 per section. The rate or tax is assessed on the total acreage of a farm and not merely on the acres under crop.

Some Lands are Exempt.

Lands within the limits of a hamlet (building lots) and land held under grazing lease from the Dominion government are exempt from the special tax. Hamlet lands are exempt because, although within a municipality (or district) they are not farm lands. Lands held under grazing lease are exempt because they are supporting live-stock and not grain crops, and hence should not be taxed for hail insurance purposes.

But certain lands may be withdrawn. Such lands are as follows:—(a) An unpatented homestead upon which there is less than 25 acres under cultivation may be withdrawn by the homesteader from the tax and, of course, from participation in the insurance benefit. (b) Any quarter section or number of

quarter sections of grazing or hay land that is completely inclosed by a substantial fence in good repair, and that is actually used by him for grazing or hay purposes only, and no portion of which is under grain crop or cultivation, may be withdrawn by the owner or occupant, provided he is a resident of the municipality or district. The withdrawal of such lands must be done each year, before May 1st, by written notice to the secretary-treasurer of the municipality or district.

Grain Crops Only are Insured.

Once the farmer's land is assessed for the special hail rate, all grain crops on that land are automatically insured as it were. Indemnity will not be paid for damage to hay, pasture, root, soiling, forage, or silage crops.

With regard to hail losses it is provided that the hail insurance funds of all the municipalities or districts in the scheme are to be pooled, and that all expenses and losses are to be paid out of the one pooled fund. Notification of loss is to be made to the Hail Insurance Commission by registered letter within three days of the damage being done. All losses must be paid before December 15th each year.

The hail rate will appear on assessment notices and be payable just the same as any other municipal or school tax. Its payment can be enforced by the municipality in just the same as any other tax.

No Indemnity if Damage Less Than 10 Per Cent.

There remains the question of indemnity. This fixed by the act at five cents for every one cent. of damage done. Thus if the crop is totally destroyed the indemnity will be five dollars per acre of crop destroyed; if half destroyed, \$2.50 per acre; if one-quarter destroyed, \$1.25 per acre. No indemnity will be paid for damage less than ten per cent.

Should the unfortunate contingency arise that claims for damages amounted to more than the proceeds of the hail tax, then the expenses will be paid in full first, and the claims will be paid pro rata out of the fund then on hand. A late claim will be treated the same as an early claim. A large claim will get the same share and no more than the same share, in proportion, as a small claim.

Success Depends on Farmers' Support.

The pertinent question is asked:—Is it likely that the claims for loss will exceed the funds available to pay them?

To this the following answer is given:—"No; provided the farmers rally to the support of the scheme as they have done to the solution of the elevator problem."

In further explanation of the scheme the pamphlet states that the commission will have the power to declare a lower rate, whenever it shall have a sufficient surplus on hand to warrant it in so doing. The commission, however, has not the power to increase the rate above four cents per acre.

Private hail insurance companies doing business in Saskatchewan will be undisturbed.

SASKATCHEWAN MUNICIPALITIES CONVENTION

During the convention of the municipalities of Saskatchewan held recently at Prince Albert, two interesting papers were given by Mr. J. N. Boyne, Deputy-Minister of Municipal Affairs, and Rev. E. B. Smith, of Saskatoon. The policy and importance of the department of municipal affairs was strongly evidenced in the discussion on the various resolutions.

The government should be requested to establish in the department of municipal affairs a branch under the control of an expert, who would assist municipalities in the marketing of debentures, was the opinion of the delegates, and was given the hearty endorsement of the convention.

The suggestion was made that a large salary would be required by such a financial expert, but that this might be overcome by the government charging reasonable commission for selling the bonds.

The unanimity with which the convention expressed their disapproval of the bonusing of industrial corporations was gratifying. A resolution was unanimously passed requesting the government to make the necessary amendments to the present city act, to prohibit such competitive bidding.

The suggestion of an enactment which would give cities the power to assess the cost of a high pressure fire protection system, which should vary from year to year according to the actual value of the lands and improvements thereon, was also favored and the necessary resolution passed.

Mr. F. W. Hilton, of Leross, stated that his village had struck a flow of natural gas and he introduced a resolution asking that power should be given to villages, enabling them to borrow money for the development of natural resources within their limits. The resolution was adopted.

There was the usual competition amongst the delegates of different towns to secure the convention of 1913, Indian Head being selected by a good majority from Moose Jaw, North Battleford and Regina.

OUTLOOK FOR BRITISH COLUMBIA'S MINES

Results That Have Been Already Obtained—Electric Railway Company Will Build Cars

(Staff Correspondence.)

Vancouver, July 8th.

The British manufacturers in their visit to the coast have seen for themselves the possibilities for commercial and industrial enterprises there.

Apart from the interest thus awakened in Great Britain, from where much money comes for development purposes in Canada, the attention of business men in other countries will be attracted. Capital has come to the West from France, Germany and Belgium, and when it is seen that Britain is alive, these other countries will be alert to opportunities. Present trade conditions are in favor of greater commercial relations with western Europe, with the round-the-world steamship lines that have been established in recent years, and in the expansion of commerce that is confidently looked for within the next few years many countries will participate. It was gratifying to note the strong feeling of imperialism in the speeches at the banquet here, indicating that in future trade Britain will have the preference. These manufacturers have come, after trips that have been made by several special representatives, press and otherwise, who reported on conditions, and now the principals themselves will be able to judge first hand just what is in Canada and what the possibilities of the future are.

Activity in Mining Circles.

In this letter a couple of weeks ago, mention was made of the prosperous condition of the lumber industry. Note may be made also of the activity in mining. News from the interior is encouraging, and the outlook is better for the operation of metalliferous properties. Prices of silver and lead are very favorable, one of the reasons being the trouble in Mexico, which has interfered with the supply from that country. Higher prices mean better conditions for the low grade properties in the interior of British Columbia, in the Slocan and Boundary, mine owners are very sanguine. Lead has gone up so that the bounty granted by the Dominion has been withdrawn for the time being, and operations are more extensive in the southeastern part of the province.

The Lucky Jim Company has been re-organized and this mine will be shipping as soon as the Canadian Pacific Railway branch line has been extended to the property. Mr. T. G. Proctor, of Nelson, has been successful in interesting capital in the Lucky Jim and the directors now include Premier Roblin, of Manitoba; Hon. G. R. Coldwell, minister of education; Hon. J. H. Armstrong, attorney-general; Hon. Hugh Armstrong, minister of finance, all of Winnipeg; Mr. Joseph Morris, Edmonton; Mr. S. Montgomery, St. Paul, and Col. G. Weaver Loper, Spokane. Mr. A. G. Larson, Vancouver, has been appointed consulting engineer for the company. This is the only one of the fine properties in the Slocan, another being the Standard, which is being developed by Spokane people, and is a money maker.

Two Mines and their Earnings.

The British Columbia Copper Company is again among the dividend payers, the latest dividend of three per cent. being an increase of one half per cent. over the dividend of June, 1911. This company is operating full capacity, production running over a million pounds per month, with estimated earnings of about \$60,000 per month. The British Columbia Copper Company has an option on the Voight property, comprising several claims near Princeton. Developments there have been highly satisfactory, in the vicinity of Princeton, are many properties and development on a large scale in that district will do much in attracting capital.

The Nickel Plate owners have bonded an adjoining group for \$150,000, and an American company, controlled by Mr. C. H. Brooks, has taken over the Kingston group. It has been the wonder of those who know the mineral resources of the Similkameen, why some of the properties with excellent showings have not been taken up by men with capital. The Nickel Plate is in the midst of a number of fine claims, and its earnings show what money is to be made. The Nickel Plate is now paying dividends of twenty-five per cent. per annum, and another quarterly dividend of five per cent. has just been declared. Their plan is to declare three quarterly dividends of five per cent. and a fourth of ten per cent. This company now has an output of about 6,000 tons a month of gold ore, which runs about \$12 to the ton.

Reports such as these indicate activity in mining that will result in considerable progress. Metalliferous mining will be the great backbone of prosperity in British Colum-

bia, and while it is coming to the front perhaps only gradually its advancement is substantial.

British Columbia Electric Railway.

Expansion has marked the operations of the British Columbia Electric Railway Company during the past few years, the latest move being the purchase of additional land in New Westminster at a cost of \$123,000 for car shop purposes. The company has found it very difficult to get delivery of cars from the manufacturers in the east, and it is proposed to manufacture cars here on a larger scale. With the big system it now has in hand, a very large number of new cars are constantly needed, for extensions are being steadily made and increasing traffic requires quicker schedules on the older established lines, necessitating more cars.

HOW GASOLINE VAPOR CAUSES FIRES

For my part, said Mr. A. Lindback, Manitoba fire commissioner, when investigating the St. Boniface fire at Winnipeg, if it were not the singular circumstances of fires being, firstly, so close together; and, secondly, all started at about the same time in the evening, I would say the seminary fire, at least, might have been started by the ignition of the vapor from gasoline. This vapor, you know, percolates down through the cracks in floors, like water, and, if ignited from beneath, will shoot up immediately, and envelop the building in flames. Now, there was a quantity of the gasoline being used by the tinsmith in the tower of the seminary, where the fire was first noticed, and as the day of the fire was a very hot day, the sun would certainly have the effect of causing the gasoline to evaporate and the vapor to spread, as I have explained.

The fact that these were unfinished buildings goes to prove the necessity of careful watching of buildings under construction. The city council has often been reminded in this way of the need for some by-law and the strict enforcement thereof, regarding contractors and the watching carefully of unfinished buildings.

COMPANY LAW

The decision of the Judicial Committee of the Privy Council in the case of the Dominion Cotton Company and the Dominion Textile Company emphasizes certain phases of the law relating to joint stock companies and their control which in a day when such companies are owners of perhaps a majority of large business enterprises, it is well the investing and business public should understand. The facts of the case were simple enough. After a somewhat unfortunate experience, so far as the earning of profits was concerned, the directors of the Dominion Cotton Company accepted a proposition for handing over the control of their property to the Dominion Textile Company, which had been created for the purpose of uniting a number of conflicting interests and securing unity in administration. The shareholders were advised to accept the proposition and by a vote of 24,467 out of 30,336 shares did so. There were some later changes in the relations of the two concerns, but they did not affect the principle at issue. A minority of the shareholders resisted and the suit in which judgment was recently given was entered. It was held in the tribunal of final appeal that to prevail against their fellow shareholders a dissenting minority must show that the action to which objection is taken is ultra vires, or beyond the powers given to the company by the law, or that in using its powers the majority had deprived the minority of its rights. In the course of the opinion rendered a former decision was quoted to the effect that no mere informality or irregularity will entitle the minority to sue if the act complained of when done regularly would be within the powers of the company and the intention of the majority was clear. Of course any action that would carry the company beyond the powers of the law which created it, or any action that would do a wrong to the minority for the benefit of the others would involve the right to claim and get redress. Neither being proved in the case in question to the satisfaction of the members of the Judicial Committee, the arrangement which the majority had sanctioned stands. Other English courts have carried the principle thus outlined to the extent of holding that a majority of shareholders may instruct the directors what to do with the common property, even if the directors take another view. This state of affairs is a necessity of the jointstock system of financing business enterprises, and it is well that the many shareholders in such enterprises should understand alike what their rights and responsibilities are.—Montreal Gazette.

The Grand Trunk Railway has placed an order in New York for 3,000 box cars.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Quebec Railway, Light and Power Company.—A British syndicate has made an offer of purchase to the Quebec Railway, Light and Power Company for all its plants and possessions.

Goodwin's, Limited.—Application has been made for the listing of the stock of Goodwin's, Limited, on the Montreal Stock Exchange. The application is for \$1,125,000 of the preferred stock and \$1,750,000 of the common.

Spanish River Pulp and Paper Company.—The following additional stock of the Spanish River Pulp and Paper Company has been listed on the Toronto Exchange: Common, \$1,000,000; preferred, \$2,509,000.

Porto Rico Railways Company, Limited.—The following is a comparative statement of earnings for May, 1912:—

	1911.	1912.	Increase.
Gross	\$61,015 42	\$75,720 82	\$14,705 40
Net	32,664 53	27,471 04	5,193 49

Montreal Light, Heat and Power Company.—The Montreal Light, Heat and Power Company dividend was placed on a nine per cent. basis at a recent directors' meeting. The dividend had previously been on an eight per cent. basis.

Valentine Mines, Limited.—A general meeting of the Valentine Mines, Limited, for the election of directors for the ensuing year and for the transaction of any business that may come before the meeting will be held at Montreal on Tuesday, July 16th.

Richelieu and Ontario Navigation Company.—The 19,085 additional shares of the Richelieu and Ontario Navigation Company, issued in connection with the purchase of the Niagara and Inland companies, have been listed on the Montreal Stock Exchange.

British Columbia Copper Company.—The British Columbia Copper Company reports output of copper for June 996,000 pounds, which is an average production. The reports from the manager indicate that the production for the current month may be larger.

Wayagamack Pulp and Paper Company.—The Wayagamack Pulp and Paper Company has completed its new sawmill, which is manufacturing over 100,000 feet of lumber a day. Work on the pulp and paper mills is nearing completion. The mills will be turning out finished paper shortly.

Dominion Iron and Steel Company.—The output at the plant of the Dominion Iron and Steel Company for June was as follows, the shipments being the second largest recorded in the history of the company, 32,090 tons: Pig iron, 27,345 tons; steel ingots, 30,190; blooms, 23,835; rails, 15,225; rods, 3,342; total shipments, 32,090 tons.

Ames-Holden-McGready, Limited.—Application will be made during the summer for the listing of the Ames-Holden stocks. The company's business, as shown by the recent annual report, is increasing, and at present the company is doing about twice the amount of business it was doing a year ago. The extension of its operations in the near future will add greatly to its earning capacity, and the outlook for the organization is good.

Crown Reserve Mining Company.—At the monthly meeting of the directors of the Crown Reserve Mining Company the usual monthly dividend of 2 per cent. and bonus of 3 per cent., making a total of 5 per cent., were declared. A report was read from Porcupine stating that the value of the ore was \$25 per ton, and that several additions to the stamping mill had been ordered, and would be ready for use about the first week of October.

Central Railway Company of Canada.—At a meeting of the directors of the Central Railway Company of Canada, held at the head office of the company in Montreal, several changes were made in the directorate. Hon. Arch. Campbell resigned his position as director and president of the company, and retired from the board. Mr. E. Goff. Penny also resigned as a director. Hon. Wm. Owen, who was leaving for a trip abroad, also sent in his resignation as vice-president, but it was not accepted, as he will be back soon. Mr. W. D. Hogg, K.C., of Ottawa, and Mr. E. Willson Smith, of Montreal, were elected as directors of the company to fill vacancies on the board.

Dominion Sawmills and Lumber Company.—Further capital is to be raised for this company. The borrowing powers will probably be increased, which will obviate the necessity for a prior lien debenture issue. The new capital will take the shape of preference shares and debentures, and if the existing arrangements are adhered to it will be

unnecessary to write down the present debenture issue, but merely to modify its form. In addition to the 90,000 acres and sawmill at Three Valley in British Columbia, the company owns in other places 150,000 acres, together with three sawmills, giving a total area of 240,000 acres and four sawmills.

Dominion Telegraph Company.—Sir Henry M. Pellatt presided over the annual meeting of the Dominion Telegraph Company on Wednesday, at which all of the old directors were re-elected.

The financial statement indicated that the total assets were \$1,308,962.85, and the liabilities \$1,015,969.28, leaving a balance carried to the profit and loss account of \$292,993.57.

The Dominion Telegraph Company's line is leased to the Western Union Company for a period of ninety-nine years from 1879 at a yearly rental of \$60,000, being at the rate of 6 per cent. on the \$1,000,000 capital of the company, and this is disbursed to the shareholders at the rate of 1½ per cent. quarterly.

Asbestos Corporation of Canada.—Mr. W. G. Ross, president of the Asbestos Corporation of Canada, accompanied by a party of directors, for the Eastern Townships, has this week been on an inspection tour of the company's property.

This is the first opportunity the newly-formed corporation officials will have had of collectively seeing the plant in operation and forming an estimate of how things are going.

Since the assets of the defunct Amalgamated Asbestos Corporation were taken over by the new company the board has been chiefly concerned with details of reorganization. They can now investigate the mines and plant and see what is needed to add to their efficiency. The president, Mr. Ross, is optimistic on the future. The plant is now in full operation and the market for asbestos is steadily improving.

Canadian Express Company.—The Canadian Express Company reports to United States interstate commerce commission for March and nine months, compared as follows:—

March:	1912.	1911.	Changes.
Total receipts from oper.	\$ 225,033	\$ 201,763	+\$ 23,270
Exp. priv.-debit	102,950	94,596	+ 8,353
Total oper. revs.	122,083	107,167	+ 14,916
Total oper. exp.	107,334	87,574	+ 19,760
Net oper. revs.	14,748	19,592	— 4,843
Taxes	2,250	1,200	+ 1,050
Oper. income	12,498	18,392	— 5,893

July 1st to March 31st:—

Total receipts from oper.	\$2,166,583	\$1,970,038	+\$196,545
Express priv. deb.	1,007,757	947,495	+ 60,262
Total oper. rev.	1,158,825	1,022,543	+ 136,282
Total oper. exp.	928,180	820,837	+ 161,342
Net oper. revs.	176,645	201,706	— 25,060
Taxes	20,250	10,800	+ 9,450
Operating income	156,395	190,906	— 34,510
Mileage steam roads.	6,122	7,362	— 1,240
Mileage other lines	830	830	

Canada Company.—An extraordinary general meeting of the Canada Company was held recently in London under the presidency of Mr. Joseph C. Weld, the governor, who said that the business of the day was the declaration of a dividend for the past half-year. They met that day with a larger sum available for distribution than for a long time past, viz., £22,430. From that they proposed to distribute £16,630 by way of a dividend of £2 per share, and to carry forward a balance of £5,792 to meet liabilities. The transactions in land during the past half-year compared favorably with those of the previous year, showing 3,500 acres, as compared with 2,387 acres, and the increase in the sale price over the last valuation was 38½ per cent., as compared with an increase last year of 20 per cent. It was very encouraging that there had been considerable activity in fruit growing in Ontario, and a large portion of their estate was suitable for that kind of cultivation. They had very large tracts, and they were encouraging that class of business. The company possessed an enormous tract of peat, and one gentleman out there had spent a fortune in an attempt to deal with it. If the efforts which were being used in that direction resulted satisfactorily it must materially benefit the Canada Company. Altogether he congratulated the meeting upon the results submitted, and proposed a resolution for the payment of a dividend for the half-year ended June 30th, 1912, under the provisions

of the Canada Company's Amendment Act of 1881, of £2 per share clear of income tax on the 8,319 shares.

Investment Corporation of Canada.—The general meeting of the Investment Corporation of Canada, Limited, which was held in London recently, Lord Clinton presiding, the report was adopted which referred to the fact that the directors could pay a dividend at the rate of 4½ per cent. per annum upon the preference stock and at the rate of 5 per cent. per annum upon the ordinary stock for the period from the date of conversion into stock to the date of the closing of the accounts. There, then, remained a surplus revenue of £11,221, from which they had applied £10,000 to the writing off of preliminary expenses, leaving to be carried forward to the next year £1,221. Lord Clinton in his report said in part that the great influx of immigration, the capital flowing across the ocean, the development of railway and other enterprises, together with the continued bringing of wild land under cultivation for wheat, etc., and the improving of the standard of agriculture all pointed to an era of increasing prosperity for the Dominion. That prosperity, he was glad to see, was reflected in the affairs of their own company. Certain members of the directorate, together with their secretary, had visited the country during the course of the last year and had inspected the whole of the real estate purchased, as well as some other lands. They had made a very satisfactory report. The directors did not propose to ask the shareholders to vote for them any remuneration for their services for the past year. They asked the shareholders, however, to vote a sum of \$1,200 as remuneration to the directors to be divided amongst them in the terms of the Articles of Association for the current year, and each year hereafter. The directors were advised, as stated in the report, that the real estate held by their own company, and also by the Land Corporation of Canada, had appreciated considerably in value since the date when it was purchased.

GRAIN COMMISSIONERS' OFFICIAL STATEMENT

Owing to a large number of mis-statements being made as to the policy of the grain commission, the commissioners have decided to make the following official statement:—

1. Terminal elevators.—The board approves of the leasing of elevator B. by the Grain Growers' Company. It considers the operation of a large terminal elevator by the farmers' company an important step in the right direction. The board has also all arrangements well under way for building a government-owned and operated elevator of three and a quarter million bushels capacity. This elevator will be the best that can be constructed and will be equipped with every facility for handling grain.

2. Sample markets.—The board is considering the practicability of having "sample markets" established at Port William, Winnipeg and Calgary for September, 1913, provided the requisite facilities exist at these places. Negotiations are going on between the board and the authorities at those centres and an early decision will be given.

3. Grain certificates.—The board is determined to protect the standards of the Canadian grain certificates. In this connection it is planned to strengthen the inspection staff. Inspection work is being carried on at present under serious handicaps in regard to facilities. The board is determined to remove such handicaps. It is also investigating carefully the inspection methods in the more important grain states in the United States. It is giving special attention to the matter of establishing a laboratory in Winnipeg for testing grain as to milling and baking values. It is also preparing for an extensive use of the moisture test in regard to the corn.

4. Registration of warehouse receipts.—The board expects to have in operation by September, 1912, an office for the registration and cancellation of warehouse receipts.

5. Vancouver and Hudson Bay terminals.—The board is giving attention to the advisability of proceeding at an early date with the construction of terminal facilities on the Pacific Coast and Hudson Bay.

6. Meetings of the Board in the West.—At the earliest convenient moment the board plans to hold sessions at various places throughout the three grain growing provinces, thus to obtain first hand information of the views of the grain growers.

Preliminary steps for the organization of a retail merchants' association for Alberta were taken at Calgary recently.

No Canadian-made butter has been exported from the port of New York this year since the opening of navigation. During the corresponding period of last year over 16,000 packages had been exported. The home market is prepared to take everything offered at higher prices than Great Britain will. Exports of cheese since the opening of navigation are a little short of 450,000 boxes, this being 50,000 less than for the corresponding period of last year.

BIG BRITISH ENGINEERING ENTERPRISE IN CANADA

Further details of the Canadian British Engineering Company, Limited, are available. The company's share capital is £205,000 divided into 200,000 7 per cent. preferred ordinary shares of £1 each and 100,000 deferred ordinary shares of one shilling each. The company have made a public flotation of 100,000 of the preferred ordinary shares. Every subscriber when applying for preferred ordinary shares is entitled to subscribe for at par and be allotted one deferred ordinary share for every five preferred ordinary shares allotted to him. The deferred ordinary shares are payable in full on application.

This company has been formed to carry on the business of an engineering supplies and construction company in Canada. It will establish branches in the principal centres in the Dominion, where stocks of standard appliances, spare parts, etc., will be carried. The company will carry out contracts for the supply and erection of all classes of machinery, purchasing the plant required as far as possible from the leading makers of such appliances in the United Kingdom. In cases, where the nature of the work is such that it can be more advantageously carried out by the manufacturers themselves, the company will act for such manufacturers as agents on a commission basis.

The company's capital will be utilized principally in carrying stocks of standard machinery and engineering appliances and in executing contracts for the construction and equipment of engineering works. The directors anticipate that the profits on this portion of the business will be sufficient to provide for a substantial dividend on the whole of the subscribed capital, in which case all profits accruing from the various agency or commission agreements, for which little or no capital is required, will be applicable for surplus dividends on both classes of shares.

The company will have a London office or buying house, through which all communications and negotiations with manufacturers will pass. The London staff will purchase all machinery and appliances required by the company for the fulfilment of its contracts, will inspect plant in course of construction, and generally take the necessary steps to ensure that all such orders receive proper attention.

Sole agency agreements have been obtained by the company from the following firms:—Sir W. G. Armstrong Whitworth and Company, Limited, hydraulic and electric cranes and conveyors, dock and harbor equipments, etc.; Ashmore, Benson, Pease and Company, Limited, gas works plant, etc.; Cammell Laird and Company, Limited, high grade steels, railway and tramway tires and axles, springs, etc.; Dorman Long and Company, Limited, steel beams, angles and channels, etc.; Galloways Limited, pumping plant, mill engines, blowing engines, rolling mill engines, large gas engines and boilers; Power Gas Corporation Limited, Mond gas producers for power and furnace heating and by-product recovery plants; Ransomes, Sims and Jefferies, Limited, agricultural machinery; Sandycroft Foundry Company, Limited, mining plant equipments; and Willans and Robinson, Limited, steam turbines Diesel oil engines and condensing plant.

The directors of the company are as follows:—C. Leonard Agnew, Northwich; W. H. Patchell, M. Inst. C.E., M.I. Mech. E., M.I.E.E., London; Leonard Andrews, M. Inst. C.E., M.I.E.E., London, managing director in Great Britain; William A. Martin, Toronto, managing director in Canada; local board in Canada: William A. Martin, Toronto; Ernest M. Sellon, M.I.E.E., Montreal; Charles Ruttan, Winnipeg; Nicol Thompson, Vancouver.

DEBENTURES AWARDED.

Zealandia, Sask.—\$6,000 6 per cent. 15 years, to Messrs. Nay and James, Regina.

Allan, Sask.—\$5,000 6 per cent. 15 years, to Messrs. McKinnon and Company, Toronto.

Belleville, Ont.—\$22,726 5 per cent. 20 years, to Ontario Securities Corporation, Toronto.

Otthon Village, Sask.—\$2,000 6 per cent. 15 years, to Messrs. Nay and James, Regina.

Medicine Hat, Alta.—\$26,000 5 per cent. 15 years, to Messrs. H. O'Hara & Company, Toronto.

Rosedale, R.M., Sask.—\$15,000 4½ per cent. 20 instalments, to Messrs. H. O'Hara and Company, Toronto.

Ochre River, R.M., Man.—\$12,500 5 per cent. 20 instalments, to Messrs. Brent, Noxon and Company, Toronto.

Brandon, Man.—\$28,911 5 per cent. 7 years; \$21,136 5 per cent. 30 years; \$160,599 5 per cent. 20 years; \$59,000 4½ per cent. 30 years, to Dominion Securities Corporation, Toronto.

ROYAL COLONIAL INSTITUTE'S WORK

Its Empire Trade and Industry Committee Supplies Up-to-Date Commercial Information—Improved Consular Service

It is not a year since the Royal Colonial Institute, which during its four decades of life has done so much to interest home-staying Britons in their magnificent heritage beyond the seas, undertook a new and promising mission by founding its empire trade and industry committee. Till then the institute, though the principal rallying point for imperialists and a focus for all kinds of intelligence concerning what has been so aptly termed Greater Britain, has devoted but little attention to the economic aspect of the British Empire. It is true that its well-furnished library contained many volumes of the greatest value to the British man of business who wished to open up relation with the dominions beyond the seas, with India, or with any of our numerous crown colonies. In the newspaper room were hundreds of papers from every part of the Empire, carefully filed and preserved for future reference in the British Museum reading room. But men of business have little time for research work of any kind.

Something more was Needed.

It was felt that something more was needed if the Institute was to maintain its place as the headquarters of all the vast interests connected with the world-wide British Empire. It was these considerations which brought into existence the institute's empire trade and industry committee, of which it was, and is, the purpose to place at the command of British captains of industry and of British merchants, the most up-to-date information regarding the economic progress of the overseas dominions, of the empire's important eastern dependencies, and of those of the crown colonies.

Another part of the committee's work is to do the same good service for Greater Britain, and to find, as far as possible, suitable avenues for British products in this country. As the Imperial Parliament is the supreme guardian of British Interests throughout the world, it seemed advisable that the committee should pass such resolutions as might appear calculated to further urgent reforms in the commercial system and in official relations with the economic developments of the British Empire. These are all practical and practicable ideas, and it only remains to consider briefly how far the committee has been able to live up to its aspirations.

Information in Accessible Form.

The committee commenced its operations by communicating with all the overseas dominions' trade departments, and by inviting them to forward to the institute all literature and any kind of statistics issued by them. The response to the invitation was most gratifying. The literature so collected is being carefully filed by the institute, and placed in the most accessible form for the instruction of all who are interested in the economic and financial development of the dominions and colonies. At the first meeting held by the committee, on April 5, 1911, the following resolution was unanimously adopted, and copies ordered to be forwarded to the Secretary of State for the Colonies and the President of the Board of Trade:

"That the attention of the Colonial Office and the Board of Trade be drawn to the necessity of taking some definite action to develop the resources of, and British trade with, the crown colonies and dependencies by the appointment of trade commissioners (for 'groups of Colonies'), as has recently been done in the case of the self-governing dominions, and by issuing detailed reports from time to time on the resources and trade conditions of those territories."

Value of Crown Colonies as Producers of Raw Material.

Few people, perhaps, realize the value of our crown colonies considered merely as purveyors of valuable raw materials for our industries. The crown colonies are necessarily destitute of well-organized local trade departments, such as might advertise their raw products in English markets or give timely warnings of the raids of foreign competitors, who, in the case of certain African British possessions, have, through a better organized and subsidized shipping service, succeeded in drawing away to their markets raw materials which British manufacturing firms have later had to purchase at a smart advance on original cost. It is believed that the government has given sufficient heed to this resolution to have in forward preparation a scheme for the appointment of trade commissioners for groups of our crown colonies, as was suggested by the committee.

At the next meeting of the committee, held on May 10, 1911, the following resolution was passed and ordered to be forwarded to the Prime Minister and the Secretary of State

for the Colonies: "That the attention of the imperial conference be called to the growing importance of the question of the uniformity of company law within the empire, owing to the increasing tendency for English firms to establish branches overseas, and the increasing popularity of empire investments."

Codification of Company Law.

The codification of company law throughout the empire is obviously a very big question; but at the imperial conference this subject received a good deal of attention, and was discussed in a broad spirit by the present Lord Chancellor, who promised to do his best to bring British commercial law into harmony, as far as possible, with the legislation obtaining in the self-governing Dominions. Sir Joseph Ward, Sir John Finlay, the late Mr. Batchelor, and other of the overseas delegates, also made sympathetic contributions to the elucidation of this great imperial question.

At the third meeting held by the committee, on June 2, 1911, the question of the work of the British Consular Service in regard to empire trade was considered and the following resolution passed: "That the time has arrived when the British Consular Service should be made equally representative of the overseas dominions and colonies as of the United Kingdom, and that some system should be established of keeping every consular officer fully informed of the resources, market requirements, and general trade interests of the various portions of the empire."

Should be Guardians of Trade Interests.

The efficiency of the British Consular Service is of the utmost importance to the economic well-being of the British Empire. British Consuls and Vice-Consuls, who are appointed by, and are under the direct control of, the Secretary of State for Foreign Affairs, are supposed to be guardians of British trade interests throughout the districts in which they serve. As a matter of fact, some of these gentlemen have a certain amount of commercial knowledge, and the reports which they periodically prepare are sometimes of value. But, on the other hand, some—it is feared many of them—have little or no economic aptitude, and are entirely dependent for trade facts and figures upon their subordinates, consular clerks and unpaid vice-consuls, and such like, who are too frequently foreigners whose personal trade interests are not exactly in harmony with those of British trade.

Citizens of Empire on an Equality.

It may be noted that on this matter being brought to the notice of the Secretary of State for Foreign Affairs in Parliament, in the shape of a question so framed as to ask whether any distinction were made between the status of British citizens resident in the United Kingdom and of citizens of any overseas dominions, as regards the services of British consuls, it was stated that the Foreign Office considered both on an entire equality in this respect; and that the office had instructed its diplomatic representatives to urge British consuls to keep them informed of all developments affecting the position of the dominions or colonies as exporters of food products. This assurance is gratifying as far as it goes; but, as the Foreign Office must be well aware, the British Empire extends far and wide, and its products are assuredly the most varied collection which any empire in this world has ever shown. If the consular service is to live up to its great mission, the staff must be strengthened, and, above all, a well-organized system of properly instructing consuls and their clerks in the economic needs of the empire must be devised.

Transportation by Sea and Land.

Several other questions have been asked in parliament which arose out of the resolutions passed at the Royal Colonial Institute.

The following important resolution, passed by the Committee in June 1911, concerned the establishment of through-bookings of goods from all parts of the empire:

"That the trend of modern trade being in the direction of bringing the manufacturer into more direct touch with the consumer, it is desirable, in the interests of empire trade, to bring about the establishment of a system of through bookings or through rates for the convenient carriage of empire products by sea and land from one point of the empire to another."

Welcoming Representative Overseas Citizens.

A further important feature of the committee's work is of a social nature. As many leading men from the dominions and other parts of the empire are often within our gates, the policy has been initiated of entertaining from time to time these, and giving them opportunities of discussing in an informal, but not the less authoritative, manner the economic development and general financial conditions of their respective states. The first of the committee's

(Continued at foot of next page).

MORE NOTES OF LONDON MARKET

Mass of Undigested Securities — Position of the Underwriters

The congestion in the London market continues. Last year nearly every new issue that was made was rapidly absorbed by the public. The underwriters, as one observer says, had seldom anything to do with signed contracts and received cheques for their commission. If an odd half-million or so of the issue remained over it was easily divided up and fed out to investment brokers later on. Such remnants generally paid to hold for a few months, and sometimes, in the case of a sound security, they would soon appreciate considerably. Even the second rate company promoters obtained success.

Popular Appetite Dwindled.

In due time the popular appetite for new securities fell off and subscriptions dwindled. The balances not applied for grew from 10 or 20 per cent. to 40 or 50 per cent., then to 70 or 80, and finally to 90 or 95 per cent. However large they might be, they had to be shouldered by the underwriters, who were soon overloaded. It might seem that the most natural thing for them to do in the circumstances would have been to call a halt, but that was easier said than done.

One Is Bound to the Other.

The London Daily Telegraph in an interesting review of the situation says that the chief groups of underwriters may have been committed to a dozen other new issues all waiting to come out at a favorable moment. Once a person has signed an underwriting contract he is completely in the power of the issuing house. He cannot withdraw even by paying forfeit. The issuing house itself is probably also bound hand and foot to someone else. The money to be raised may have been actually spent before the public are asked for it. It is for a Canadian railway there may be a big and ever-accumulating overdraft at the company's bank. This must be paid off before any further advances can be made, and a public issue is the only effective way to do it.

Where a current expenditure of a million dollars a week has to be provided for a railway financiers must look well ahead. They have to contract with one or more issuing houses to place certain amounts of bonds or stocks at intervals extending over six or twelve months, it may be. The issuing houses have to protect themselves by getting the successive issues underwritten. It may be months before they actually come out, and they cannot be stopped simply because one of them falls flat. Railway builders, bankers, and financiers at large are all very sanguine people. When a "frost" befalls them they do not lose heart, but hope for better luck next time.

Will Not Stop Supply.

It does not follow, therefore, that the unfortunate issues of the past few months will at once shut off the supply. The underwriters might be only too glad if they did. But they may have 90 per cent. of a new loan dumped on them today, and to-morrow another prospectus may appear in which they are also involved. In the early days of underwriting an innocent person was tempted to put down his name for a few thousand pounds. Only 5 per cent. was taken by the public, and he claimed that in face of such a fiasco the underwriter taking was abandoned, or at least postponed. But he was told that the contract had already been let, and the materials were on their way out to the Antipodes.

Moscow and Danish Loans.

In short, there is no escape from an underwriting contract if the principals insist on its being carried out, and often they cannot help themselves. Hence the strange spectacle to be seen of new issues following each other rapidly, in spite of two-thirds of them proving failures. During the past few days three more startling examples have been added to the long procession of "frosts." The City of Moscow loan, though it carried the tempting interest of $4\frac{1}{2}$ per cent., was little more than half-subscribed, the underwriters having been left with 45 per cent. of the whole. The Danish Government loan of £2,500,000 at 4 per cent. was even less successful, the underwriters having had to take up 55 per cent. And they were lucky in comparison with the guarantors of the Algoma Steel Corporation's Five per Cent. Refunding Loan, only 7 per cent. of which was publicly subscribed.

The past three months have left behind them an almost unprecedented list of addled issues. Eight of the largest are set out below, together with a very instructive comparison of the percentages which fell to the public and the underwriters respectively. It will be observed that the latter got on an average three-fourths of a total sum approaching 22 millions sterling. What can they be doing with it?

	Total amount.	Taken by the Public.	Percentage Left with the Underwriters.
Canada $3\frac{1}{2}$ per cent.	£5,000,000	30	70
India $3\frac{1}{2}$ per cent.	3,000,000	13	87
New Zealand $3\frac{1}{2}$ per cent. (2-year bonds)	4,500,000	15	85
Danish 4 per cents.	2,500,000	45	55
City of Moscow $4\frac{1}{2}$ per cent.	3,809,520	55	45
City of Winnipeg 4 per cent.	960,000	26	74
Quebec and Lake St. John 4 per cent.	873,000	5	95
Algoma Steel Corporation 5 per cent.	1,113,000	7	93
	£21,755,000		
Average of the eight issues....		24.5	75.5

A little patience may work off even large percentages of unsubscribed stock, but when they go over 90 per cent. of the total issue there can be no blinking the unwelcome truth that the investment market needs a rest. Of course, all these still-born issues fall at once to a discount, and the subscribers feel disgusted.

As to the Underwriter's Position.

One consolation which the underwriters have is that there are now so many of them, and the business is so widely spread, that their burden is well distributed. Formerly it was almost entirely confined to the Stock Exchange, and even there it was kept within a select circle. Each of the great issuing houses had its clientele of brokers and jobbers, who took whatever was offered them. Certain amounts graded according to their financial standing were granted to them as a favor, and were received as such. But when the trust companies came in the underwriting area had to be enlarged. Later the insurance companies joined in, and they are now an important class of underwriters. They are, in fact, preferred to the others, because they are more likely to hold their stock.

One of the largest industrial insurance companies is a wholesale underwriter. It signs for £40,000 or £50,000 of a good issue, and locks it up. Presumably, the stock is taken in at actual cost—namely, the issue price, less the commission. Trust companies and other corporate underwriters may be in the same happy position. The temporary discredit of an investment does not affect them seriously. If they believe in it they may take advantage of the depression to buy more. But the professional dealer in stocks has to turn them over as rapidly as he can, and the speculative underwriter simply wants a quick profit. These two classes are the chief sufferers through a bad issue.

Selling of Consols.

Undoubtedly, considerable amounts of Consols and other gilt-edged stocks have been sold of late in order to provide money for underwriting exigencies. The forced selling of Consols has been so persistent that there cannot be much floating stock left on the market. A silent transformation is going on in the whole range of floating securities, which form the stock-in-trade of investment brokers and jobbers. The bulk of them are no longer gilt-edged Two and a Half and Three per Cents. More frequently they are Three and a Half or Four per Cent. Colonial or foreign.

Thanks to this change the underwriter earns a larger rate of interest on his holdings than he used to do. There is a wider margin than formerly between the yields of his securities and the interest he has to pay on the borrowed money with which he carries them. This, however, may be only a temporary advantage, on which he cannot safely count for more than another month or two. When the autumn strain comes on, he may have to pay much higher interest on these loans than he earns on his stocks, and that is where the danger of excessive underwriting may assert itself.

ROYAL COLONIAL INSTITUTE'S WORK.

(Continued from previous page).

distinguished guests was Sir Newton Moore, agent-general for Western Australia, who, on this occasion, delivered a most interesting address on the present conditions of his state; while a little later Sir Elliott Lewis, premier of Tasmania, gave a lucid summary of the past history and the present prospects of that flourishing Australian state. Then the Hon. Richard McBride, premier of British Columbia, took occasion, at the luncheon at which he was guest of honor, to deliver a stirring address on British Columbian loyalty and position as the guardian of Canada's western gate. Later on in the year, Dr. J. Pelletier, the first agent-general in this country of the Province of Quebec, spoke with much feeling of the attachment of his fellow-countrymen to the British Crown, and gave an eloquent description of Quebec's varied and valuable resources.

PROMOTION OF LIFE INSURANCE COMPANIES

Michigan Insurance Commissioner Wants Better Legislation—Organization Expenses

The Michigan Commissioner of Insurance, Mr. C. A. Palmer, is giving some attention to the promotion of new life insurance companies. He considers this the most important subject for the consideration of the governor and the next legislature of the state. In the annual report of his department he notes that as soon as the company is organized and begins operations as an insurance company, the laws of the state, as they now exist, are sufficient to control the situation. But from the time that an unscrupulous promoter starts to sell stock until the field is properly "worked" or the stock all sold, and a license applied for, the public has no one to whom it can turn for authentic information, as to the honesty and reliability of the proposition offered it.

"That all promotion schemes are not honest," says Mr. Palmer, "is a foregone conclusion. That a great many more that are probably honest are, to say the least, highly colored, and the prospects of the proposed company greatly exaggerated, is established beyond possibility of contradiction. Of course, it is true that there probably is no field of business in which the opportunity for misrepresentation and exaggeration is greater, all due to the profits that have been made in the past by some of the larger insurance institutions. But this is not the day of deferred dividends and confiscated values.

Insurance at Lowest Cost

"A new era has arrived; an era in which the purpose of every honest company is to place insurance upon the market at the lowest possible cost to the insured, and for the stockholders to be satisfied with a modest profit on their investment, but even while I write, the citizens of the great state of Michigan are being circularized and stock being placed with them by the promoters of an insurance corporation, and the literature is not only greatly misleading because of exaggeration, but it contains some absolute misstatements of facts. For instance, it shows as the net earnings of one of the larger and older companies for the year 1910, approximately \$2,500,000, when, as a matter of fact, the net earnings of this company for that year, as shown by the sworn statement of that company on file in this department, was approximately \$46,000. The stock of one of these proposed corporations is generally sold for a considerable advance over the par value, when, as a matter of fact, it has no monetary value whatever. The selling price is arbitrarily fixed by the promoters, at whatever price they believe the public will stand for, and out of the "surplus" or moneys received over and above par value, the organization expenses are paid.

As to Organization Expenses.

"These expenses vary according to the honesty of the promoters, running all the way from practically nothing to as high as 75 and 80 per cent. of the total contribution. The most deplorable fact in the whole deal, however, is the class of investor that is caught by these propositions. It is not the large investor, or financier, who is approached, but the small investor, the widow and orphan with their husband's and father's life insurance that looks so small to them for a covering of the necessities of a lifetime and which must be made to bring the best and quickest returns possible; the tiller of the soil, or the laborer with the little nest egg laid away for a barrier against old age, to whom every dollar represents one hundred drops of sweat; these are the ones who, unfortunately, are the victims of the insurance promoter.

Fifteen Per Cent. Limit

"Please do not understand that I am opposed to new companies. Rather am I in favor of their organization under proper restrictions. If the person purchasing stock is reliably informed as to what he is paying his money for, and if a limit is placed upon the amount of money that may be used for organization purposes, and if the promoters are held to as strict an accounting as are the insurance companies, then I believe that the organization of insurance companies in the state of Michigan should be encouraged. As to just what limit should be placed upon the amount of money that could be used for expenses, I am not prepared to say positively, but it is my present opinion that it should not exceed 15 per cent. of the sale price of the stock. This may be considered by some to be too low, but because we have had three companies organized in this state practically without any organization expense, we know that even that percentage is not absolutely necessary."

Mr. W. G. Langdon has been appointed publicity commissioner at Dauphin, Man.

NOVA SCOTIA TRUST COMPANY.

The Nova Scotia Trust Company which was recently incorporated under special act of the legislature of Nova Scotia has opened offices in the Metropole building, Halifax. They have the usual powers granted to Canadian trust companies as well as power to deal in investment securities and real estate. In the past there has been only one trust company in the Maritime Provinces having its head office there, although there are a number of branches of other companies. The company appears in the field especially fitted to deal in investments as its directors are all successful Nova Scotia business men, who have an intimate acquaintance with the investing public. The Hon. O. T. Daniels is president, and the other directors are Messrs. J. A. McDonald, Melvin S. Clarke, Wm. M. McDonald, and R. W. Elliot. Mr. D. G. Kirk, of Antigonish is to join the board at a later date.

NEW STEAMSHIPS FOR CANADIAN TRADE.

A New York dispatch on Thursday stated that eight new trans-Atlantic liners are being built for exclusive use in the Canadian trade. The four big companies reported to be building two each are the White Star Line, the Allan Line, the Canadian Pacific and the Cunard Steamship Company.

In response to special inquiries, Mr. G. M. Bosworth, vice-president of the Canadian Pacific Railway, wires that the report is incorrect so far as his company is concerned. Neither the Montreal or Toronto office of the White Star Line had official knowledge of new tonnage for the White Star Dominion service.

The only fact in the New York dispatch appears to be in regard to the Allan Line, who inform The Monetary Times that they are building two steamers, eighteen thousand tons each, quadruple turbines, with all the latest improvements of modern science in shipbuilding. These are for the Canadian trade, and their names will be "Alsatian," and "Calgarian." They will probably be available for Canadian trade at the opening of St. Lawrence season in 1913.

RAILROAD EARNINGS.

The gross earnings of the Canadian Pacific Railway for the past three fiscal years are as follows:—

July 1, 1911, to July 1, 1912	\$122,856,000
July 1, 1910, to July 1, 1911	103,525,000
July 1, 1909, to July 1, 1910	94,490,000

The Grand Trunk May statement shows net profit, as follows: Grand Trunk proper, increase £500 sterling; Atlantic, net profit decreased £3,250; Grand Trunk western, net profit increased £23,950; Grand Haven, net profit increased £1,650. The total net profit for the whole system increased £22,850.

The gross earnings of the Canadian Northern Railway for the twelve months ending June 30, 1912, were \$19,538,600, as compared with \$15,199,200 in the previous twelve months, a gain of \$4,339,400.

The gross earnings of Toronto Railway for June were \$444,598.91, as compared with \$401,185.88 in the corresponding month last year, an increase last month of \$43,413.03. In the past five years the street car receipts for the month of June have increased by \$153,141.41, and the percentages paid to the city for June have increased by \$45,201.17.

Traffic is increasing steadily on the Timiskaming and Northern Ontario Railway, although heavier operating charges keep net earnings from gaining much on last year's figures. The gross earnings for April amounted to \$142,525, compared with \$118,181 in May, 1911. Operating charges increased from \$78,000 to \$107,000, leaving a net revenue of \$50,869. In April, 1911, the net for the month was \$40,467. From the beginning of the financial year on November 1st to the end of April, net earnings amounted to \$278,000, compared with \$272,000 for the corresponding period last year. A considerable portion of the road's earning revenue this year is represented by ore royalties, the total being \$71,900, compared with only \$12,391 for the corresponding period of 1910-1911.

The following are the railroad earnings for the week ended June 30th:—

	1911.	1912.	Increase or decrease.
C.P.R.	\$2,807,000	\$3,293,000	+ \$486,000
G.T.R.	1,629,178	1,552,647	— 76,531
C.N.R.	469,700	579,700	+ 110,000
T. & N.O.R.	32,048	33,423	+ 1,375
Halifax Electric	6,311	6,871	+ 560

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Macklin Village, Sask.—Until July 22nd for \$5,500 6 per cent. debentures 15 years. Secretary-treasurer, Macklin.

Halifax, N.S.—Until July 15 for \$352,700 4 per cent. payable July 1st, 1945, to Mr. W. L. Brown, city treasurer.

Nipissing, Ont.—July 15th the electors will vote on a by-law to issue \$30,000 debentures for waterworks, etc.

Fernie, B.C.—By-laws to raise \$30,000 to build and equip addition to the central school building were carried.

North Toronto, Ont.—The ratepayers passed a Public school building by-law for \$40,000.

Medicine Hat, Alta.—By-laws aggregating \$89,820 to be utilized for city improvements, were carried.

Strassburg Rural Municipality No. 220, Sask.—Until July 20th for \$7,500 6 per cent. debentures. S. L. A. Smyth, secretary-treasurer.

McTaggart S.D. No. 1143, Sask.—Until August 1st for \$4,000 20-year debentures. R. J. Jackson, secretary-treasurer, McTaggart.

Lloydminster, Sask.—Tenders are invited for \$5,000 debentures. H. C. Lisle, secretary-treasurer. (Official advertisement appears on another page).

Pas, Man.—Tenders are called for \$200,000 20-year municipal improvement debentures. H. Finger, mayor. (Official advertisement appears on another page).

Port Dover.—The by-law providing for the purchase by this municipality of \$25,000 of stock in the Lake Erie & North-ern Railway was voted upon this week and carried.

Antigonish, N.S.—Up to Tuesday, July 16th, 1912, for the purchase of \$7,000 of town of Antigonish waterworks debentures. D. C. Chisholm, town clerk.

Stettler, Alta.—Until August 22nd for \$10,800 5½ per cent. 20-year waterworks, and \$4,000 5½ per cent. 20-year electric light debentures. R. Dick Ballantyne, secretary-treasurer.

Paris, Ont.—The twenty-five thousand-dollar by-law to purchase bonds in the stock of the proposed electric railway from Port Dover to Galt, known as the Lake Erie and North-ern Railway, was carried.

Ottawa, Ont.—Until August 29th for \$12,000 40-year, \$727,000 30-year, and \$292,429.99 20-year debentures; interest, 4 per cent. Charles Hopewell, mayor. (Official advertisement appears on another page.)

Victoria, B.C.—By-laws to raise the sum of \$500,000 for the purpose of erecting a new City Hall upon the Pandora Street Gore, and to raise the sum of \$175,000 for school purposes, will be voted on by the electors on July 11th.

Vermilion, Alta.—Until July 27th, for \$4,000 park, \$1,000 electric light and \$1,000 sidewalk debentures. Interest, 6 per cent.; payable in 20 instalments. H. P. Long, secretary-treasurer. (Official advertisement appears on another page).

St. John, N.B.—Until July 15th for \$50,000 bonds, tax exempt, 4 per cent. 40-year Lancaster sewerage bonds, in denominations of \$250 and \$500. J. King Kelley, county secretary.

Nelson, B.C.—Until July 25th, for \$20,000 20-year 5 per cent. fire hall; \$7,500 20-year 5 per cent. waterworks; \$7,500 20-year 5 per cent. sewer; and \$8,595.20 5 per cent. 10-year local improvement debentures. W. E. Wasson, city clerk.

West Vancouver, B.C.—Until July 16th for \$75,000 50-year 5 per cent. road; \$25,000 5 per cent. 50-year school; and \$30,000 5 per cent. 20-year ferry debentures. G. H. Peake, C.M.C., 103 Mercantile Building, 318 Homer Street, Vancouver.

Fort William, Ont.—The electors will vote on the following by-laws on July 10th:—\$253,000 for improving and extending the waterworks system; \$200,000 for street railway purposes; \$21,000 for parks; \$14,000 for fire engine, etc.; \$205,000 for public market.

Winnipeg, Man.—Among the by-laws introduced at the council meeting, one for \$750,000 for extensions to the power and light distribution system, will be submitted to the ratepayers. The by-law to raise \$1,250,000 for a subway was put through two readings, but was then held for further discussion.

Toronto, Ont.—With a view to retaining the cattle market Toronto will build an abattoir, and have secured the promise of the Premier, Sir James Whitney, and several of his colleagues in the Ontario Government to permit the city to issue debentures for this purpose to the sum of \$300,000, without going to the ratepayers.

Point Grey Municipality, B.C.—Until July 15th for \$340,000 50-year roads; \$501,250 40-year roads; \$50,125 4½ per cent. 50-year waterworks; \$50,125 4½ per cent. 50-year schools; \$164,800 4½ per cent. 50-year roads; \$257,933.33 4½ per cent. 50-year sewers; and \$41,366.66 4½ per cent. 25-year sidewalks debentures. H. Floyd, comptroller, Kerrisdale, B.C. (Official advertisement appears on another page).

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Toronto, Ont.—July 4.—Mr. R. Edwards' residence destroyed. Loss \$850, insurance \$500. Origin unknown.

South Porcupine, Ont.—July 3.—Hollinger Reserve mine plant damaged. Loss and origin unknown.

Sault Ste. Marie, Ont.—July 1.—Forest fires in the vicinity of Shell Lake destroyed much valuable white pine.

Halifax, N.S.—July 3.—Forest fires broke out near Halifax, but were kept under control.

Montreal, Que.—July 3.—Starke Cooperage Company's premises. Loss \$30,000. Origin unknown.

Montreal, Que.—July 3.—Four sheds and two houses destroyed. Loss \$2,000. Origin, boys playing with matches.

Turbot, Ont.—July 8.—9 residences destroyed. Loss, \$6,000. Origin unknown.

Cobourg, Ont.—July 7.—Mr. R. Blakely's house and barns. Loss and origin unknown.

Brookville, Ont.—July 7.—Mr. H. Streets livery stables. Loss and origin unknown.

Toronto, Ont.—July 6.—Mr. H. Hope's planing mill. Loss, building \$1,000, machinery \$2,500. Origin unknown.

North Bay, Ont.—July 4.—Lady Evelyn Hotel. Loss \$30,000. Origin unknown.

Steveston, B.C.—June 25.—Richmond Hotel. Loss \$12,000. Origin unknown.

Scarboro Junction, Ont.—July 4.—Mr. Third's barn. Loss \$2,500. Origin lightning.

Montreal, Que.—July 3.—Messrs. Morin and Frere lumber yard. Loss and origin unknown.

Whitewood, Sask.—June 29.—Road camp damaged. Loss \$500. Origin unknown.

Cedars, Que.—July 7.—Hotel store and tailor's shop destroyed. Loss \$50,000. Origin supposed to be tramps smoking in a barn.

Cobalt, Ont.—July 5.—The post office, Star Theatre, Mr. Louis Fleury's store and two empty stores. Loss \$6,000, with no insurance. Origin unknown.

North Head, N.B.—July 7.—Seventeen buildings were burned, including the Bank of New Brunswick and the custom house. Loss estimated at \$60,000, with little insurance.

Tilbury, Ont.—June 9.—Mr. S. Mather's mill and contents \$14,000, insurance \$8,500. Mr. John A. Magee's barn \$2,000, insurance \$1,000. Messrs. Beno and Morrison, liverymen, including 15 horses \$3,500, insured for \$2,500. Town pumping plant's estimated loss is \$1,000 fully insured. The telegraph and telephone lines in the vicinity of the fire were wrecked. Total loss \$22,000. Origin unknown.

Bedford, N.S.—July 4.—Mr. J. E. Roy's residence and three other houses owned by him, and occupied by Mrs. Ward, Miss Murphy, Mr. T. H. Curry. Loss, Mr. Roy, \$25,000. Insurance, buildings \$7,000 Nova Scotia Fire Insurance Company; \$1,000 Liverpool, London and Globe Company; \$1,000 British American Company; \$2,000 Fidelity Underwriters; furniture, etc., Mr. Roy's, \$2,000 Western Insurance Company; \$1,000 Connecticut Insurance Company; Mr. Curry's, \$1,000 Continental Insurance Company.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED.

Chicoutimi, Que.—The following are the companies affected by the fire at Chicoutimi:—Atlas, \$11,000; British America, \$4,500 Caledonian, \$2,000; Commercial Union, \$23,300; Fidelity-Phenix, \$17,500; Guardian, \$43,000; Liverpool & London & Globe, \$58,000; Manitoba, \$33,000; Insurance Company of North America, \$18,000; North British, \$1,200; Northern, \$18,000; Norwich Union, \$12,500; Phoenix of London, \$27,000; Queen, \$9,500; Royal, \$46,500; Sun, \$11,000; Union of London, \$10,000; Western, \$500; La Fabrique, \$52,000; Anglo-American, \$1,000; Dominion, \$8,200; London Mutual, \$3,000; Mount Royal, \$1,000; Ontario, \$6,000; Provincial, \$30,000; Rimouski, \$20,000; Strathcona, \$5,000; Stirling, \$1,000; Richmond & Drummond, \$3,200; Stanstead & Sherbrooke, \$3,000; Mutual de St. Hyacinthe, \$10,000; La Protection, \$1,500.

Among the industrial enterprises recently located at Edmonton are a brewery, two brick plants, a tent and mattress factory, a cigar factory and four wood-working plants.

SOVEREIGN BANK AFFAIRS

First Report of International Assets, Handling the Bank's Assets and Liabilities, is Presented

The first annual report of International Assets, the company formed to handle the Sovereign Bank's affairs was presented this week. The company's operations commenced in August, 1911, when it took over the assets formerly owned by the Sovereign Bank, and assumed liabilities, as follows:—Cash payments due on purchase of assets, \$2,038,997.77; accrued interest from 30th June, \$19,650.51; bonds covering all assets \$2,020,000, making a total of \$4,078,648.28.

During the period ended 31st May, 1912, its receipts were: Subscriptions to preference stock, \$2,073,143; realization on assets, \$575,082.33; other sources, \$36,602.62, making a total of \$2,684,827.95.

Disposal of Money.

This amount has been disposed of as follows:—

Cash payments on purchase of assets	\$2,038,997.77
Bonds paid. Due 1st January, 1912 ..	\$120,000
On account of payment due 30th June, 1912	310,000
	<u>\$ 430,000.00</u>
Interest paid	84,606.08
Liabilities of Sovereign Bank purchased, reinvestments made, etc.	67,132.94
Organization expenses	23,103.41
Trustees' expenses	2,811.94
Legal expenses	8,265.45
General expenses	14,459.30
	<u>\$2,668,376.89</u>
Cash on hand	15,451.06
	<u>\$2,684,827.95</u>

Showing in Balance Sheet.

The balance sheet presented to the shareholders this week showed the company's assets as \$8,408,916.79 divided as follows:—

Cash on hand	\$ 166.05
Cash in bank	15,285.01
	<u>\$ 15,451.06</u>
Safes and office furniture	500.00
Bonds and stocks	81,075.80
Real estate and mortgages	41,482.50
Forfeited stock	54,850.00
Unpaid stock subscription	84,607.00
Bills and accounts receivable and other assets (nominal valuation)	4,407,075.67
Due by Sovereign Bank of Canada	3,723,874.76
	<u>\$8,408,916.79</u>

The following is a statement of liabilities:—

Five per cent. mortgage bonds.....	\$1,900,000
Less redemption fund	310,000
	<u>\$1,590,000.00</u>
Accrued interest on bonds	13,250.00
Other liabilities	22,904.93
	<u>\$1,626,154.93</u>
Total liabilities to public	
Common (authorized \$1,000,000) ..	\$1,000,000
Preferred (authorized \$3,000,000), subscribed	2,212,600
	<u>\$3,212,600.00</u>
Contracts with Sovereign Bank of Canada (nominal valuation)	3,523,874.76
Surplus, nominal	46,287.10
	<u>\$8,408,916.79</u>

Reduction of Debt.

The report stated in part:—"The total liabilities, other than to shareholders, have been brought down from \$4,078,648.28 to \$1,626,154.93, a reduction of \$2,452,493.35. As against this, new liabilities to shareholders have been contracted to the extent of \$2,073,143, being the amount paid in by them on preference stock.

"The debt has been reduced as on the 31st of May, from \$3,938,997.77 to \$3,723,874.76. As it is evident that it will be a considerable time, if ever, before it can be paid in full, the shareholders should consider whether the company should not make a formal demand on the bank for payment, and in default take the necessary steps to cause the double liability to be collected.

"The amount of the call to which this company, as a shareholder, in the Sovereign Bank, would be liable, is \$2,-

157,750, while your directors estimate that from \$150,000 to \$175,000 can be collected from other shareholders."

Quantity of Disputed Stock.

"In addition, there is a large quantity of disputed stock from which a considerable amount can be collected if the judgment of the Privy Council in the case of the Sovereign Bank directors should be in our favor."

Mr. Emilius Jarvis was elected president, Mr. Alex. Bruce was elected vice-president, and the directors elected were J. A. Halstead, F. G. Jennett, W. J. Boland, Rev. E. D. Silcox and S. Kilpatrick.

WHAT TRENTON OFFERS MANUFACTURERS

Trenton, Ont., offers the manufacturer an excellent combination of advantages. Its policy is to donate free sites to manufacturers desirous of locating in Trenton, provided the industry gives employment to a number of hands, sufficient to entitle it to such a concession.

Excellent factory sites, through which spur lines of one railway already run, and of which the secretary of the board of trade will furnish full particulars and which are so situated as to be easily accessible to the navigable waters of the Trent River, can be purchased very reasonably, and transportation is furnished by the main lines of the Grand Trunk Railway, Central Ontario Railway, Canadian Northern Railway and that of the Canadian Pacific Lake Shore line is building.

ANGLO-CANADIAN MORTGAGE INVESTMENT CORPORATION

It is natural that the extensive demand for funds in the Dominion, especially in the Western provinces, should multiply mortgage companies. The Anglo-Canadian Mortgage Investment Corporation is one of the latest to help satisfy the demand. It has a Saskatchewan charter and capital stock of \$500,000 in 10,000 shares of \$50 each. The directors propose to distribute the capital stock not only throughout Canada but also in Great Britain and anticipate that with the active co-operation of the shareholders valuable and extensive connections will be established from the outset, resulting in a large amount of good business.

The organization costs are reported to have been low, making early dividend prospects more likely. The company, which may later apply for a Dominion charter with increased powers, is formed primarily for the purpose of investing its funds in Canada at a higher rate of interest than can ordinarily be obtained by the individual investor, and in the first place by the purchase of vendors' equities in agreements of sale, mortgages, etc., and to provide a safe channel through which English capital may be employed in absolutely safe and conservative investments, and in order to afford facilities which would not otherwise be available for acquiring selected investments in all lines of real estate securities.

It is the intention of the company to act as agents to carry on an active agency for English and Eastern investors who wish to employ their funds in mortgage or other channels of investment in Canada where they are assured of a safe and careful management and oversight in procuring these investments. Private or corporation funds will be invested by the company acting as agents for the investors where from six to eight per cent. per annum net is easily obtainable for first mortgage loans.

The officers and directors are as follow:—President, Henry Dorrell; vice-president, Alfred W. Maybery; directors: Henry Dorrell, Alfred W. Maybery, John A. McLean, John W. Colling, Frederick A. G. Ouseley, Joseph E. Battell, Hugh M. Barrett, George W. Fowler, M.P., secretary-treasurer, H. Davison Pickett.

An incendiary, who attempted to set fire on Cushing Brothers' factory at Saskatoon, escaped. The fire was extinguished before damage was done.

Mr. C. F. Codere, Winnipeg, formerly superintendent for Western Canada of the St. Paul Fire and Marine Insurance Company, is going into partnership with Messrs. Butler and Byers, the well-known Saskatoon firm.

The Timiskaming and Northern Ontario Railway has received a report from its engineers establishing the fact that copper exists in important quantities in Lebel Township, north of Englehart. On the property of the Dane Mining Company, where two shafts, one of 120 feet and the other of 200 feet, have been sunk, the ore has been found well mineralized. The other mines showing copper are the Swastika, the Lucky Cross and the Tough Oakes.

CANADA PERSISTS WITH FLOTATIONS

More Issues Made in the London Market Despite Warnings from Significant Quarters

The Cape Breton Coal, Iron and Railway Company, Limited, has offered in London £300,000 6 per cent. first mortgage gold bonds at 98. The authorized bond issue is £410,000. The balance, £110,000, will be available for future issue, if required. There are also authorized \$2,000,000 5 per cent. income bonds, of which \$921,000 are issued. The company's capital is \$5,000,000, divided into 50,000 shares of \$100 each, of which 40,000 shares are issued or agreed to be issued as fully paid. Every subscriber who receives an allotment of any of the bonds of the company of the present offering will, upon payment of the final instalment, be entitled to receive one fully-paid share of \$100 in respect of each £100 bond allotted to him; the said shares will rank pari passu with the shares already issued by the company and will form part of the \$5,000,000 capital.

The Cape Breton Coal, Iron and Railway Company, Limited, was incorporated in 1895 for the purpose of acquiring, developing and working certain coal areas in Cape Breton. The areas which have been acquired from time to time now amount to nearly eighty square miles (about 50,000 acres).

The following are the directors of the company:—Messrs. Horace Mayhew, J.P., D.L., Broughton Hall, Broughton, Chester (Messrs. Mayhew and Leech, mining engineers, King Street, Wigan; managing partner in the Hawarden group of collieries; managing director of Hall's Collieries, Limited, Burton-on-Trent), president. William Buckley Gladstone (Messrs. Ogilvy, Gillanders and Company), 67 Cornhill, London, E.C. William Hanson (Messrs. Hanson Bros.), St. James' Street, Montreal. Arthur Hildebrand Ramsden-Tagore, 85 Gracechurch Street, London, E.C. (Director, Rhymney Iron Company, Limited). Charles Taswell Richardson, Chastleton House, Moreton-in-Marsh (Chairman, Pathini Tea Company, Limited).

Corporation of Canada Issue.

The Corporation of Canada, Limited, of whose Canadian board Hon. Robert Rogers, W. A. Black and George Drummond are members, has issued in London £250,000 four and a half per cent. debentures at 97½.

Arrangements for an issue in London of \$5,000,000 bonds of the Pacific Great Eastern Railway, to run from North Vancouver to Fort George, have been successfully completed. Construction work will be started within the next few weeks at a point between the southern terminus and Newport, at the head of Howe Sound. This is the announcement made by Mr. D'Arcy Tate, K.C., vice-president and manager of the proposed road. Subscriptions for the issue will be lodged with Parr's Bank in London and the Canadian agents will be the Union Bank of Canada.

Ontario to Market Loan.

Hon. A. J. Matheson, provincial treasurer of Ontario, leaves shortly for the Old Country. During his stay in London he will look into the condition of the money market with a view to placing the remainder of the five-million-dollar loan to be raised for Northern Ontario development. The first million was secured some time ago through the Bank of Montreal, and it is expected that the rest will be placed as soon as the great money markets assume a sufficiently favorable tone.

Sir Edmund Osler has returned to Toronto after a visit to Great Britain. He adds his opinion to others, that Canada has endeavored to float too many issues on the English market. "It would be unwise, he says, to force any more Canadian flotations upon England just now. The present supply of offerings is not absorbed, and the feeling is that Canada is asking for too much money. 'The English capitalist,' said Sir Edmund, 'on the other hand, is very much interested and closely in touch with the development of the newer parts of Canada. The West particularly is receiving a lot of private attention from English capital.' It is the public issue that has been overdone in the old land, and has caused a halt in the movement of municipal and other public flotations.

Had to Increase Underwriting Commission.

Some recent borrowers in London, notably Newfoundland and the city of Edmonton, had to increase the underwriting commission from 1 to 1½ per cent. in order to induce the market to guarantee the issues. Such a policy cannot long continue, as the knowledge that such high terms are offered will restrain the public from subscribing, investors knowing full well that they will be able later to buy the securities at a discount.

While the half-yearly settlements have been financed without apparent strain, there appears no probability of a distinct ease in our money situation, says a London cable

to a New York daily. The loan market is laboring under the large recent issues of securities that are still in the hands of underwriters—securities that are still to be digested. The demand for capital exceeds the supply. Hence the gradual contraction in gilt-edged securities due to the exigencies of underwriters of the new securities.

VANCOUVER STOCK EXCHANGE.

The following table shows the number of shares sold, high and low prices and value, on the Vancouver Stock Exchange for the year ended June 30th, 1912:—

The transformation of Toronto's waterfront into model industrial locations on the east, a central harbor with shipping and docking facilities, and a sea-wall drive and park system on the west, is reported to be the ambition of the civic harbor commission. They expect to raise the necessary funds by debentures, in issues made as required, and instead of asking the Dominion Government for loans, a course that was followed by Montreal, the commission probably will ask the Federal power to guarantee their bonds.

DESIRE A LOAN AGENCY

Messrs. Welton Bros., Red Deer, Alta., desire an agency for a loan company, lending money on town property.

A LARGE British Fire Insurance Office of highest standing desires to make city agency arrangements at Toronto, with one or two first-class men. Highest rates of commission for good business. Communications will be treated strictly confidential. Box 63, The Monetary Times, Toronto.

TWO LARGE MONTREAL COMPANIES

Grand Trunk Terminal Warehouse Company and Industrial Properties Corporation Account for Sixteen Millions Capital

Forty-five new companies this week have aggregate authorized capitalization of \$22,288,400. Classifying them according to the situation of the head office, the following result is obtained:—

Companies with head office, in	No.	Aggregate Capital.
New Brunswick	3	\$ 79,000
Manitoba	10	1,580,000
Ontario	21	2,765,000
Quebec	11	17,864,000

The Quebec figures are made large by the inclusion of the Grand Trunk Terminal Warehouse Company, with capital of \$6,500,000 and the Industrial Properties Corporation, \$10,000,000, both with head office at Montreal. The scope of the former company was explained in last week's *Monetary Times*. The three representatives of the Grand Trunk and Grand Trunk Pacific on the board of the new company will be Messrs. Wm. Wainwright, R. S. Logan and J. E. Dalrymple.

The latter company has authority to manufacture, buy, sell and deal in all kinds of goods, wares, merchandise; to buy or otherwise acquire and to hold sell or otherwise dispose of all kinds of property, both real and personal; to organize, manage or develop, or to assist in the organization, management or development of any corporation, company, syndicate, enterprise or undertaking, and so on.

J. J. McLaughlin, Limited, is the only other large company with capital of \$1,000,000. It will take over the business of J. J. McLaughlin, Toronto, mineral water manufacturers.

The new incorporations for June in the United States aggregated over \$280,000,000, as against \$250,000,000 last year and \$230,000,000 in 1910. The new security issues in June were also very large, having amounted to nearly \$300,000,000, as against \$238,000,000 a year ago. This brings the total new flotations for the first half year up to the extraordinary sum of \$1,557,000,000, against \$1,229,000,000 a year ago. Some deduction must be made from these figures for refunding operations, but if 25 per cent. were made on this account it would still show a record-breaking demand for new capital.

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Hanover, Ont.—Peppler Brothers, \$100,000. M. Peppler, H. Peppler, N. Peppler.

Simcoe, Ont.—Norfolk Gold and Country Club, \$25,000. F. Reid, F. E. Curtis, J. Porter.

Dalhousie, N.B.—Clifford Drug Company, \$5,000. A. H. Hilyard, P. H. Sheehan, H. A. Hilyard.

Chatham, Ont.—Children's Aid Society of the County of Kent. D. S. Paterson, R. V. Bray, W. R. Hall.

Hamilton, Ont.—Hamilton Trolley Wheel Company, \$60,000. H. Brown, H. McReynolds, H. B. Currie.

Lochiel, Ont.—Quigley Cheese Manufacturing Association. J. A. McGillis, M. McRae, A. B. McDonald.

St. Flavien, Que.—La Compagnie de Progress de St. Flavien, \$49,900. A. Dumaine, L. Ratee, J. Paquet.

Sheguindahin, Ont.—New Ontario Oil and Gas Company, \$45,000. J. M. Fortier, J. Daust, A. P. Frigon, Montreal.

Quebec.—Crown Furniture Company, \$45,000. J. E. Paquet, Quebec; A. H. Thompson, Montreal; L. O. Paquet, Quebec.

Fort William, Ont.—Silver Islet Navigation Company, \$40,000. F. S. Wiley, R. L. F. Strathy, H. J. Stephens, Port Arthur.

Three Rivers, Que.—La Compagnie des Terrains Notre Dame du Cap, \$49,500. L. P. Normand, C. N. de Blois, I. H. de Grandmont.

Windsor, Ont.—White Machine Works, \$40,000. A. E. White, Eau Claire; W. A. White, E. S. Wigle, Windsor. Ideal Mat Company, \$100,000. F. D. Davis, Windsor; C. E. Henri, H. W. Dunham, Detroit.

St. John, N.B.—Newlands Improvement Company, \$50,000. A. R. Slipp, R. B. Hanson, H. Calder, Fredericton. Hutchings Company, \$24,000. C. H. Hutchings, Westfield; A. K. Hutchings, J. Hannah, St. John.

Ottawa.—Cando Townsite Company, \$50,000. H. E. Nunn, Guelph; N. A. Belcourt, J. A. Ritchie, Ottawa. Ottawa Pattern and Foundry Company, \$40,000. G. H. Rogers, A. E. Stitt, N. M. Retallack. Rideau Electric Supplies, \$40,000. A. A. Martin, A. E. Stitt, N. M. Retallack.

Montreal.—Grand Trunk Terminals Warehouse Company, \$6,500,000. A. C. Calder, S. G. Dixon, J. M. Montle. Industrial Properties Corporation, \$10,000,000. W. McDougall, L. Macfarlane, G. Barclay. Eastmount Land Company, \$100,000. J. A. Davis, E. Pitt, Outremont; T. J. Shallow, Montreal. Aberdeen Estates, \$250,000. A. H. Duff, W. A. Merrill, R. Burnett. Jacobs Hart and Company, \$20,000. A. R. Hall, I. Friedman. Cyclops Construction Company, \$300,000. P. Bercovitch, H. J. Trihey, J. Johnston. British American Film Manufacturing Company, \$500,000. A. R. Holden, C. G. Heward, A. Charters. Dixie Land Company, \$50,000. E. R. Decary, J. C. Barlow, H. Decary.

Toronto.—Johnson Temperature Regulating Company of Canada, \$50,000. H. W. Ellis, Milwaukee; D. D. Fish, H. E. Wallace, Toronto. J. J. McLaughlin, \$1,000,000. S. W. C. Scott, J. M. Donahue, J. H. McDonald. Garden Springs, \$75,000. J. T. Campbell, N. D. McLean, H. R. Moses. Canadian Building and Land Associations, \$40,000. J. P. MacGregor, C. S. Mallett. William Woodley & Sons, \$40,000. W. Woodley. R. A. Woodley, F. L. Woodley. Toronto Properties, \$500,000. H. Riley, W. B. Sturup, G. W. Morley. Dominion Reduction Company, \$400,000. J. G. Shaw, J. Montgomery, H. P. Edge. Lakeside Land Company, \$40,000. J. P. McNair, J. A. Burns, A. N. Burns. Royal Templar Hall Company, \$100,000. B. F. Harvey, J. M. Sparrow, W. J. Armstrong. Rockyford Irrigation Land Company, \$40,000. J. L. Ross, A. W. Holmstead, W. L. Carr.

Winnipeg, Man.—Colonial Securities Company, \$100,000. L. Rosewald, C. R. Dodderidge, J. T. McKaig. Autogenous Welding and Gas Company, \$100,000. C. H. Locke, C. A. Crawley, G. F. de C. O'Grady. Russel Land Company, \$60,000. D. H. Hudson, J. S. Reid, D. A. Downie. Red River Boulevard Company, \$20,000. W. S. Fallis G. S. Galloway, J. Munro. St. Andrew's Investments, \$100,000. C. Vokes, C. W. N. Kennedy, A. E. Hoskin. Producers' Grain Commission Company, \$100,000. R. D. Smith, J. B. Crepeau, W. F. Guild. Star Realty, \$100,000. D. S. Robb, E. J. Thomas, W. J. Major. Lamton Winnipeg Investment Company, \$100,000. G. H. Balls, F. E. Balls, A. D. Sproule. Winnipeg Supply and Fuel Company, \$800,000. Miss G. W. Tarbolton, Miss J. T. Scott, Miss M. Fulton. Western Grain Company, \$100,000. R. Siderfin, E. B. Eadie, D. Wilson.

NEW BRUNSWICK'S INTERESTS

(Staff Correspondence.)

St. John, July 8th.

While high freights and a dull market have somewhat effected lumber shipments to transatlantic ports, there has been considerable demand from the United States market, and large shipments are going forward, the mills everywhere are busy.

With regard to the fisheries, the catch of cod has been small. There has been a fair catch of salmon. The lobster catch has been light. The market for cured fish is dull, all fresh fish find a ready market and bring good prices.

Sir Thomas Tait, in behalf of the Grand Lake Coal and Railway Company is negotiating for one of the most extensive and valuable coal properties in the Grand Lake district in Queens County. It is stated that when this property has been acquired, the company's holdings will have an estimated output of about two million tons.

Mr. A. G. Turney, the provincial horticulturist, is selecting the sites for the commercial orchards to be established by the St. John, Moncton, Woodstock and other Boards of Trade under his direction.

Thirty-five applications for homesteads on crown lands have been made showing that more interest is being taken in the movement to settle farm lands.

Mr. W. P. Thomson, representing J. Norton-Griffiths, M.P., is in New Brunswick making enquiries regarding desirable localities in which to place farm settlers brought from the old country.

Natural gas pipes have been laid from the oil wells in Albert County, to the border of the village of Hillsboro, where the gas will be installed for industrial and other purposes.

The customs receipts at St. John for the quarter ending June 30th, showed an increase of more than \$45,000 over those of the corresponding quarter last year. The inland revenue receipts also show a substantial increase.—W.E.A.

FIRE INSURANCE STANDARDS OF RATING

Relations with the Public—San Francisco Conflagration Showed Ability of Underwriters to Fulfil Promises

In the relations with the public the following have been accomplished in the interest and for the protection of the public, intimated Mr. H. W. Eaton, manager of the Liverpool, London and Globe Insurance Company, in a recent address at New York.

The maintenance of just standards of rating.

The granting of bounties in the shape of rate reduction for improvement in hazards.

The reduction of fire waste and especially the conflagration hazard in various ways.

The accumulation of resources to strengthen the indemnity offered.

"As to whether just standards of rating have been adopted and maintained, we allege that, to the best of our ability, this has been done. If in this judgment we are wrong, then the public is at fault in not apprising us of their views, which the underwriters are ever ready to receive and welcome. In looking, however, for public evidences of fault, we would naturally turn to the reports of the recent investigation by the Legislative Commission of the State of New York, during which complaints of aggrieved policyholders were invited. The result did not justify any conclusion under this head unfavorable to insurance companies, both as to the number and importance of complaints presented.

Rates Affecting Similar Establishments.

"For many years past no complaints have come to notice in the case of the rather large operations conducted under my general supervision, save in instances involving differences in rates affecting complainants and competitors maintaining like trading establishments. These were immediately withdrawn on my being able to point out the particulars of the rating of the two establishments, by which it appeared that, if such complainant would conduct improvements of a kind made by their competitors, they could obtain equal or even lower rates. It is to be remarked, in this connection, that only by co-operation can systems of rating be devised and maintained whereby unjust discriminations can be avoided.

"Looking to the results attending the operations of the fire insurance companies over a period of years for evidence that in the fixing of rates injustice to the insured has been perpetrated, will result in failure to find anything to warrant in any degree such a condition, for in the ten years ending December 31st last, the fire insurance companies lost in the aggregate a sum far in excess of that furnished by the premiums collected from the assured. During the past year the underwriting profits to fire insurance companies in the aggregate amounted to 66-100 of 1 per cent. on the premiums.

Need of Substantial Accumulations.

"When the need is considered of substantial accumulations to provide for the possibilities of serious loss attaching to this hazardous business, this result is not only extremely poor, but highly insufficient.

"As to the granting of bounties in the shape of rate reductions for improvements in hazard, the following facts are presented for the justification of the fire underwriter.

"Whilst it would be difficult to ascertain the exact extent to which, in the aggregate, voluntary abatements in premium throughout the United States have been made for improvements in hazards conducted under advice, an impression is formed of its great extent, due to continued observation of the vast number of individual applications submitted for our consideration. In some cities—as in New York—useful information, and in some detail, bearing on this point, is at hand and in a statement issued by the New York Exchange towards the close of 1910, it was announced that not less than 16,000 improvements on an average had been influenced yearly by abatements in premium made therefor. In regard to concession in rates often affecting a wide number of hazards, involved in a general reduction of rates in a given area for improved fire extinguishing facilities of cities, action in New York may be again referred to, for in the same line reductions of rates were made in January, 1912, in addition to action taken in 1908, in the three districts in which the high pressure service had been installed. In the case of the first of these general reductions the concessions averaged about 10 per cent. of the annual premium of the highest rated section of the city, representing the relinquishment in premiums of an immense sum in the aggregate, and it is to be remembered that the installation of this high pressure system was largely

influenced by the persistent recommendation of the fire insurance companies to the municipality.

Voluntary Rate Reduction Afforded by Co-operation.

As an impressive reference in this connection, dealing with general results, it seems desirable to point out the changes in which voluntary rate reduction afforded by co-operation has played a large part during the last few years:

In 1906 the average rate on sums assured was 1.146%
In 1911 this had been reduced to 1.0594%
Leaving a difference of 1.0594%

"This reduction as a percentage gradually applied over the period amounts to about 7½ per cent. If the rate applying to the year 1906 were applied to the sums assured for the year 1911, the companies would, in the aggregate, have received not less than \$35,000,000 more in premiums last year. A large portion of this represents what the companies have voluntarily relinquished in a desire to assist in relieving the burdens of the insuring public.

"As to the reduction of the fire waste, and especially as to the conflagration hazard your attention is drawn to the very valuable address delivered at the last annual meeting of the National Board of Fire Underwriters by its president, Mr. Babb.

Reduction of Fire Waste.

"The reduction of the fire waste has in part been encouraged by our system of rewards to policyholders by premium abatement for improvement of individual hazards, but the lessened tendency to conflagration has come not alone from this, but from a direct expenditure on the part of the insurance companies by the employment of a large force of men in inspection work in the many ways already described to you. The insurance companies therefore have surrendered some of the premium to the public as the price of certain improvements, and of the the premium which has remained they have devoted a certain portion to particular purposes of protection against fire of a kind which the individual policyholder could not well influence.

"Thus throughout the country fire departments have been methodically and periodically inspected with exhaustive tests of apparatus and water supplies upon which they were dependent with their distribution. Such inspections are conducted by persons carefully selected and competent to advise as to needed changes. The reports when made are printed, with particulars in much detail and recommendations for change. These are sent to the municipal authorities interested and independent efforts made by the insurance companies through the public press and otherwise to influence the improvements desired. For this service alone the insurance companies spend, through the National Board of Fire Underwriters, about \$68,000 per annum.

Building up of Large Resources.

"As to the accumulation of resources to strengthen the indemnity offered:—

"At the beginning of the year 1871, and, therefore, a few months prior to the happening of the great Chicago fire, the combined resources (capital and surplus) of the six fire insurance companies then doing business in the United States and having the largest incomes were \$12,532,217, or an average of \$2,088,703. The experience of this large loss, and especially that in the conflagration at Boston in the following year, showed conservatively managed companies the need of larger resources and the desirability of restricting dividends during the process of up-building. The apparent necessity for the change had, moreover, support in the report of the Insurance Superintendent of New York State for the year 1872, in which he said: 'This sweeping conflagration (Chicago) should, and it is hoped will, act as a powerful instrument toward inducing the managers of companies to provide for the accumulation of large surpluses of available assets beyond capital.' And the aims of the conservative companies were never apparently afterward ill-directed, for a steady increase in the amounts withheld from dividends for reserve purposes to the end that they might be found ready for emergencies of the same kind in future times.

Baltimore and San Francisco Conflagrations.

"The conflagrations of Baltimore and San Francisco accordingly found companies generally well prepared, and the distressed insurers at those points were left in no doubt that, notwithstanding the immense loss with which the companies were faced, and especially at the city last named, no loss in recovery was to be expected save in cases where the policies of insurance held had not been selected with reasonable care. It is interesting to repeat that the aggregate capital and surplus of six companies having the largest resources in the United States at the time of the Chicago fire was \$12,532,217, while at the close of last year the aggregate on a like basis was over \$71,000,000!

SOUTH AMERICA AND THE PANAMA CANAL

Preparations Being Made to Take Advantage of New Channel of Commerce

A Colon (Panama) dispatch says:—Owing to the near approach to completion of the Panama Canal, all South America is stirring itself to take advantage of the new channel of commerce. Reports from half-a-dozen important centres in the southern continent tell of unusual activity.

The Chilean Government has awarded a contract to S. Pearson and Sons, of London, for improvements at Valparaiso, one of the best harbors in the world. The new docks are to be of massive construction and thoroughly modern in every respect. In addition, the steamship line owned by the Republic of Chile, the South American Steamship Company, is about to increase the number of its vessels by six fast liners, to ply between Valparaiso and New York. The company for some years has maintained a regular service between Valparaiso and the West Coast of Panama.

Commercial Artery to Feed Canal.

Peru is another country that expects to reap a rich harvest from canal trade. The Peruvian Government now operates a line of vessels between the ports of that country and Panama. It has at Callao a fine dry-dock, which brings much repair work to that port. Announcement is made that a new Peruvian railroad soon will be started. It will run over the Andes, and tap the rich region around the headwaters and tributaries of the Amazon. The road will connect at Corro de Pasco with the line now extending to Callao, thus furnishing another great commercial artery to feed the canal traffic.

The Egyptian Government has issued a report containing statistics of the traffic through the Suez Canal last year, and in view of the probable early completion of the Panama Canal, the figures have peculiar interest. The figures show that the proportion of British tonnage passing through the canal continues to increase, as it has done to a marked degree in the last two or three years. The British net registered tonnage represents 63.7 per cent. of the whole. The predominance of British mercantile tonnage over shipping of other nationalities is seen below:—

Nationality.	Vessels.	Net Registered Tonnage.	% of Total 1911.	% of Total 1910.
United Kingdom	3,036	9,501,100	63.7	62.5
Germany	662	2,250,888	15.1	15.2
Holland	278	823,330	5.5	5.5
France	231	725,900	4.9	5.4
Austria-Hungary	180	502,782	3.4	3.8
Japan	81	307,458	2.1	2.3
Russia	112	247,909	1.7	1.7
Italy	83	171,886	1.1	1.3
Denmark	41	86,863	0.6	0.6
Sweden	28	77,150	0.5	0.4
Spain	26	62,252	0.4	0.4
Turkey	50	61,829	0.4	0.2
Norway	24	46,233	0.3	0.3
Other countries	26	38,855	0.3	0.4
Total	4,858	14,904,475	100	100

Germany is second on the list, and has a tendency to lose business, exhibited also in the figures for earlier years. French, Austro-Hungarian, and Japanese tonnage are also comparatively less important. Italian shipping has declined, while Turkish vessels are more than twice as prominent. The only other country which shows a marked increase is Sweden. The figures indicate that while the chief competitors of Great Britain are either losing ground, or only just maintaining their position, relatively to the total tonnage passing through the canal, the British mercantile marine is improving its lead.

Protest from Great Britain.

A dispatch from Washington states that Great Britain has asked that the pending bill for the operation of the Panama Canal be deferred until the matter is considered diplomatically. It is thought this action is taken on account of the clause in the bill which provides that the President may in his discretion authorize free tolls or reduced tolls for American ships. The principle of equal tolls or no tolls has been affirmed in many treaties between the United States government and Great Britain, and American and foreign vessels entering the harbors of New York, San Francisco, New Orleans, and other United States ports. Great Britain may assert that the article as to tolls must be construed as meaning that there are no free tolls on American vessels passing through the Panama Canal unless all foreign vessels shall likewise pass through free, and that whatever rate of toll be fixed as chargeable to vessels of foreign countries, the same and no other rates shall be applied to American vessels.

A series of articles on Canada and the Panama Canal will begin in next week's Monetary Times.

“Canada and the Panama Canal”

(With especial reference to Western Canada)

Series of Articles

To begin in The Monetary Times on July 20th

By FRED. W. FIELD, Editor

- (1) History of the Canal
- (2) Canal Tolls and United States Preference
- (3) Tolls and Their Relation to Commerce
- (4) General Changes the Canal May Effect
- (5) Savings in Distances
- (6) The Canal and the Railroads
- (7) Western Canada Wheat and the Canal
- (8) British Columbia's Just Claims
- (9) Canada's Pacific Grain Ports
- (10) Canada's Pacific Ports, Their Facilities and Shipping.
- (11) Coaling Stations on the Canal Route
- (12) Western Coal and the Canal
- (13) Pacific Lumber, Fisheries and the Canal
- (14) Trade with Australia and the Orient

The articles will be illustrated with maps and diagrams to give the reader a clear idea of the ways in which the Panama Canal will likely affect the world's shipping and commerce generally, and particularly its effect on Western Canada.

SPECIAL OFFER

In order to introduce The Monetary Times, we offer the issues containing these articles, commencing July 20th, for Twenty-Five (25) cents, postpaid. Fill out coupon and return with Twenty-Five (25) cents in stamps or coin to

THE MONETARY TIMES,
62 CHURCH STREET, TORONTO, ONT.

COUPON

Enclosed herewith is Twenty-Five Cents for which send to address below, The Monetary Times for specified issues commencing July 20th.

FIRE INSURANCE STANDARDS OF RATING

(Continued from Page 152).

A consideration of the obligations of the fire insurance companies to the insuring public, to which this address is directed, could not be appropriately closed without a reference, however brief, to the question of loss settlements. The question of the companies' obligation to the public in the matter of rate-making in a much greater degree than in the matter of loss settlements, it is for the reason that the companies have been repeatedly denounced in certain quarters for their alleged failure of duty in the case first named, whilst in the latter case we have, on the whole, been fairly treated.

Desire to Give Satisfaction.

"It is, of course, sometimes true that the insurance companies fail to give satisfaction to clients in cases of individual loss. To give satisfaction in all cases would be impossible in this or in any other line of work that could be mentioned involving the performance of contract, verbal or under instrument. Especially would it be impossible always to avoid disputes in matters of value of property, regarding which opinions widely differ, but in estimating the character of the large number of gentlemen guiding the operations of the fire companies the desire to give satisfaction is ever present.

"The greatest tests in recent times of the ability, as well as the disposition, of underwriters to act with liberality and promptitude when faced with a conflagration for which histories of all countries furnish no parallel, whether in regard to area involved or destruction of values, it is with no sense of shame that the fire underwriters can point to the amazing catastrophe of the San Francisco fire as illustrative of their particular desire to fulfil to the utmost the promises made in their policies of insurance, and of their ability in general to do so.

Difficulties of Work of Fire Underwriter.

"These are some of the difficulties with which the work of the fire underwriter is naturally attended, and, as well, the influence of such work in a progressive degree on the improvement in conditions of general benefit to the insured, and to interests such as those you represent. This work of improvement is far from finished, and the underwriter

will not be discouraged at past difficulties. He will look for success in the greater disposition on the part of the insuring public and various authorities toward co-operating in many directions. And distinct encouragement to his labors will be afforded by a study of insurance history as illustrating in the development of trade, commerce and the arts, the protecting and fostering influence of fire insurance."

GRESHAM LIFE ASSURANCE SOCIETY.

More than ordinary interest has been exhibited in the figures presented in the sixty-third annual report of the Gresham Life Assurance Society, Limited, as this strong English company recently entered the Canadian field. The latest report covers the year ended December 31st, and during that period 6,551 policies were issued, assuring an amount of \$10,945,495; 851 proposals were declined, for \$1,658,950.

The premiums for new assurances completed, amounted to \$510,262. The amount of \$540,700 was received as consideration for annuities granted representing an annual payment by the Society of \$66,055. The income of the Society derived from premiums, interest and rents amounted to \$7,144,451. The claims of life policies with bonuses amounted to \$2,487,723, and the claims on endowments maturing by age or expiration of term amounted to \$2,361,736. Annuitants to the number of 181 died, releasing the Society from annuities amounting to \$90,893. The charge upon the Society for the surrender of policies (including loans written of in respect of policies which had lapsed) was \$357,401. The assets appearing in the balance sheet amount to \$51,127,431. The investment reserve account stands at \$340,669. The rate of interest realized upon the funds after deduction of income tax was 4.2 per cent.

Mr. Arch. R. Howell is the manager of the company in Canada, with headquarters at Montreal. Mr. Howell has been very active ever since the company established itself in the Dominion and his zeal bodes well for the society's Canadian results. There is a vacancy for a provincial manager in this country, and Mr. Howell invites applications for agencies.

Mr. NaKamura, the Japanese Consul-General at Ottawa, is in Japan on leave of absence.

BELL TELEPHONE BONDS

Large Issue Purchased on Joint Account—Canada Bread Bonds Active

The Royal Securities Corporations have purchased on joint account with Lee, Higginson & Company, of Boston, \$1,750,000 5 per cent. bonds of the Bell Telephone Company of Canada, Limited. The issue is being made to provide for the growth and extension of the company's system generally. A similar bond issue amounting to \$1,250,000 was made in March, 1911, and last September an issue of \$2,500,000 stock was made. The last payment on the stock issue is due on August 1st next, and the company will then have a paid-up capital of \$15,000,000. Outstanding bonds at the close of the company's last fiscal year, December 31st, 1911, were \$4,899,000. The company has authority to issue bonds up to 75 per cent. of the paid-up capital, so that even with the present issue there will be a margin of over five million dollars between the outstanding and the authorized issue. The bonds constitute a first charge upon the whole lines, works and plant of the company, but do not create a privilege or lien on the real estate. Plant and patent account of the company on December 31st last stood at \$20,531,327.

It is understood that there will be no public offering of the bonds. They will be disposed of privately through the purchasers, the Royal Securities Corporation, Limited, and the Boston financial house of Lee, Higginson and Company.

Montreal Terminal Railway Issue.

The Montreal Central Terminal Railway has called a special meeting for August 9th to authorize an issue of bonds, to increase the capital stock and to authorize traffic agreements with all railways requiring terminal facilities in Montreal.

The bonds of the Canada Bread Company were active on the Toronto Stock Exchange this week. The figures are given in our stock and bond tables elsewhere in this issue.

Ritz-Carlton Hotel Bonds.

The offering of Ritz-Carlton Hotel bonds will consist of half the total issue of \$1,000,000. The bonds, which will be offered at 95 and accrued interest by the owners, Messrs. C. Meredith & Company, Limited, are five per cent. first mortgage bonds, subject to retirement at not more than 105 and interest, on and after June 1st, 1919. Under the trust deed the issue represents a closed mortgage on all the fixed assets of the company. The capitalization of the company is \$1,000,000 bonds, \$1,000,000 seven per cent. preferred stock and \$1,000,000 common stock. The value of the assets is 71 per cent. greater than the total issue, and estimated earnings are placed at six times the bond interest. The estimated income is as follows:—

Gross profits	\$295,000
Depreciation, etc.	\$75,000
Bond interest	50,000
	125,000
	\$170,000
Dividends on preferred stock	70,000
	70,000
Surplus	\$100,000

Mr. C. R. Hosmer is president of the company, and the other directors are Mr. William Harris (London), Sir Montagu Allan, Mr. H. S. Holt, Mr. H. V. Higgins (Lon-

don), Mr. T. J. Drummond, Hon. L. G. Guest (London), Mr. C. B. Gordon, Mr. W. M. Birks, and Mr. G. W. Farrell.

Chicago and Milwaukee Bonds.

The basis of the refinancing plan of the Chicago and Milwaukee Electric Railway is the authorization of an issue of \$10,000,000 of first mortgage bonds, of which, however, only \$4,500,000 is to be sold at present. Of the return from this issue \$1,080,000 will be used to retire the underlying bonds of road, \$1,000,000 to redeem receiver's certificate, about \$1,000,000 will go into betterments, and the balance will remain in the treasury. Several million dollars of the bonds of this road are held in Canada.

The assets of the Amalgamated Asbestos Corporation, Limited, have been sold to the Asbestos Corporation of Canada, Limited, and bondholders of the Amalgamated Asbestos Corporation are entitled to receive securities of the Asbestos Corporation of Canada, Limited, in the proportion of \$250.00 5 per cent. bonds, \$500.00 6 per cent. preferred stock and \$250.00 common stock for each \$1,000 bond on surrender of their bonds to the Royal Trust Company for cancellation at its office, Transportation Building, Montreal.

Ontario Power Bonds.

The Toronto General Trusts Corporation desire to purchase 5 per cent. first mortgage gold bonds and 6 per cent. coupon gold debentures of the Ontario Power Company, of Niagara Falls, of the par value of \$1,000 each. Owners of such bonds or debentures desiring to sell same are invited to send particulars to the Toronto General Trusts Corporation, Toronto, on or before July 22nd.

The National Trust Company, Limited, will receive until 25th July, at its Montreal office, proposals to sell first mortgage bonds of the Dominion Iron and Steel Company, Limited, to be purchased by means of \$88,533.62 paid by the company to the trustee for the purpose of a sinking fund according to the terms of the trust deed executed by the Dominion Iron and Steel Company, Limited, in favor of National Trust Company, Limited, trustee, on July 1st, 1899.

Messrs. N. B. Stark & Company, Montreal, have opened a bond trading department to deal exclusively in current standard Canadian securities. This department will meet the increasing demand for a market for unlisted bonds, and will be under the management of Mr. J. N. Stone.

RIO AND SAO PAULO PRICES.

The following are the high and low prices and dividend record of Rio & Sao Paulo for the past seven years:—

Rio de Janeiro Tramway, Light & Power Company.

	1906.	1907.	1908.	1909.	1910.	1911.	1912.
High	48	48	80	103	105	117 ¾	149 ¾
Low	38 ¾	26 ¾	29 ¾	79 ¾	87 ¾	101 ¾	111 ¾
Dividends paid				1 %	4 ¾ %	5 %	5 %

Sao Paulo Tramway, Light & Power Company.

	1906.	1907.	1908.	1909.	1910.	1911.	1912.
High	145 ¾	138 ¾	157	160	152 ¾	190	251
Low	128 ¾	98 ¾	113	142 ¾	139	148 ¾	187 ¾
Dividends paid	8 %	8 %	9 %	10 %	10 %	10 %	10 %

The erratic market in these stocks during the past few days, was due to a reported hitch in the merger negotiations. It was learned on Friday that the old country interests, who are the chief holders, objected to the proposed initial dividend of 6 per cent. as being too high for a beginning, and that the Sao Paulo holders were not getting sufficient consideration generally. The status of the Rio shareholders is not likely

to be changed. They will receive eight-fifths of the new stock for each share held at the time of the amalgamation. The position of Sao Paulo holders will probably be improved. In place of receiving two and a half shares of the new stock for each share of Sao Paulo they will be given one-quarter share extra. In short, every share of Rio will rank for \$160, and every share of Sao Paulo for \$275 in the new corporation. Official confirmation of these terms is likely as we go to press.

DEBENTURES FOR SALE

DEBENTURES FOR SALE.

Debentures for sale, town of Battleford, Saskatchewan. Sealed tenders addressed to the undersigned and marked "Tenders for Debentures," will be received up till 6 p.m., 3rd of August, (Saturday), 1912, for the purchase of \$15,000 of twenty-five year debentures bearing 5 per cent. interest per annum. For further particulars, apply to

J. P. MARSHALL,
Secretary-Treasurer.

TENDERS FOR PULPWOOD LIMIT.

Tenders will be received by the undersigned up to and including the 15th day of August next, for the right to cut pulpwood on a certain area situated on the Abitibi Lakes and River, tributary to the Grand Trunk Pacific Railway, and the Temiskaming and Northern Ontario Railway, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, of such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario,—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, Ontario, May 15th, 1912.

\$1,031,929.99

CITY OF OTTAWA, ONTARIO.

Debentures for Sale.

Tenders addressed to "The Chairman, Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa until 3 p.m. on Thursday the 29th August, 1912, for the purchase of \$12,000.00 40 year debentures, \$727,500.00 30 years, and \$292,429.99 20 years.

They are all a liability of the City at large, and bear 4% interest, payable 1st January and 1st July.

Two separate tenders will be received, one for \$40,000.00 30 year debentures, and the other for the remainder of the debentures \$991,929.99.

All tenders must be on the official form. The tender for the \$40,000.00 debentures must be accompanied with an accepted cheque for \$1,000.00 and the tender for the \$991,929.99 debentures with an accepted cheque for \$5,000.00.

Accrued interest from 1st July, 1912, must be paid in addition to the price tendered.

The \$40,000.00 debentures are in \$1,000.00 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York or London, at the option of the purchaser, and in denominations to suit.

Delivery of the \$40,000.00 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,

Ottawa, 29th June, 1912.

Mayor.

DEBENTURES FOR SALE.

Principal \$4,878.44, divided into 20 instalments with 20 coupons, payable on the 1st day of February every year for 20 years, bearing interest from the 1st day of May, 1912, at a rate of 5½ per cent., which the first instalment both interest and principal will become due on the first day of February, 1913.

Under the Municipal Drainage By-law No. 37 of the Municipality of the Township of Hanmer, District of Sudbury, Ontario.

Tenders will be accepted up to July 15th, 1912, for consideration with no obligation.

On request copy of by-law will be sent to any address, and those who desire to buy said debentures should apply to,

NAP. LEPAGE,

Clerk, Township of Hanmer,
Brunetville, Ont.

MUNICIPALITY OF LLOYDMINSTER, SASK.

DEBENTURES FOR SALE.

Debentures. Tenders are invited for sale of \$5,000 town debentures. Apply for particulars to

W. C. LISLE,

Lloydminster, Sask.

Sealed tenders addressed to the undersigned and marked "Tenders for Debentures," will be received up to the 27th day of July, 1912, for the purchase of the following debentures:—

Agricultural and Park Grounds..	\$4,000.00
Electric Light extension	1,000.00
Sidewalk extension	1,000.00

Debentures payable to bearer in twenty equal payments with interest at six per cent.

The highest or any tender not necessarily accepted.

H. P. LONG,

Secretary-Treasurer,
Vermilion, Alta.

CANADIAN INDUSTRIAL EXHIBITION, WINNIPEG.

A visit should be paid to the Canadian Industrial Exhibition at Winnipeg, one of the finest exhibitions on the continent. The prospects are for a better show than even that of last year, which is strong testimony to its merits and attractions. The exhibition will be in full swing until next Saturday.

BRITISH COLUMBIA ELECTRIC'S STOCK ISSUE.

A further increase in capital is being made by the British Columbia Electric Railway Company, Limited, and existing shareholders are offered an issue of 200,000 five per cent. cumulative participating preference shares of £1 each at 21s., 200,000 preferred ordinary shares of £1 each at 22s., and 200,000 deferred ordinary shares of £1 each at 24s. per share. The shares are offered in the proportion of one new preference share, one preferred ordinary share, and one deferred ordinary for every complete £10 of preferred ordinary and / or deferred ordinary. After September 25th the new shares will be converted into stock. The new capital is required as a consequence of "the continuous increase in the trade and population of the cities and districts of British Columbia," which necessitates further extensions of the railway and equipment of the light and power systems to provide for the additional requirements of the community. The receipts for the first ten months of the current year show an increase of 38 per cent. over the figures for the corresponding period of the previous year.

Guelph, Ontario, ratepayers defeated the following three by-laws. A by-law to grant \$25,000 to the general hospital to comply with the government demand for additional repairs; a by-law to loan D. McKenzie of Guelph \$5,000 to enlarge the present plant and a by-law to make a loan to the Anchor Furniture Company, of Toronto.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

DIVIDENDS AND NOTICES

A. E. REA & COMPANY, OTTAWA, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a dividend of one and three-quarters per cent, upon the paid-up preferred capital stock of the company has been declared for the current quarter, being at the rate of seven per cent, per annum, and the same will be payable at the office of the company, or any branch of the Standard Bank of Canada, on and after the second day of July next.

By order of the board.

GEO. A. WANLESS,
Secretary-Treasurer.

Ottawa, June 29, 1912.

MEXICO TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of one and three-quarters per cent. (1¾%), (being at the rate of 7% per annum), has been declared on the capital stock of the **Mexico Tramways Company** for the quarter ending June 30th, 1912, payable on the 1st day of August, 1912, to shareholders of record at the close of business on the 13th day of July, 1912, and that the transfer books of the company be closed from 15th July to 31st July, 1912, both days inclusive. Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York, N.Y.; Mexico City, Mexico; London, England, and branches.

The holders of bearer share warrants on detaching from their share warrant coupon No. 13 and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York, N.Y., or London England, on and after the 1st day of August, 1912, will receive in exchange for each coupon the sum of \$1.75, representing the amount of the dividend.

By order of the board.

W. E. DAVIDSON,
Secretary.

Toronto, Canada, 28th June, 1912.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend of one per cent. (1%) has been declared on the ordinary shares in the capital stock of **The Mexican Light and Power Company, Limited**, payable on the 15th day of July, 1912, to shareholders of record at the close of business on the 6th day of July, 1912;

THAT the transfer books of the company for the ordinary shares be closed from the 8th day of July to the 15th day of July, 1912, both days inclusive.

By order of the board.

W. E. DAVIDSON,
Secretary.

Toronto, Canada, 28th June, 1912.

MAPLE LEAF MILLING COMPANY, LIMITED.

DIVIDEND NOTICE.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%) has been declared on the Preferred Stock of the **Maple Leaf Milling Company, Limited**, for the quarter ending July 4th, 1912, payable July 18th, 1912, to shareholders of record of July 4th, 1912. Transfer books will be closed from July 4th, to July 17th, inclusive.

By order of the Board.

J. CARRICK,
Secretary.

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED.

DIVIDEND NOTICE.

A dividend of two per cent. on the preferred and one and one-half per cent. on the ordinary shares of the company for the quarter ending June 30th, 1912, has been declared payable July 15th, 1912, to shareholders of record of June 29th, 1912.

By order of the directors.

THOMAS GREEN,
Cashier.

New Glasgow, N.S., June 21st, 1912.

With the laying last week by the Algoma Central Railroad of the last steel rail between "The Soo" and Hobon station, Sault Ste. Marie was placed in direct railroad communication north with the Canadian Pacific, a distance of one hundred and seventy-five miles. Trains will not be run until the latter part of October, at which time it is expected the work of ballasting will be completed.

One hundred and seventy-two grain elevators scattered throughout Manitoba at present the property of the Provincial Government, will probably pass under the control of the Grain Growers Association, the farmers' organization which for a number of years past has been active in the grain business. Title to the elevators will continue to be vested in the government, and the company will pay \$66,000 a year as rental charges. This represents six per cent. upon capital account, which amounts approximately to \$1,100,000.

The demand for eggs in Canada has increased much more rapidly than the supply during recent years. In 1902 we exported to Great Britain, eggs to the value of \$1,733,242; nine years later, the exports had fallen to less than a value of twenty-five thousand dollars while the imports in 1911 reached a value approaching half a million dollars. It is pointed out that farmers are not taking full advantage of the high prices offered for strictly new laid eggs at all seasons of the year. The good profits from these are being secured chiefly by specialists who are often at the disadvantage of having to pay retail prices for feed. Much useful information is contained in a pamphlet containing evidence given by Mr. A. G. Gilbert, poultry manager at the central experimental farm, before the select standing committee on agriculture and colonization, on the development of the poultry industry, which may be procured from the Publications Branch, Department of Agriculture, Ottawa.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

MUNICIPAL FUNDS IN MORTGAGES

City of Kelowna Will So Invest Sinking Fund— Municipal Bond Situation

The city of Kelowna, B.C., has decided to loan 75 per cent. of its sinking fund on first mortgages, bearing interest at 8 per cent. per annum. Already applications have been received for \$16,000 of the \$18,000 available. The loans are to be appraised and to be passed upon by the council.

The borrowing of money by Western cities and towns was discussed by the president of the Saskatchewan Union of Municipalities at a recent convention. He said:—

"The Market for the issues of municipal debentures should have the consideration of this Union. Financially, the East does not understand the West. The East has never passed through the conditions of rapid development that the West is passing through now—the rate of growth is unique in the history of the world. It is not paralleled by any development that took place even in the Middle and Western States, because the conditions are different. It seems to me that Western debentures should command a better price as soon as Eastern financiers can come to understand that prospective development to-day is actual development to-morrow in these wonderful Western communities. We should band ourselves together and have financial agents in the financial centres who are thoroughly conversant with Western conditions and the absolute value of Western securities."

Legal Dispute Over Bonds.

St. Pierre aux Liens debentures, which occasioned a legal battle last autumn, are again the subject of litigation, action having been entered by the school commission of the municipality against Mr. A. E. Brunet, of the firm of D. W. & A. E. Brunet, financial agents and brokers. Mr. Brunet was the broker through whom the proposed debentures were to be issued according to the arrangement made by the old school board, but there was much opposition to the loan from taxpayers, and when the elections came round a new board was installed and a change of policy agreed upon.

A petition was filed in the Superior Court to have the debenture issue annulled, and was granted last September. Plaintiffs now allege that the debentures are still in Mr. Brunet's hands, and that he has not returned either the bonds or money, and they ask that he be compelled to do so. Messrs. Lamthe, St. Jacques & Lamthe have charge of the action.

Mr. R. B. Bennett, of Calgary, thinks that the moral of the poor public reception of the Edmonton bond issue in London is that caution should be exercised in placing bonds on the market, and that municipalities should go slowly in matter of the construction of public improvements. Economy should be practised, and work done only when this is a necessity.

Canadian Borrowers Running Risk.

Referring to the visit of Mayor Geary and City Treasurer Coady to London to negotiate a loan for Toronto, "Canada" says: "We are afraid this will be the reverse of welcome intelligence to those Anglo-Canadian financial houses who have been endeavoring to stem the rush of Canadian loans. As we said last week, Canadian borrowers are running a great risk of wearing out their welcome in this market. London is already groaning under the burden of undigested issues, and successive emissions only serve to aggravate the acute stage of congestion from which the market is now suffering. The persistence on the part of Canadian borrowers of the present policy will make the placing of further loans exceedingly difficult, as underwriters, already burdened with loans which the public have refused to take, will be more disinclined than ever to commit themselves to further engagements. What is needed is a period of rest during which recent issues may be quietly digested by the market. Further appeals can but lead to a continuance of the decline in prices, which has already aroused misgivings both in Britain and in Canada."

Notes of Municipal Bond Bidding.

For the \$5,750 5 per cent. 30-year debentures of Parry Sound, Ont., three offers were received from Toronto bond houses. As previously noted, the bid of the Ontario Securities Company was accepted.

Three Toronto bond firms bid for the Ochre River Rural Municipality, Man., \$12,500 5 per cent. 20-year drainage debentures, which were awarded to Messrs. Brent Noxon & Company.

Seven bids were received from Toronto bond firms for the Weston, Ont., \$30,000 5 per cent. 30-year High School debentures. The offer of Messrs. Brent, Noxon & Company was accepted, as previously noted.

Montreal and city of Victoria's agents are in London endeavoring to place £500,000 in six months treasury bills at about 4½ to 4¼.

The Government of Queensland is underwriting £2,000,000 sterling 3¼ per cent. stock at 96, with twelve shillings interest thrown in. This is regarded as a sign of the times. Three and one-half per cent. has been the standard rate hitherto for stock of this class.

The lists of the Newfoundland Government £400,000 3½ per cent. stock at 93 open to-day, but they are paying 1½ per cent. to the underwriters instead of the usual one per cent.

For the first time in the history of Quebec province the maturing debentures of a loan have been extinguished at one time from the available sources of the provincial revenue. The loan is of 1882, which was contracted for thirty years at five per cent. under the Chapleau régime. At the time it amounted to \$3,489,833.33, of which debentures for £500,000 sterling, equal to \$2,433,333.33, were issued in London and for \$1,066,500 in Quebec. Of this sum prior to last session there had been redeemed debentures for slightly over a million in the conversion of the public debt, leaving an amount outstanding of \$2,493,080. Of this, there has just been paid \$1,712,580 in London and \$775,000 in Quebec, the loan falling due on Dominion Day.

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt station for the week ended July 5th:—Nipissing, 188,826; Coniagas, 210,786; McKinley, 217,767; LaRose, 151,066; Trethewey, 85,000; Kerr Lake, 121,107; Buffalo, 58,600; Cobalt Townsite, 64,140; Hudson Bay, 62,967; total, 1,160,259 pounds, or 580 tons. The total shipments since January 1st are now 22,641,399 pounds or 11,320.6 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

ANOTHER STOCK OFFERING.

All the shares in the Tuckett Tobacco Company, Limited, having been secured by Messrs. C. Meredith and Company, Montreal, a portion was reserved for public issue and was offered this week at \$95 and \$40 per share of preferred and common stock respectively. The company's capitalization is \$2,000,000 preferred 7 per cent. cumulative stock and \$2,500,000 common stock. There is no bonded indebtedness. Application will be made to list the shares on the Montreal and Toronto Stock Exchanges. The Tuckett Tobacco Company, Limited, has taken over the business formerly carried on by the George E. Tuckett and Son, Limited, the Tuckett Cigar Company, and Tucketts, Limited, all of Hamilton.

There will be no change in the management of the company, the old officers all remaining and taking substantial interests in the new organization, thus assuring the continued success of the business. The controlling interest, since the death of the late Mr. George E. Tuckett, has been vested in the trustees of his estate, who are not permitted to increase their investment in the companies or to take any part in the necessary extensions, and it is for this reason that their holdings are being converted into statutory trust investment. Nearly all the present shareholders have reinvested in the new company shares.

The properties of the company consist of: Head office building, tobacco factory, cigar factory and cigarette factory; also storage houses, in Hamilton, Ont. Cigar factory at London, Ont.; cigar factory at Montreal, P.Q. These factories are all in excellent shape, modern in every way, and well located.

The assets of the company show a surplus of \$2,000,000 over all the liabilities of the concern. The common stock is not given as a bonus, as it is oftentimes the case. The earnings of the company for the past two years leave sufficient, after the 7 per cent. is paid on the preferred, to pay a dividend of 6 per cent. on the common, and still leave a small surplus.

The average net profits shown by Messrs. Price, Waterhouse & Company for the past two years, after paying 7 per cent. dividend on preferred stock, shows over 6 per cent. on common. It is anticipated that larger profits will be shown during the present year.

Saskatoon has made arrangements with the Stone and Webster Engineering Corporation of New York for the construction of a street railway system. The work of construction has commenced and probably cars will be running by November.

PANAMA CANAL TOLLS

There is little reason for surprise at the action of Great Britain in requesting the State Department at Washington to delay the passage of the bill for the operation of the Panama Canal until a note on the question can be presented formerly by the British Ambassador. The details of the protest are not public at the time of writing, but it is assumed that the question of the provision in the bill vesting in the president a discretion to authorize reduced tolls or no tolls for United States ships passing through the canal, is raised in the British note.

We fail to see how any but one meaning can be attached to the specific clauses in two treaties governing this issue. These are the Clayton Bulwer Treaty made in 1850 and the Hay-Pauncefote Treaty made in 1901. One clause of the former has a direct bearing on the operation of the Panama Canal. It says:—"It is always understood by the United States and Great Britain that the parties constructing or owning the same (the Canal) shall impose no other charges or conditions of traffic thereupon than the aforesaid governments shall approve of as just and equitable; and that the same canals or railways, being open to the citizens and subjects of the United States and Great Britain on equal terms, shall also be open on like terms to the citizens and subjects of every other state which is willing to grant thereto such protection as the United States and Great Britain engage to afford."

The second treaty referred to, entered into in 1901, extended the Clayton-Bulwer provisions, as follows:—"The Canal shall be free, and open to the vessels of commerce and of war of all nations observing these rules, on terms

of entire equality so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic, or otherwise. Such conditions and charges of traffic shall be just and equitable."

The proposal of the United States to pass its own coastwise vessels free through the Panama Canal and to collect tolls from British and foreign ships, is obviously an evasion of these treaties. They impose a moral obligation upon the United States Government to treat the vessels of other countries exactly as those of the neighboring Republic.

The British attitude this week was supported at Washington both by Senator Burton, of Ohio, and Senator Root, of New York. They declared that Great Britain had surrendered important rights at Panama held under the former Clayton-Bulwer Treaty for the pledge of "equal treatment" to all ships, given by the United States in the existing Hay-Pauncefote Treaty. The controversy they think hinges on the question of whether the United States in its pledge to treat the ships of "all nations" equally, meant to include vessels owned by its citizens, a very weak hinge.

Senator Root, formerly secretary of state, declared that The Hague Court would be called upon to settle the issue finally if the United States passed the bill with the free provisions, which he characterized as "unjustifiable discrimination against other nations." A decision against the United States by The Hague Court, he said, would undoubtedly involve this country in the repayment of millions of dollars to the owners of foreign ships, which might have been taken in as tolls at the canal.

The Monetary Times does not believe that the average citizen of the United States is in sympathy with the proposal of its government. A large section of the

responsible press - of the United States complains of this attempt to sidetrack the treaties placing the canal in a contentious atmosphere before its opening. Financial America, of New York, for instance, says there are only two alternative courses—to exact the same tolls from both domestic and foreign vessels using the canal, or admit all free. They are in favor of the latter. Whatever plan is adopted, from a moral standpoint there should be no discrimination and from the practical and commercial viewpoint, discrimination would probably affect very unfavorably the patronage of the canal.

A history of the Canal undertaking is given elsewhere in this issue of The Monetary Times, the first of a series of articles respecting the relation of Canada to the Panama Canal. Next week the question of tolls will be discussed in detail.

UNITED STATES RAILROADS IN CANADA

A despatch from New York states that Newman Erb, president of the Minneapolis and St. Louis Railroad, has left for a trip, during which he expects to complete the incorporation of a new company to build branches to the Canadian border. The southern terminal of the new line is to be Watertown, S.D. Plans for these extensions, which, it is said, will eventually mean a new Canada-to-the-Gulf line, by a connection with the Missouri, Kansas and Texas, were interrupted some time ago by the sudden death of Edwin Hawley. This is another reminder of the growing and natural tendency of United States railroads to extend to Canada, and vice versa. The United States railways have 1,485 miles of track in Canada, while the Canadian railways have no less than 7,197 miles of track in the United States, divided as follows:—

Grand Trunk Railway—	Miles.
Grand Trunk Western Railway	336
Detroit, Grand Haven and Milwaukee Railway	191
Toledo, Saginaw and Muskegon Railway	116
Cincinnati, Saginaw and Mackinaw Rail- way	53
Pontiac, Oxford and Northern Railway..	100
Central Vermont Railway	612
Island Pond to Portland	150
Detroit and Toledo Shore Line Railway.	78
	— 1,636
Canadian Northern Railway—	
D.R.L. and W. (Fort Frances to Duluth)	170
	— 170
Canadian Pacific Railway—	
D.S.S. and A. System	614
Soo System	4,295
Spokane International	140
Sumas to Seattle	125
Megantic to Vanceboro (Maine).....	217
	— 5,391
Total	7,197

The Grand Trunk had a big fight to obtain admission into New England, but its efforts were successful. The main purpose of extending that road into the rich traffic territory of New England is, according to the Grand Trunk's own contentions, to balance their business between the Eastern and Western States. The Grand Trunk's double track main line lies across Canada like an arm, the elbow at Montreal, the forearm across Ontario, the hand upon five fertile and productive States, with Chicago, the great traffic centre, in its palm. The fingers of this hand are the feeders, which will bring through this American gateway the traffic of the West, the North-West, and the South-West. The trend of this traffic, eliminating the Grand Trunk, is to the Atlantic seaboard. With the system, the traffic organization, and friendly connections at

Chicago, the Grand Trunk gathers a vast volume of this freight, and carries it eastward across Canada. When they do this they contribute not only to the earnings of the Grand Trunk, but to the prosperity of the Dominion,

The interchange of traffic in the two countries recalls the suggestion of the late Judge Mabey, when chairman of the Dominion Railway Board, that an International Railway Board should be formed. The former Minister of Railways had correspondence with the United States government on this matter. It is claimed by shippers that importers on both sides of the line are often compelled to pay two local sales: one to the border from the place of shipment and the other from that point to destination. Under existing conditions neither the Canadian Board nor the Interstate Commerce Commission has power to make a through rate, and it was suggested that an International Board be formed, made up of members from the two boards mentioned, and that this international body be given power to make through rates. A draft arrangement was discussed on both sides of the border. To this proposed agreement the railway companies took exception. There are prospects, however, that the consideration of the matter will be continued by the two governments concerned.

BRITAIN'S INSURANCE ACT

On Monday, the National Insurance Act came into operation in Great Britain, so far as the payment of contributions is concerned. With the exception of what is called "sanatorium benefit," claimable on that date, no other benefits are claimable until January 15th, 1913. The framing of this legislation was a work of considerable magnitude and its application will probably be a still greater labor. It does not appear that employers have rendered themselves familiar with the procedure of the act. This is more interesting in view of the fact that the penalty for offences against the legislation or the regulations under it is a fine not exceeding £10.

As pointed out by The Times the duty of paying contributions is under the Act placed upon the employer in the first instance. He is, save in exceptional cases, entitled to recover part of the contribution from the worker, but it cannot be too clearly understood that the employer pays the full contribution in the first instance, and that he cannot recover the worker's share by deduction from wages or otherwise, unless he has first paid it. Every employer is required to pay contributions under the Act in respect of all persons employed by him who are between the ages of 16 and 70, unless the employment falls within one of the classes which are expressly excluded from the compulsory provisions of the Act. These excluded classes are clearly set forth in the explanatory memorandum above referred to, which should be consulted. They include apprentices without wages, and so forth.

It does not matter for how short a time the worker is employed, nor for how many employers he works, nor whether he is paid by time or by the piece. Nationality makes no difference; contributions must be paid whether the worker is an alien or a British subject. In cases where the worker receives wages or other money payments, not from his employer but from other persons, the employer is still made responsible for the payment of the contributions—e.g., the owner of a cab who lets it out to a cabman is responsible as employer for the payment of the contributions in respect of the cabman; and the employer of a waiter whose earnings depend entirely on the "tips" he receives is under the same liability. In short, the Act, which came into force on Monday, requires that, with certain exceptions, easily ascertainable every person in the service of an employer must be insured, if between the ages of 16 and 70, and must (1) get a contribution card before July 15th, either from the approved society of which he or she is a member, or from any post office; and (2) produce it to his or her em

ployer before July 15th, to be stamped on the first pay day. Every employer must (1) require contribution cards from every person in his employment (save those who are excepted by the Act); or, if the employed person fails to produce a card, use an emergency card which may be obtained from any post office; (2) obtain health insurance stamps at the post office; and (3) stamp the cards before paying wages. Should employers or employed fail in the performance of these obligations they will do so at their peril; since, as stated above, the penalty for each offence against the Act or the regulations is a fine not exceeding £10.

The Insurance Commissioners are prepared to make arrangements with large employers of labor for the stamping of the cards of their regular employees quarterly instead of week by week. The Act requires that the full contribution shall first be actually paid before the employer can deduct the employee's share of it from his or her wages, and consequently any employer with whom the above-mentioned arrangement is made will have to remit to the Commissioners, in advance, a cheque sufficient to cover the contributions payable in respect of the employees to whom the arrangement applies. These remittances may be made either quarterly or weekly in advance. The arrangement can only apply to employees who have agreed to deposit their cards with their employer during the quarter, because in the absence of such agreement the employee must be given his card each pay day, duly stamped to date.

It will also be necessary for the employer to stamp to date the card of any employee who requires his card during the quarter either for production to his society in order to claim benefit or on leaving the employer's service. When a quarterly stamping arrangement has been made with an employer, the latter will be able to stamp the cards at the end of each quarter (the quarters run for 13 weeks, beginning July 15th), and the necessary stamps will be sent by the Commissioners to the employer in return for the remittances made. Stamps for 1, 2, 10, and 13 weeks' contributions will be available for this purpose. There are certain other conditions with which employers to whom these special facilities are granted will be required to comply.

The operation of the Act will be watched with great interest by insurance men everywhere.

SMALL CHANGE

If Vancouver will give 80 acres of land near the city, a bonus of \$10,000 cash, free water, free light and exemption from taxation for a term to be arranged, the

Mars-Fowler Aero Company, of Kansas City, is prepared to establish an aeroplane factory and school at that point. Has the company overlooked other trifles of their proposal?

* * * *

A convention of mayors and industrial commissioners of the cities and towns west of the Great Lakes will be held next week in Winnipeg to discuss injudicious bonusing of manufacturing industries. This has become a pernicious practice. It is to be hoped that the convention will initiate a campaign to stamp out the evil, which is sapping the strength of municipal foundation. When depression comes, that fact will be realized.

* * * *

Captain Fred Hackett, of Vancouver, is not to have a monopoly of treasure hunting in the Cocos Island region. A syndicate in London has secured a steamer and started this week on a quest for hidden gold. A year ago members of the same party returned from a similar hunt. They discovered three skeletons and an alleged idea as to where \$100,000,000 had been buried by a pirate. In these days, when one can obtain six per cent. from investments in bonds of undoubted security, it is difficult to imagine apparently sane people investing in the stock of hidden treasure companies. Canada has its Cocos Island treasure hunt company with headquarters at Vancouver. As *The Monetary Times* has previously stated, the only way the stockholder can get his money's worth is by taking the ocean voyage with the promoters. If the treasure happens to fail, the ozone is good.

* * * *

Much attention is being directed to the stock markets by the continual advances taking place in the price of various stocks. For two years past, there have been predictions that the advance had been carried too far and that a slump was bound to occur. The advance has continued uninterruptedly until bullish markets seem to be the natural condition. During the past six months, we find that Canadian Pacific Railway has registered an advance of about thirty points, Soo has advanced fifteen points, Rio fifty points, and Sao Paulo sixty points. Toronto Railway has made more than fifteen points. Bell Telephone is up about fifteen points and Canadian Car has advanced twenty points, and Montreal Light, Heat and Power twenty-two points. Shawinigan has risen twenty points; and so on through practically the whole list. Here and there is found a stock which shows a decline. The instances are few and the declines generally insignificant. Growing time is certainly being reflected in the stock markets.

ANGLO-CANADIAN MORTGAGE INVESTMENT CORPORATION

The stock of the Anglo-Canadian Mortgage Investment Corporation is being offered for subscription at a premium of 5 per cent. The shares have a par value of \$50. The sum of \$7.50 is payable upon application and \$45 in calls of not more than \$5 each and not oftener than every six months at the directors' call.

As previously noted, the company, which has a Saskatchewan charter, is formed chiefly for the purpose of investing its funds in Canada at a higher rate of interest than can ordinarily be obtained by the individual investor, and in the first place by the purchase of vendors' equities in agreements of sale, mortgages, etc., and to provide a safe channel through which English capital may be employed in absolutely safe and conservative investments, and in order to afford facilities which would not otherwise be available for acquiring selected investments in all lines of real estate securities.

Over \$60,000 of stock has been subscribed by the directors and their friends, and, from the active demand and inquiries for the stock reported, indications point to a prompt subscription of the entire allotment.

The city of Moose Jaw, the headquarters of the company, has now a population of upwards of 20,000, and the value of assessable property has increased from \$13,500,000 in 1910 to \$27,750,000 in 1911, and the clearing house returns have

trebled in six months. In addition to the large building investments (building permits have increased from \$1,500,000 in 1910, to \$2,500,000 in 1911), preparations are being made for the entrance of two transcontinental railroads besides that already established, and branches of other roads for which charters have already been granted. At present there are eleven roads in operation, under construction, or with charters (on which the bonds are guaranteed by the Government) running out of Moose Jaw.

WHITE STAR'S CANADIAN SERVICE

Respecting the reported proposal of the White Star Dominion Steamship Line to build two more steamers for the Canadian service, the company writes *The Monetary Times* as follows:—"At present we are not building any steamers for the Canadian trade but we are very anxious to expand in this trade and are willing to improve our fleet and facilities and are anxiously watching the decision of the Canadian government in connection with trans-Atlantic mail compensation for the future, hoping that we will be put on 'all fours' with our competitors so that we can expand with them in the trade and thereby give added facilities for commerce to and from Canada."

Mr. G. E. Scroggie of the Sherbrooke branch of the Canadian Bank of Commerce has been moved to Walkerville as accountant.

BRITISH COLUMBIA'S CAPITAL

Cosmopolitan Streets Reflect a Healthy Prosperity—
A Short Character Sketch of Victoria

Victoria has acquired a reputation for being the home of the world's retired wealthy. Although the city has a heavy per capita investment power, the average business man of the middle West and Eastern Canada, placed the Victoria man in a class rich enough to be idle, idle enough to lack desire for labor, and sufficiently steeped in business during past years, to care little for the trend of modern trade, commerce and investments. That color in the picture of Victoria is only one of the colors; it is not the whole painting. The climate, the picturesque surroundings, the appreciation and practice of recreation—something which prairie men especially might well cultivate—have attracted to Victoria people who can afford to live in a region where nature bestows smiles frequent and long. Those who have completed the cycle of the common round and daily task can afford to bask in the sunshine. The strenuous business life should not be carried into the declining days. That is why one finds the English predominating in certain parts of Victoria. They have thrown off the business harness in sufficient time to enjoy the fruits of labor.

Other Colors in the Picture.

But, as we have said, that is only one shade of the picture. Others are found in industrial life, business activity, investments, shipping, real estate dealing and the many other factors which contribute to the conduct and prosperity of a thriving port and city. It is doubtful whether anywhere in Canada one may see such interesting streets as those of Victoria on a Saturday evening. That night in cities of other countries is one of shopping. So it is in Victoria. The morning finishing the week's labor, the afternoon being devoted to sports and recreation, the evening transfers a large part of the wages to the shopkeeper. The Saturday night crowd in Victoria is another color in the picture. Far different to the brilliant dash of red of the retired wealthy, it is the commonplace shade of the common people. Withdraw it and the picture would be spoiled.

As with all seaside towns where commerce rubs shoulders with the tourist trade, the population of Victoria is cosmopolitan, but it is heavily marked with the impress of the Anglo-Saxon. There is not the varied assortment of nationalities one finds in New York, for instance. That fact places law and order in strong evidence in our British Columbia city. There is as much difference between Victoria's brand of population and New York's as between a British Columbia apple show and an Italian fruit stand.

Reflection of Prosperity.

The streets of British Columbia's capital reflect a healthy prosperity, a prosperity of substance which will be able to resist the worst features of economic depression. Good reasons exist for that condition. Victoria benefits from railroad and shipping growth. The port has natural geographical advantages, is easily accessible and practically free from fog. Entrance to and exit from the port may be made without a pilot. Victoria benefits from the salmon and other fisheries. The latest returns show that 762,201 cases of salmon were canned in British Columbia. The demand for canned salmon last season was good and high prices ruled. This created an outlet for the cheaper grade which are now finding a market instead of being wasted as hitherto.

Victoria benefits from the agricultural industries of the province. Immigration of a desirable class of settlers is turning to Vancouver Island. These settlers usually have enough means to purchase land and engage in farming and fruit-growing. British Columbia has unique possibilities for mixed farming, fruit-growing, poultry raising and dairying. Conditions of those industries are excellent on Vancouver Island.

Barometers of Progress.

Comparing the statistics which act as a barometer to conditions, it is found that imports, exports, customs collections, inland revenue, post office revenue, tramway passengers carried, value of building permits and bank clearings, all show a considerable increase during the past few years. Bank clearings, for instance, showed a gain last year over 1910 of more than 64½ per cent. Victoria, therefore, is a city of business as well as one of luxury. Those of the East and prairie West must not overlook that fact. Victoria offers employment, a career and contentment to the wage earner. At the same time it affords a play ground without parallel for those seeking recreation and rest.—F. W. F.

For having raised a money order for one dollar to thirty dollars, Mr. Ernest Breton, of St. Viateur de Tripp, Beauce county, was sentenced at Quebec to two years in the penitentiary.

WESTERN CANADA

New Hotel for Winnipeg—Edmonton's Board of Trade
and Development of Pulp Industry

A prominent Winnipeg architect has stated that arrangements have been completed for the construction of a new hotel in Winnipeg. This is to be a building of eight or ten stories, modern in every particular, and in keeping with the class of hotel built and under construction by the great transcontinental railways in Winnipeg.

The Chicago firm of Massey & Company, manufacturers of railway supplies, have completed arrangements to open a factory in Winnipeg. The site chosen is on McPhillips Street, and building operations are now under way under the direction of C. F. Massey, one of the firm.

A large party of prominent members of the Chicago Association of Commerce visited Winnipeg this week and on behalf of the city of Chicago extended a cordial invitation to His Royal Highness the Duke of Connaught to visit the capital city of that State.

The Security Coal Mines Company, operating a property at Wabamun, 44 miles west of Edmonton, are preparing for development. A Chicago engineering firm have been instructed to prepare plans for equipment to be installed as early as possible, which will afford a daily capacity of one thousand tons. This mine has been worked only experimentally, on a small scale.

Regulating the Cutting of Pulp Timber.

The Edmonton board of trade, at a meeting this week, decided to approach the Dominion government with a request for the formation of regulations which will permit the cutting of pulp timber on Dominion land in Alberta. It appears that there are something like two billion feet of spruce pulp timber along the waters eventually flowing through Edmonton. There is some prospect of interesting capital in the development of a pulp paper industry here; but, owing to the fact that conditions of cutting cannot be definitely stated, progress is delayed.

Arrangements for the second annual trip of Edmonton business men through tributary territory have been completed by the board of trade. A party of 60 heads of wholesale and industrial enterprises will leave by special train on July 22nd, and will travel through surrounding territory for seven days, making stops at some 90 towns with which they are doing business, and running 2,022 miles.

Estimating Amount of Crop.

Mr. E. J. Chamberlain, president of the Grand Trunk Railway, remarked this week that during the years that he had been in the West, he did not remember seeing the crops look so promising as at the present time.

The wheat crop in the Canadian North-West will be the biggest ever grown, and, while there is no doubt of a yield of 200,000,000, I believe the crop will be between that figure and 250,000,000 bushels, said Mr. James Carruthers, who has returned from a two weeks' trip through the West.

Alberta's grain crop for 1912 will be 75,000,000 bushels of wheat, barley and oats—25,000,000 bushels more than last year's total of something over 50,000,000—if the prediction of the statistical branch of the provincial department of agriculture, based on reports of 800 crop correspondents in all parts of Alberta, is fulfilled.

"I have never seen the crops looking better, and unless some unforeseen accident occurs I believe that the crop will run as high as a quarter of a billion bushels," said Sir Donald Mann, vice-president of the Canadian Northern Railway, at Winnipeg.

The British Empire Insurance Company and the Canadian Indemnity Company have been granted permission to carry on hail insurance in the province of Saskatchewan during the season of 1912.

The thirteenth general meeting of members of the western branch of the Canadian Mining Institute was held at Greenwood, B.C. In the absence of the chairman of the branch, Mr. Robert R. Hedley, and at the request of the members present, the chair was taken by Mr. Frederick Keffer, an ex-president of the institute. The branch council were elected for the ensuing year and consists of the following gentlemen: Mr. T. E. Purcell, chairman; Messrs. W. H. Armstrong, S. S. Fowler, Charles Graham, Thomas Graham, J. Cleveland Haas, Robert R. Hedley, John Hopp, Frederick Keffer, Thomas Kiddie, A. G. Larson, F. C. Merry, W. F. Robertson, R. H. Stewart, O. E. S. White-side, W. R. Wilson, and W. E. Zwicky. Interesting papers were read dealing with various aspects of "The Copper Mining Industry of British Columbia."

CANADA'S CROP STATISTICS

Reports from Western Provinces—Crop Rotation
Increases Production

In a report on crops, live stock, etc., issued by the Manitoba department of agriculture and immigration, the number employed, and required on farms is given as follows:—

Farm help.	Employed.	Required.
Males	26,203	39,820
Female	7,511	6,060

In reference to seeding time and crop prospects it says:—

The spring of 1912 opened up a little later than that of 1911, but with the soil conditions most ideal and with every prospect of perfect seeding.

The copious rainfall of last autumn, supplemented by the winter frosts, was most encouraging to the farmers, and while seeding was not reported as general until the 7th of April, yet, all things considered, the crop was in and growing quite as early as in 1911. Combined with the above conditions, the unusually bright weather, interspersed with frequent showers, produced conditions most desirable for an excellent seedbed, and seeding was practically finished by the 12th of May.

It speaks much for the farmers to state that notwithstanding the unusually large amount of work on hand this spring the area sown to grain is nearly a half million acres in excess of last year.

Increased Interest in Mixed or Diversified Farming.

A brief analysis of the crops sown shows a decrease in the area under wheat but a largely increased acreage in all other grains.

The decrease in the acreage sown to wheat is an example of the progress of crop rotations which is being followed more and more in the province, and of the interest our agriculturists are taking in mixed or diversified farming.

The interest in live stock generally and in beef cattle, milch cows and sheep particularly, is a most gratifying feature of this bulletin. The estimate is 429,274 cattle, 273,395 horses, 216,640 pigs, and 42,085 sheep.

The crop statistics are as follows:—

	Acres.
Decreased area under wheat	215,981
Increased " " oats	311,420
" " " barley	202,951
" " " flax	110,479
Total increase in grain crops	413,693
" " " crop area	453,565
Total area under grain crop	6,235,557
" " " all crops	6,485,602
Area under wheat	3,123,091
" " " oats	1,939,982
" " " barley	962,928
" " " flax	196,315
" " " rye	10,305
" " " peas	2,936

Total area under grain crop	6,235,557
Area under fodder corn	19,952
" " " brome grass	25,152
" " " rye grass	17,473
" " " timothy	114,899
" " " clover	6,572
" " " potatoes	51,878
" " " roots	14,109

Total area under all crops

Comparison of Area.

The following table gives a comparison of the area in crop for 1912 with that of 1911:

	1911	1912
Wheat	3,339,072	3,123,091
Oats	1,628,562	1,939,982
Barley	759,977	962,928
Flax	85,836	196,315
Potatoes	44,478	51,878
Roots	13,448	14,109
	6,032,037	6,288,303

The farmers in every quarter of the province report prospects as the brightest; grain is well up, the growth most vigorous, no check having been met from the beginning. Wheat has stood out better than for many years, and promises to be shot out quite as early as in any previous year.

The following table, from the Census and Statistics Monthly, gives the acreage in field crops in Canada for 1911-12

and the percentage of standard condition on May 31st for the past two years:

Field Crops.	Acres in crops.	Per cent. of standard condition.
	1912	1911
Fall wheat	781,000	1,172,119
Spring wheat	9,145,000	9,205,040
Oats	9,486,000	9,233,550
Barley	1,429,000	1,403,960
Rye	138,000	153,272
Peas	234,000	288,310
Mixed grains	522,000	563,846
Hay and clover	7,904,000	8,059,720
Alfalfa	112,000	107,833

Fall wheat shows a considerable decrease in acreage and condition as compared with 1911. The principle decrease in acreage is in Ontario, which is 253,746 acres less than in 1911, due, no doubt, to the large amount of fall wheat that was plowed up this last spring owing to winter killing and backward spring growth. Alberta's acreage is nearly one-half less than a year ago. Saskatchewan, however, has increased the acreage of fall wheat very materially. Other crops show comparatively little change in acreage, though other reports from the West indicate that the acreage under crop this season is much larger than the above figures would indicate. The increase in the acreage of alfalfa is gratifying. The total, however, is still away below what it ought to be.

Western Provinces Reports.

In Manitoba reports from Canadian Pacific Company agents show that in almost every district heavy rains have fallen which have entirely relieved any anxiety that had been felt on account of drought and hot weather. In some parts of southern Manitoba the dry weather of June affected probably 25 per cent. of the crop and in the Rosenfeld district fifteen farmers were haled out, and some hail is reported in other parts of the province, but the losses will affect the total very slightly.

"Never in my experience, and I have been here ten years, has there been such a promise as now for a excellent grain crop", said Mr. W. J. Tregillus, president of the United Farmers of Alberta when discussing the crop situation recently. "If we realize the present promise, it will be the biggest crop we have ever garnered yet. That applies to hay as well as to the grains.

"I talked with the farmers from all over our provinces at the Calgary exhibition and they declared that the crop as a whole promised to be the greatest in all their experience."

SCHOOL DISTRICTS EMPOWERED TO BORROW
MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

SASKATCHEWAN

Zelma, No. 577, \$1,200. H. Andrew, Zelma.
Canuck, N. 719, \$1,700. S. Crowell, Canuck.
King, No. 738, \$1,500. W. Scherle, Markinch.
Luella, No. 748, \$2,000. H. M. Ching, Luella.
Blessum, No. 2620, \$800. G. P. Borlan, Webb.
Ogema, No. 2760, \$600. R. K. Rounds, Agema.
Melville, No. 2187, \$1,200. R. E. Culp, Melville.
Hill Peak, No. 545, \$1,200. G. Millar, Cluffield.
Virginia, No. 467, \$1,000. R. McCool, Zealandia.
Bee Hive, No. 533, \$1,400. A. McFadyen, Landis.
Newville, No. 610, \$1,000. J. Lacelle, Lac Pelletier.
Minot, No. 663, \$1,800. J. A. Hornback, Bourgogne.
Tiger Lily, No. 638, \$1,200. A. J. Webster, Paswegin.
Uplands, No. 2290, \$500. A. J. Sanders, Chamberlain.
Harpree, No. 628, \$1,500. A. T. Penhorwood, Harpree.
West Slope, No. 657, \$1,500. W. Brehmer, Hodgeville.
Wheat Centre, No. 629, \$1,500. N. Ashby, McTaggart.
Hazeldene, No. 489, \$1,800. R. J. Crawley, Valley Centre.
Champion Hill, No. 703, \$1,500. M. E. Bonsall, Chaplin.
Lac Pelletier, No. 2224, \$1,000. E. Ordronneau, Lac Pelletier.
Lein, No. 700, \$1,500. H. L. Thompson, Henreil, via Radville.
Sacre Coeur, No. 1586, \$2,500. D. F. de Tremandau, Montmartre.

The mill, formerly belonging to the Canada Woolen Mills Company at Hespeler, Ont., but for the last eight years unoccupied, has been acquired by a limited liability company for the purpose of manufacturing stove furniture and fittings.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

I.—HISTORY OF THE CANAL

A short cut for the world's shipping will change considerably the geography of commerce. The halving of the American continent by the Panama Canal will mean fresh trade routes, the shortening of old ones, the creation of new enterprises, the adjustment of railroad rates, and a hundred other important incidents which must necessarily have a vital bearing on the world's trade and shipping. Those in charge of the Canal state that it will be open for shipping by July 1st, 1913. Others claim that it will not be ready before January 1st, 1915. The time of completion mentioned in the estimates is January 1st, 1915. Whatever the date, the event is sufficiently near for consideration of its relation to Canadian trade and development. On the other hand, many details in connection with the operation of the Canal have yet to be settled. This, together with the fact that certain effects upon commerce of the new waterway are not determinable until demonstrated by actual operation, make prediction a little risky.

Secretary of State P. C. Knox in an address at Panama said:—"Much has been said about the effect of the opening of the Panama Canal, but I believe it is given to a few of us to realize what magic possibilities are potentiated in that event. It will create for our Western world an entirely new situation, fraught with possibilities so vast as to daze the fancy."

Western Provinces Will Benefit.

At this time we may consider broadly some of the ways in which the Canal will give an impetus to Canada's commercial growth and general progress. Our Western provinces particularly are likely to benefit materially. They are already showing a keen interest in the matter and their efforts to meet the Canal by making proper preparations, cannot be too rapidly advanced. Those are the best trade channels which stand ready from the first to encourage and receive the flow of commerce. President Taft has said that the United States can afford to extend, "as one of the wealthy neighbors of all the other countries in helping them along, a world's avenue of trade that has been invented and paid for by the United States." Signs are not wanting that other countries will take advantage of the new avenue. Mr. Lewis Nixon, a shipbuilder and an authority in the United States on merchant marine, who recently returned from a visit to Panama, thought that the Canal would be much more used by Great Britain and Germany than by the United States. Wherever he went, Mr. Nixon heard a great deal about what the English and German steamship companies were going to do when the canal was completed, but little was said about American shipping interests. This caused "The American Banker," of New York, to remark, "It would indeed border on the farcical if the lion's share of the benefits of the Panama Canal should accrue to foreign countries after the United States had spent half a billion dollars in its construction." But we can trust the enterprise of the United States to take their full advantage of the Canal.

Frenchman Started the Project.

The history of the Canal is interesting. In 1825 a Frenchman obtained a franchise from New Granada, but failed to raise the necessary capital. In 1835 the United States sent an engineer to report on a canal project, but this came to nothing. In 1838 a concession was granted to France, but this concession lapsed. In 1848 a party of Americans secured a concession for a railroad across the Isthmus, and this road was opened for traffic in 1855, from Colon to Panama. Under this concession

the Panama Railroad Company held exclusive right to construct a railroad or canal through certain territory, which gave it complete control of the Panama route.

President Grant Appointed Commission.

From 1853 to 1895, inclusive, this company paid dividends amounting to \$37,800,000, or over 600 per cent. In 1869 the United States again considered the question of an Isthmian canal, and President Grant appointed a commission to investigate the matter. A treaty was entered into with the United States of Columbia in 1870, and as the Panama route was subject to the Panama Railroad Company's concession, the commission selected the Nicaragua route, and reported favorably upon it in 1876, but nothing was done, and France stepped in and remained in control until 1904.

Ferdinand de Lesseps formed a company in 1878, and secured a concession from the United States of Columbia. Surveys were made and the route from Colon to Panama was decided upon. The Panama Railroad was purchased for \$18,000,000 and work was started on a sea-level canal; \$240,000,000 was subscribed to the project and the time of completion was fixed as twelve years.

Stopped for Lack of Funds.

In 1887 it became impossible to secure more money and a lock canal was substituted for the sea-level project, but at last the whole work stopped for lack of funds, \$260,000,000 having been expended and 66,700,000 cubic yards of excavation having been removed.

In 1889 work was suspended and a receiver appointed. A new company was formed in 1894, and this company continued to do sufficient work to maintain its franchise, until in 1904 all of its rights were taken over by the United States. The total excavation by both French companies amounted to about 78,146,000 cubic yards.

The United States secured from the French company all of its franchise rights, the Panama Railroad, all the French surveys and maps, machinery, buildings, etc., and paid therefor \$40,000,000.

The United States has utilized 29,000,000 cubic yards of the French excavation in the present project, valued at \$27,500,000. The Panama Railroad, for which the French paid \$18,000,000, was valued at \$7,000,000. A total of 76,000 acres of land was acquired. The French surveys, maps, and data were valued at \$2,000,000. Up to the present, French machinery valued at \$1,000,000, and French buildings, valued at about \$2,000,000, are in use.

Treaty with Panama Republic.

The United States made a treaty with the Republic of Panama and paid \$10,000,000 for all rights conveyed, and agreed to pay \$250,000 per annum, after the expiration of nine years from the date of the signing of the treaty. Under this treaty the United States guarantees the independence of the Republic of Panama and secures absolute control of the canal zone, a strip of land ten miles wide, through the centre of which the canal passes. This zone has an area of about 448 square miles. It is a perpetual lease to the United States for this territory with all governmental rights and privileges, but strictly it is not United States soil, for residents therein acquire no rights of United States citizenship. The cities of Panama and Colon, while within the five-mile limit which bounds the canal zone, from the centre line of the canal, are not included in the zone, and are considered Panamanian territory, although the United States has the right to regulate sanitary matters within their borders and preserve order with armed forces if they consider it necessary.

From Atlantic to Pacific.

The Canal will pass through the Isthmus from the south shore of Limon Bay, in a southeasterly direction, to Balboa near Panama, on the Pacific side. Its length

A glance at this map of the world on Mercator's Projection will give an idea of the relation of the Panama Canal to various countries. The Canal will halve the American continent, cutting North America from South America at the narrowest part of the neck. The map should be preserved in order that the articles in subsequent issues of The Monetary Times on Canada and the Panama Canal may be more clearly followed.

(Printed by special arrangement with the Century Company, publishers of the Century Atlas, New York.)

from shore to shore will be $41\frac{1}{2}$ miles, and from deep water in the Atlantic to deep water in the Pacific $50\frac{1}{2}$ miles.

In entering the Canal from the Atlantic, a ship will proceed from deep water in Limon Bay, a distance of seven miles, to the north end of Gatun Locks. It will be raised 85 feet through these locks, by three steps, and will then pass out of the locks into the Gatun Lake, which is formed by the Gatun Dam intercepting the Chagres River. The ship will pass through the lake and Culebra Cut to the Pedro Miguel Lock, on the Pacific side, a distance of about 32 miles, Culebra Cut itself being about nine miles long. The ship will here be lowered 30 feet through Pedro Miguel Lock, by one step, and will then pass through Miraflores Lake, a distance of about two miles, and enter Miraflores Locks, where it will be lowered 55 feet, at mean tide, by two steps, to the level of the Pacific Ocean. It will then proceed through the channel about eight miles to deep water in the Pacific.

The channel throughout its entire length will have a minimum depth of 41 feet. The tidal variation on the Atlantic side does not exceed 2 1-2 feet, while on the Pacific side it is about 21 feet. The time of passage for a ship through the canal is estimated to be from nine to ten hours, three of which will be spent in the locks.

(To be continued).

RITZ-CARLTON HOTEL, MONTREAL

This is a photograph of the Ritz-Carlton Hotel, Montreal. An offering of \$500,000 bonds of this enterprise was made last week at 95 and accrued interest by Messrs. C. Meredith & Company. They are 5 per cent. first mortgage bonds, subject to retirement at not more than 105 and interest on and after June 1st, 1919. The issue was well received.

The hotel is now in course of erection in accordance with the designs of Messrs. Warren & Westmore, of New York, who have also designed the Hotel Belmont, the Imperial Hotel, and the Ritz-Carlton Hotel in that city. It is being built of steel, cut stone and concrete, and will be of fireproof construction throughout. The building will contain a ballroom, restaurant, grill-room and palm garden,

Ritz-Carlton Hotel, Montreal.

and about 240 bedrooms and sitting-rooms, each bedroom being provided with a bathroom.

The land upon which the hotel is being erected was acquired by the company in October, 1910, and, in common with much other property in Montreal, has since risen in value considerably. It has been valued at \$300,000.

Contracts covering the furnishing and equipment of the hotel, not including above, amount to \$287,000, making the initial value of the building, land, equipment, etc., \$1,920,000. The issue of 7 per cent. cumulative preferred stock has been sold to Canadian investors and the Ritz-Carlton organization. Contracts have been made whereby the entire charge and responsibility for the internal administration of the hotel, when completed, have been placed in the hands of the Ritz and Carlton Hotel organization of New York, London, Paris and elsewhere, which organization has also approved of all the plans and furnishing.

MORTGAGE CLAUSE IN FIRE POLICIES

Assignment of Mortgage Does not Transfer Contract of Insurance, States One Section

The mortgage clause was first introduced during the year 1860, and it made so much trouble both for the companies and the courts, that it was dropped for some time and then taken up again, stated Mr. T. H. Williams in a paper read at the 30th annual meeting of the Fire Underwriters' Association of the Pacific, and the New York standard form of mortgage clause adopted.

A mortgagor and mortgagee may both insure their separate interests (1) Mortgages are now regarded by the courts as mere securities for the payment of money. The mortgagor is the substantial owner of the property, and therefore his interest is absolute within the meaning of the policy. (2) Where a policy is taken out by the mortgagee, the mortgagor has no interests in the proceeds of the policy. (3) The assignment of a mortgage does not transfer the contract of insurance; the mortgagee's insurable interest is gone. (4) The clause in reference to foreclosure proceedings is held to be wise and a proper safeguard against the greatly increased risk consequent upon the circumstances provided against therein. (5) An appraisal accepted by the insured is binding upon the mortgagee. (6) Knowledge of an agent at the time of insuring, that foreclosure proceedings were pending, estops the insurer from setting up that policy is void.

Notify Both the Mortgagor and the Mortgagee.

(7) It is necessary to notify both the mortgagor and the mortgagee of the company's intention to cancel. (8) A warranty deed or a trust deed with a separate agreement to reconvey on payment of a certain sum is in effect a mortgage, which is not a change of title or possession within the policy. (9) A mortgage covering mill building and machinery therein held not to be a chattel mortgage. (10) The provision in a mortgage that all insurance shall be assigned to the mortgagee is not an assignment which will avoid the policy. (11) The right of a mortgagee is not affected by a transfer of interest by a part owner of the property. (12) Where mortgagee took out insurance and charged the premium to the mortgagor the policy covered both the interests of the mortgagor and the mortgagee and the company was not entitled to subrogation. (13) The co-insurance clause is binding upon the mortgagee.

First Entitled to Whole Amount of Debt and Interest.

(14) Where a policy is payable to more than one mortgagee the first mortgagee is entitled to the whole amount of his debt and interest and the second mortgagee to the balance. (15) The mortgage clause makes it a separate contract as far as the mortgagee is concerned. (16) A sale of the property by the mortgagor without the consent of the insurance company voids the policy as to the mortgagor and mortgagee, but if there is a mortgage clause on the policy the company must pay the mortgagee and it is entitled to subrogation. (17) "As the stipulations and conditions of the standard fire policy which relate to the proceedings after the liability of the company has accrued in terms relate to the mortgagor only, all or none of such terms must be held to apply to the mortgagee, and, as many of them are inapplicable, none apply." The court in rendering this decision evidently did not consider it justice to the insurance company but were compelled under our form of mortgage clause to decide as they did. In explaining their actions they said in part: "We must hold that all those stipulations, which in terms relate to the mortgagor only, apply equally to the mortgagor and mortgagee, or we must hold none of them do." The former indicates that which is impossible of performance.

PERSONAL

Mr. J. S. Beaty, a well-known Montreal broker, was presented with a handsome umbrella upon the attainment of his fiftieth birthday by the staff of Messrs. Erickson, Perkins & Company.

Mr. A. C. Pratt has been appointed manager for Eastern Canada for Messrs. W. & T. Avery, Birmingham, England, the well-known manufacturers of scales. This company has obtained contracts for several large installations in the Dominion.

Mr. W. D. Ross, general manager of the Metropolitan Bank, and a director of the Mexican Northern Power Company, and Mr. D. E. Thompson, K.C., president of the Mexican Northern, have left Toronto for an extended trip to Mexico, where they will examine the property of the Mexican Northern.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Expansions, Dividends and Future Plans

British Canadian Cannery Company.—The five new factories of the British Canadian Cannery Company in Ontario started operations yesterday. The season's output was contracted for some time ago.

Nipissing Mines Company.—The position of the Nipissing Mines Company on July 6th showed a surplus of \$1,525,898, of which \$1,173,000 was in cash. Half of the low-grade mill, to cost \$275,000, has already been paid for by the earnings.

Richelieu and Ontario Navigation Company.—Negotiations are being made, it is reported, between the owner of Round Island, in the Thousand Islands, and the Richelieu and Ontario Navigation Company for the purchase of the island by the company for the purpose of building a large modern summer hotel on it.

Monarch Knitting Company.—A dividend at the rate of 7 per cent. per annum has been declared on the preferred shares of the Monarch Knitting Company, Limited, for two and a half months ending July 31st, 1912. The dividend is payable August 1st to shareholders of record July 20th.

Canada and Foundries and Forgings.—The directors of the Canada Foundries and Forgings, Limited, have started the second half year of their existence by the declaration of a dividend of 3½ per cent. on the preferred stock for the first half of 1912. The dividend is payable on the 15th inst. to shareholders of record of June 30th. Mr. W. M. Weir, of the financial firm of J. A. Mackay & Company, has been elected a director of the company.

British Columbia Permanent Loan Company.—This company has just declared a half-yearly dividend at the rate of 10 per cent. per annum. During the past six months loans have increased from \$2,917,544 to \$3,057,671, sterling debentures from \$734,947 to \$805,892, and deposits from \$512,969 to \$670,491. The assets now stand at \$3,827,714, an increase over the figures of December, 1911, of \$274,285. Building activity throughout the West ensures a steady demand for the company's funds.

Canada North-West Land Company.—The sales of farming land of the Canada North-West Land Company, Limited, for the month of June, 1912, were 5,187 acres for \$81,591.76, against the 5,156.51 acres sold during the same month last year for \$80,884.12, a decrease in receipts of \$707.64. From January 1st to June 30th last year 21,065.92 acres were sold for \$283,565.18. This year 24,381.85 acres were disposed of for \$345,566.89, an increase of \$62,001.71.

Hudson Bay Company.—A London cable stated that at a meeting of the Hudson Bay Company resolutions were passed authorizing the acceptance of the new charter and an increase in the company's capital by the creation of 200,000 new preference shares of £5 each. Lord Strathcona, who presided at the meeting, said that the object of the new issue of capital was to provide funds to meet the present needs of the company in extending its general business. The shares would be allotted to shareholders in the proportion of two shares of £5 each for every ordinary share of £10 par value.

Granby Consolidated Mines.—For the first six months of its current fiscal year the Granby Consolidated output totalled 11,015,684 pounds of copper. Operations for full fiscal year will not make such a satisfactory showing as was expected, however, owing to the coal strike. The company's production for the year will only be in the vicinity of 13,000,000 pounds, as compared with 18,000,000 pounds in the preceding twelve months.

The two specific elements which have been favoring Granby during the first six months of current year have been steadily increased prices received for copper and lowering its cost of production to a point where it is now under ten cents a pound. This has resulted in monthly net earnings of between \$130,000 and \$140,000.

Dominion Bank.—For the six months ending June 29th the financial statement of the Dominion Bank shows the following changes, as compared with the statement for the same period last year: Profits for the six months, \$405,063.33, are \$72,000 greater than for the corresponding period of 1911. Circulation during the past twelve months has expanded over \$1,000,000. Deposits have increased \$5,500,000. The cash assets on the 29th of June, 1912, amounted to \$14,100,000, and the quick assets to about \$28,000,000—an increase of \$2,000,000. Current advances have increased \$6,400,000, indicating a steady growth in the general business of the bank. Total assets on the 29th of June were \$72,695,000, an increase of approximately \$9,000,000 during the twelve months ending on that date.

Detroit United.—The London Statist, in a recent article analyzing the position of Detroit United, remarked that "should the whole of the franchises in the city be taken from the company, a course which naturally it would be impossible to carry out, the earnings of the remaining part of the system would still be sufficient to provide for the bond interest, and, even if the city should refuse to renew any of the expiring franchises, there would appear sufficient property to protect bondholders. Until the untoward effect of politics is removed, the future is, of course, of a very doubtful nature. It may be that the company will have to continue to fight for its rights, or it is possible that a little more common sense will convince the city authorities of the folly of their attacks and the impossibility of any good resulting, so that a satisfactory agreement may be reached which shall bring an end to the dispute and place the whole system on a proper basis, whereby the rights of the company will be preserved and the needs of the citizens be met to the advantage of all concerned."

Dominion Sawmills and Lumber Company.—Much interest was awakened by the announcement of the particulars of a drastic scheme for the reconstruction of Dominion Sawmills and Lumber Company, says "Windermere" in a cable to the Montreal Star, a British Columbian Company floated with a great flourish of trumpets less than two years ago, Lord Desborough being among the directors.

Each holder of 6 per cent. first mortgage debentures receives the same amount of 5 per cent. debenture stock in the new company and three fully paid \$1 shares for each £20 of present holding. Interest on the new debenture stock is to be payable only out of profits during the next five years, but constitutes a fixed annual charge. Thereafter preference shareholders receive 6 per cent. income debenture stock for an equal amount and \$4 for each \$100 of present holdings.

Ordinary shares are to be whittled down from \$100 to six shares of \$1. Debenture stock of the old company, which in 1910 was hoisted to 9½%, dropped at one time this year to 36 and is now quoted at 42-52.

In view of the large number of new English companies operating in Canada, the following paragraph in the report of the Dominion Sawmills directors has especial interest: "Experience has satisfied directors that it is essential that the management of a business of this character should be located in Canada. It is quite impossible for a board in London to keep in sufficiently close touch with the business to exercise any real control; therefore, it is proposed that the new company be incorporated with the entire new board resident in Canada, a small London committee being appointed, but the management to be vested in the board resident in Canada."

Montreal Water and Power Company.—The gross earnings of the company from the sale of water continue to show a satisfactory increase, the total for the year being \$506,504.13, as against a total of \$432,150.87 for the preceding year, an increase of \$74,353.26, or over 17 per cent.

In the report of last year an estimate was made that, should the yearly increase maintain an average of only 10 per cent., the gross earnings might reach a total of \$750,000 in five years, and \$1,000,000 in eight years. As the increase for the past year has been so much in excess of 10 per cent. it is reasonably certain that the estimate above given is well within the mark.

A reference to the profit and loss account shows that, after providing all operating expenses, including all cost of repairs, full maintenance charges and all general and level expenses, amounting to \$228,900.30, the gross profit for the year amounted to \$277,603.83. From the profits of \$32,822.26, brought forward from last year, there was paid a dividend on the income securities of the company, leaving \$5,957.35 to be added to the \$277,603.83 gross profits of this year (or a total of \$283,561.18). Out of this latter sum, \$132,575.02, being the net cost on operating account of interest charges, was paid, leaving a net profit of \$150,986.16.

This balance was employed in further strengthening the various reserves of the company, as follows, viz.: \$32,912.20 was set aside to provide the year's proportion of the premium due at maturity on the outstanding bonds of the company and in meeting the year's proportion of the discount, etc., on the prior lien bond issue. The sum of \$20,000 was provided for meeting possible bad debts. \$65,000 was added to the general reserve account for depreciation, etc., and \$1,807.22 for meeting special depreciation. This still leaves a balance of \$31,176.74 to be carried forward, out of which it is proposed to make a further distribution to the income security holders of the company. The cash on hand at the end of the year was \$224,203.37, besides convertible securities to the amount of \$154,922.05.

HUDSON BAY COMPANY

Policy to Adapt Activities to Modern Requirements—

"Present Conditions Were Undreamed of by First Shareholders," Says Lord Strathcona

The report and annual accounts of the company as submitted to the shareholders are in part as follows:—

The policy adopted last year of dividing the company's business into three departments—land, salesshops, and fur trade—with a commissioner for each, has been justified by the results.

With the object of having the best local advice and co-operation for themselves and the three commissioners, the governor and committee invited Mr. A. M. Nanton, Mr. George Galt and Sir William Whyte, all resident in Winnipeg, to act as a local committee in an advisory capacity, for which their long acquaintance with the North-West fits them. These gentlemen having had this proposition under consideration for some time have signified their willingness to serve, and the governor and committee look forward to considerable benefit to the company from their co-operation.

Further progress has been made towards bringing the sale-shope up to the requirements of the present time, and the governor and committee are able to report that the improved results in this department of the company's business amply justify the more energetic policy now being pursued. At Winnipeg separate and adequate provision has been made for warehousing the goods required for the shops and posts, and in this way greatly increased accommodation has been provided for the retail business. At Calgary important new premises are being erected; at Vancouver preparations are in progress to provide long needed additional room to meet the growing trade there; new stores have been opened at Vernon and Kamloops, and a suitable building is in course of construction at Yorkton.

Amendments in Charter Desirable.

But much more will need to be done from time to time to keep the company abreast of the times, and for this reason it has been considered desirable to obtain such amendments in the charter as will provide the means for the necessary capital expenditure. At the same time this opportunity is being taken to ask for such other modifications as the various conditions of to-day suggest. The draft charter is now before the crown authorities, and so soon as an intimation is received that its provisions will have the Royal Assent, a special meeting of the shareholders will be called to consider its adoption.

To enable the company to retain its position in the fur trade in spite of increasing competition, new steamers are being constructed for service on the Athabasca and Slave Rivers, and the company have also acquired a majority interest in the "Nascope" Steamship Company, Limited, to deliver supplies to, and to bring out the returns from, the Labrador, Straits and Hudson's Bay posts.

The amount at the credit of the trade account on May 31 is £196,070, to which is to be added £121,887 brought forward from 1911, making a total of £317,957. A dividend of £2 per share, to be paid free of income tax, is recommended, amounting to £200,000, leaving the sum of £117,957 to be carried forward on this account.

The amount at the credit of the land account for the year ending March 31 last is £273,267, to which is to be added the sum of £298,556 carried forward in the accounts of 1911, making a total of £571,824. From the proceeds of land sales an interim distribution of £1 per share, amounting to £100,000, was paid to the proprietors in January last, leaving a balance of £471,824. It is now proposed to make a further distribution of £1 per share, absorbing £100,000, making together £200,000, and leaving £371,824 to be carried forward on land account. Income tax is not payable in respect of land sales. The total distribution from trade and land for the year amounts to £4 per share, or £400,000.

Fur Sales Were Satisfactory.

The results of the fur sales were satisfactory, an advance in prices having taken place in some of the most important descriptions dealt in by the company.

Farm land sales for the year ending March 31 last comprised 42,554 acres for \$808,944, an average of \$19.01 per acre, compared with 267,038 acres for \$3,747,768, an average of \$14.03 per acre for the year preceding. Sales of town lots amounted to \$810,690, compared with \$390,156 for the previous year. The total sales amounted to £332,801, compared with £850,258. The receipts amounted to £369,364, compared with £633,150 last year. The payments for surveys, taxes, and other expenses of the land department amounted to £96,006, as compared with £84,593 for the year ending March 31, 1911.

On March 31, 1911, the unsold lands in the possession of the company amounted to 4,022.086 acres, and as during the year 42,554 acres were sold, and 69,277 acres accrued to the

company, there is now on hand 4,049,709 acres, to which must be added 8,874 acres reverted to the company under cancelled sales during the year. Instalments to be paid on sales amount to \$5,458,653, compared with \$5,476,582 on March 31, 1911, and \$4,010,373 on March 31, 1910. Seeding operations and crop prospects are reported to be favorable, and the outlook for the company's land and general business continues good.

The Right Honorable Lord Strathcona and Mount Royal, G.C.M.G., Mr. John Coles and Mr. Richard Burbidge are the members of the board retiring, and being eligible, offer themselves for re-election.

Lord Strathcona Presides.

Presiding at the shareholders' meeting of the Hudson's Bay Company, Lord Strathcona, last week, stated that the trade results of the company were of a highly gratifying nature.

"While the policy of the board had been to prepare for the time when the fur trade should diminish to insignificant proportions," said he, "events in Canada are moving so rapidly that it recently became necessary to take energetic measures to retain the good-will existing throughout Canada towards the company by the extension of salesshops and branches, which effected a very material improvement."

"Indications for the fur trade point to an average collection in the coming season."

"The land market has remained firm throughout the year. There has been a fair demand at good prices for agricultural as well as town lots. The Winnipeg market continues fairly active. Conditions in Victoria, North Battleford, Prince Albert and Fort William are improving. It is anticipated that the demand for lots in other townsites will be intermittent. The improved state of the Edmonton townsite market resulted in the disposal of lots valued at £902,732. The total land now in the company's possession is 4,058,050 acres."

Prospects of the Coming Year.

Returning to the prospects of the coming year, Lord Strathcona said he thought they might anticipate a fair fur profit, which a few years ago was the company's only industry. With the extension of salesshops, business would be bound to be more profitable.

The conservative policy regarding land sales had been abundantly justified. Had the land been thrown on the market earlier, the company would have sacrificed the future.

In concluding, Lord Strathcona paid a tribute to the loyalty of the company's officers in Canada.

Two of the shareholders urged that the dividend should be ten shillings more.

Lord Strathcona said there might possibly be a better dividend this year. It was his 75th year's connection with the company, and the present conditions were undreamed of by the first shareholders.

Lord Strathcona and Messrs. John Coles and Richard Burbidge were re-elected directors.

CANADIAN AUTOBUS COMPANY

Several conditions were proposed by the Canadian Autobus Company in a conference with the Montreal board of control this week, with a view of obtaining a franchise for operating autobuses in this city. Mayor Lavallee stated after the meeting that the controllers were to meet the company next week to go over their project again. They offered the city, said the mayor, 2,500 paid-up \$100 preferred shares, and were willing that the city should have one or two representatives on the board of directors. As to routes, the company asked for fourteen lines for running their buses, and they would agree to have the first line in use by June, 1913, and subsequently a new line every two months.

The board decided to strike out the clause stating that after midnight, when ten-cent fares are required, no transfers were to be given. This was amended in such a way that transfers are obtainable after midnight.

In a general way it is understood that the company desires to have the exclusive rights to the routes where they operate their cars, and a preferential right to such other streets as the city may decide to open up to autobus traffic.

The controllers listened to what was said as to the advantages of having bus vehicles in Montreal, traversing the city without steel rails, which cut up the streets so badly, and also that in certain European towns autobus traffic was replacing the trolley car as well as the old omnibus.

The by-law controlling autobuses in Montreal which has been adopted by the city council was the base of the demands made. That by-law avoids reference to any company, that being a point for the board of control to decide on later. The Canadian Autobus Company are now making their request in the regular way.

CALGARY'S STREET RAILWAY MILEAGE

Has Grown from Sixteen to Fifty-Three Miles—Western Trade Routes Association—Board of Trade Trip

(Special Correspondence).

Calgary, July 16th.

At the banquet given to delegates, British manufacturers party and public men after the Panama Canal conference, Mr. J. S. Dennis, of the Canadian Pacific Railway Natural Resources Department who has placed so many of the United States settlers on the company's lands in the West, said that up to the end of last year £317,000,000 of British capital was invested in Canada as against £656,000,000 in the United States. He expected to see this changed, and urged British manufacturers to cater more to the wishes of Canadian trade. Referring to the influx of settlers from the United States, Mr. Dennis said he hoped in five years to see 500,000 coming instead of 200,000 as now. The Panama Canal conference passed resolutions. Resolutions demanding equalization of western freight rates, relief for the blockade of the eastern grain shipping route, and preparing the Pacific coast ports for the opening of the canal will be presented to the Dominion Government. A permanent organization was formed, of which Mr. L. P. Strong, president of the Alberta Pacific Elevator Company, was elected president. Mr. E. J. Fream, secretary of the United Farmers of Alberta, is secretary. Manitoba, Saskatchewan, Alberta and British Columbia are to elect the executive. No expression of preference to any British Columbia port was given. The Western Trade Routes Association is the name chosen for the new organization.

Calgary's Natural Gas Supply.

Natural gas pipes are being laid throughout the city and into all the residences where application is made. The charge will be 35 cents per thousand cubic feet for domestic use, and on this basis the estimate is that it will be cheaper, as is the difference between \$4.80 for gas and \$7 for coal. A test of the first 78 miles from Bow Island to Lethbridge has been made. The pressure was from 260 to 350 lbs. in the mains, which is probably sufficient for all requirements.

Municipal Street Railway System.

The third year of the Municipal Street Railway system has just been completed. The revenue for 1909 was \$144,244; for 1910, \$275,434, and for 1911, \$479,240. Out of this revenue there has been paid as profits to the city treasurer, after all fixed charges, interest, sinking fund, and five per cent. of the gross revenue set aside as a contingent, accident, insurance and renewal account:—\$29,435; \$87,206; \$101,000 for the three years respectively. The trackage has extended from 16½ miles in 1910 to 53 miles now, with 48 cars and 236 employees. Earnings during the five days of Exhibition week in 1910 were \$6,167; in 1911, \$8,250.70; and this year, \$12,754.55. A new observation car costing \$7,000 was added this week. When routed it will pass over parts of the city of special interest to sightseers. The round trip fare is to be 25 cents.

Board of Trade Trip.

Calgary's business men are arranging for a Board of Trade trip over the southern part of the province. They purpose, with five coaches, spending a week seeing things at first hand, while renewing acquaintances among their customers in the towns and cities to which they distribute their commodities.

Although Calgary's exhibition was somewhat affected by the wet weather, the attendance especially on Monday, when 40,000 people were on the grounds, was in excess of previous years, and the exhibits and entries of manufacturers, farm products, live stock, arts, etc., reached higher standards than previous years.

The Canadian Bank of Commerce have subscribed \$5,000 towards the relief fund for the sufferers in the Regina disaster.

Mr. J. A. Harrison of the Canadian Bank of Commerce, Walkerville, has been moved to the Hamilton branch as accountant in place of J. M. Duff, who has been moved to Sherbrooke in that capacity.

The establishment of a three-hour electric rapid transit service between Ottawa and Kingston, giving an outlet to the fertile Rideau valley and rich farming district of the Rideau lakes, is promised within two years by Mr. T. R. Clougher, of London, England. English capital is being interested in the project, and a bond issue will shortly be placed in London. The promoters have already secured the co-operation of electric transit engineers in the British Isles.

MONTREAL COMPANIES INCREASE DIVIDENDS

Suggestion of a Holding Company—Alderman Lapointe and Municipal Financing

Monetary Times Office,

Montreal, July 17th.

There were two dividend changes in Montreal stocks recently, being those of the Montreal Light, Heat & Power, and Canadian Converters.

The 8 per cent. dividend on Montreal Light, Heat & Power was increased to 9 per cent., while the directors of the Canadian Converters start dividends again upon that stock, at the rate of 4 per cent. per annum.

The street is discussing both these dividend changes. For probably a year past, 9 per cent. has been predicted on Montreal Power. More hopeful predictions have placed the dividend at 10 per cent., and the general feeling even now is that the higher rate will be paid ere long, unless something in the nature of a new stock deal takes place. Power is earning largely in excess of the amount requisite to pay dividends at the rate just declared, or even at a 10 per cent. rate. The decision to increase the dividend had no effect upon the stock, inasmuch as the increase was fully expected. Activity has now prevailed in the stock, and the market strengthened up perceptibly.

Interesting Suggestion Regarding Power Companies.

This is interesting in view of the talk concerning the possibility that a holding company may be organized to take in the three power concerns of Montreal, namely, the company just referred to, together with Shawinigan Water & Power Company, and the Cedar Rapids Company. All three companies are now working in very close touch with each other. The stocks of the Montreal Power Company, and the Shawinigan Water & Power Company are owned very largely by the same interests, and within the past six months these have acquired control of the Cedar Rapids Company which was previously owned by Mr. D. Lorne McGibbon, who still retains a large interest. With the Cedar Rapids development going on thirty miles west of Montreal, and the Shawinigan Water & Power increasing its development some eighty miles or so east of Montreal, and the Montreal Power Company with several developments in the vicinity of Montreal, and a complete distributing system in its control, it would seem that a holding company for the three concerns would not be at all illogical.

Canadian Converters Dividend.

As to the dividend on Converters, the cause for the declaration of this is said to be more the outlook for the future than results obtained. The company has had difficulties, having a few years ago shown a serious deficit, and having been compelled to pass its dividend. These financial difficulties have been surmounted, and it has a comfortable surplus, although its earnings have been scarcely equal to the 4 per cent. dividend requirements. As was explained at the recent annual meeting, however, the year was not at all a favorable one, whereas the present year had started off exceptionally well, the orders on the books of the company being twice as great as a year ago. A very considerable change also took place in the directorate, and the present directors in taking office were strongly advised by the old directors to make the dividend declaration they have just made.

Difficulties in Municipal Financing.

Financial circles in Montreal are interested in Alderman L. A. Lapointe's suggestion that the time has come for the city to increase its rate of interest from 4 per cent. to 4½ per cent. It will be necessary for the city to obtain the power to accomplish this from the legislative assembly.

Alderman Lapointe declares that money is becoming dearer and, to a considerable extent, he lays the blame of the difficulty of obtaining money upon the low rate of interest which the city is prepared to pay. He refers to the fact that New York is compelled to pay 4½ per cent. in order to obtain par for its loans. He refers to the fact that no bids were sent in last year for the \$7,000,000 loan, and assumes that this may have been due to the placing of a \$5,000,000 loan but a short time previously, upon which occasion the city secured the high price of 101.115. That was eighteen months ago, yet the city has never since been able to get a better offer than 97, which was received in January. The city now needs \$13,000,000, as \$6,000,000 is required for the current year's undertakings, in addition to the \$7,000,000 of last year. By advancing the interest to 4½ per cent., interest would be stimulated, he thought, in financial centres, and bidding would be more active.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Saanich, B.C.—The school loan by-law to raise \$33,500 was carried.

Mitchell, Ont.—A by-law to raise \$10,000 for park purposes was carried.

Fort William, Ont.—Nine by-laws were carried by the ratepayers involving over \$700,000.

Victoria, B.C.—The school loan by-law, to raise \$175,000 for school purposes, was passed.

Parkhill, Ont.—The town of Parkhill carried a by-law to raise \$25,000 for a system of waterworks.

Macklin Village, Sask.—Until July 22nd for \$5,500 6 per cent. debentures 15 years. Secretary-treasurer, Macklin.

McTaggart S.D. No. 1143, Sask.—Until August 1st for \$4,000 20-year debentures. R. J. Jackson, secretary-treasurer, McTaggart.

Strassburg Rural Municipality No. 220, Sask.—Until July 20th for \$7,500 6 per cent. debentures. S. L. A. Smyth, secretary-treasurer.

Berlin, Ont.—Berlin ratepayers carried the by-law to grant the Consolidated Rubber Company a bonus of \$25,000 and minor concessions.

Cupar, R.M., No. 218, Sask.—The municipality will borrow \$15,000 for permanent improvements, John Moir, secretary-treasurer, Markinch.

Cot Rural Municipality No. 271, Sask.—Tenders are called for \$1,000 permanent improvement debentures. J. Bowes, secretary-treasurer, Kamsack.

Britannia Rural Municipality, No. 502, Sask.—The municipality will borrow \$7,000 for permanent improvements. S. M. Daly, secretary-treasurer, Lloydminster.

Big Quill Rural Municipality No. 308, Sask.—The municipality will borrow \$20,000 for permanent improvements. R. Denovam, secretary-treasurer, Wynyard, Sask.

Prairie Rural Municipality No. 408, Sask.—The municipality will borrow \$10,000 for making permanent improvements. S. C. Bowensmith, secretary-treasurer, Wilkie.

Rosedale Rural Municipality, No. 283, Sask.—The municipality has been empowered to borrow \$27,000 for permanent improvements. A. Holm, secretary-treasurer, Hanley.

Galt, Ont.—The electors of Galt authorized the expenditure of the sum of \$25,000 on the purchase of second mortgage bonds of the Lake Erie and Northern Railway.

Battleford, Sask.—Until August 3rd for \$15,000 25-year 5 per cent. debentures. J. P. Marshall, secretary-treasurer. (Official advertisement appears on another page).

Swift Current R. M., No. 137, Sask.—The municipality has been empowered to borrow \$20,000 for permanent improvements. F. W. Gammam, secretary-treasurer, Swift Current.

Strassburg Rural Municipality, No. 220, Sask.—The municipality has been empowered to borrow \$15,000 for permanent improvements. S. L. A. Smyth, secretary-treasurer, Strassburg.

Vermilion, Alta.—Until July 27th, for \$4,000 park, \$1,000 electric light and \$1,000 sidewalk debentures. Interest, 6 per cent.; payable in 20 instalments. H. P. Long, secretary-treasurer.

Newcombe Rural Municipality, No. 260, Sask.—Authority has been granted the municipality to borrow \$12,500 for permanent improvements. C. G. Annable, secretary-treasurer, Rathmullen.

St. Clements Rural Municipality, Man.—The electors will vote on a by-law to issue \$12,000 30-year 4 per cent. road debentures, on July 29th. Thomas Bunn, secretary-treasurer, St. Clements.

Morris Rural Municipality, No. 228, Man.—On August 3rd the ratepayers will vote on a by-law to issue \$2,000 20-year 6 per cent. debentures for school purposes. D. M. Ure, secretary-treasurer, Morris.

Welland, Ont.—The electors will vote on a by-law to authorize the issue of debentures of the town of Welland, to the amount of \$45,000 for the cost of a plant to distribute electric power, on August 6th.

Ottawa, Ont.—Until August 29th for \$12,000 40-year, \$727,000 30-year, and \$292,429.99 20-year debentures; interest, 4 per cent. Charles Hopewell, mayor. (Official advertisement appears on another page.)

St. Agnes R.C.S.D., No. 22, Sask.—Until August 10th for \$30,000 5 per cent. 40-year school debentures. Edw. J. Baker, Post Office Box 41, Moose Jaw, secretary-treasurer. (Official advertisement appears on another page.)

Stettler, Alta.—Until August 22nd for \$10,800 5½ per cent. 20-year waterworks, and \$4,000 5½ per cent. 20-year electric light debentures. R. Dick Ballantyne, secretary-treasurer. (Official advertisement appears on another page.)

Nelson, B.C.—Until July 25th, for \$20,000 20-year 5 per cent. fire hall; \$7,500 20-year 5 per cent. waterworks; \$7,500 20-year 5 per cent. sewer; and \$8,595.20 5 per cent. 10-year local improvement debentures. W. E. Wasson, city clerk. (Official advertisement appears on another page).

Vancouver, B.C.—A by-law to authorize the raising by way of debentures the sum of \$600,000 for the purchase taking, or extinguishment of certain lands, rights, littoral, riparian interests, and rights of access, etc., to False Creek, will be voted on by the electors August 8th.

Belleville, Ont.—A by-law to ratify and confirm an agreement between the Wood Chemical Company of Canada, Limited, and the corporation of the city of Belleville, and to authorize the issue of debentures to the amount of \$5,000 to provide for the cost of a site for the company, will be voted on by the ratepayers, August 1st.

Owen Sound, Ont.—Two by-laws of an industrial nature were carried by the ratepayers. The first by-law provided for a loan of \$20,000 to Mr. J. H. Cote for the establishment of a factory for the manufacture of wire and wire nails. The second by-law was for the purpose of authorizing a loan of \$20,000 to the Superior Match Company.

Saskatchewan, Sask.—The following villages have been empowered to borrow money for permanent improvements. The particulars are given in order of village, amount, and name of secretary-treasurer:—Macklin, \$5,500, A. W. A. Carscadden; Ogema, \$3,000, M. Matheson; Tisdale, \$5,000, W. E. Moore; Welwyn, \$600, A. Sumner; Mortlach, \$3,000, V. H. Ricci; Goodwater, \$1,500, W. C. Johnson; Laura, \$1,200, J. H. Shillington; Rocanville, \$3,000, F. J. Hewgill; Delisle, \$3,500, H. N. Freeman; and Keeler, \$2,000, C. M. Watson.

FARMERS BANK ENQUIRY

During the investigation this week at Toronto by Sir William Meredith, of the Farmers Bank failure, denials were made by Messrs. Stratton, Lown, Nesbitt and Lindsay that they had suggested to Travers that he take \$3,000 to Ottawa in order to get the Farmers Bank charter more easily. Travers again swore that the cheque was left with the hotel clerk at Ottawa in a sealed envelope addressed to Mr. Peter Ryan. Travers was asked whether he had ever spoken to Mr. Ryan since he was in Ottawa on that occasion, and said that as recently as June 15th, 1912, Mr. Ryan had approached him in the office of G. T. Clarkson, liquidator of the bank, and said: "I will look after your interests." The prison guard, Travers said, had probably heard the remark.

Superintendent Rogers, of the Ontario Provincial Police, said that three of his men saw Dr. Nesbitt after the warrant for his arrest had been issued, and that if he had been notified by the Toronto Police Department immediately the doctor could have been arrested between Muskoka and the Soo. The warrant was issued on January 14th, and he was not officially notified for him until March. Inspector Rogers admitted there was personal ill-feeling between himself and Inspector Duncan, of the Toronto detective force.

Mr. D. A. Yeats gave evidence respecting the manner in which Inspector Duncan had permitted two Toronto newspaper men to have access to the papers bearing on the various charges against W. R. Travers and other men connected with the bank.

RIO-SAO PAULO AGREEMENT

The revised terms of the Rio-Sao Paulo agreement were announced this week. The holders of the stock of the Brazilian Traction, Light and Power Company, the holding corporation, will receive dividends upon the new basis from August 1st. The Sao Paulo Company will pay its full ten per cent. dividend for the month of July, a special disbursement of five-sixths of one per cent. being declared for that period.

On the basis of exchange the distribution of the share capital of the Traction Company will be as follows:—

For the Rio de Janeiro Tramway, Light and Power Company, Limited	\$ 72,000,000
For the Sao Paulo Tramway, Light and Power Company, Limited	27,500,000
For the Sao Paulo Electric Company, Limited	5,000,000
Unissued	15,500,000

\$120,000,000

The \$15,500,000 of the authorized capital of the Traction Company unissued will be available for sale in the future. The directors in their circular say that the estimated revenue of the Traction Company from the combined undertakings is sufficient to justify the Traction Company in commencing to pay dividends at the rate of six per cent. per annum, and the expected increase in the future revenues of the company in the years 1913 and 1914 will, without doubt, be sufficient to justify larger dividends.

NEW COMPANIES

Seventy-six Corporations Have Obtained Charters—
National Steel Car Company is Incorporated

Seventy-six new companies have been incorporated this week with Dominion or provincial charters. Their aggregate authorized capital is \$137,231,000. This unusually large amount is made up chiefly of the capital of the Brazilian Traction, Light and Power Company, amounting to \$120,000,000. This is the holding corporation for the Rio and Sao Paulo companies, the amalgamation of which was announced last week. The headquarters of this concern is in Toronto and it has a Dominion charter. Deducting the authorized capital of the Brazilian company, the capitalization of the other seventy-five companies, divided according to the provinces in which the head offices are situated, is as follows:

Province	Companies.	Authorized capital.
Quebec	11	\$6,600,000
British Columbia	16	3,870,000
Ontario	23	2,947,000
Manitoba	10	2,305,000
Saskatchewan	14	1,200,000
Nova Scotia	1	300,000
Total	75	\$17,231,000

There are two large financial companies, both in Western Canada, the Canadian Guaranty Company, Winnipeg, with capital of \$1,000,000, and the Northern Loan and Mortgage Guarantee Corporation, Vancouver, with capital of \$2,000,000. The Port Edward Townsite Company, capitalized at \$1,000,000, has its headquarters at Prince Rupert, B.C. Another million dollar mining company has made its appearance in Ontario, the Moira River Mining Company, with head office at Tweed. The National Steel Car Company, of Montreal, has capital of \$6,000,000 and a Dominion charter. The corporation is given authority to manufacture all kinds of cars-conveyances and railway equipment. The charter is very extensive.

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Canora, Sask.—F. P. Layton, \$10,000.

Kerrobert, Sask.—H. T. Grain Company, \$24,000.

Regina, Sask.—United Lumber Company, \$100,000.

Cut Knife, Sask.—Cut Knife Concert Hall Company, \$1,000.

Battleford, Sask.—Battleford Masonic Temple Company, \$25,000.

Windsor, Ont.—Windsor Club, \$40,000. G. Mair, W. C. Kennedy, J. F. Smythe.

Oshawa, Ont.—Fowke Brothers, \$40,000. F. L. Fowke, A. L. Fowke, A. P. Fowke.

Alfred, Ont.—Alfred Tin and Roofing Company, \$25,000. N. Brisebois, H. Daoust, E. Lalonde.

Ottawa, Ont.—Stapleton Amusements, \$40,000. B. F. Stapleton, D. J. McA'Nulty, A. Pritchard.

Victoria, B.C.—Peninsular, City and Suburban Home Builders, \$25,000. British Importers, \$50,000.

Stanhope, Que.—Frontier Granite Company, \$20,000. J. T. Hackett, T. B. Gould, C. B. Mackinnon.

Truro, N.S.—Midland Collieries, \$300,000. W. A. Henry, R. V. Harris, H. C. W. Powell, Halifax.

Prince Albert, Sask.—Bradshaw Agencies, \$20,000. Prince Albert Mineral Water Company, \$10,000.

Tweed, Ont.—Moira River Mining Company, \$1,000,000. E. J. Cowain, P. W. Cornyear, J. Murphy.

Prince Rupert, B.C.—Prince Rupert Financiers, \$100,000. Port Edward Townsite Company, \$1,000,000.

Bridgeburg, Ont.—Canadian Tonitves, \$40,000. J. A. McLaughlin, jr., G. H. Harrower, J. M. Lawrence, Buffalo.

Fraserville, Que.—La compagnie des distractions populaires de Fraserville, \$10,000. A. Lennox, A. Jung, A. Landry.

Joliette, Que.—Standard Sand and Gravel Company, A. Perrault, J. H. Dillon, P. A. Degroseilliers, all of Montreal.

Saskatoon, Sask.—R. B. McClean Grain Company, \$100,000. Saskatoon and District Co-operative Society, \$500,000.

Welland, Ont.—Welland Dredging Company, \$100,000. M. Sullivan, Detroit; D. J. Sullivan, E. D. Sullivan, Amherstburg.

Walkerville, Ont.—Sparks-Withington Company, \$40,000. W. Sparks, Jackson, Mich.; P. H. Withington, Cleveland; J. H. Coburn, Walkerville.

Calgary, Alta.—Calgary Brewing and Malting Company \$2,000,000. A. E. Cross, Calgary; W. R. Hull, Calgary; Hon. F. A. Macnaghten, Calgary.

Moose Jaw, Sask.—Liverpool Securities, \$20,000. Directoyou Company, \$50,000. Moose Jaw Cartage Company, \$40,000.

Melville, Sask.—Melville Permanent Development Company, \$50,000. Dominion Milling Company, \$250,000.

Hamilton, Ont.—Fuel Economizer Company, \$25,000. G. W. Morgan, Columbus, Ohio; A. T. Bratton, J. M. Jones, Hamilton. Ruby Cigar Company, \$40,000. A. H. Rosenberg, A. Thomson, S. Golberg. Glassco Limited, \$100,000. M. S. Glassco, R. D. Glassco, Hamilton; G. B. Jacobs, Oakville.

Vancouver, B.C.—Territorial Light and Heat, \$100,000. Batson Fisheries, \$250,000. City Lumber Company, \$50,000. Cameron Valley Land Company, \$50,000. Vancouver Barbers' Supply Company, \$15,000. Vancouver Institute of Physical Culture, \$10,000. Deutscher Klub, Vancouver, B.C., \$10,000. J. J. Dissette Company, \$100,000. Commercial Motors, \$100,000. Northern Loan and Mortgage Guarantee Corporation, \$2,000,000. Nicholl Hotel Company, \$10,000. Colonial Sash and Door Factory.

Montreal.—Compagnie d'Immeubles Union, \$99,000. J. A. Paquin, J. O. Deziel, H. Foucreau. Imperial Press, \$20,000. W. T. Hood, J. A. T. Richards, J. J. Dolan, Monarch Investment Company, \$50,000. J. W. Blair, F. J. Lavery, A. R. McMaster. Longueuil Realities, \$150,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. People's Amusement Company, \$20,000. S. W. Jacobs, A. R. Hall. Maher's Safety Rubber Heel Company, \$20,000. E. F. Slack, Westmount; W. J. C. Sutton, T. A. Kvdd, Montreal. McArthur-Irwin Limited, \$200,000. G. W. McDougall, L. Macfarlane, G. Barclay. National Steel Car Company, \$6,000,000. W. R. P. Parker, R. W. Hart, C. H. C. Leggett.

Winnipeg, Man.—Church Exploration Company, \$50,000. C. S. Tupper, J. Allen, H. W. Hollis. Canadian Guaranty Company, \$1,000,000. F. C. Hamilton, C. Parker, A. H. Oakes. Central Canada Construction Company, \$100,000. J. A. Adams, W. E. Moore, W. Harvey. Fidelity Mortgage Company, \$250,000. H. R. Drummond-Hay, F. W. Louthood, M. Anderson. New Era Developing Company, \$100,000. H. Bechtel, L. A. Dietrich, Buffalo; J. R. Gray, Winnipeg. Commonwealth Lumber Company, \$100,000. G. F. Robertson, W. G. Macconnell, A. E. Fowles. Business Men's Investment and Loan Company, \$100,000. C. W. Baker, W. W. Robinson, L. C. MacIntyre. M. Gardner and Company, \$5,000. M. Gardner, J. Gardner, B. Stern. Fort William Elevator Company, \$500,000. D. Horne, H. E. Swift, G. H. Yule.

Toronto.—Toronto School Supply Company, \$40,000. G. Dunham, S. E. Ballard, T. H. Barton. Exclusive Estates, \$40,000. C. Wilder, J. Fishbain, N. L. Porfilovskv. National Underwriters, \$40,000. R. E. Menzie, G. S. Menzie, R. W. Menzie. Star Knitting Mills, \$40,000. O. H. King, E. M. Rowand, A. J. Wise. Galt Securities Company, \$72,000. D. G. M. Galbraith, W. A. McFarlane, S. McCutcheon. Romantite, \$50,000. H. J. Macdonald, R. Armstrong, jr., J. M. Greer. B'nei Abraham Congregation, A. Colis. I. Snider, E. Cohen. Lone Branch Bowling Club, \$10,000. C. Bonnick, J. P. Heighton, T. A. Mitchell. Shanghai Club. M. Gam, T. Sun, L. Den. Elliot Woodworker, \$40,000. W. A. Elliot, A. A. Miller, G. W. Eliot. International Patent Syndicate, \$50,000. J. W. Broudy, A. R. Nesbitt, T. J. W. O'Connor. Toronto Lawn Tennis Club, \$75,000. A. C. McMaster, H. C. Boulbee, T. D. Dockray. Brazilian Traction, Light and Power Company, \$120,000,000. J. S. Lovell, C. D. Magee, W. Bain.

ENGLISH INSURANCE COMBINE.

Four of the leading industrial insurance institutions in England have decided to amalgamate for the purpose of forming an approved society to work the Insurance Act. The companies are:

	Insurance Funds.
Refuge	£7,272,008
Pearl	5,100,658
Britannic	2,556,031
London and Manchester	78,544

The combination, whose policyholders run into many millions, will possess the largest number of agents of any insurance concern in the Kingdom. The chairman of the combination is Mr. F. T. Jefferson, J.P., of Birmingham, the chairman of the Britannic Insurance Company.

The by-law to authorize the expenditure of \$300,000 on a new city hall at Victoria, B.C., was defeated.

UNITED STATES AND CANADIAN CANAL TRAFFIC

Seventy-nine Per Cent. of Commodities Transported Originated from States—Distribution of Water-borne Wheat

Since 1908 a record of the country origin of business passing through the canals of Canada and various facts with respect to the traffic of all the canals has been kept, and the comptroller of statistics, Mr. J. L. Payne, gives these particulars in the following tabular statement:—

Year	Canadian Vessels		U.S. Vessels		Freight Tonnage		
	No.	Tonnage	No.	Tonnage	Canadian	United States	Total
1908.....	29,040	6,780,789	7,489	4,835,320	5,012,147	12,490,673	17,502,820
1909.....	22,507	7,811,578	9,996	16,459,322	7,378,057	26,342,691	33,720,748
1910.....	25,337	8,931,790	11,462	21,777,297	7,883,614	35,106,994	42,990,608
1911.....	25,585	9,172,192	10,370	18,231,672	7,792,907	30,237,446	38,030,353

It will be observed that of all the commodities transported through the canals of Canada in 1911, the proportion originating in the United States was 79.5 per cent. In 1910 the proportion was 81.6 per cent. This large difference in favor of the United States is almost wholly accounted for in the volume of ore passed through the canal at Sault Ste. Marie.

With regard to vessel tonnage, the proportions in 1911 stood as follows:—Canadian, 33.5 per cent.; United States, 66.5 per cent.

Transportation of Canadian Wheat.

With the development of the Western Provinces there has been a steady growth in the volume of waterborne wheat. Since 1895 the quantities annually brought down through the canal at Sault Ste. Marie are shown in the following table:—

1895	4,518,334
1896	19,314,234
1897	17,925,834
1898	9,746,600
1899	12,759,634
1900	9,292,034
1901	9,639,534
1902	27,912,500
1903	32,233,934
1904	29,794,100
1905	25,983,100
1906	34,389,300
1907	49,399,967
1908	58,574,034
1909	*48,047,833
1910	51,774,833
1911	63,641,000

*For the first time represents Canadian wheat only. The figures of preceding years include American wheat which passed through the Canadian canal.

The figures for the years anterior to 1909 include American wheat. It will be observed, however, that the increase in 1911 over 1909, applicable only to Canadian wheat, amounted to 15,593,167 bushels, or 32.4 per cent.

In addition to the 63,641,000 bushels of Canadian wheat which passed through the Canadian canal at Sault Ste. Marie, 1,981,481 bushels of Canadian wheat passed through the United States canal at that point. These figures combined show that the volume of water-borne Canadian wheat in 1911 was 65,622,481 bushels. Account is not taken of the relatively small quantity of wheat which was moved through any of the other canals. It is quite relevant, however, to point out that 183,449 barrels of Canadian flour were carried through the Canadian canal at Sault Ste. Marie in 1911, and 841,733 barrels of Canadian flour through the American canal. Calculating this Canadian flour into wheat, we have an addition of 4,100,728 bushels to the volume already indicated, bringing the total up to 69,723,209 bushels.

Some Analytical Methods Applied.

Last year, for the first time, a careful study was made of the distribution of Canadian wheat after it had passed through the canal at Sault Ste. Marie, and this year the same analytical methods have been applied to the traffic of 1911. Placing the figures for 1909, 1910 and 1911 side by side, for purposes of easy comparison, the record is as follows:—

	Canadian Wheat.		1909.		1910.		1911.	
	Bushels.		Bushels.		Bushels.		Bushels.	
Fort William to Montreal ..	10,517,266		13,185,370		12,761,666			
“ “ “ Georgian Bay ..								
“ “ “ other Canadian ports ..	13,384,400		12,753,200		9,881,234			
Fort William to other Canadian ports ..	10,149,633		9,603,400		11,880,666			

Canadian Wheat	1909.	1910.	1911.
Fort William to Buffalo....	12,841,334	15,693,363	27,945,600
Duluth to Montreal	520,000	315,000	
“ “ Buffalo	528,200	224,500	710,334
“ “ Georgian Bay ..	28,000		461,500
“ “ other Canadian ports	79,000		
Total	48,047,833	51,774,833	63,641,000
Through American canal ..	9,117,328	5,321,446	1,981,481
Grand total	57,165,161	57,096,279	65,622,481

It should be explained, perhaps, that the “other Canadian ports” indicated in the foregoing statement are ports west of Lake Erie, but not on the Georgian Bay.

Passed Through Canadian Canal.

It is quite impracticable to follow the course of the small volume of Canadian wheat which passed through the American canal at Sault Ste. Marie. With respect to that which passed through the Canadian canal, however, the figures work out in the following percentages:—

	1909.	1910.	1911.
	%	%	%
Fort William to Montreal	21.9	25.5	20.1
“ “ “ Georgian Bay	27.9	24.6	15.6
“ “ “ other Canadian ports..	21.1	18.5	18.7
“ “ “ Buffalo	26.7	30.3	43.8
Duluth to Canadian ports	1.3	.6	.7
“ “ American ports	1.1	.5	1.1

It will be seen that 54.4 per cent. of all the Canadian wheat which came down in 1911 through the Canadian canal at Sault Ste. Marie clung exclusively to Canadian channels. The proportion in 1910 was 68.6 per cent.; so that the diversion to American channels was considerably greater in 1911.

BUILDING CONSTRUCTION ACTIVE

According to reports from official sources compiled by the Contract Record the building operations in twenty-seven Canadian cities for the first half-year, totalled \$69,583,674, twenty-eight per cent. more than for the same period in 1911. As illustrating the steady growth of the country the journal points to the fact that the buildings erected in 1911 exceeded in value those of 1910 by 29 per cent.

The buildings for the month of June alone represented an expenditure of \$17,645,709, as compared with \$12,346,908 in June, 1911.

Toronto is in the lead with a six-months' record of \$13,195,271. Winnipeg's figures are \$11,205,600. Vancouver, with an expenditure of \$8,132,720, is \$65,000 ahead of Montreal, and Edmonton is not far behind with \$7,725,622.

Edmonton's expenditure shows the remarkable gain of 376 per cent., Stratford showed a gain of 278 per cent., Brantford 133, Fort William 132, Port Arthur 124, Nelson 118.

The building returns for six months of 1912 and the same period of 1911 are as follows:—

	1912.	1911.
Toronto	\$13,195,271	\$11,939,953
Winnipeg	11,205,600	9,058,150
Vancouver	8,132,720	9,191,524
Montreal	8,065,993	7,306,136
Edmonton	7,725,622	1,620,431
Saskatoon	4,634,685	2,574,441
Hamilton	3,145,600	2,246,780
Regina	2,549,770	2,936,930
Ottawa	2,120,000	1,393,370
Fort William	1,743,425	750,075
Maisonneuve	817,428	748,900
New Westminster	785,578	613,580
Lethbridge	719,343	528,950
Port Arthur	700,994	312,985
Brantford	657,230	282,228
London	509,598	458,423
Windsor	433,830	396,795
St. Boniface	395,530	467,880
Berlin	332,950	242,585
St. John	315,950	211,700
Sydney	254,616	282,052
Kingston	224,059	133,223
Galt	204,032	163,920
Nelson	198,015	90,705
Stratford	202,791	53,500
Peterborough	188,858	186,786
Welland	124,186	

CROSS-TIES USED BY RAILWAYS

Species Used by Steam and Electric Roads—Methods of Manufacturing are Unchanged—Preservation Plants Being Established

There were 9,213,962 cross-ties, costing \$3,535,628 purchased in 1910 by the steam and electric roads of Canada. This represents a decrease of 4,964,279, or 35 per cent. from the number purchased in 1909, due to the decreased purchase of ties for new steam railway lines.

This decrease was general throughout the important species except with Douglas fir. The average cost of these ties at the point of purchase was 38 cents, being an increase of one cent over the cost in 1909.

The data upon which the report, compiled by Mr. H. R. Macmillan, of the Department of Forestry, is based, were furnished by the steam and electric railways of Canada. The value given for the ties was the cost at the point of purchase.

Three kinds of wood supplied 77 per cent. of all the ties purchased. These were cedar, jackpine and hemlock. Though not as many cedar ties were purchased in 1909 as in 1910 cedar is still the chief species used in Canada. In 1910, it furnished 40 per cent. of the ties purchased by Canadian roads, as against 29.8 per cent. in 1909. Nearly all the cedar used is eastern cedar (*Thuja occidentalis*), as western cedar (*Thuja plicata*) is too soft for satisfactory use as cross-ties, except for electric lines where the traffic is light.

Five Species Supply Ninety-four Per Cent.

Jack pine is the second in importance in cross-tie production. In 1910 it supplied 23.5 per cent. of the ties used in Canada, which was practically the same percentage as used in 1909.

Hemlock, supplying 13.8 per cent. of the total consumption, occupied third position in 1910. Hemlock has now for the first time passed tamarack as a tie-producer. The advance of hemlock from the fourth position, which it previously held, is due not to an increase in the use of hemlock, but to a decrease in the use of tamarack. Douglas fir formed 9.6 per cent. of the ties purchased in 1910 as against 4.6 per cent. in 1909. About 232,000 more Douglas fir ties were purchased in 1910 than in 1909. This species was used to a greater extent by both steam and electric railways. Tamarack ties have dropped from third place in 1909, when they formed 19.8 per cent. of the total, to fifth place in 1910, when they formed only 7.1 per cent. In 1910 only 663,922 tamarack ties were purchased, compared with 2,811,820 purchased in 1909. This great decrease of 2,147,898 ties is found entirely in the number used by steam roads, and is due to the fact that the purchase of ties for the eastern half of one of the new trans-continental roads was completed previous to 1910. The above five species, namely, cedar, jack pine, hemlock, Douglas fir, and tamarack, represent 94 per cent. of the total number of ties used. Nearly all the remainder is made up of oak and spruce.

Increase in Number of Oak Ties.

The number of oak ties purchased in 1910 was 264,647, or an increase of 230,258 over the number purchased in 1909. This is due to one United States Railway, operating in Canada, which is using a great proportion of durable woods. Aside from this road the railways of Canada use oak ties chiefly for switch ties. The use of spruce, one of the cheapest ties, has fallen off greatly, 657,871 ties less being purchased in 1910 than in 1909. The decrease in the purchase of spruce is due to the same reason as that ascribed to tamarack.

The remaining species, cypress, chestnut, and white pine, are used to a small extent for ties. All the cypress and chestnut ties and practically all the oak were imported from the United States. Red pine and yellow pine, which were used in 1909, were not reported in 1910. The average price of ties in 1910 was 38 cents as compared with 37 cents in 1909. Of the important woods oak cost the most, 74 cents per tie, and spruce the least, 28 cents per tie. Cedar cost 41 cents per tie, as compared with 45 cents per tie in 1909. Douglas fir cost 30 cents per tie in 1910, or 4 cents less per tie than in 1909. The remaining woods, or all excepting these two, have advanced in price from 3 to 12 cents per tie.

Percentage Used by Electric Railways.

The electric railways used four per cent. of all the ties purchased in 1910. In 1910, 195,411 more ties were used by electric roads than in 1909, representing an increase of 182 per cent., mainly in the use of cedar and Douglas fir. This is due to much increased construction. Nearly 50 per cent. of the total number used were cedar ties at a cost below the average, namely, 37 cents.

Douglas fir constituted 32 per cent. of the total. Jack pine, being at a distance from the electric railways, was used

only to the extent of 0.6 per cent., the ties costing 51 cents each. In steam roads 23 per cent. of the ties used were jack pine, and they cost only 33 cents each. Very little spruce and no chestnut or white pine were used in the construction of electric roads. Over 10,000 cypress ties were imported at an average cost of 40 cents each. This is the first report of cypress ties being used for electric roads.

The average cost of ties used in 1910 by electric roads was 41 cents, as compared with 47 cents in 1909. This is due largely to the decrease of 2 cents per tie in the cost of cedar ties and 12 cents in the cost of Douglas fir ties. It is an interesting fact that, although the average tie used by electric roads is smaller than that used by steam roads, the price paid for it is generally greater, viz., 3 cents per tie more in 1910. This is due not only to the disadvantages incident to contracts for smaller quantities of material, but also to the fact that the electric roads are more likely to purchase ties at points where the price includes railway transportation charges. This is shown by the electric roads paying not less than 37 cents for their ties, while many used by the steam roads were bought for 27 cents per tie.

JUNE COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt station during June:—

Mine.	Tons.
Buffalo	123.4
Casey Cobalt	87.8
Chambers-Ferland	32.0
Cobalt Lake	134.8
Cobalt Townsite	199.2
Coniagas	117.5
Crown Reserve	49.0
Drummond	20.7
Hudson Bay	31.6
Kerr Lake	30.3
LaRose	274.9
Lost and Found	15.0
McKinley	202.8
Nipissing	227.9
O'Brien	31.2
Temiskaming	95.5
Trethewey	77.2
Total	1,750.8

The shipments during May were 1,959.7 tons.

CANADA INDUSTRIAL BOND CORPORATION

The Canada Industrial Bond Corporation, Limited, has opened its offices at 136 St. James Street, Montreal, with branch offices in Toronto and London, England. The company was organized for the purpose of dealing in high-class investment securities, with special facilities for enabling its clients to obtain industrial bonds of undoubted security, and whose interest yield is commensurate with the income returns which prevailing conditions warrant.

The company solicits enquiry, either by personal interview or letter, from discriminating investors desirous of obtaining the maximum income return on their surplus accumulations, without entering the speculative field.

The following are the directors of the corporation:—Messrs. Thomas P. Birchall, Montreal, president, director The Canada Syndicate, Limited, director London Mutual Fire Insurance Company; W. J. Sheppard, Waubesa, Ont., vice-president, president Georgian Bay Lumber Company, president Spanish River Pulp and Paper Company, Limited, director Traders Bank of Canada; J. B. Tudhope, Orillia, Ont., president Tudhope Carriage Company, Limited, president Carriage Factories Limited, director Spanish River Pulp and Paper Company, Limited; Charles E. Read, Ottawa, Ont., president Read Lumber Company, director Riordon Pulp and Paper Company, Limited; A. H. C. Carson, Montreal, president London Mutual Fire Insurance Company, president Matthews, Wrightson and Company (Canada), Limited; W. T. Whitehead, Montreal, vice-president Wabasso Cotton Company, Limited, director Oxford Knitting Company, Limited, director Canada Syndicate, Limited; and E. M. Selby, M.I.E.E., Montreal, director Matthews, Wrightson and Company (Canada), Limited, director The Canadian-British Engineering Company, Limited.

The Gresham Life Assurance Society, Limited and the Merchants' Life and Casualty Company, have been registered in Saskatchewan.

INSURANCE NOTES AND HAPPENINGS

Fire Claims Numerous—Proposed Tariff Association for British Life Offices—Insurance of New York Police—Canadian Convention

In discussing the outlook for the insurance business this year the Times comments on the growth in the United States and Canada, during the first quarter of the current year, of the epidemic of fires which started at the end of 1911. The result has been to produce claims far in excess of those in the corresponding period either of 1910 or 1911, and it is expected that unless the losses for the remainder of the year are lighter than in corresponding months of 1911, fire business in North America this year will involve a debit balance to the offices. On the other hand, it is reported that the losses at home and on the Continent have not been abnormal and that as there is no great likelihood of severe drought this year the forthcoming summer months should prove less expensive to the insurance companies than those of 1911. The Times Supplement reports that "Mr. Marlborough Pryor, presiding at the meeting of the Sun Insurance Office, made some very pertinent remarks. Referring especially to the grant this year of a Royal Charter to the Insurance Institute, he said that the moral standard of insurance in this country was already very high, but there were some defections from it, and they looked to the Insurance Institute to elevate the tone of the profession. Everyone will sympathise with the aims of the Institute, and will hope to see their success accompanied by an improvement in public opinion, which in the past has occasionally to its cost been apt to be attracted rather too much by cheapness and to pay too little attention to the more important virtues of undoubted security and prompt and generous settlements."

Suggested Tariff Association.

Referring to the suggested formation of a tariff association among British Life assurance offices, the Manchester Guardian is of the opinion that the difficulties met with a few years ago when the matter was seriously considered by the life offices, have not since been removed, and that, on the whole, the practically unrestricted competition prevailing at present is a benefit to the insuring public. "Probably," it says, "the most serious effect of competition which the offices have to contend with at present is the tendency of agents' commissions to increase. This in some cases has had the effect of materially increasing the proportion of premiums absorbed in expenses and has rendered it impossible for certain offices to maintain bonuses at previous rates." But is it the payment of increased commissions which has caused some offices to reduce their bonuses and others to pass them altogether? We incline to the belief that the heavy depreciation in the value of certain gilt-edged securities has been a far more potent factor, and the amount of attention which the offices have devoted of late to the science of geographical distribution of capital would appear to confirm our belief.

Hudson Bay Route and Insurance Companies.

"The great difficulty about the Hudson's Bay route is the insurance," says Sir Montagu Allan, K.B., C.V.O., President of the Merchants' Bank. "Insurance companies," he continued, "are afraid to take the risk, and if they did their rates would be too high to make it worth while. Whether the Hudson Straits will be navigable or not it is hard to say yet."

Arrangements have been completed by an insurance agent at New York whereby the 10,000 members of the police force of New York will be insured for between \$12,000,000 and \$15,000,000. The annual premium on these policies, approximating \$150,000, will be paid by the policemen. They are regarded as uncommonly good risks, since most of them are young, and even the elder men had to undergo a rigid physical examination when they entered the force.

The average policy under the contract will be \$1,000, but any policeman may make arrangements with the society by which the insurance was written whereby he can obtain insurance for a sum equal to one or two years' salary. The limit under the agreement is \$3,000. No further medical examination is to be undergone by the policemen.

So that the insurance policy of the whole group may not lapse with the loss of a few individuals annually, the bulk insurance has been arranged with a number of squads separately.

All arrangements are nearing completion for the annual convention of Life Underwriters' Association of Canada, which is to be held at Montreal from August 21st to 24th. From all reports this seems likely to be a record gathering.

Mr. John Mashev has been elected a director of the Canada Permanent Mortgage Corporation. He will fill the vacancy on the board created by the death of the late Mr. Samuel Nordheimer.

FORTIER & KILPATRICK, LIMITED

The prospectus has been issued of Fortier and Kilpatrick, Limited, incorporated under the Dominion Companies Act and licensed to do business in Ontario. The company's authorized capital is \$250,000. This company has been formed for the purpose of taking over, for the province of Ontario—excepting Port Arthur and the territory lying north of the Canadian Pacific Railway between Port Arthur and Mattawa—the patent rights and also the sole right to manufacture sewer pipe with the Thomas glazed cement sewer pipe machine, also, the sole rights to manufacture and deal in Trojan partitions and ceilings, stonewood plastic flooring, sarco asphalt and waterproofing. The company have several side lines, such as washable water paint, asphalt, etc., and the right to engage in any other manufacturing and mercantile business which may be conveniently carried on therewith.

Patent rights for the Thomas glazed cement sewer pipe machine and the right to manufacture Trojan partitions and ceilings and stonewood and Trojan flooring and Sarco asphalt and waterproofing and Trojan washable water paint are being purchased and acquired by Thomas Mills for \$90,000, payable as follows:—\$20,000 in the capital stock of Fortier and Kilpatrick, Limited, consisting of 200 fully paid and non-assessable shares and \$70,000 in cash.

Fortier and Kilpatrick, Limited, in addition to the purchase of the Thomas glazed cement sewer pipe machine, and all rights connected therewith for the territory named, have also purchased the rights, patents, formulas, secret processes, etc., of the Interior Construction Company of Winnipeg for the following utilities: "Trojan" partitions, ceilings, etc., "Trojan" plastic sanitary floors, and Thomas glazed cement sewerpipe.

An offering of \$150,000 stock of the company is being made at par. The proceeds from the sale of this stock will be devoted to acquiring the above named rights and patents and for putting money into the company's treasury to manufacture the same. The following are the directors of the company:—Messrs. John H. Hudson, manufacturer, 93 Bernard Avenue, Toronto; George R. C. Merriam, president Fraders Limited, 31 Adelaide Street West, Toronto; W. E. Whitehead, manufacturers' agent, 355 Palmerston Boulevard, Toronto; James Aitchison, barrister, Canada Life Building, Toronto; Thomas Mills, banker, 79 Clarence Street, Kingston.

REORGANIZATION OF ROBB ENGINEERING COMPANY.

Steps are being taken to incorporate and organize a new company to take over the properties of the Robb Engineering Company, Limited, one of the oldest companies in the manufacture of engines in Canada, with headquarters at Amherst, N.S. The company has defaulted in the payment of its assessments and taxes and also in the payment of its bond interest, due on July 1st last. The outstanding liabilities amount to approximately \$900,000.

At the request of a large number of the bondholders, Corporation Agencies, Limited, has made an examination of the properties and assets of the company and has undertaken to organize a new company. The proposal now being submitted to the bondholders is that the new company shall issue 7 per cent. non-cumulative preference shares to an amount which shall not exceed the net amount of the assets of the company, as may be found by an appraisal of its assets by the Canadian Appraisal Company, Limited, and an accounting by Messrs. Price, Waterhouse and Company, chartered accountants; that is to say, every \$100 par value of preferred shares of the proposed new company shall represent net assets of the value of \$100. Corporation Agencies, Limited, offers to all the holders of the bonds of the Robb Engineering Company, Limited, to exchange such 7 per cent. preference shares of the proposed new company for bonds of the Robb Engineering Company, Limited, par for par; such bondholders also to receive, in cash, at par, the amount of the interest coupons which were payable on July 1st instant, on the bonds held by them respectively. The offer is conditional upon bondholders depositing their bonds to the order of Corporation Agencies, Limited, at any office or agency of the Bank of Montreal by July 30. In the alternative, Corporation Agencies, Limited, offers those holders of the bonds of the Robb Engineering Company, Limited, who do not wish to accept preference shares of the new company, to purchase and pay for their bonds in cash, at the price of 60 per cent of their par value, plus the par value of the interest coupons which were payable on July 1st instant.

It is stated that a number of independent wire mills are to be merged, and that the Imperial Steel and Wire Company, of Collingwood, Ont., will be the holding company. This company recently paid a stock dividend of 20 per cent. and enlarged its preferred stock capital by \$300,000. It has no bond issue.

MUNICIPAL FINANCING

Montreal's Temporary Loan—Moose Jaw Issues
Treasury Notes

The Montreal city council received a communication from the Bank of Montreal on Monday notifying them that the quotation for the civic temporary loan of £750,000 for six months at 4½ per cent. could not be put through at that rate, as the discount since July 13th, when the offer was made, had risen from 4¼ to 4½ per cent. To this has to be added bank commission, bringing the total rate to about 5 per cent. The civic board of control will consider the matter.

At Sherbrooke a by-law to authorize the borrowing of money for street improvements was carried. Alderman L. H. Olivier, chairman of the finance committee, has made arrangements with the Canadian Bank of Commerce, through Mr. E. W. Farwell, local manager, to secure the money on bonds immediately. The bank will issue treasury bills to the amount of \$615,000, for a period of three or six months, and will take the city's bonds as security. The city will pay interest at 4½ per cent., plus the usual commission.

Moose Jaw Issues Treasury Notes.

The Moose Jaw commissioners recommended in a letter that the city council authorize the issue of treasury notes amounting to \$1,296,399.89 through the Bank of Montreal, through whose office the city's sterling debentures have been domiciled for the past two years. The letter explained that the state of the debenture market did not warrant the sale of the debentures at present. The issue of the notes was confirmed by a by-law.

In issuing treasury notes the municipality is allowed by law to issue them for the 80 per cent. of the face value of the debentures authorized by the vote of the people. This issue of notes is made as 80 per cent. of the total value of thirteen by-laws the total of which is \$1,610,499.86. The by-laws included in this are as follows:—General Hospital, \$75,000; fire alarm extension, \$17,000; Caron system, \$550,000; Or. light stand's, \$7,499; 11th Avenue Subway, \$95,000; Sewer programme, \$170,000; electric light, \$225,000; paving, \$160,000; roads improvement, \$25,000; high pressure system, \$60,000; parks improvement, \$40,000; Saskatchewan Mill Company, \$146,000; sidewalk programme, \$50,000; total, \$1,610,499.

Arrangements have been made by the city of Saskatoon with Messrs. Stone and Webster Engineering Company, New York, whereby the city will pay for the construction of a street railway by the issue of \$500,000 debentures direct to the contractors. The municipal authorities, therefore, will not place the bonds on the open market in the usual way.

Finances of South Vancouver.

A statement of the finances of South Vancouver has been prepared by Mr. J. B. Sprengford, clerk to the municipality, which gives in a concise way the borrowing powers and the estimates for the current year's expenditure. The sum necessary to finance the municipality this year is estimated at \$486,585.16, while the interest and sinking fund amount to \$153,341.03.

In addition to that amount the interest on school loans is \$39,787.13, and the school board's ordinary expenditure is estimated at \$80,957. The estimated rebate on taxes is \$30,000, and the arrears of taxes are expected to total \$50,000 this year. Thus the amount of \$486,585.16 will have to provide for municipal purposes for the year, pay interest and provide sinking funds on bonded debts. It will also allow for shrinkage in taxation by arrears and rebates, and contributions to charity estimated this year at \$4,000.

The existing debt is \$4,660,214.69, and the total assessment \$38,995,285.44. The municipality can borrow 20 per cent. of its assessment less the bonded indebtedness; thus the net borrowing power of the municipality is \$3,138,842.39.

The money required for the work of the year will be raised by taxation on a levy as follows: 12½ mills on improved land and 22½ mills on wild land.

Municipal Bond Bidding.

Two bids were received from Toronto bond houses for the Moose Jaw, Sask., \$150,000 and \$65,000 5 per cent. 30-year debentures, which were awarded Messrs. Wood, Gundy and Company.

Three Toronto bond firms bid for the \$97,000 5 per cent. waterworks, sewerage, street and school debentures of Kelowna, B.C. As previously noted, the award was made to Messrs. Amilius Jarvis and Company.

By the adoption of the minutes of the previous session the Windsor city council has virtually given formal ratification to the sale of \$195,000 worth of 4½ per cent. debentures to Wood, Gundy and Company, of Toronto, at a price of \$188,000.

Several members of the council thought that the price offered was considerably below what should have been re-

ceived, but Chairman Howell, of the Finance Committee, explained that the committee had ascertained that the present condition of the money market was such that the price of 98.3 was the best obtainable, and it had been deemed advisable to accept the offer of the Toronto firm.

Messrs. C. Meredith and Company, Limited, have purchased \$500,000 6 per cent. bonds of the Rolland Paper Company, Limited, and will make a private offering of the bonds at par and accrued interest. These bonds are the only outstanding bonds of the company and are secured by \$3,300,000 of fixed assets, and constitute a closed mortgage. The earnings are reported as being equal to 2½ times the bond interest requirements.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Hull, Que.—July 15.—Mr. U. Viau's residence. Loss and origin unknown.

Dereham, Ont.—July 11.—Mr. J. Searon's residence. Loss \$600. Origin unknown.

Ville Emard, Que.—July 15.—Brick house. Loss unknown. Origin, supposed incendiary.

St. Thomas, Ont.—July 16.—Mr. M. McVicar's barn. Loss \$3,500. Origin, struck by lightning.

Warton, Ont.—July 15.—Mr. G. Gault's barn, buggy and machinery. Loss \$2,000. Origin unknown.

Belleville, Ont.—July 17.—"Ontario" newspaper office. Loss, plant \$5,000, building \$1,500. Origin unknown.

St. Pamphile, Que.—July 15.—Mr. E. Choquard's sawmill and 100,000 feet lumber. Loss and origin unknown.

Montreal, Que.—July 10.—Montreal Cotton and Wool Waste Company's warehouse. Loss and origin unknown.

Eardley, Ont.—July 10.—Mr. J. Templeton's barns and contents destroyed. Loss \$600. Origin, struck by lightning.

Toronto, Ont.—July 15.—Duck's Hotel. Loss \$12,000. Insurance \$1,500. Origin, supposed to be rats chewing matches.

St. Gabriel de Brandon, Que.—July 16.—Quebec & Jacques Cartier Electric Company's plant. Loss \$50,000. Origin lightning.

Winnipeg, Man.—July 15.—Jubilee block. Loss, O.K. restaurant, \$5,000; Quong Suen Yen Company, \$3,000; others \$550. Origin unknown.

St. John's, Que.—July 15.—Provincial government exhibition buildings, including the grandstand, bandstand, dressing room, stage, horse stables, sheep and pig pens. Loss and origin unknown.

Pictou, N.S.—The plant of Atlantic Milling Company destroyed. Loss \$28,000, with \$13,000 insurance divided as follows:—Western, \$3,000; Norwich Union, \$3,000; Royal, \$2,000; Rimouski, \$2,000; Nova Scotia, \$1,000; Sweden Mutual, \$2,000. Origin unknown.

Port Tupper, N.S.—July 11.—Intercolonial freight shed's 2 piers, 20 freight cars and contents. Mr. M. A. McLeod's residence and contents, loss \$4,000, insurance nil. Mr. M. Campbell's dwelling and contents, loss \$2,000, insurance \$1,000. Mr. A. Murray's dwelling and contents, loss \$2,500, insurance \$1,000. Mr. J. Murray's dwelling and contents, loss \$2,500, insurance \$1,000. Mr. John Martin's dwelling and contents, loss \$2,200, insurance \$1,000. Mr. James Hennesey's dwelling and contents, loss \$2,000, insurance nil. Mr. Adolphus Embree's hotel and contents, loss \$6,500, insurance \$3,500. Messrs. Frost & Wood's warehouse, with machinery, on which the insurance is not known, loss \$50,000. Mr. Farquhar McPherson's barn, loss \$300, insurance nil. Mr. Edward Dorley's hotel and contents, loss \$700, insurance nil. Mr. H. K. McDonald's barn, loss \$300, insurance nil. Total loss over \$200,000. Origin unknown.

Messrs. Farson, Son & Company are offering in Chicago this week \$750,000 six per cent. collateral trust timber notes, backed by the obligations of the British Canadian Lumber Corporation, Limited, of Montreal. These notes are serials short terms, maturing January 1st, 1913, \$400,000 March 2nd, 1913, \$200,000, and June 2nd, 1913, \$150,000. The security is 4,300,000,000 feet of timber located on Massett Inlet, Graham Island, British Columbia. The bulk of the timber is spruce, hemlock, cedar and cypress. The rate of the loan is 17½ cents per thousand feet.

The Canadian Bank of Commerce has opened a branch at Rock Creek, B.C., under the supervision of the manager at Greenwood, B.C.

LIFE INSURANCE & FIELDS FOR INVESTMENT

Compulsory Investment Legislation—Trial Test Under a Texas Insurance Law

Most people who urge compulsory investment laws seem to assume that conditions which make it possible to write a large volume of life insurance likewise make it possible to loan a corresponding amount of money to the advantage of the lender, said Mr. Robert Lynn Cox in an address at Dallas, Texas, recently. Nothing could be further from the truth. Life insurance must be written among people who have incomes large enough to enable them to pay the premiums required. Certain kinds of insurance afford means of investing surplus funds and are used for this purpose by policyholders. It may, therefore, be said that a large volume of life insurance can be written only in a prosperous community. We can even go further and say that the more prosperous the community the more life insurance can be written in it.

Reverse Is True Regarding Loans.

The exact reverse of this is true with reference to the making of loans in a community after it has passed the point where its lands are settled and its resources fairly well developed. Then the greater its prosperity the fewer the loans that can be made in it. So we have in the United States to-day certain places in which loans can be made with difficulty because the community is not what may be termed a borrowing community, yet in which the volume of outstanding life insurance is enormous. Likewise we have communities where comparatively little life insurance has yet been written, but whose resources and prospects are such as to make it a desirable investment field for life insurance funds.

By way of illustration let us compare the states of Massachusetts and Texas. The reserves held by foreign life insurance companies doing business in Massachusetts amount to about \$147,500,000. The reserves held by foreign companies now doing business in Texas amount to about \$8,200,000.

In Massachusetts farms which can be tilled are under cultivation, water powers are in use, roads are macadamized, railroads are built, trolley lines are in operation; in short, there is little, if any, need of outside capital, and its own state institutions are looking for outside investments in order to invest the capital in their hands at satisfactory interest rates.

Not One-Tenth of Resources Developed.

As to conditions in Texas, I do not need to describe them, since what I should say would be merely to repeat what I have been told by citizens of your own state, showing that not one-tenth of your resources have been developed and that not a hundredth part of the capital you need has yet been supplied. Can there be any doubt but that the interests of policyholders require that companies should collect life insurance premiums in Massachusetts and invest them largely in Texas or in states like it. Yet if we come to compulsory investment laws intended to give citizens who are not policyholders the advantage of borrowing money at the lowest possible rate, what could Texas say in opposition if Massachusetts should follow its lead and compel Massachusetts reserves to be invested in Massachusetts in order that interest rates in that state might be still further reduced. We should be there pleading for the interests of policyholders which would likewise be in the interests of states needing capital worse than Massachusetts needs it, and the chief obstacle in the way of our success would be the example which had been set by Texas.

If reserves are to be kept at home by force of statutes rather than by opportunity for satisfactory investment of them, it will be policyholders in such states as Massachusetts and citizens of such states as Texas who will be the losers.

Foreign Companies Doing Business.

Before leaving the Massachusetts comparison it might be well to call attention to the fact that, should we add to the reserves held by foreign companies now doing business in Texas (\$8,200,000), the reserves held by foreign companies not now doing business in Texas (about \$40,000,000), and the reserves of Texas companies (perhaps \$5,000,000), the total Texas reserves (\$53,200,000) would be only a little over one-third of the total reserves of foreign companies doing business in the state of Massachusetts. Surely these figures show that even one hundred per cent. of the Texas reserves are hopelessly inadequate to meet the present needs of Texas or for a generation to come, so it would seem to me that the problem is really not so much that of keeping reserves at home, but of finding a way in which to attract the reserves of states whose capital is in excess of local requirements.

Security Lies Primarily in Property.

The flow of capital has often been likened to the flow of water. There is a constant tendency to seek a level. To attract it to a given spot you must have regard for the natural

laws by which it is controlled. Ignorance and prejudice may afford slight restraints for a time and artificial obstructions may defer its course temporarily, but it cannot long be impounded against the operation of the laws of supply and demand.

A locality whose future wealth and prosperity is reasonably assured, can get the capital if it is willing to pay good interest rates and has adequate security to offer. Investments such as life insurance companies are compelled to make involve loans in which the element of personal integrity of the borrower is largely eliminated. Their security lies primarily in the property behind them. Such loans are very different from those made by banks and by individuals to personal acquaintances. There the reputation of the borrower is a most important element and perhaps the only security required. In life insurance investments the question is as to the value of the property offered as security and to the lender's ability to realize upon it in case of necessity.

INDUSTRIAL INSURANCE

In the year 1854 the Prudential Insurance Company, of England, issued the first industrial insurance policy. In January, 1875, there were two million policies in force, stated Mr. Joseph Vivian, in a paper read at a recent meeting of the London, Ontario, Life Underwriters' Association, and to give an idea how the movement was taking with the public the records show that there were in 1874 16,000 policies sold on a weekly average.

In 1875 the Prudential Insurance Company, of America, started to sell industrial insurance, and five years later, in 1880, there were 44,000 policies on the company's books.

In January, 1891, there were with nine companies 3,875,102 policies, and ten years later, January 1, 1901, there were 11,219,296. The remarkable growth of industrial insurance since then is apparent to all, and it now occupies one of the foremost positions in the financial world to-day.

With the growth of industrial insurance and the gradual education of the public to its merits the health of the people has been showing improvement. Pauper funerals, so common in the close of the 18th century, have through the aid of the industrial policy almost ceased to be, and if for that reason alone the taxpayers have cause to be thankful for the advent of the industrial policy. In bringing this paper before you to-day, those who are engaged in ordinary insurance alone may perhaps be interested, as few ordinary agents know much of the industrial policy, or how much they owe to the industrial agent, the desire created by the agent who is calling at the house every week, and each call he makes, there is some seed sown for more insurance, and in the course of time the husband, and the sons who are growing up to be young men are interested in ordinary insurance, and while the ordinary agent does not come into contact with these people in their homes, at the shop and store or office they frequently reap the harvest that was planted by the industrial agent. We who are solicitors know from experience how beneficent our calling is; the large number of people who are daily receiving the insurance from the industrial companies come before our notice, and one may truly say, almost hourly. In fact, one large company has it on record that they pay a claim every sixty-three seconds of an 8-hour day, or \$140 per minute. Think of the vast amount of relief afforded to families who by the small deposit of five or ten cents per week has been enabled to meet the expense of the undertaker and the doctor. It falls to the lot of every man to see the results of some of his own work, and there is nothing that can make a man's heart rejoice so much as to see the good that has been done to his fellowman by his own instrumentality. Small amounts which seem nothing at the time can be directed to good use, and to great saving by applying the same to the purchase of industrial insurance. Again it is not essential that a person must die to gain this saving as the 20-year endowment is one of the best means of making a child thrifty and careful, and oft-times forms a habit that lasts a lifetime. We are engaged in a high calling, and we owe it to ourselves to give the best that is in us, to be honest with ourselves, with our clients, with our competitors, and to be loyal to our respective companies.

At a meeting of the Moose Jaw city council, it was unanimously decided that plans be advertised for under the regulations of the Royal Architectural Association for a city hall to cost \$250,000. It was decided to offer \$3,000 for the most suitable plans, the first prize being \$1,500.

The freight traffic through Sault canals for a single month passed the 10,000,000 ton mark last month for the first time, the total for the month being 10,747,159 tons. The next largest month was July, 1910, when the traffic totalled 8,975,173 tons. Last month's total equalled that for the entire season of 1893.

PREVENTION OF CONFLAGRATIONS IN NEW TOWNS

Provincial Government has Opportunity in New
Ontario—Cleaning up Days

(Specially Contributed by Henry Lye, Vancouver).

Nearly every week the total destruction by fire of some wood-built village or town in Canada occurs; yet the building of such towns of the same old inflammable materials goes on without restriction or regulation.

The present control of the Ontario Government over the whole situation in New Ontario should be far seeing in the matter of fire protection of the proposed towns and villages, even if it does not extend to the arrangement of farmsteads.

Wood must necessarily be used for most of the buildings, but the government should retain and exercise control over the distances between buildings which should depend upon the sizes and occupations, and over the spaces between and behind them, which should be kept clean, so that, when fire does occur, it should not, as a matter of course, entail the destruction of a whole block of buildings, or of a whole town, or even of a whole farmstead, as is now too often the case.

Cobalt and Chelmsford, Chicoutimi, St. Scholastique and countless other places in Canada, have furnished object-lessons which should not be disregarded.

Regulations Must be Enforced.

The country is big enough to afford breathing space and safety to its people; one person's carelessness should not assuredly result in the loss of life or property to others as is now the fact in most of the towns and villages and in some of the cities of Canada, but it is only by wise forethought that this state of affairs can be prevented from extending to New Ontario.

Personal greed causes the subdivision of townsites into lots so small, with streets and lanes so narrow that when a fire breaks out the whole town is endangered. In nearly every place the spaces between and behind the business buildings are filled with old boxes, oil barrels, crates, straw, shavings, weeds, and other such quick burning rubbish; all of which, being nobody's business, is everybody's peril; local indifference or local influence permits the continuance of the dangers, so that if, in New Ontario, common sense measures are to be taken for the safety of life and property, they must be the outcome of government vigilance and governmental regulations which must be enforced by governmental officials.

Nelson's Example a Good One.

Insurance companies' inspectors see and protest, but dare not insist on the clearing away of inflammable materials or rotten old sheds. Insurance companies may reject risks or may impose rates of premiums based upon maps and plans which do not show the dangerous materials which exist between and behind the buildings. Insurance agents being desirous of commissions sometimes seem to ignore the facts or are ignorant of them. Individual proprietors are either careless or unobservant or are not personally responsible, and so these dangers continue and increase.

It was interesting to note that Nelson, B.C., had recently a general cleaning up day when everybody cleaned up vacant lots, alleys, backyards and basements, so as to minimize the danger from fires; such days should be observed at least quarterly in every place, but in addition to this there should be sufficient space between wooden and buildings of inflammable material to afford a measure of protection to those surrounding it.

Premier McBride says that he has been assured that the Canadian Pacific's double-tracking from Winnipeg to the Pacific Coast, will be carried out speedily, and will cost between \$25,000,000 and \$30,000,000 in British Columbia alone. The premier also said that the Great Northern had decided to build its road over Hope Mountain from Coalmount to Vancouver, and that the Canadian Northern would be running accommodation trains from Kamloops into Vancouver within a few months. The railroad contracts in the province, already let or to be let, he added, amounted to \$100,000,000 worth of construction.

At the annual meeting of the Victoria Board of Trade, Sir Richard McBride delivered an address which aroused considerable enthusiasm on the present conditions throughout the province and the outlook for the future. He reviewed at some length the progress being made in the furtherance of the railway programme in hand and projected, dealt with the financial position of the province, and drew a picture of an even greater era of progress and prosperity. He estimated that the railway work now in hand or shortly to be inaugurated would in itself involve an expenditure of \$100,000,000. Mr. J. J. Shallcross is the new president of the board of trade, and Lieutenant-Colonel E. G. Prior, the vice-president.

Life Underwriters Convention

MONTREAL
August 21-24, 1912

As usual, The Monetary Times is planning to feature the convention, and will publish the papers read before convention, discussions, and also a detailed report of the convention happenings; a clear, concise and intelligent digest of the doings of the convention.

In addition, the issue will present an unusually large number of excellent articles dealing with the different phases of Life Insurance.

The issue will be of permanent value to all life insurance men.

Orders for extra copies of this
number are being received now

CANADIAN NORTHERN RAILWAY AND VANCOUVER

Westward Trend of Grain Will Not Likely be Great Till Panama Canal Opens—Elevator Accommodation

(Staff correspondence.)

Vancouver, July 13th.

Sir Donald Mann, vice-president of the Canadian Northern, is on the coast this week. He speaks optimistically of the prospects of the Canadian Northern Railway, and outlines the large expenditures that will be made both at Port Mann and Vancouver. While Port Mann will be the place where the car shops, industries, etc., will be located, the railway will come to Vancouver over its own line and will have ocean steamers. The exact route of entry into this city it not yet stated, but mention has been made of the tunnel proposition under the Granville Street hill from Eburne. Sir Donald says that his company will spend five million dollars in Vancouver on terminals, etc. The number of applications received for industrial sites at Port Mann gives assurance that the new town on the Fraser River will be an important manufacturing centre. Sir Donald does not look for a large grain traffic until after the Panama Canal opens. He does not appear quite as sanguine as the Western grain men themselves, who think that the overflow from the prairie must come via the Pacific Coast next fall, if congestion is to be avoided. The production of grain is much greater, in fact double, than what it was two or three years ago, and outlet will have to be found.

No Adequate Means of Handling Crop.

With Sir Donald Mann of the opinion that not much will be moving this way before the Panama Canal and, incidentally, his line of railway, are completed, and the Canadian Pacific officials loath to erect elevators before 1914, it looks as if there would be little use of large quantities of grain moving this way. There would be no means to handle it adequately. The suggestion has been made that Vancouver should erect elevators, but that would have to be private enterprise, or the federal government, which has been making enquiry, might get busy in the meantime and build elevators.

Approached City for Concessions.

Representatives of the Canadian Northern have approached the city for a concession at the head of False Creek. The city still retains 140 acres there, though it donated the larger portion to the Great Northern Railway. Now, however, it is not disposed to be so generous. The city proposes a lease, but while this has not been declined by the railway company, the hint is given that they would like something better. One of the aldermen suggested selling the ground to the company at the rate of \$30,000 an acre, which would bring the purchase price to over four million dollars. It seems rather hard that an alien railway company, the sole object of which for fifteen years past has been to divert traffic from British Columbia to cities in Washington State, should receive the first and best portions of False Creek flats as a gift pure and simple, while another line, Canadian throughout, with its bonds guaranteed by the province and government at Ottawa, should have to pay the full market price for anything it wants. The Great Northern Railway was supposed, as was set forth in the by-law, to make large improvements, but it is extremely slow in doing so. The nearest to anything being done is when one of the officials comes to Vancouver and rehearses the old story of how the company is going to expend millions on False Creek development.

TORONTO FINDS DIFFICULTY IN RAISING FUNDS.

Notwithstanding the fact that Calgary is a popular borrower and the price of the new £500,000 sterling loan was not unreasonable, it was not attractive to the public, 85 per cent. being left on the underwriters' hands.

The city of Toronto, after repeated attempts, has sold in London £1,000,000 sterling 4 per cent. bonds at about 91¼ net to the city. The market declines to take any loan at any price at this juncture, the purchase being made by an outside firm of brokers.

Major J. E. Hutcheson, superintendent of the Ottawa Electric Railway since its construction, nearly 21 years ago, has accepted the general managership of the Montreal Tramways Company.

Mr. A. Locas has received the appointment of manager at the Canadian Bank of Commerce, Black Lake, Quebec, in succession to Mr. H. E. Green, who has been appointed manager at Joliette, Quebec.

SPECIAL OFFER

In order to introduce The Monetary Times, we offer the fourteen issues containing the special articles on Canada and the Panama Canal, commencing to-day, for Twenty-five (25) cents post-paid in stamps or coin to

THE MONETARY TIMES,
62 CHURCH ST., TORONTO. ONT.

PROMINENT TORONTO FINANCIER KILLED.

Mr. R. A. Smith, a partner in the stock-broking firm of Osler and Hammond, of which Sir Edmund Osler is the head, was killed on Wednesday night in an auto accident at Richmond Hill, 15 miles north of Toronto, while returning from the North York Conservative picnic at Jackson's Point.

Mr. Lorne Campbell, a leading stock-broker, was seriously and perhaps fatally injured, and Mr. V. H. Ross had a leg fractured. Mr. C. A. B. Brown, of Bradstreet's, and McKenna, the chauffeur of the car, were thrown out and escaped injury.

The late Mr. Robert A. Smith was a Scotchman, having been born in the Parish of Rayne, Aberdeenshire, Scotland, where his father, John Smith, resided for many years. He served seven years' apprenticeship with the Great North of Scotland Railway Company, and at the age of 22 came to Canada. For a year he was in the employment of the old Northern Railway Company, and then entered the office of the Canada North-west Land Company in Toronto. In 1896 he decided to enter the stock broking office of Osler and Hammond, and that same year he was elected a member of the Toronto Stock Exchange. In 1902-3 he was president of the Exchange.

Some years ago Mr. Smith was chosen for the board of the Mackay-Bennett Cable Company, an enterprise which serves as holding company not only for subsidiary cable companies, but also for a network of telegraph and telephone companies throughout America. Some of the other companies on which he served as director were the Toronto Ferry Company, of which he was also secretary-treasurer, Consolidated Caribou Hydraulic Mining Company, Ontario and Qu'Appelle Land Company, and the Victoria Rolling Stock Company of Ontario, Limited. He was also secretary of the Qu'Appelle, Long Lake and Saskatchewan Railroad and Steamboat Company, and a director of the Royal Alexandra Theatre.

Speaking of the loss of his friend and business associate, Sir Edmund Osler said: "He was always considerate and generous. There was not a day in which he did not think of others—not a day that did not see some kind and helpful act done by him. Large in stature, his impulses found expression in an equally ample mould. In a business way he reflected, of course, competency and rectitude to the utmost degree. But at no time did he seek honors beyond his own immediate sphere of work. Elected as a director of a few companies, he might have had a seat upon the boards of triple the number. He did not, however, show any inclination to connect himself with outside concerns. Had he done so his judgment and ability would have enabled him to render the most valuable service."

DECENTURES AWARDED.

Midland, Ont.—\$33,000 5 per cent., to Ontario Securities Corporation.

Moncton, N.B.—\$160,000 4½ per cent. 40 years, to Montreal City and District Savings Bank.

Biggar, Sask.—\$16,000 5½ per cent. 40 years, to Messrs. C. H. Burgess and Company, Toronto.

Ryley Village, Alta.—\$2,000 6 per cent. 10 years, to Messrs. Nay and James, Regina.

Hanley, Sask.—\$10,000 4½ per cent. 20 instalments, to Ontario Securities Company.

Rosemount R.M., Sask.—\$8,000 5½ per cent. 20 years, to Messrs. Nay and James, Regina.

Moose Jaw, Sask.—\$215,000 5 per cent. 30 years, to Messrs. Wood, Gundy and Company, Toronto.

Pleasant Point S.D., Man.—\$2,000 6 per cent. 10 instalments, to Messrs. Wood, Gundy and Company, Toronto.

Brampton, Ont.—\$30,000 4½ per cent. 30 annual instalments, to Messrs. C. H. Burgess and Company, Toronto.

Mount Hope R.M.—\$6,000 6 per cent. 20 annual instalments, to Messrs. C. H. Burgess and Company, Toronto.

Mount Hope R.M., Sask.—\$6,000 6 per cent. 20 annual instalments, to Messrs. C. H. Burgess and Company, Toronto.

\$ 7,500 Water Works Extension Debentures, 20-year 5 per cent., interest payable half yearly, dated 1st July, 1912.

\$ 7,500 Sewer Extension Debentures, 20-year 5 per cent., interest payable half yearly, dated 1st July, 1912.

\$8,595.20 Local Improvement Debentures, 5 per cent 10 instalments, principal and interest, dated 1st December, 1912.

W. E. WASSON,
City Clerk.

Nelson, B.C., July 6th, 1912.

Desirable Office to Rent

IN THE NEW

Imperial Life Building

comprising 2,980 square feet of office space, lighted on three sides, and clear of columns or other obstructions, with two lavatories, and fireproof vault, 12x15 feet, fitted with adjustable steel shelving.

Also one smaller suite of 1,490 square feet.

**Inner Partitions Installed
Free of Expense to Lessees.**

Building is a modern, eight-storey, fireproof structure, situated in the centre of the financial district—one block from corner of King and Yonge Streets.

Moderate Rental : Efficient Service

For further information and floor plans apply to
C. ELVINS - - - Building Manager

The Imperial Life Assurance Co.

24 King Street East - TORONTO

DEBENTURES FOR SALE.

Debentures for sale, town of Battleford, Saskatchewan. Sealed tenders addressed to the undersigned and marked "Tenders for Debentures," will be received up till 6 p.m., 3rd of August, (Saturday), 1912, for the purchase of \$15,000 of twenty-five year debentures bearing 5 per cent. interest per annum. For further particulars, apply to

J. P. MARSHALL,
Secretary-Treasurer.

TENDERS FOR DEBENTURES

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m., August 10th, 1912, for the purchase of \$30,000 debentures, repayable in forty equal annual instalments, with interest at 5 per cent.

This issue is for the purpose of purchasing site and erecting thereon a four room school.

The highest or any tender not necessarily accepted.

EDW. J. BAKER,
Secretary-Treasurer.

The St. Agnes Roman Catholic
Separate School District No. 22,
July 7th, 1912.

TENDERS FOR PULPWOOD LIMIT.

Tenders will be received by the undersigned up to and including the 15th day of August next, for the right to cut pulpwood on a certain area situated on the Abitibi Lakes and River, tributary to the Grand Trunk Pacific Railway, and the Temiskaming and Northern Ontario Railway, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario,—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, Ontario, May 15th, 1912.

PERSONAL.

Mr. D. F. Maguire, a well-known broker of Toronto, died in the Toronto General Hospital.

Hon. I. B. Lucas is now on his way to England to enquire on behalf of the Ontario Government into public ownership of telephones in Great Britain.

Mr. R. L. Barry, formerly manager of the Tri-State Telephone Company of Minneapolis, has been appointed to take charge of the telephone system of the Manitoba government.

Mr. James Hunter, of Messrs. Hunter and Boorman, financial brokers, of Vancouver, formerly manager of the Penticton branch of the Canadian Bank of Commerce, is visiting Toronto in connection with Toronto investments in British Columbia, particularly Vancouver.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

YOUNG GENTLEMAN, well educated, desires position with good company, sound business experience and good correspondent, understands trust and loan company work, also stock, debentures, etc. Box 65, The Monetary Times, Church Street, Toronto.

We require representatives in Eastern Canada to handle Regina real estate for us. We are also open to represent a good board fire insurance company. Apply Western Canada Finance Company, Dominion Trust Building, Regina, Sask.

WANTED.—Stock salesman to handle company with bright prospects. Nature speculative but better and safer than many so-called investments. No exaggeration necessary. Apply Box 85, Barrie, Ont.

WANTED.—A first-class salesman, first-class proposition, salary or commission. Apply Box 53, Monetary Times Office, Toronto.

WANTED.—By an established insurance office in Vancouver, General Agency for a first-class Marine and Automobile Insurance Company. Apply Box 67, Monetary Times, Toronto.

WANTED.—A strong Board Company requires the services of a thoroughly competent and experienced Fire Insurance Inspector. Liberal salary and excellent opportunities for advancement will be given to suitable man. Applications will be received in strict confidence. Apply Box 17 Monetary Times.

DIVIDENDS AND NOTICES

JAMES LOW,
Treasurer.

Vancouver, B.C., July 11th, 1912.

MURRAY-KAY, LIMITED

Notice is hereby given that the regular quarterly dividend of one and three-quarters per cent. (1¾%), being at the rate of seven per cent. per annum, has this day been declared on the preferred shares of the Company for the quarter ending July 31st, 1912. Said dividend to be paid on the 1st day of August next to the shareholders of record at the close of business on the 20th day of July, 1912; and that the transfer books of the company will be closed from the 21st to the 31st of July, both days inclusive.

By order of the board.

J. E. FEATHERSTONHAUGH,
Secretary.

Toronto, July 15th, 1912.

Dairying in Manitoba can be said to be in a reasonably healthy and satisfactory condition, from many points of view, says a report issued by the Manitoba Department of Agriculture and Immigration. The late spring delayed the opening of the cheese factories and summer creameries to some extent, but as a complete offset to this cattle came through the winter in good condition; the pastures are excellent at the present time, and the milk yield is large, thus making the outlook for the season quite promising. There is strong evidence of a steady growth in the dairy industry, and a growth with a permanency about it. This is a par-

ticularly true as regards the older portions of the province, where an increased interest in dairying is quite manifest and new creameries are being established. This is the third season in succession for a dairy car to tour the province, and each season has brought with it an increased attendance and an increased interest. The large number of farmers who are taking advantage of the Cow Testing Association work being conducted by the dairy department of the Agricultural College shows a strong desire to improve the dairy herds and establish dairying on a permanent and profitable basis. Take all in all, the outlook is most promising.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

MANY NEW ISSUES IN LONDON

Four Companies and the City of Calgary Make Flotations Overseas—Demands on the Market

Several more Canadian issues have been made in the London market. The city of Calgary has floated £500,000 4½ per cent. debentures at 99.

The Milford, Calgary, Colliery Company, of which Mr. R. B. Bennett, K.C., M.P.; Clement Pollen, president Central Kootenay Railway, and Noel Brooks, Canadian Pacific divisional engineer, are Canadian directors, offer at par 500 six per cent. first mortgage participating debenture of \$500 each, to develop coal-fields near Cochrane, Alberta.

British Maritime Trust.

Lord Furness and a group of financiers acting as the British Maritime Trust, offer 35,000 shares, £5 each, at a premium of five shillings per share, and £500,000 5 per cent. first debentures of £100 each are offered at par. The issue is connected with the working of the Richelieu & Ontario Navigation Company, and also the purchase of properties in Montreal, Toronto and Winnipeg, for which the Trust is in close treaty.

The fourth new invitation is by the British and General Trust, Limited. John Dennis, of Canadian Wheatlands, Limited, is chairman. The other directors include Lord Clanwilliam, A. E. Mathews, Toronto; Clarence McCuaig, Montreal; Colin Campbell, Winnipeg; R. B. Bennett, M.P., Calgary. The Trust offer 200,000 pound shares at par. Thus \$7,250,000 of British money was sought in London by Canadian enterprises.

The Dominion Agency with the Bank of Montreal as bankers, have offered in London this week \$250,000 five per cent. first mortgage bonds of the Dorchester Electric Company at 95 with 25 per cent. common stock.

Newfoundland Loan Poorly Received.

Newfoundland has suffered a rebuff at the hands of the English investors. The public has taken only 15 per cent. of its new loan of £400,000 3½ per cent. stock issued at 93. The underwriters take 85 per cent.

Consols this week reached the lowest price for eighty years, namely, 75. Leading bankers say they will go even lower.

Some speculative prospectuses have been successful, but the good securities have not been taken up readily, and it is broadly true that in the last three months the lower the rate of interest offered the poorer has been the response. So says The London Economist in its interesting compilation respecting capital applications in London.

But, though the times are not well suited to the issue of new capital, the demand for public subscriptions in the last three months has been fairly large—larger, in fact, than in any corresponding period in the previous ten years except 1910 and 1908.

In the first table is given, quarter by quarter, the amount applied for:—

	First quarter.	Second quarter.
1902	£47,993,000	£58,397,000
1903	22,226,000	55,188,000
1904	19,505,000	50,654,000
1905	67,301,200	36,915,500
1906	30,264,800	55,059,800
1907	49,428,600	40,304,600
1908	45,287,900	64,385,600
1909	64,238,400	26,835,200
1910	99,355,600	88,721,400
1911	61,245,000	56,238,800
1912	47,966,100	62,377,500

Total Applications Made in London.

The total applications for the half-year amount to £110,343,600, against £117,483,800, but the difference in favor of last year is accounted for by the smallness of this year's January-March figures, which were affected by the national coal strike.

That portion of the new capital distributed in the United Kingdom and possessions was as follows:

	—First half of year—	
	1911.	1912.
United Kingdom	£16,677,000	£24,159,400
British possessions—		
Australasia	3,157,500	4,201,900
Canadian Dominion	19,784,500	14,978,600
South Africa	3,794,500	2,695,100
India and Ceylon	4,904,300	3,225,500
Other British possessions	3,936,000	2,831,100
Total	£35,576,800	£27,932,200

It is rather remarkable that British possessions should have taken so much less than in the corresponding half of 1911, and it may be a sign of change that Canada in the past six months borrowed only £14,978,600. The falling off in "other British possessions" as compared with 1911 is due, of course, to the rubber boom.

Of foreign countries the United States took about the same as last year. Argentina £5,800,000 more, and Brazil £6,500,000 less. Russia is now the fourth largest borrower in the table, and presumably her demands will not fall off as the years go by.

The Saskatchewan government has agreed to guarantee bonds for Grand Trunk terminals in Regina, Saskatoon, Moose Jaw, Prince Albert and Swift Current. Mr. E. J. Chamberlain, president of the railroad, has issued instructions to have the necessary work undertaken without delay. Early action will also be taken to complete the Grand Trunk Pacific into Prince Albert, and carry out the proposed programme in Regina, including the erection of an hotel agreed upon with the civic authorities.

There will be offered to private investors an issue of 6 per cent. first mortgage sinking fund gold bonds of the Santiago Electric Light and Traction Company. This company was incorporated in 1906 in accordance with the laws of the Republic of Cuba, for the purpose of improving the light-ino facilities and providing much needed street railway transportation in the city of Santiago de Cuba, the second largest city on the island, with a population of 55,000. For the present year earnings are on the basis of over twice the bond interest. Extensions to the system are now under way which, when completed, will materially increase the earning capacity of the company. The bonds will be offered simultaneously in the United States by Messrs. Speyer & Company and Lawrence Turnure & Company, and in England and Canada by the Royal Securities Corporation, Limited, of Montreal.

FIRE LOSS OF THE UNITED STATES AND CANADA

The fire loss of the United States and Canada for the month of June, as compiled by the New York Journal of Commerce, shows a total of \$16,103,450, as compared with \$20,691,950 in June, 1911, which was unusually heavy, and with \$13,183,600 in June, 1910, which was about a normal record for the sixth month of the year. The losses for the first half of the year reach a total of \$134,417,750, as compared with \$129,691,750 for the first six months of 1911 and \$99,228,850 for the same time in 1910. The following table gives a comparison of the losses by fire during the first half of 1912, with the figures for the same months in 1911, together with the losses for the balance of those years:—

	1911.	1912.
January	\$21,922,450	\$35,653,450
February	16,415,000	28,601,650
March	31,560,800	16,650,850
April	17,670,550	16,394,400
May	21,422,000	21,013,950
June	20,691,950	16,103,450

Total six months \$129,691,750 \$134,417,750

The Monetary Times estimate of Canada's fire loss during June amounted to \$4,229,412, and \$14,740,499 for the first six months of 1912.

The Canadian Pacific Railway will probably build another station at Moose Jaw next year.

Mr. Percy Cowans, of Messrs. Macdougall and Cowans, Montreal, is visiting Vancouver with the object of establishing a branch office of the firm there with direct wire connections to Montreal.

The American Insurance Company has been licensed to transact fire insurance throughout Canada. The chief agency of the company is established at Winnipeg, and Mr. Conrad S. Riley has been appointed chief agent.

The British Empire Trust is about to create 500,000 cumulative 5 per cent. one pound preference shares, thus raising the issued capital to £1,000,000 sterling for use in Canada and elsewhere.

The palm room of the King Edward Hotel, Toronto, has become a popular rendezvous for business men, in addition to its other high-class and select patronage. The preliminary arrangements of many important business and financial deals are frequently made there over light refreshments served quickly and with every desire to please.

A RESERVE FOR DEPRECIATION OF INVESTMENTS

Year after year the bankers in the Mother Country have set aside very considerable sums in order to bring the book value of their consols to a parity with the market quotations of the day. On each occasion they have supposed, or rather hoped, that the appropriation then made would be sufficient, and that the decline would go no further. But nearly every new half-year has seen quotations at a lower level; and latterly the low records for seventy-five and eighty years have been broken with the descent of the so-called premier security to below 75.

The necessity of providing for this further depreciation in the June half-year promises to prevent certain of the banks showing increased profits, notwithstanding that they have had a very satisfactory half-year from a working point of view. In remarking upon the situation the current number of the London Bankers' Magazine says: "It is generally understood that last December a fair number of institutions took drastic steps to guard against depreciation in the future. Consols were written down freely, and in certain cases stand even below the quotations now prevailing, while like precautions were taken in regard to other securities. Banks which adopted this course may, therefore, be able to show better profits, but those which simply took the valuation of the day last December will have a considerable sum to meet under this head."

This peculiar situation of the Old Country banks has its interest for Canadian bankers, notwithstanding that the matter of depreciation of securities is not at

present a live question in Canadian banking. There are two reasons why the bankers in this country have not been troubled greatly by depreciation in securities. One is that they do not invest so large a proportion of their funds in securities as do the banks in Britain; the other is that since 1907 the securities owned by Canadian banks have not declined greatly. Some of the banks in Canada have long held British consols for investment, and they have had to write them down as prices fell. But their holdings of consols comprised only a moderate proportion of their total security holdings, and their total security holdings again represented but a moderate proportion of the total assets; so they have not been greatly affected. (In the June statement of the Canadian banks the total of securities of all kinds was \$92,894,046, or a little over 6 per cent. of the total assets of \$1,490,443,071.)

On the other hand, the current loans and discounts constitute nearly 60 per cent. of the total assets of the banks in Canada, a noticeably larger proportion than is the case in England. And when the loans on securities are also taken into account the total of loans and advances in Canada accounts for more than 70 per cent. of the total assets. When securities are falling it is well known that the policy of buying securities outright has more risk for the banks than the policy of lending on securities. If the loans are made to borrowers who are considered responsible, the risk in lending is reduced to a minimum. For in the first place the bank has its margin of 20 per cent. in the securities held as collateral. Then it may rely also upon the resources of the borrower. But with securities bought outright the case is altogether different. There is in them no margin of any kind between the purchaser and loss. The loss begins the moment the securities drop below the pur-

chase price; and, if the bank holds them while they continue to drop, it is helpless to avert an increasing loss.

With certain modifications the business of lending to mercantile and industrial customers is similar to that of lending on securities. Providing the executive officers of the bank display good judgment in making loans, the bank has a satisfactory margin or protection between itself and loss. Its loans are not necessarily endangered if its borrowers meet with reverses.

While their relatively greater interest in loans has had some effect in making the Canadian banks more independent of fluctuations in securities, it should be remembered that Canada's great prosperity is the principal factor in enabling them to present statements and reports in which the item of losses is not an important figure. If conditions were to change, the banks would find that whether their business consisted of loans to presumably good borrowers or of outright investments in supposedly good securities they would have losses to meet. Timely preparations are made while the skies are clear for the coming of stormy weather. With respect to the loans and discounts, these preparations consist of periodical careful valuations of all liability accounts and provision of reserve or contingent funds for probable losses. With respect to the investments in securities, although the banks have but a relatively small amount, they would likely have losses to meet if security prices fell.

The Bankers' Magazine referred to one method by which some banks in England made preparation for a further drop in consols. The method was to write them down in the books to a price well below the market quotation for the day. If a Canadian bank wished to follow that plan it would proceed to value its securities as far as possible according to market quotations, and in the case of those particular securities which were specially liable to fluctuate an allowance of several points below the market could be made. The amount required to write down the selected securities would probably be taken from current earnings and carried to a reserve account.

Such a policy might necessitate the transfer of a considerable sum from the profits of a given year. It would, perhaps, be a more satisfactory plan to build up gradually a reserve for depreciation. By taking, each quarter or half-year, a small fractional amount of the interest collected on bonds and stocks, a reasonable reserve can be built up in a few years. Thus, supposing a bank had \$2,000,000 in bonds yielding $4\frac{1}{2}$ per cent. net, the annual yield would be \$90,000. If the interest received were credited, $4\frac{1}{4}$ per cent. to profits and $\frac{1}{4}$ per cent. to a reserve for depreciation, the latter would receive \$5,000 per year; and if $\frac{1}{2}$ per cent. went to reserve it would receive \$10,000 per year. If this fund were to receive also sundry small profits secured through redemption or sale of bonds, it would probably amount in a few years to a figure which would provide for any moderate fall in quotations of securities held by the bank.

ANOTHER NATIONAL INSURANCE SCHEME.

Following Great Britain's experiment in national insurance, Italy proposes to engage in the same business. The Italian Government has secured legislation, under which will be established a National Insurance Institute, to have entire control of life insurance throughout Italy. Life insurance contracts concluded before the coming into operation of the law shall continue to have full validity according to their terms, but the societies or companies issuing the policies shall be required to close up their business in ten years. Each of these companies shall submit its operations to official inspection, and shall turn over to the National Insurance Institute forty per cent. of every risk assumed after the act comes into force. Their investments and their ex-

penses, too, will be under strict rule and close supervision. Any companies, who do not wish to continue their business, shall transfer their risks to the National Insurance Institute, and shall pay or guarantee the premium reserve.

The National Insurance Institute is given civil personality and its own administration under the new law. The State guarantees the payment of the policies, but that is only in case the Institute has not sufficient funds to meet its obligations. The Institute is under the control of the Department of Agriculture, Industry and Commerce, and the Minister of that department will select two of the members of the Board of Management of the Institute, while the entire board will be appointed under royal decree. The General Director, whose functions will correspond roughly to those of general manager of a company, is to be appointed by the Government on the nomination of the Minister of Agriculture. He is to be present at the meetings of the Board of Management, but has no vote. The agents of the Institute are to be paid exclusively in proportion to the number and amount of contracts they write. Postmasters, notaries and municipal officers are to be employed as agents.

The investment of the funds of the National Institute is closely guarded by the law. It is restricted to the following eight classes:—

- (1) The public debt.
- (2) Securities guaranteed by the Government.
- (3) "Lettres de gage" issued by authorized land banks.
- (4) Advances guaranteed by the previous three classes of security.
- (5) Purchase of Government annuities by transfer.
- (6) In loans on insurance policies.
- (7) Real estate, not more than one-tenth of the reserve.
- (8) Loans to employees of the State and other recognized institutions on security of a part of their salaries.

The new law is a part of the already extensive provisions of the Italian Government to encourage thrift. Co-operation is widespread in Italy, and there is a State institution known as the National Thrift Bank, whose General Director is to be a member of the Board of Management of the National Insurance Institute. By the employment of postmasters and municipal officers as agents on commission the Government hopes to make life insurance popular throughout the rural districts, now little canvassed by insurance agents. A strong appeal which the Institute will possess for this purpose, which was not in the power of the independent societies, will be the State guarantee of the payment of the policies.

CANADIAN PACIFIC STOCK.

Accumulating money at a rapid pace, making continued increases in earnings, always enlarging its programme of construction and improvement, the discussion of another issue of stock for the Canadian Pacific Railroad will not be silenced. A member of a New York banking house with London connections is the latest to re-echo the belief that when Parliament meets again at Ottawa, the railway will apply for authority to increase the amount of its authorized common stock capitalization.

The authorized common stock of the company is \$200,000,000, it having been increased from \$150,000,000 at the stockholders' meeting in October, 1908. Outstanding on June 30th, 1911, was \$180,000,000. Shareholders of record of January 2nd, 1912, were privileged to subscribe at 150 for \$18,000,000 of new common (ordinary) stock to the extent of 10 per cent. of their holdings. This is now being paid for, and will

have yielded \$27,000,000 by the time of the last payment, viz., October 18th.

In some quarters it is asserted that the next bonus to stockholders will take the form of an increase in the regular dividend rate to 12 per cent., which rate, in view of the rapidly expanding earnings, could be easily enough sustained. Others still seem to hold to the belief that a plan will be formulated whereby the large extraneous assets of the company will be segregated from the railroad assets proper and new securities created to represent them. But the majority is anticipating a new issue of common stock at 150 or 165, with accompanying valuable "rights" accruing to shareholders.

"The circumstances giving rise to this expectation of new financing," says the New York banker, "are the extraordinary expansion of earnings and the fast-rising values of land. It is apparent to those who have a reasonably good acquaintance with the vast scale upon which Canadian Pacific operates, that in a comparatively short time—\$100,000,000 or more of new cash capital must be provided. When the time comes, some of this will be raised, no doubt, through the issuance and sale of new 4 per cent. debenture stock and perhaps 4 per cent. preferred stock, but the greater part of the requirement will be obtained by issuing additional common stock."

The earnings of the Canadian Pacific for several years have consistently made new records, and it looks as though the current year will make still another. While no official decision respecting the double-tracking of the system from coast to coast has been announced, observers see that such an enterprise will become necessary in a comparatively short time.

If another offering of stock is made, say, \$40,000,000, at 150, which was the price of the \$18,000,000 issue of last January, it would yield \$60,000,000, but, as there is a likelihood of the next block being offered at a higher price, probably 165, an issue of \$40,000,000 would bring \$66,000,000. Such an amount would serve to carry the company's programme forward on an increased scale for another year. The company usually has on hand a working cash balance of \$45,000,000 to \$50,000,000, and this amount, coupled with the newly raised capital—\$27,000,000 through sale of common stock and about £1,000,000 of preferred stock in London at the close of last year—the company could put about \$80,000,000 into the construction work it has under way without issuing any new stock. Ample amounts, however, must be provided from time to time for the proper operation of the company's system, not only to-day, but in years to come.

The ratepayers of Ingersoll, Ont., gave a majority of 390 against the proposal to install a sewerage system in the town. That is a decision which one day will be regretted by the citizens, and which marks Ingersoll as a town desirous of remaining in the unsanitary age.

* * * *

The city of North Vancouver need not lose any sleep respecting the criticism of an irresponsible English journal in regard to its recent bond issue. North Vancouver has demonstrated in the past few years its right to moderate loans abroad. Its only care should be to keep well within its borrowing powers, to remain economical, and thus to maintain its good credit both at home and abroad.

* * * *

The Canadian Guardian Life Insurance Company, with the history of which readers of *The Monetary Times* are familiar, has applied for the release of its deposit in accordance with the notice given by the company some time ago. The department, however, will require to have all the company's policies outstanding forwarded to them and the values of the respective policies ascertained and tendered to the policyholders before any release of deposit can be granted. These policies are now being received, but the Department of Insurance is not at present in a position to say what percentage of the policyholders transferred or surrendered their policies, as they have not yet received replies from all the holders of the policies in force. Policyholders have previously been advised by us to place their cases in the hands of the Insurance Department at Ottawa rather than in those responsible for the mismanagement of this company.

EXPERT WOODSMAN REPORTS ON FOREST CONDITIONS

The timber of the Hudson Bay region (the southern part of the old district of Keewatin) is a topic that has lately become of considerable interest. Interesting observations with regard to it are found in the 1911 report of the Director of Forestry, published as part of the annual report of the Department of the Interior for 1911. These are in continuation of the report on the timber along the proposed line of the Hudson Bay Railway, published as Bulletin No. 17 of the Forestry Branch.

Mr. J. T. Blackford, an experienced woodsman, acquainted with the conditions in the north, reports on the conditions of the forest around Oxford House, his explorations covering some 5,400 square miles of country. Of this only about 1,600 square miles bears merchantable timber; on the remaining 3,800 miles the timber has been burned. There is abundant evidence that the whole country was originally forested with spruce, tamarack, jack pine, balsam fir, birch and poplar, and on islands which have by their position been protected from fire are dense stands of trees two to three feet in diameter.

The areas, after the first burning, have usually been covered with dense growth of trees, but the debris left after the first almost invites a second fire. In many places fire has swept the country many times, impoverishing the soil, destroying all seed-trees, and with them all hope of a second forest. "During the summer," the report states, "Mr. Blackford found no commercial timber of any quantity, but he states that, except for fire, the country would be covered with timber two or three feet in diameter."

The two loan by-laws that were recently defeated at Guelph, the one to loan \$20,000 to the Anchor Manufacturing Company, and the other to loan \$5,000 to D. McKenzie, may be re-submitted to the ratepayers in the near future.

PORT OF NEW WESTMINSTER

Plans, Progress and Possibilities of its Harbor Scheme —How It Will Cater to the Panama Route

(By Kenneth Myers, New Westminster.)

New Westminster comes before the public as a port ambitious for the Panama Canal traffic, and the export wheat trade of Alberta and Saskatchewan. The plans announced by mayor Lee last month are the result of more than two years work by the mayor and the civic administration of New Westminster. During those years little was allowed to leak out concerning the scheme, with the result that all arrangements could be made without the success of the plans being prejudiced.

The object of these plans is to build a great fresh water harbor with dockage for the largest ships of the Pacific Ocean on the great Fraser River in the neighborhood of New Westminster. Realizing that docks without railways are useless, the city has entered into negotiations with the Canadian Northern Railway, Great Northern Railway, and other railways. The Canadian Pacific Railway is willing to give every accommodation to the completion of the plans, while the Chicago, Milwaukee and Puget Sound Railway is taking interest in the proceedings, and has expressed its intention of coming to New Westminster within the next few years. The Canadian Northern Railway and the Great Northern Railway are the most immediately interested. Mayor Lee has been in close consultation with Sir William Mackenzie and Sir Donald Mann, and matters have now reached that stage where it can be confidently stated that the Canadian Northern Railway is preparing to take advantage of the splendid facilities offered by the scheme. Mayor Lee, who is now in London, held a conference with the Great Northern officials at St. Paul on his way out, and it is extremely likely that this railway will also take direct advantage of the plans proposed.

Owens its Own Waterfront.

New Westminster starts its harbor development with the great advantage of owing almost every foot of its own waterfront. This enables it to go ahead without asking for the assistance of any private corporation, and at the same time supply industries with sites on reasonable terms. Realizing this condition of affairs and the unparalleled advantage existing on the Fraser River for the construction of one of the finest fresh water ports on the Pacific coast, mayor Lee evolved a rough scheme of developing these advantages over two years ago. To perfect these and to make certain of their feasibility the city council some eighteen months ago voted a sum of \$15,000 for the engagement of Mr. A. O. Powell, a prominent harbor engineer.

Mr. Powell, was soon convinced of the possibilities of the scheme, he studied the river at all seasons and finally drew up the plans. He also carefully worked out the estimates of the cost and this has been found to be in the neighborhood of only \$6,000,000. Compared with the results to be obtained and with the expenditures made at other ports, this sum is trifling and as it would only be spent gradually during the next five or six years, it would not prove a burden in any way.

The scene of the main part of the new port is on Lulu and Annacis Islands, some thirteen miles from salt water, on the north bank of the main channel, and partly within the city limits and partly in the adjoining municipality of Richmond.

Harbor Commission will Handle Details.

The details of the docks will be left to the proposed harbor commission, but as a first step it has been suggested that the channel be dredged to a width of only two hundred and fifty feet, with a turning basin at the end, and sufficient dockage to accommodate the present shipping of the coast. Then as the trade would grow, the remaining docks could be put in according to the completed scheme, and the channel dredged to its full width.

With regard to the fifteen miles of river from the docks to the sea, works have already been started by the Dominion Government which will, when completed, give an average depth of about thirty-five feet for the whole distance. The channel, with the exception of one bend, will be almost straight, and ships will be able to come up under their own steam and dock in the quiet water of the Westminster waterway without the expensive assistance of tugs.

At the sand-heads at the mouth of the river, the Dominion Government has let the contract for the first 6,900 feet of jetty, which will confine the stream to its channel and cause the silt carried down by the Fraser River to be carried right out to the deep waters of the Gulf of Georgia. The Dominion Government is committed to an expenditure of over \$2,000,000 on the improvement of this channel and already a good depth of water has been secured all the way from the sea to

New Westminster, and points further up the river, so that ten thousand ton vessels have docked at Port Mann without difficulty in the past.

Railways and Proposed Scheme.

In trying to link up this proposed system of docks with the Canadian Northern Railway and other railways it was found that the key to the position was on Front Street, New Westminster. Accordingly plans were drawn up for the widening of this street, and at the same time for the improvement of the street's waterfront, which will give both railways all required facilities and New Westminster a straight municipal quay of over a mile in length. The plans call for the widening of the street to one hundred and ninety-two feet in all, and the construction beyond this of an unbroken line of wharves with warehouse and factory accommodation along the whole front. The street will then be continued west in a straight line by a railway bridge over the north arm on to Lulu Island. On Lulu Island there exists acres of land available for railway yards, industries, etc.

According to the proposed plans the Canadian Northern Railway will run off the bridge over elevated tracks along this distance and across the proposed railway bridge down to the grade on Lulu Island. The same plans, also call for the construction of a fine passenger depot almost opposite the present city hall. The Canadian Pacific Railway and Great Northern already have tracks together with the British Columbia Electric Railway on Front Street.

Work Already Accomplished.

On June 26th a money by-law for \$500,000 for harbor improvement and development work was passed by the citizens of New Westminster. In the interval since then the services of Mr. A. O. Powell, the engineer, who drew up the plans, has been secured for the supervision of the expenditure of this sum of money. Before contracts can be let for this work Mr. Powell and the city council will have to complete negotiations with the present holders of waterfront leases from the city of New Westminster with regard to compensation and accommodation.

The whole of this sum of half a million dollars will be expended along the city's waterfront, for the widening of Front Street and the construction of the municipal quay.

With regard to the main body of the harbor scheme affecting Lulu and Annacis Islands, it is proposed to ask the Dominion Government to appoint a harbor commission to control the port and the whole of the waterfront, and to carry out the development work by means of money obtained from bonds guaranteed by the government. If this was not forthcoming, it is estimated the city could afford to finance the scheme itself, so great would be the benefits reaped.

Already the plans have been submitted to the government engineers at Ottawa and also to the harbor engineers of Montreal and these men have expressed their opinions regarding same in a satisfactory manner. In addition, all the ministers but one have been shown the plans and Mr. J. D. Taylor, M.P. for New Westminster, has expressed his conviction that the government will support a harbor commission bill at the beginning of the next session of parliament. The work of drawing up that bill is now under way at New Westminster, and the prospects of an early beginning of work on the plans are very bright.

Exactly what the construction of this port will mean to the city it is not possible to say, but once the plans are under way, New Westminster will enter into the beginning of an era of industrial progress and of importance as a Pacific port of the Dominion.

Messrs. Lowe Brothers, Limited, have increased their capital stock from \$100,000 to \$150,000.

The mayor of Brandon has received a communication from Mr. J. A. M. Aikins, M.P. for Brandon, to the effect that he has been assured by Mr. Chamberlin, president of the Grand Trunk Railway that the work of constructing the Brandon branch of that road will be commenced at once. When the Grand Trunk Pacific comes into Brandon, the city will have four transcontinental railways besides many branch lines.

Financed by British capitalists holding a Federal charter, which provides for 1,800 miles of new railway construction, with Fort Churchill on the east and Port Essington on the west as terminals, and connecting Edmonton with Las la Riche, Fort McMurray and Lake Athabasca, the Northern Territorial Railway will commence a survey of its route from Edmonton northeasterly in the course of the next few days, and before the close of the season a start will probably be made on the actual construction of the grade. So says an unconfirmed dispatch from Edmonton. The corporation is capitalized at \$40,000,000, and under the charter, which was granted by the Dominion Parliament at its last session, has bonding powers amounting to \$40,000 per mile. The length of the new line from the coast to Fort Churchill will be 1,450 miles.

COMMENTS ON BRITAIN'S CANAL PROTEST

A Matter of Vital Interest—No Hague Tribunal Would Adjudge Legislation Before Congress in Keeping with Treaty

The following are press comments regarding Great Britain's protest at the discriminatory Panama Canal tolls proposed by the United States Government:

The patient investigator may search in vain through all the long list of State papers on this subject, which have emanated from our Government for any hint or suggestion that it reserved the right to confer on American ships using the canal any special privilege or exemption whatever.—New York Journal of Commerce.

Unless the United States is prepared to take the extreme step of abrogating the existing treaties, a course which would necessarily involve a serious breach of faith, it can hardly escape from its contractual and moral obligation to refrain from any act of discrimination. The refund from the federal treasury of rates charged on United States shipping may be arguable as within its technical rights although an evident evasion of the spirit of the agreement.—Toronto World.

That Republic Should Keep Faith.

To Canada and to Canadian shipping it is of vital interest that the Republic should keep faith in this matter. We look to the canal to regulate the freight rates between Eastern and Western Canada and to greatly increase trade between St. Lawrence and Atlantic coast ports and the Pacific coast.—Toronto News.

No Hague tribunal would adjudge the Panama Canal legislation now before Congress to be in keeping with the treaty. We do not believe that the United States' own Supreme Court would uphold that legislation. Some of the most prominent men in United States politics condemn the provisions as to tolls and as to the excluding of railway-owned steamships.—Toronto Mail and Empire.

More Than Panama Canal at Stake.

Our neighbors should realize that in this case, there is more than the Panama Canal at stake. If they take advantage of the delicate European situation to coerce John Bull into accepting an interpretation of the Treaty which it sentences will not bear out in the judgment of the average reader, they may get the Canal, but they will plant in the breasts of the Canadian people a permanent suspicion of American "good faith" in the writing of international agreements which will be of infinite harm to both of us.—Montreal Daily Star.

It is not merely the British trans-oceanic trade which will be discriminated against, but Canada, Mexico, Central and South America will be seriously hurt. One of the amazing proposals provides that railroad ownerships may engage in coastwise trade in the United States during a voyage to and from trans-oceanic ports, but not to the ports of Canada, Mexico, Central or South America. The inference is obvious. It is sought to make the Panama Canal a mere domestic possession of the United States when by treaty it was deemed an international waterway. The canal is not, and cannot be allowed to become, the undisputed possession of the States to do with as she thinks fit. That is not the understanding with which its construction was allowed by other nations. That is not the agreement to which the United States has put its signature. That is not the demand which a nation which values its honor, and respects its word will support.—Montreal Herald.

Would Violate all Ethics of Good Business.

Treaties aside, such a step would violate all the ethics of good business, even were the world to acquiesce in our right to do as we please with the canal. It is not to be forgotten that the canal belongs to the people of the United States, not to any one interest. They have built it, as stated, to promote commerce, and not to promote monopoly of transportation. Throwing the waterway open to the vessels of the world may not be the means of building an American merchant marine, but restricting it to favored corporations will not create activity in our shipyards. A merchant marine is all right, but cheap rates through world competition are preferable to extortionate transportation charges, even though these charges are exacted by vessels flying our own flag.—The Financier, New York.

It is needless to speak of the deadly retaliation within the power of the Canadian government. Our lake shipping uses their canals ten for one to the Canadian vessels. They could establish preferences which would transfer the largest and most profitable part of our lake shipping to the British flag within a year. But this suggestion constitutes a threat; and the United States Senate, to its abiding credit, is establishing a dignified and honorable basis. Bluster on either side can be relegated to the corner groceries and machine-made political clubs, where such counterfeit coin is current.—Wall Street Journal.

INDUSTRIAL ACCIDENTS DURING JUNE

According to the industrial accident record of the Department of Labor, sixty-two persons were killed and 249 injured during the month of June in the course of their employment. A comparison with the records of previous month and of June, 1911, shows that there were twenty-eight fewer fatalities than in May and thirty less than in June, 1911. Of the non-fatal accidents, there were eight more recorded than in May, and one hundred and thirty-seven more than in June, 1911. There were but two accidents recorded involving the death of more than one workman, one of which occurred on June 1, by which eight construction laborers were killed during blasting operations on railway construction work near Stones' Corners, Ont., and the other a head-on collision of railway trains near Nipigon, Ont., in which four railway employees were killed.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 12th:—McKinley-Darragh, 213,439; Buffalo, 53,300; Nipissing, 62,500; Cobalt Townsite, 84,000; Hudson Bay, 65,175; Crown Reserve, 42,900; Coniagas, 63,911; Casey Cobalt, 204,790; total, 790,105 pounds, or 395 tons.

The following are the shipments for the week ended July 19th:—Right of Way, 53,100; Chambers Ferland, 63,400; Cobalt Lake, 115,100; La Rose, 155,273; McKinley-Darragh, 122,731; Buffalo, 56,371; Nipissing, 150,087; Cobalt Townsite, 86,000; Temiskaming, 62,106; total, 864,168 pounds or 432 tons.

The total shipments since January 1st are now 24,295,672 pounds, or 12,047 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 20,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

VIEWS OF LONDON MARKET.

Mr. I. W. Killam, of the London office of the Royal Securities Corporation, Montreal, is another visitor to Canada who confirms the report of extreme congestion of securities in the overseas market. In an interview with The Monetary Times, Mr. Killam stated that the British investor desired a higher return upon his capital than that with which he had been hitherto contented. Good industrial bonds, yielding 5 and 6 per cent., and giving ample security, were favored, and it was doubtful if a big block of any such securities was awaiting absorption in the market. On the other hand, there were many millions of dollars of government and municipal issues unabsorbed, largely on account of the lack of investment demand. These included many Canadian issues. Mr. Killam thought that municipalities would have to accept much lower prices than obtained in recent years, firstly, because of the changing appetite of the investor, and, secondly, because of the glut of undigested issues in London. The summer season would not mitigate matters, and he could hold out little hope of improvement in the autumn.

Mr. Killam has been in the London office of the Royal Securities Corporation for the past three years, and is leaving Montreal shortly for a trip to the Western provinces and to British Columbia, prior to his return to England in September.

Mr. W. R. Arnold, managing director of the Dominion Trust Company, Limited, sailed last week from Liverpool by the Olympic for New York.

The Canadian Pacific has placed contracts for 1,000 freight cars with the American Car and Foundry Company and for a similar number with the Barney & Smith Company. This is part of the road's recent order of 12,500 cars, the greater portion of which went to Canadian concerns.

The Northern Crown Bank has increased its paid-up capital to three millions. At the same time the difference between Crown and Northern certificates will be adjusted. The new stock will be issued at par, and all shareholders will participate. Holders of a hundred Northern certificates will be entitled to thirty-six new shares of par value of \$3,600 for \$2,100.

A surplus of \$37,500 over all liabilities including capital is reported by the Western Life Assurance Company, Winnipeg, after its initial year's work. The managing director, Mr. Adam Reid, is encouraged at the progress made, the amount of insurance already written being near one million dollars. Stock has already been sold to the amount of nearly \$350,000, and is being placed at \$125 per share. Thus far the expense of placing stock has been less than \$4.50 per share.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

II.—CANAL TOLLS AND UNITED STATES PREFERENCE

The shipowners and industrial captains of every progressive nation have anxiously awaited the decision of the United States Government with regard to tolls. What advantage will United States vessels obtain compared with those of other countries? At Saint Paul, on October 25th, 1911, President Taft, reviewing the history of the Canal, and predicting its opening on July 1st, 1913, made a significant announcement. "We have agreed," he said, "that we will charge equal tolls to all countries, and there arose the question how far we may favor our own vessels between coast and coast as to exclude vessels from that trade of any other country. The question is whether if we remit the tolls we are in a sense discriminating against any other country that has no power to enter upon that trade. It may be that it will be held that the rule can apply to them as to others; if so, there is nothing to prevent our voting back to the coastwise vessels the tolls which they would be required to pay.

Trade Between Two Coasts.

"I say this because it seems to me of the utmost importance that we should make that canal a means of affecting, beneficially, to the great public interest, the trade between the two coasts. I have no idea that it is going to break up the railroad transcontinental trade. It may revolutionize it in some ways, but it will do a business that the transcontinental lines cannot do, and it will do a business that will bring the two coasts so much more closely together that if that were the only benefit it would justify the construction of the canal. Of course, we have invested \$400,000,000, and we ought, if we can, to put the canal as soon as we can on a reasonable paying basis, but it is better a great deal that we should get our benefit from the canal indirectly than that we should impose tolls which should limit its usefulness."

In a message sent to Congress in December, 1911, the President said, "We own the canal. We have the right to charge tolls for its use. These tolls must be the same to everyone; but when we are dealing with our own ships, the practice of many governments of subsidizing their own merchant vessels is so well established in general that a subsidy equal to the tolls, an equivalent remission of tolls, cannot be held to be discrimination in the use of the canal."

Hay-Pauncefote Treaty.

There enters here the Hay-Pauncefote treaty, which cannot be overlooked with a word and wish. When President Taft recommended Congress to pass legislation to secure discrimination in favor of United States shipping, he was obviously stepping on delicate ground. His method of effecting this discrimination was to be the levying of tolls on foreign vessels, while United States vessels were to be allowed the free use of the canal. In accordance with this message a bill was introduced into the Senate which provided that the tolls on foreign vessels should not exceed \$1.25 a ton, United States vessels being exempt unless they were owned by railroad companies and were operated so as to secure for their proprietors the advantage of the expected reduction in the cost of freight transportation.

History of Negotiations.

Until 1901 the control of the Isthmus of Panama for transportation purposes was by the Clayton-Bulwer treaty of 1850, vested in the United States and Great

Britain jointly, the object being to secure the absolute neutrality of the canal, and to prevent encroachment by either of the two powers on the territory of any Central American State. In 1901 the Clayton-Bulwer treaty was abrogated, and was replaced by the Hay-Pauncefote treaty, which authorized the construction of the canal by the United States Government, or under its auspices, and continues the general principle of neutrality as embodied in the Clayton-Bulwer treaty with this exception: that there is no prohibition of the erection of fortifications commanding the canal or its adjacent waters.

Terms of the Agreement.

The terms of the agreement which the United States made with Great Britain are found in the treaty of February 22nd, 1902, ordinarily called the Hay-Pauncefote treaty under Article 3, Clause 1, in which occurs the following provision:—

"The canal shall be free and open to the vessels of commerce and of war observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

The "rules" referred to are rules governing the relation of the canal to warfare and neutrality.

Protests Against Discrimination.

The suggestion of President Taft to discriminate in favor of United States vessels and the proposed legislation with that object in view brought an official protest from Great Britain. The note sent to Washington by the British authorities naturally expressed also Canada's views. Australia, too, joined England in the same protest. In the discussion of the legislation in the United States Senate, Senator Root, of New York, and Senator Burton, of Ohio, both upheld Britain's attitude. The final court of arbitration for this matter is the Hague Peace Tribunal.

Sir William Mackenzie, president of the Canadian Northern Railway, was one of our own countrymen who protested. In an interview in London early this year, he gave his opinion that Canadians would keenly resent any such preference on behalf of the United States, for they had naturally been expecting further substantial development in their far eastern trade when the canal was ready to receive shipping. Canadians, he added, desired perfect freedom of navigation to and from Pacific ports of the Dominion.

Mr. J. H. Turner, the agent-general in London for British Columbia, agreed that it would be a violation of the treaty, and would seriously injure British Columbia. It would also injure the canal itself for many years, until the United States had built up a mercantile fleet. Protests were also made in the Dominion House at Ottawa.

No Evasion of Obligation.

The London Morning Post in a long editorial declared that such discrimination would be a violation of the Hay-Pauncefote treaty, and said: "By no sophistry can the American Government pretend that it is not bound by the terms of the treaty. An evasion of the obligation into which it entered would prove to the world that its pledges are meaningless."

British shipowners, from the purely business viewpoint, did not appear to be seriously disturbed by the proposal. They argued that, outside of the coastal trade, from which they are already barred, British ships would continue to do the carrying trade of the United States, even if United States ships were allowed to use the canal free of tolls. The reason for their opinion was, they explained, that it costs sixty to seventy per cent. more to build ships in the United States and forty per cent. more to operate them than it does in the United Kingdom.

The matter finally reached the United States House committee on interstate and foreign commerce, and in March, 1912, the committee reported against the President's proposal. The three main provisions of their report were as follows:—

(1) The committee went on record as opposed to making the canal free to either foreign or domestic shipping.

(2) The President received autocratic power in the canal zone and in the management of the waterway.

(3) The only restrictions as to the use of the canal were placed on United States ships which, when owned or controlled by "combinations in restraint of trade" were to be denied admission to the waterway.

In the meantime, the question of tolls remains unsettled by the nation.

(To be continued.)

Map Showing Isthmus of Panama and Adjoining Countries.

TORONTO'S HOTEL ACCOMMODATION

In the Toronto Board of Trade News attention has been drawn to the question of hotel accommodation in the Queen City. A list compiled shows that 3,981 rooms are available at the city's hotels for transients. Many of these are in the smaller places out of the way of business. The twenty best houses are generally full. For example, on February 26th, 1912, at 9.30 p.m. these twenty had available altogether only 24 rooms. Fourteen out of the twenty, including all the large houses, were full. During four days, February 28th to 29th, and March 1st and 2nd, a careful count of incoming and outgoing passengers at the Union Station was procured. Eliminating through passengers, which averaged for all lines about 2,000, the following results were reached:—

	In.	Out.
Total (4 days)	34,705	39,170
Average per day	8,676	9,792

Other days would balance up the ins with the outs. One may estimate that with the natural traffic increase in the past four months that there are 10,000 people coming to Toronto every day. Many of them go to private houses, but a total of 3,981 hotel rooms is inadequate. One reason for the standstill in hotel extension is said to be the prevailing uncertainty with respect to the license law. Even if a prohibition law were enacted within the next five years hotels would be needed. While a poor or medium class house depends wholly on the bar for its profits, the high class hotel may be profitable independently. Capitalists might find in the provision of additional accommodation a good investment. Toronto is growing at the rate of 30,000 a year.

The organization of the St. Croix Docks and Railway Company was perfected at a meeting held at St. Andrews, N.B., last week when directors were chosen as follows:—Messrs. F. P. McColl, F. M. Murchie, G. D. Grimmer, G. J. Clarke, D. F. Maxwell and W. H. Berry. Subsequently Mr. F. P. McColl was elected president, Mr. F. M. Murchie vice-president, Mr. G. D. Grimmer treasurer, and Mr. W. H. Berry secretary. The capital stock is placed at \$49,900. It was decided to commence the survey of the proposed road from St. Stephen to the Ledge at once and to make application to the Dominion Government for a survey of the harbor and site of proposed docks at Oak Point.

VANCOUVER LIFE UNDERWRITERS' ASSOCIATION

Mr. N. T. Truell, of Regina, Western vice-president of the Dominion Life Underwriters' Association, was recently banquetted by the Vancouver Association of Life Underwriters. He made it clear that the success of the associations rested with the active individual interest of the agents, rather than with the managers. He reviewed the progress of the association, which was started six years ago in the province of Quebec, spreading through the Maritime Provinces and Ontario, with the first annual convention in Toronto in 1907. Now the membership is nearly two thousand. He declared that the Dominion of Canada had the best insurance law in existence and this was largely owing to the information which representatives of the association placed in the hands of the government. By adopting a code of ethics, the association also had been instrumental in eliminating to a large degree detrimental practices which had crept into the business.

In moving a vote of thanks to Mr. Truell, Mr. H. C. Evans, secretary of the Vancouver Association, said that one of the greatest needs of the association was adequate publicity, not only of its own work, but also of the objects of the business they administered, the funds of the companies being largely placed in railroads and other big development enterprises of a more or less public nature. Mr. W. A. Weaxell, who supported the motion as seconder, suggested that insurance men should have consideration from the railway companies in the matter of fares similar to commercial travellers.

After a conference this week between the Montreal board of control and representatives of the Canadian Autobus Company, Mayor Lavallee intimated that an agreement had been reached in regard to the amount of stock to be handed over to the city. This will be 100 shares per mile of circuit, or \$600,000 worth of stock altogether. The company at first offered \$250,000 worth and later \$500,000 worth. Now one of the directors has said they are willing to meet the city's demand for the 100 shares per mile. The company will submit their conditions in writing to the board of control, who will make any necessary amendments and will send their recommendations to council. The company proposes to use 14 routes, totalling 62 miles.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Twin City Company.—The Twin City lines report a decrease of \$16,893 in earnings for the first week of July. The total for the week was \$166,467, and from January 1st to date, \$4,041,471.

Lake of the Woods Milling Company.—The Lake of the Woods Milling Company is enlarging its mills at Keewatin, Ont., from six thousand to nine thousand barrels, and that at Portage la Prairie from fifteen hundred to twenty-five hundred.

Timiskaming Mine Company.—A special general meeting of the Timiskaming Mine Company, Limited, has been called for Monday for the purpose of ratifying a by-law passed by the directors increasing the number of directors from five to seven.

Rio de Janeiro Tramway, Light and Power Company.—The gross earnings of the Rio de Janeiro Tramway, Light & Power Company as reported by cable for last week are \$288,769, against \$241,061 for the same week last year, an increase of \$47,708.

Amalgamated Asbestos Corporation.—Amalgamated Asbestos shareholders received another setback when the Standard mill at the Thetford Mines was burned to the ground this week. The mill, which was owned by the Amalgamated Company, was largely covered by insurance.

Bell Telephone Company.—Mr. L. B. McFarlane, managing director of the Bell Telephone Company, says that his company has no intention of absorbing the rural telephone lines operating throughout Ontario and Quebec. A statement to the effect that the Bell Company was about to absorb all the rural lines has been current for the past few days.

Guarantee Company of North America.—In its seventyninth semi-annual statement the Guarantee Company of North America shows total assets of \$1,723,683, and liabilities amounting to \$223,039, leaving a surplus to policyholders of \$1,500,644, and, deducting the paid-up capital of \$304,600 a surplus to shareholders of \$1,196,044. The total resources of the company for security of the insured amount to \$2,087,683. The total amount of current obligations under bonds in force on June 30 was \$70,397,742.

British Columbia Electric Company.—The gross earnings of the British Columbia Electric Company for May, 1912, were \$491,826, an increase of \$93,389, or about 23 per cent. The net income for the month was \$165,422, an increase of \$37,192, or 28 per cent. For the eleven months from July 1, 1911, gross totals \$5,251,343, an increase of \$1,412,173. The net amount for the same period, after deductions for depreciation and amortization, was \$1,836,830, a gain of \$372,121, or 38 per cent.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company ore receipts at the Trail smelter for week ending July 19, and from July 1 to date in tons:—

Company's Mines—	Last week.	July 1 to date.
Centre Star	2,510	9,483
Le Roi	741	3,051
Sullivan	447	1,518
Other mines	1,442	4,014
Total	5,140	18,066

Niagara Power Company.—The province of Ontario has won an important law-suit from the Niagara Power Company. Decision in the suit was given by the Privy Council.

The case was one of the Attorney-General against the Canadian Niagara Power Company, and arose over the interpretation of the lease of rights to power development in the Niagara River. The province contended that the lease required the company to pay a tax on the highest amount of electricity carried on the wires. The company contended it was only to pay on the metered quantity of power, and their contention was upheld by the Trial Judge and the Court of Appeal. The Judicial Committee of the Privy Council has now reversed that decision.

Eastern Car Company.—Mr. Charles Cantley, assistant to the general manager of the Nova Scotia Steel and Coal Company, reports that active preparations are afoot for the construction of the plant of the Eastern Car Company, which will go into the manufacture of steel cars. The plans for the building, which will cover about fourteen acres of ground, are well in hand, and Mr. Horace H. Lang, consulting engineer, who has planned many big

American plants, is now on the ground. The site selected is close to the present plant of Scotia and Trenton, a suburb of New Glasgow. Mr. Cantley reports the recent up-to-date additions to the Scotia plant both at Trenton and Sydney Mines are working splendidly and justifying the heavy outlay incidental to the installation. Mr. Charles Cantley is a graduate of the Science Faculty of McGill, and a son of Mr. Thomas Cantley, general manager of the Nova Scotia Steel and Coal Company. He was recently appointed assistant to the general manager. Nova Scotia Steel is directly interested in the Eastern Car Company, as it will supply all the raw material entering into construction.

Sao Paulo Tramway, Light and Power Company.—The net earnings of the Sao Paulo Tramway, Light and Power Company for the month of June show an increase of \$48,641 over those of June, 1911, while aggregate net earnings for the first six months of 1912 are \$275,973 ahead of last year.

The following is the statement of earnings and operating charges, etc.:—

	1912.	1911.	Inc.
Total grs. earn.	\$ 367,799	\$ 282,558	\$ 85,241
Opr. charges, etc.	145,857	109,257	36,600
Net earnings	21,942	173,301	48,641
Ag. grs. earn. from Jan. 1	2,212,348	1,684,253	528,095
Ag. net earn. from Jan. 1	1,336,439	1,060,466	275,973

Timiskaming Mines.—Directors of the Timiskaming mine are sending out the half-yearly statement showing the condition of the company at the end of the half-year. The principal items compare with the corresponding figures at the end of 1911 thus:

	June 30, 1912	Dec. 31, 1911
Cash on hand	\$299,612	\$100,442
Due from smelters	114,940	158,708
Ore on hand	44,874	28,555
Accounts receivable	55,709	11,770
Insurance and taxes earned	6,197	1,300
	\$521,332	\$300,775
Less June pay-roll	\$ 33,327	
	\$488,005	

Less balance deferred payments North Dome stock, \$150,000; balance, \$337,005.

British Columbia Packers' Association.—The annual report of the British Columbia Packers' Association, being for the year ended June 30 last, shows the favorable operations of the year. The profits, after providing for depreciation, amounted to \$422,352.82, which, added to the balance carried forward, brought the amount at credit of profit and loss account up to \$921,951.74. From this dividends at the rate of 7 per cent. on the preferred stock and 6 per cent. on the common took \$161,632.50. There was put aside \$6,000 reserve to provide for losses on fishermen's account; \$108,788.97 was applied to redemption of 1,088 preferred shares, series "B," leaving a balance at credit of profit and loss to be carried forward of \$645,530.27.

The total assets of the company are set down at \$3,426,873.72, of which \$2,143,413.74 is real estate, buildings, canning and cold storage plants, brands, good will, etc.; \$164,979.13 the Packers' Steamship Company plant; \$7,000 the Numpkish hatchery, and the balance sundry debtors, salmon consigned on hand, insurance reserve and sundry advances. The capitalization on June 30 was \$1,511,400 in common and \$945,800 in preferred stock. The indebtedness amounted to \$301,322.99 due to banks and accounts payable.

National Steel Car Company.—At a directors' meeting held at the headquarters of the company, Transportation Building, Montreal, Sir John Gibson, of Hamilton, Ontario, was elected president, Mr. Basil Magor, of Montreal, vice-president and general manager, and Mr. Adolphe Butze, secretary, treasurer and purchasing agent of the National Steel Car Company, Limited.

The principal contracts were awarded for the erection of the plant and the contractors agreed under a heavy penalty to have their work completed by the middle of October. This will enable the company to begin delivery of cars to the railway companies during November.

The main buildings will be 900 feet long by 200 feet wide, and will be constructed along the most modern lines and will be equipped with the latest and most approved tools for the manufacture of both steel and wood freight cars, and will have a capacity of from thirty to thirty-five cars per day.

About sixty acres of land have been secured in Hamilton, this property being a part of the so-called Tuckett Farm, which is situated on Burlington Bay in the eastern part of the city.

Grading and foundation work will be begun immediately, and in order to expedite the delivery of the necessary structural steel, a bonus has been given the contractors for the purpose of securing immediate shipment of their steel.

International Nickel Company.—The directors of the International Nickel Company, whose properties are situated at Sudbury, have made an agreement for the consolidation of the company with the Colonial Nickel Company. This agreement will be voted on by the shareholders of the International at a special meeting on September 5. The capitalization of the consolidated company will be \$50,000,000 common stock, \$12,000,000 6 per cent. non-cumulative preferred stock, preferred both as to dividends and assets in the event of liquidation.

The shareholders of the Colonial Nickel Company are to pay in \$9,000,000 in cash which is to be used to retire the bonds of the International outstanding to the amount of about \$8,000,000. Preferred stock of the consolidated company is to be exchanged for the preferred of the International share for share. Common stock of the new company is to be exchanged in the ratio of 2½ of the new for one of the International.

The Colonial Nickel Company has been organized under the laws of New Jersey. Its authorized stock of \$9,000,000 is yet to be paid. Payment will be made in the form of cash payment of \$9,000,000 to the consolidated company, shareholders receiving the new company common stock share for share for the Colonial. The new company will have reserved in the treasury \$3,000,000 common and \$12,000,000 of preferred.

Asbestos Corporation of Canada.—The Asbestos Corporation of Canada party, which visited the company's properties last week, comprised: Mr. W. G. Ross, president; Mr. H. E. Mitchell, of Philadelphia, vice-president; Mr. H. U. McCarter, of Newark; Mr. Thos. McDougall, Mr. H. J. Fuller and Dr. C. C. Colby, the complete board with the exception of Mr. William McMaster, who was unable to make the trip. Mr. R. P. Doucet, secretary-treasurer of the company, and Mr. Marshall, of London, a prominent shareholder, were also in the number.

On his return from the inspection of the Asbestos Corporation of Canada mines and plant, Mr. W. G. Ross, the president, said:—

"The directors are well satisfied with the inspection of the various properties and mills of the company, which are working satisfactorily. Some expenditure will be necessary to place them on a more effective and economical basis. This will be studied carefully, and no unnecessary money will be spent.

"The industry is a very important one for the province, and it is unfortunate that the various companies do not seem to realize that they are at present only the laborers of the foreign manufacturers. Prices are low and unremunerative, and the outlook in this respect is not encouraging. On the other hand, the demand for asbestos is increasing, and, as the knowledge of the valuable uses that asbestos can be put to, especially in the line of economical fireproof buildings and roofing is also increasing, there should be a rapidly growing demand for the material."

Illinois Traction Company.—The annual statement of the Illinois Traction Company for the year ended December 31st last shows that satisfactory progress has been made in all departments. The total earnings are reported at \$6,902,221, as against \$6,218,037 for the previous year, or an increase of close on \$685,000.

The net earnings for 1911 were \$2,768,580, as against \$2,552,409, or an increase of \$216,170. The fixed and other charges of the subsidiary companies amounted to \$1,885,221, leaving \$883,358, out of which \$318,276 was taken to pay four quarterly dividends on the preferred stock, leaving a surplus for the year of \$565,082.

The surplus account stood at December 31st, 1911, as follows:—

Balance brought forward from 1910.....	\$1,764,419 77
Net surplus for 1911	565,082 66

\$2,329,502 43

Appropriated for depreciation (in addition to \$762,864.01 charged to operating account for maintenance, renewals and betterments)	\$250,000 00
Bond discount of controlled companies	91,269 17

341,269 17

Balance carried forward for 1911..	\$1,988,233 26
--	----------------

The report also shows progress in connection with the different steam and traction services, while many improve-

ments and extensions have been carried out. The earnings of the street railway lines have shown steady improvement, while from the franchise point of view the company is in excellent order. Next to the Interurban, the electric lighting and power earnings show the largest increase for the year. In 1909, approximately 17½ per cent. of the company's gross earnings were derived from the electric lighting and power business, while in 1911, in spite of the increases in all other departments, the receipts from electric lighting and from power were 21.35 per cent. of the gross revenue.

During the year fixed charges increased \$348,534; this largely represents the interest on the investment made by the company in bridge and terminals into St. Louis and in the several belt lines for freight. These additions and improvements were turned over to the operating department either at the close of 1910 or early in the present year, and the interest for a full year on the securities issued has now been deducted from the net earnings for the first time. There has also been an increase in the dividend charges on the preferred stock of \$44,990. The increase in net earnings for 1911 over 1910 was not quite sufficient to absorb all of these additional charges of \$393,000, which accounts for a decrease in the year's surplus as compared with 1910, when this large interest sum was chargeable to construction account.

Fort William.	721,002	
--------------------	---------	-------

The head office of the Pennsylvania Mines Company, Limited, has been changed from Porcupine to Toronto.

The Merchants' Life and Casualty Company, of Minneapolis, Minn., has been licensed to do business in Manitoba.

Messrs. McDougall and Cowans, members of the Montreal Stock Exchange, will open a branch office in Vancouver.

Negotiations regarding the proposed purchase of the Dominion Power & Transmission Company, by Sir William Mackenzie has ceased at the instigation of the company's directors.

Articles of incorporation were filed at Pierre, S.D., for the Minneapolis, St. Louis and Canadian Railway with headquarters at Watertown, S.D., and officers in Minneapolis and New York. The road, which will extend to Canada, is capitalized at \$7,000,000. The incorporators are Messrs. L. C. Scott, W. G. Bied, G. W. Severs, W. W. Cole, of Minneapolis, and G. W. Case, of Watertown, South Dakota.

T. C. BOVILLE,

Deputy Minister of Finance

JUNE BANK STATEMENT

Total Deposits Again Exceed One Billion Dollars—Circulation Shows Substantial Increase

	June, 1911.	May, 1912.	June, 1912.	Year's Inc.	Month's Inc. or dec.
Deposits on demand	\$309,804,854	\$376,953,217	\$373,500,189	+ 20.5	— 0.9
Deposits after notice	564,867,554	625,294,344	631,317,687	+ 11.7	+ 0.9
Current loans in Canada	717,869,386	837,282,550	848,940,089	+ 18.2	+ 1.3
Current loans elsewhere	33,557,617	33,478,564	34,254,568	+ 2.0	+ 2.3
Call loans in Canada	61,507,268	68,305,157	68,701,855	+ 11.6	+ 0.5
Call loans elsewhere	97,865,400	115,832,736	120,569,812	+ 23.1	+ 4.0
Circulation	88,618,699	93,819,333	102,011,848	+ 15.1	+ 8.7

The above are the principal items and changes shown in statement made to the Dominion Government of the condition of the chartered banks during June. Every item exhibits a substantial increase over the figures of a year ago. With one exception, gains are also recorded over the accounts of a month ago, demand deposits showing the only decrease. The largest gain during the month was in circulation, which appreciated from \$93,800,000 to \$102,000,000, an expansion of about \$8,000,000, or 8.7 per cent. Call elsewhere than in Canada made a gain of \$5,000,000, or 4 per cent. The next largest increase was in current loans out of Canada, being a change of about \$1,000,000, or 2.3 per cent. Compared with the statistics of a year ago, demand deposits last June have increased \$64,000,000, or 20.5 per cent., and deposits after notice \$67,000,000, or 11.7 per cent. Domestic loans have also made large gains during the year, those current appreciating 18.2 per cent., and call, 11.6 per cent. Circulation was 15 per cent. greater than June, 1911. The course of the domestic loan account during the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1911—April	\$712,032,758	\$57,832,690
May	708,093,677	57,709,853
June	717,869,386	61,507,268
July	723,765,358	65,339,288
August	734,683,962	65,106,110
September	749,007,607	67,717,991
October	768,492,008	69,088,467
November	770,356,419	72,933,493
December	774,909,172	72,640,526
1912—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855

Current loans have made a steady gain, and only once within the thirteen months' period have they exhibited a decline. Call loans in Canada have shown a declining tendency seven times in the same period, although this item is 11.6 per cent. greater than a year ago. The growth of our bank loans, both in and out of Canada, during the past four years, is clearly shown in the following table:—

	June, 1908.
Current loans in Canada	\$534,523,592
Current elsewhere	22,386,034
Call in Canada	41,650,478
Call elsewhere	52,256,320

Current loans in Canada have steadily increased without exception during the four years' period. The figures have changed from 534 millions to 850 millions, a gain of 316 millions, or 59.1 per cent. Current loans out of Canada are \$4,000,000 smaller than in June, 1910, but since 1908 they have increased \$12,000,000, or 54.5 per cent. Call loans

in Canada in the four years' period have changed from \$41,000,000 to \$68,000,000, an increase of \$27,000,000, or 65.8 per cent. Call loans elsewhere than in the Dominion have more than doubled in the same time. The figures in June, 1908, were \$52,000,000, and last month \$120,000,000, an increase of \$68,000,000, or 130.7 per cent.

Here is a table showing the growth of the deposits account during the past thirteen months:—

	On demand.	After notice.
1911—April	\$281,964,369	\$555,822,930
May	298,784,206	562,209,148
June	309,804,854	564,867,554
July	316,973,780	570,780,435
August	311,111,668	575,740,956
September	313,584,893	577,591,045
October	331,953,562	586,451,045
November	341,712,265	588,942,142
December	335,020,693	591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	370,053,217	625,294,344
June	373,500,189	631,317,687

Demand deposits are 20.5 per cent. greater than a year ago. Four times during the thirteen months' period they have declined. Last month they decreased by about \$3,000,000, or 0.9 per cent. Deposits after notice have made consistent gains since April, 1911, and last month were 11.7 per cent. greater than in June, 1911. The increase during last June was about \$6,000,000, or 0.9 per cent. The remarkable growth of our chartered bank deposits during the past four years is shown in the following table:—

	On demand.	After notice.	Total.
June, 1908	\$161,218,037	\$399,285,738	\$560,503,775
1909	226,480,468	455,178,476	681,658,944
1910	263,417,539	534,432,054	797,849,593
1911	309,804,854	564,867,554	874,672,407
1912	373,500,189	631,317,687	1,004,817,876

Total deposits have practically doubled since 1908, having changed from \$560,000,000 to \$1,004,000,000. Total deposits reached the billion dollar mark for the first time

	June, 1909.	June, 1910.	June, 1911.	June, 1912.
June, 1909	\$535,212,269	\$649,145,920	\$717,869,386	\$849,940,089
June, 1910	33,403,171	38,171,443	33,557,617	34,254,560
June, 1911	52,617,696	61,598,958	61,507,268	68,701,855
June, 1912	115,254,868	130,173,902	97,865,400	120,569,812

last May. The June bank statement shows that this record has been maintained and bettered. Demand deposits have also more than doubled in the same period, changing from \$161,000,000 to \$373,000,000. Deposits after notice during the four years have changed from \$399,000,000 to \$631,000,000, a gain of \$232,000,000, or 58.1 per cent.

BANK OF SASKATCHEWAN'S BILLS

Mr. R. H. Fulton, general manager of the Bank of Saskatchewan, which will open in the early fall, has received samples of the new bank bills which the institution will issue. There are three denominations of bills—fives, tens and twenties.

The five-dollar bill on one side shows the Saskatchewan coat of arms and on the other side a picture of the harvest train passing through the prairie, and a number of steam ploughs at work.

The five-dollar bill on one side shows the Saskatchewan and railway yards and on the other side track gangs busily employed at the steam shovels. The twenty-dollar bills also show a railway gang at work. The feature of the prints on each denomination is that the picture is representative of Saskatchewan industry and the name "Moose Jaw" appears prominently on each bill.

UPWARD MOVEMENT IN PRICES

The advance in prices continued during June, the index number of the Department of Labor having advanced from 135.9 in May, the highest recorded, to 136.9 in June, as compared with 126.1 in June last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the ten years, 1890-1899, the period selected by the department as the standard of comparison throughout its investigation into wholesale prices of some two hundred and fifty commodities of representative character. The estimate of the department for the month of June, therefore, shows prices to have been nearly thirty-seven per cent. higher in that month than was the average for the decade 1890-1899. The chief increases during June were in animals and meats, fodders, fruits and vegetables, hides and leathers, there having been slight decreases in dairy products, prepared fish, sugars, coal and coke.

NEW COMPANIES

More Than Two Thousand Charters Issued This Year to Date—This Week's List

Company incorporation in Canada has been very active this year. During the first six months of 1912, 2,430 new companies were chartered with aggregate authorized capital of \$621,135,362. This compares with 3,320 new companies during the whole of 1911, when the total capital was \$1,148,544,783.

Nineteen million dollars represent the aggregate authorized capital stock of 113 new companies which have been granted either Dominion or provincial charters. Ontario, Quebec and Saskatchewan respectively claim the head offices of 22, 21 and 20 of these companies. The headquarters of 19 are to be in Alberta, 17 in Manitoba, 12 in British Columbia and 2 in New Brunswick.

The Canadian Western Natural Gas, Light, Heat and Power Company, of Calgary, has received an Alberta charter dated July 13th. Three large land companies have been incorporated, the Red Deer Investment Company, the Boulevard Realty Company, and the British Canadian Land Settlement Corporation. The first two are capitalized at \$1,000,000, and the last at \$2,000,000. Two have their head offices at Winnipeg and the other in the progressive Albertan town after which the company is named. The Lowndes Company of Toronto, with capital of \$1,000,000, will conduct a clothing establishment.

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Radville, Sask.**—Radville Agency, \$15,000.
Pense, Sask.—Pense Realty Company, \$20,000.
Battleford, Sask.—Battleford Curling Club, \$25,000.
Melville, Sask.—Central Saskatchewan Investments, \$100,000.
Burnaby Lake, B.C.—Burnaby Club Site Company, \$100,000.
Red Deer, Alta.—Red Deer Investment Company, \$1,000,000.
Fairlight, Sask.—Fairlight Village Telephone Company, \$1,000.
Viking, Alta.—Viking Realty & Development Company, \$10,000.
Sorel, Que.—Electro, \$20,000. S. Lunan, A. Lavallee, J. A. Wright.
Athabasca Landing, Alta.—Athabasca Natural Gas Company, \$300,000.
North Battleford, Sask.—North Battleford Brick Manufacturing Company, \$25,000.
Stickney, N.B.—Stickney Hall Company, \$1,000. H. Milbry, J. A. Drake, R. E. Hunter.
Doon, Ont.—Doon Twines, \$150,000. H. Krug, J. A. Scellen, Berlin; R. L. Defries, Toronto.
Renfrew, Ont.—Renfrew Hotel Company, \$75,000. M. J. O'Brien, J. E. H. Barnett, G. B. Ferguson.
Belleville, Ont.—John Lewis Company, \$30,000. Mrs. L. H. Lewis, Mrs. E. E. Wallbridge, C. F. Wallbridge.
Chapleau, Ont.—Macnamara Company, \$40,000. W. R. Macnamara, Chapleau; E. A. Lye, J. Harris, Toronto.
Danville, Que.—Moose Jaw & Montreal Investment Company, \$60,000. R. J. Cullen, E. J. Morrill, W. N. Paul.
Bowmanville, Ont.—Standard Development Company, \$100,000. C. H. M. Anderson, T. C. Roberts, B. E. Wood.
Buatoche, N.B.—Kent Freestone Company, \$10,000. J. D. Irving, Buatoche; F. N. Hall, F. W. Sumner, Moncton.
Hebertville Station, Que.—La Compagnie Hydraulique du Lac Saint Jean, \$200,000. J. L. Barbeau, J. E. Brassard, G. Guerard.
Brockville, Ont.—Canadian-Detroit Realty Company, \$40,000. W. T. Sampson, Mrs. P. Sampson, Gananoque; W. E. Brough, Brockville.
St. Georges de Beauce, Que.—Gagnon Lumber Company, \$49,900. Hon. E. E. Roberge, Lambton; A. Pacaud, St. Joseph; J. Gagnon, St. George.
Sherbrooke, Que.—Columbian Sites, \$50,000. D. O. E. Denault, A. C. Demers, L. Forest. Belmont Real Estate Company, \$50,000. J. W. Gregoire, B. A. Dugal, A. Gendron.
Regina, Sask.—Walker Knisley Woods Company, \$100,000. Petch Barber Company, \$10,000. Regina Real Estate Board, \$50,000. William Grant Grain Company, \$100,000.
Victoria, B.C.—Nanaimo Properties Company, \$50,000. Building & Finance, \$50,000. Sands & Fulton, \$10,000. Ten Acre Farms (Shawinigan), \$30,000. Hayward & Dods, \$75,000.
Saskatoon, Sask.—Concrete and Supply Company, \$25,000. Stepney Securities, \$100,000. Christ Church Hall Company, \$20,000. Enterprise Realty Company, \$50,000. Saskatchewan Cement Products, \$150,000.
St. Catharines, Ont.—Ritter Illuminating & Manufacturing Company, \$75,000. H. K. Ritter, Niagara Falls; C.

Kmentt, G. B. Burson, St. Catharines. Peninsular Construction Company, \$400,000. A. W. Marquis, W. M. Marquis, Miss M. G. T. Sullivan.

Moose Jaw, Sask.—Southern Elevator Company, \$100,000. Dominion Electrical Manufacturing Company, \$20,000. Coalville Realty Company, \$25,000. Moose Jaw Club Building Company, \$50,000. Moose Jaw Distributing Company, \$100,000.

Vancouver, B.C.—Barr & Anderson, \$150,000. Vancouver Development Company, \$300,000. Little Chief Mining Company, \$15,000. Industrial Trust Company, \$100,000. Ricketts, Taschereau & Company, \$50,000. Terminal Electrical Company, \$10,000.

Calgary, Alta.—Carrigan Gate Company, \$30,000. Western Iron Manufacturers, \$100,000. Atlas Investment Company, \$36,000. Canadian Western Natural Gas, Light, Heat & Power Company of Calgary, \$2,000,000. Victoria Square Development Company, \$500,000. Kensington, \$240,000.

Edmonton, Alta.—Brewster & Moore, \$12,000. Scotts Builders, \$10,000. Namayo Investment Company, \$50,000. Central Alberta Loan and Building Company, \$50,000. Dunvegan Development Company, \$15,000. Western Amusement Company, \$150,000. Duggan Building & Investment Company, \$100,000. Port McMurray Registered Townsite Company, \$20,000. North-West Fidelity Trust Company, \$100,000.

Toronto.—W. R. Boyle, \$60,000. J. B. Holden, G. A. Grover, W. R. Boyle. Olympic Powder Company, \$100,000. G. G. Ruel, R. H. M. Temple, S. P. Biggs. Union Brick Company, \$350,000. E. C. Hill, G. W. Monk, G. P. Magann. Interprovincial Concrete Construction Company, \$40,000. J. R. Johnston, H. Douglas, W. J. Tubman. Toronto Developments, \$300,000. A. D. Parker, W. H. Clipsham, L. S. Cuddy. Provincial Estates, \$40,000. J. C. Stevenson, H. H. Lang, G. W. Clawson. Canada Moving Pictures, \$40,000. J. E. Day, E. V. O'Sullivan, J. M. Adam. Summer Homes, \$40,000. A. C. Thompson, G. A. Conlan, F. R. James. Sterling Neckwear Company, \$40,000. H. A. Newman, N. Sommerville, J. E. Jones. Toronto Concrete Building Company, \$40,000. J. B. Bartram, W. J. Tubman, D. R. Leask. Moore's, \$40,000. W. P. Moore, W. J. Power, F. A. N. Powell. Brighton Laundry, \$50,000. J. Poffley, G. H. Dyer, H. Adams. Lowndes Company, \$1,000,000. E. N. Armour, C. W. Mitchell, W. Kelly, Granite Brick & Tile Company, \$200,000. W. J. Henry, F. R. Peharriell, M. P. Cameron.

Montreal.—General Chemical Produce and Explosive Company, \$500,000. E. Hess, E. Bertrand, H. Bonneau. Peerless Heater Company, \$100,000. G. L. Alexander, L. J. M. Dugas, S. H. R. Bush. Model City Annex Company, \$250,000. E. Senecal, T. R. Gains, R. DeSerres. Progressive Publicity Agency, \$15,000. H. Gerin-Lajoie, T. J. Shallow, P. Lacoste. Electra Company, \$50,000. P. J. Lorrain, H. C. McNeil, L. Garneau. Grier Timber Company, \$100,000. F. G. Bush, G. R. Drennan, H. W. Jackson. Brodeur Company, \$500,000. A. N. Brodeur, P. J. Lorrain, G. Bourbonnais. Winnipeg Northern Realities, \$950,000. A. R. McMaster, W. J. S. McMaster, C. W. Taylor. Abenakis Springs Company, \$450,000. H. J. Elliott, G. L. Alexander, L. J. M. Dugas. WESTERN GRAIN STATISTICS

Blue Book Figures Tell an Interesting Story—Lake Shipments—Number of Elevators

The grain statistics just published by the Department of Trade and Commerce are full of interest but its extraction involves a close study of more than a hundred pages of facts and figures, mostly figures. The statistics include those for the crop year ended August 31st, 1911, and of the navigation season ended December 6th, 1911. The statement showing the quantity of wheat and other grain inspected gives a total of 125,000,000 bushels, inspected during the year 1910-11, of which nearly 87,000,000 bushels were wheat. The eastern inspection division comprises the following points:—Kingston, Peterborough, Toronto and Montreal. The inspection may be conveniently summarized as follows:

Grades.	Eastern Inspection Division. Bush.	Manitoba Inspection Division. Bush.	Grand Total. Bush.
Wheat	1,356,635	85,611,090	86,967,725
Corn	3,211,938		3,211,938
Oats	1,336,341	26,389,100	27,725,441
Buckwheat	691,391		691,391
Barley	422,283	2,726,400	3,148,683
Rye	93,896	16,800	110,696
Flaxseed		3,463,000	3,463,000
Peas	142,483		142,483
Total grain, 1910-11 ..	7,254,967	118,206,390	125,461,357

Grain Weighed in West.

The inspection fees amounted to \$98,301. The total grain weighed in the Manitoba Inspection Division last year was divided as follows; the weighing fees amounting to \$57,-235:

	Bushels.
Wheat	57,258,113
Oats	16,276,582
Screenings	224,284
Barley	1,598,432
Rye	1,586
Flaxseed	3,087,591
Totals	78,446,588

The total grain weighed in the Eastern Inspection Division was as follows, the fees therefor being \$4,036:

	Bushels.
Wheat	7,886,537
Indian Corn	934,654
Oats	6,791,281
Barley	360,431
Flaxseed	266,986
Totals	16,239,889

Elevators in Operation.

The following table shows the number of grain elevators in operation in the Western grain inspection division and their capacity:—

	1910-11.	Capacity in Bushels.
	No.	
Public country elevators	1,998	62,114,500
Warehouses	31	
Terminal elevators and milling elevators	18	27,400,400
Totals	2,047	89,514,900

There were 2,016 elevators operated under license together with 31 warehouses. This was an increase of 130 elevators and warehouses over the previous year. The total storage capacity was 89,514,900 bushels. In 1901 there were only 426 elevators and 97 warehouses, with a total capacity of about 19,000,000 bushels.

Here is an interesting table showing the lines of railways on which the elevators and warehouses are operated with the number and capacity of each road:

	1911-12.	Capacity. Bushels.
	No. of Elevators & Warehouses.	
C.P.R.—Manitoba	437	15,113,700
Saskatchewan	616	18,157,500
Alberta	236	8,114,000
British Columbia	7	422,000

	1911-12.	Capacity. Bushels.
	No. of Elevators & Warehouses.	
C.N.R.—Manitoba	227	5,797,800
Saskatchewan	281	7,716,500
Alberta	37	1,154,000
G.T.P.—Manitoba	26	779,000
Saskatchewan	115	3,440,000
Alberta	20	595,000
G.N.R.—Manitoba	25	720,000
British Columbia	1	65,000
C.P.R.—Ontario Terminals and Ontario milling elevators	13	15,585,400
Ontario country elevator	1	40,000
C.N.R.	4	8,565,000
G.T.P.	1	3,250,000
Totals, Western Division	2,047	89,514,900

Eastern Transfer Elevators.—

C.P.R.—Ontario	4	4,035,000
G.T.R.—Ontario	11	10,600,000
C.P.R.—Quebec	3	2,500,000
C.P.R.—New Brunswick	1	1,000,000
I.C.R.—New Brunswick	1	500,000
I.C.R.—Nova Scotia	1	500,000
Totals, Transfer Elevators Eastern Division	21	19,135,000
Grand Totals	2,068	108,649,900

Licenses Issued in West.

More than 2,000 licenses were issued in the Western grain inspection division last year, divided as follows:

Kind of License	1911-12.
Elevators and warehouses	1,972
Terminals and transfer elevators	34
Space in elevators	58
Commission merchants	84
Track buyers	123
Not licensed	26
Totals	2,297

About 120 elevators and warehouses were not operated at all last year on account of the short crop in certain districts. The following table shows the total number of bushels of the various kinds of grain marketed, the proportion which was handled by the country elevators and also the proportion shipped direct over the loading platform:

Grain.	Shipped through Elevators.	Shipped over Loading Platform.	Inspected at Winnipeg.	Total Marketed.
Wheat	70,913,452	16,905,498	87,618,950	87,818,950
Oats	30,069,271	7,781,829	26,351,100	37,851,100
Barley	1,589,257	965,543	2,554,800	2,554,800
Flax	2,588,743	627,257	3,216,000	3,216,000
Total ..	105,160,723	26,280,127	119,740,850	131,440,850
			*11,700,000	

*Shipped locally, not inspected.

The total oats shipments both from country elevators and over the loading platform amounted to 37,851,100 bushels, and of this quantity only 26,351,100 bushels were inspected; that is to say 11,500,000 bushels were shipped from one district where there was a surplus of oats to another district where there had been a total or partial oat failure—due to drought. Many of the districts in southern Manitoba, Saskatchewan and Alberta had to purchase not only their seed oats but their feed as well.

Yield per Acre.

Owing to drought prevailing, especially in the southern districts of the three Western Provinces, during the growing season of 1910 it was impossible to approximate with any degree of accuracy what the yield per acre would be.

The wheat yield was variously estimated as high as 120,-000,000 bushels during the earlier stages of the season to as low as 75,000,000 and 80,000,000 bushels at harvest time.

The following table, however, discloses the actual results of the wheat crop at the close of the season:—

Wheat situation, August 31st, 1911—Final report for crop of 1910.

Inspected to date—81,506 cars at 1,075

	Bushels.
bushels each	87,618,950
In store—interior elevators	1,717,700
In transit—not inspected	140,000
Marketed at Winnipeg—not inspected	200,000
Total marketed during the year	89,676,650
Allowance for seed	20,000,000
Allowance for feed and local mills ...	7,000,000
	27,000,000
	116,676,650
Estimated balance in farmers' hands (say)	1,000,000
	117,676,650

As to Lake Shipments.

The following summary shows the proportion of the lake shipments to Canadian and American ports, for crop year ended August 31, 1911:—

			Percentage.
Wheat	23,748,619	bus...U.S. ports	38.5
	37,917,756	" ...Canadian ports	61.5
Total wheat.	61,666,375	"	
Oats	 1,009,291	bus...U.S. vessels to U.S. ports.	
	103,819	" ...Canadian vessels to U.S. ports.	
	1,113,110	" ...U.S. ports	 5.7
	18,375,319	" ...Canadian ports	94.3
Total oats	..19,488,429	"	
Barley	 458,291	bus...U.S. vessels to U.S. ports.	
	195,000	" ...Canadian vessels to U.S. ports.	
	653,291	" ...U.S. ports	43.
	865,600	" ...Canadian ports	57.
Total barley.	1,518,891	"	
Flax	 1,911,867	" ...U.S. vessels.	
	*172,000	" ...Canadian vessels to U.S. ports.	
	2,083,867	bus...U.S. ports	80.9
	489,616	" ...Canadian ports	19.1
Total flax	... 2,573,483		

*Not including flax screenings, 2,697 bushels.

The percentage of shipments ex Fort William and Port Arthur terminals to American ports has been steadily increasing during the last four or five years, when they received from us about twenty per cent. of the wheat crop and only a nominal percentage of the other kinds of grain. No doubt the Milling-in-bond-in-transit privilege given by the States will account, to a considerable extent, for the increase during the past two years; also the lower freight rates via American ports American sea-board which prevailed on occasions during the year.

SUCCESSFUL CROP GROWING

An address was delivered by Mr. J. H. Grisdale, director of experimental farms, during the past session of parliament before the standing committee of the senate on agriculture and colonization, which well covers the subject of successful crop growing. This has been embodied in a pamphlet of thirteen pages which is available to all who apply for it to the Publications Branch, Department of Agriculture, Ottawa. Soil function, requirements of crops, rotation, cultivation, moisture, warmth, plant food, cultural operations and implements, are all well dealt with. Under crop rotations seven are described and explained. The three year rotation—hoed crop, grain, hay—is highly recommended, more especially for farms that have considerable areas of rough land fit for pasture, but not available for crop production. Farms that are mostly arable are better served by a four year course which adds one year's pasture to the three year rotation mentioned. Any of the seven rotations, described if carefully followed and the cultural operations therewith performed at the right time and in the right way, are claimed by the author, to increase tremendously the crop production of any given farm and at the same time increase but slightly, if at all, the cost of production.

HIGH COMMODITY PRICES

Effect of Over-Production of Gold—Some Important Considerations

The effect of the over-production of gold on the prices of commodities is estimated as follows by Mr. Bryan W. Holt, an authority in the United States:—

1. Both the output and supply of gold are likely to increase rapidly for many years.
2. Therefore the value of gold will depreciate as the quantity increases.
3. This depreciation will be measured by the rise and fall of the average price level.
4. A rising price level, if long continued, is accompanied by rising or high interest rates.
5. High interest rates mean low prices for bonds and all other long-time obligations drawing fixed rates of interest, dividends or income.

Decrease Net Profits.

6. Rising prices increase the cost of materials and of operation, and tend to decrease the net profits of all concerns, the price of whose products cannot be advanced at all or are not free to advance rapidly.

7. Rising prices tend to increase the net profits of all concerns that own their own sources of materials and supplies.

8. Rising prices of commodities tend to cause the prices of all tangible property to rise. This includes lands, mines, forests, buildings and improvements.

Increase Values of Securities.

9. Rising prices of commodities and property tend to increase the values of securities of corporations holding commodities or property.

10. Rising prices and cost of living necessitate higher wages, though the rise of wages will follow at some distance behind the rise of prices.

11. As rising prices do not mean increased profits to all concerns, many employers will not concede higher wages without strikes.

12. Rising prices and wages mean dwindling profits and troublous times in many industries, with complete ruin as the final goal.

Wages Will Not Rise as Fast.

13. Because wages will not rise as fast or as much as prices and the cost of living, there will be dissatisfaction and unrest among wage and salary earners.

14. Rising prices of commodities and property encourage speculation in commodities, stocks and real estate and discourage honest industry.

15. Rising prices, by diminishing the income of "safe" investments in "gilt-edged" bonds and stocks and by increasing the profits of speculation encourage extravagance, recklessness and thriftlessness.

16. As rising prices decrease the purchasing power of debts, and thus aid debtors at the expense of creditors, they discourage thrift.

Speculation and Extravagance.

17. Rising prices, by promoting speculation and extravagance, increase consumption, especially of luxuries, and, therefore, stimulate production.

18. Rising prices result in what is real prosperity for many industries, but what is for a nation as a whole artificial or sham prosperity—the result of marking up prices rather than of increasing production.

19. With prices, wages, rates and industries always imperfectly adjusted to the ever-depreciating value of gold, and with instability and uncertainty throughout the financial world, there cannot but be a great shifting around of values and of titles to property.

Depreciating Standard of Values.

20. As this shifting is to the advantage of the debtors—the rich—and the disadvantage of creditors—the great middle class—it results in rapidly concentrating wealth in the hands of the few.

21. For all these reasons a prolonged period of rapidly rising prices is reasonably certain to become a period of unrest, discontent, agitation, strikes, riots, rebellions and wars.

22. A rapidly depreciating standard of values, if long continued, not only produces the most important results in the financial, industrial and commercial world, but is likely to result in changes of great consequence in the political, social, and religious world.

Serious allegations have been laid before Hon. J. J. Foy, attorney-general for Ontario, relative to threats said to have been used on a material witness in the Farmers Bank investigation by an officer of the Toronto detective department. An inquiry into this matter will probably be held in September.

TORONTO COULD NOT FLOAT LOAN

City Has Had to Place Treasury Bills at Four and a Half Per Cent.—Notes of the Market

The pilgrimage of City Treasurer Coady and Mayor Geary to London for a loan of several million dollars has been followed with interest. On Wednesday a cable message was received stating that these representatives had been unable to dispose of the city's four per cent. debentures. This announcement was expected in well posted financial quarters in Canada. A London bank suggested a price of about 91 for the bonds, subject to market approval. The market absolutely declined to take a long dated loan at any price. The city was then obliged to place \$6,000,000 twelve months' treasury bills at 4½ per cent.

Toronto Refused Good Offers.

The city of Toronto during the past few months refused several attractive offers made by local bond houses, attractive in view of general market conditions. Those refusals are probably regretted now. At least 3 points higher than offered by the London bank this week could have been obtained had one or other of the offers been taken.

State of the London market for Canadian municipals. In June, 1909, Toronto placed £394,100 4 per cent. general consolidated.

In June, 1909, Toronto placed £394,100 4 per cent. general consolidated debentures at 102½.

A Canadian Associated Press cable says that the general investment market in London is practically unparalleled in the history of that market.

Regarding high-class stocks generally, and the Canadian and Provincial Government stocks and municipal stocks in particular, the outlook is highly unsatisfactory. It is only fair to add that Canada has only partially contributed towards the present state of affairs. It is thought that borrowing will be postponed in expectation of getting better terms.

The Canadian Northern Railway loan guaranteed by the Government constituted a blow which was the last straw. That security stands at a discount of from four and a half to five per cent. after allowing for interest.

Halifax Bonds go to Boston.

Last week, for the first time in many months, a United States financial house made a bid for Canadian municipals. Messrs. N. W. Harris and Company, of Boston, purchased a block of \$352,700 4% debentures maturing in 1945 of the city of Halifax. The price was 93.32 and the next highest offer was 91.75. The remaining bid was 90.02. The securities are being issued for new market building, improvement of city prison, sewer construction, new ladder truck, garbage incinerator, street widening and reservoir construction. Mr. W. L. Brown is the city treasurer.

Western View of Market.

Mr. F. J. James, of Nay and James, Regina, who has just returned to the Saskatchewan capital from a visit to eastern Canada, has some good advice for Canadian municipalities. "It seems," he says, "that a large number of municipalities, more or less important, are borrowing this year with the result that it is going to be exceedingly difficult to meet the demand. At present there are in the east cities holding in the aggregate many millions in debentures awaiting to be put on the market and, while the market is in its present stage, we cannot hope for much improvement."

"Our advice to municipalities, both high or low in the grade, is to borrow as little as they can and, if possible, to defer marketing issues until at least next season. We find that all over the east development is going on to a very marked extent and it has taken large sum of money to look after the requirements of the east which, hitherto, has not been borrowing to anything like the extent of the west in proportion to population. We are not, by any means, looking for a panic, but we do believe that the practice of economy at this time is very desirable. The chartered banks are doing all they possibly can, but even the large institutions we have, which compare very favorably with similar institutions on this continent, have their limitations."

Lethbridge Bonds for Sale.

Lethbridge has about \$750,000 debentures for sale, and will dispose of them as soon as the market improves. The city has no fiscal agent, preferring the open market.

Six Toronto bond firms bid for the \$30,000 4½ per cent. 30-year waterworks debentures of Brampton, Ont. As previously noted, the award was made to Messrs. C. H. Burgess and Company.

Macleod, Alberta, town council has voted in favor of securing money for its municipal purposes and street improvements from the town lots account and repaying from the income just as debenture interest, and not by direct taxation. Macleod owns its townsite valued at \$4,000,000. The present rate of taxation is 13 mills which it is hoped to

reduce by one-half following the adoption of this scheme which is of a decidedly distinctive nature among the varied courses of municipal financing.

Five bids were made for the \$160,000 4½ per cent. 40-year sidewalk debentures of Moncton, N.B. As previously noted, the offer of the Montreal City and District Savings Bank, Montreal, was accepted.

RAILWAY BONDS SOLD

Pacific Great Eastern Issue Was Successful—Bell Telephone Financing

The issue of bonds for the Pacific Great Eastern Railway, which are guaranteed by the British Columbia Government, has been a success. This railway is being built in agreement with the Grand Trunk Pacific to give connection between Vancouver and the Grand Trunk Pacific at Fort George. Before the autumn 4,000 men will be at work on it, and the line should be completed in two years' time or simultaneously with the completion of the Grand Trunk Pacific into Prince Rupert.

Decline of Consols.

Consols declined on Tuesday on the London Stock Exchange to the new low figure of 73¼. The increased expenditure foreshadowed in the speech on the supplementary appropriation for the British navy made by Mr. Winston Spencer Churchill, First Lord of the Admiralty, in the House of Commons was the immediate cause of the fall, but consols at present have very few friends, and any attempt to put on the market even a small block is a signal for a decline in the price.

Of the purchase of \$1,750,000 5 per cent. bonds of the Bell Telephone Company on joint account by the Royal Securities Corporation, Limited, and Lee, Higginson and Company, \$750,000 have been issued. Of that amount, one-half was placed in the United States and the other half was absorbed by Canadian investors. The balance of the issue will be placed in the market about the end of September.

British Maritime Trust.

Applications were invited in London recently as previously noted in The Monetary Times, for an issue of £500,000 5 per cent. first debentures of £100 each at par and 35,000 shares of £5 each at a premium of 5s. per share, in the British Maritime Trust, Limited, a company controlled by Messrs. Furness, Withy and Company, Limited. It is pointed out that the business is of the broadest character and "in the geographical distribution of its capital it takes specially into account the prospects of continuity in earning power." The board has been directing its attention for some time past to the vast developments taking place in Canada, which have led to a large demand for capital. Through its association with Furness, Withy and Company, Limited, the Trust commands a Canadian organization of long standing "in touch with projected enterprises of every kind, and in a position to gain at first hand all essential information relating thereto." The recent issue was accordingly made mainly for the purpose of taking advantage of Canadian business already arranged for and additional business for which negotiations are pending. During the past 12 years, in addition to a regular dividend of 5 per cent. per annum, bonuses totalling 12½ per cent. have been distributed, giving an average yearly return of over 6 per cent. The debentures are redeemable at the rate of £20,000 per annum, commencing July 1, 1917, by drawings at 105 or by purchase at or below that price, and each holder of debentures will have the option of exchanging the whole or any part for shares, on the basis of the par value of both securities at any time up to December 31, 1914.

British and General Debenture Trust.

The British and General Debenture Trust, Limited, which recently made an issue in London of 200,000 shares of £1 each at par, was formed with a capital of £300,000 to act as an investment trust company, and to take over from the Canadian and General Trust, Limited, securities valued at the lowest market prices on July 4, at £140.652. The purchase price is £140,542 in cash, payable by instalments with interest at 5 per cent. One of the directors of the British and General Debenture Trust, Limited, is a director of the Canadian and General Trust, Limited, and holds three-fourths of its issued capital. The present annual income from the bonds and debentures acquired is given as £8,409, which "after paying working expenses is sufficient to assure minimum dividends from this source alone of 5 per cent. per annum on the whole of the capital at present called up in respect of the shares now offered for subscription." No promotion money is to be paid in respect of the issue, and the whole of the proceeds, after payment of the consideration for the bonds and debentures acquired, will be available in

cash for working capital and the general purposes of the company. It should have been stated how much the amount paid by the Canadian and General Trust, Limited, for the securities which it is selling to the British and General Debenture Trust, Limited. Allottees are entitled to an option carrying the right to subscribe at any time before October 15, 1912, at the price of £1 2s. 6d. per cent. per share for one share of the Company in respect of each complete four shares allotted.

The company's Canadian advisory board is composed of Hon. Colin Campbell, K.C., M.P.P., Messrs. R. B. Bennet, K.C., M.P., A. E. Mathews, and C. J. McCuaig.

Dominion Bond Company's Office.

The Dominion Bond Company is opening another branch office, this time at Vancouver, in the Rogers Building. Mr. W. F. Irwin, who visited Toronto this week, will be in charge. The action of the Dominion Bond Company in thus strengthening its Pacific Coast connections will be appreciated, and particularly by its Western clients.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Suffield, Alta.—Mr. L. Welsford's residence. Loss and origin unknown.

Attercliffe, Ont.—Mr. J. Black's outbuildings. Loss, \$3,000. Origin unknown.

Marmora, Ont.—June 22.—Mr. W. Smith's barn. Loss unknown. Origin, lightning.

London, Ont.—July 19.—Toasted corn flake factory. Loss, \$400. Origin, overheated oven.

Windsor, Ont.—July 24.—Mr. W. J. Pulling's residence. Loss, \$1,500. Origin, lightning.

Sarnia, Ont.—July 24.—Hotel Northern barn damaged. Loss, unknown. Origin, supposed incendiary.

Picton, Ont.—July 18.—Mr. M. Miller's motor boat. Loss, \$1,500. Origin, supposed engine back-fired.

Westville, N.S.—Briquette plant on Mackay Mine. Loss, \$25,000. Insurance, \$10,000. Origin unknown.

St. Andrew's, N.B.—July 21.—Sir Thomas Shaughnessy's gas-house destroyed. Loss and origin unknown.

Port Dalhousie, Ont.—July 21.—Mr. Allerthorn Dyke's residence. Loss, unknown. Origin, explosion of gasoline stove.

Dundas, Ont.—July 26.—Messrs. Jones Bros.' factory. Loss, \$30,000. Origin unknown. Fireman J. Smith was killed.

Port Hope, Ont.—July 23.—Mr. L. E. Hall's planing mill, Queen Street. Loss, \$1,500. Insured with Gore Mutual.

Chatham, N.B.—July 22.—Mr. J. Lino's residence, Little Branch. Loss unknown; no insurance. Origin, defective flue.

Halifax, N.S.—July 22.—140 Lockman Street, origin, children playing with matches; 44 Summer Street, origin, sparks; 268 Upper Water Street, origin, sparks. Loss small.

Welland, Ont.—July 19.—Mr. G. Rogers' residence. Loss, \$400. Origin unknown. July 21.—Welland Laundry destroyed. Loss unknown. Insurance: Building, Commercial Union, \$2,000. Furniture insured with Monarch Company, \$200.

Morse, Sask.—July 19.—The Elkhorn Hotel, McDonald's livery barn, Stevens' barn and several other smaller buildings were destroyed. The hotel, which was valued at \$60,000, was the heaviest loss. Total loss and origin not known.

Toronto, Ont.—July 19.—University schools damaged. Loss, \$725. Origin unknown.

July 21.—Mrs. R. Benner's residence. Loss, \$2,700. Origin, upset lamp.

July 24.—Street car. Loss, \$25. Origin unknown.

Montreal, Que.—July 20.—Messrs. Stimpson, Reed Company's premises. Loss, \$30,000. Origin unknown.

July 23.—Sovereign Lime Works. Loss, \$75,000; no insurance. Origin unknown.

July 24.—Corner Green Avenue and Delisle Street. Loss and origin unknown.

Ottawa, Ont.—July 20.—Miss Rowan's frame house; loss, \$1,000; origin, unknown. Mrs. Verreault's residence, 255 Wilbrod Street; loss, unknown; origin, painter's blow-lamp exploded. Mr. R. Caya's residence, 80 Springhurst Avenue; loss, \$400; origin, unknown. Mr. E. Gaubau, 307 St. Andrew Street; loss, \$25; origin, unknown.

Vancouver, B.C.—July 21.—West side of Main Street practically destroyed. Loss estimated at \$1,500,000, including Messrs. Champion & White, dealers in all kinds of builders' supplies, five-story brick block, warehouses and wharves, \$200,000; reported to be more than half covered by insurance. Canada Malleable Range Company, loss in stoves and office furniture; estimated loss, \$10,000. Palmer Bros. & Henning, contractors, office furniture; estimated loss, between \$1,000 and \$2,000. Palmer Bros.,

damaged buildings, fronting on Main Street, and occupied by Canada Malleable Range Company, Palmer Bros. & Henning, Angelus Rooms, warehouses at rear, occupied by Champion & White, Palmer Bros. & Henning and Commercial Motors, Limited; estimated loss, \$30,000. Commercial Motors, Limited, loss in forty-nine motor cars and garage; estimated loss, \$108,000. Angelus Rooms, furniture damaged by water and fire; estimated, \$3,000. Royal George Hotel, furniture damaged by fire and water; estimated, \$1,500. Far West Lumber Company, loss in lumber burned; estimated, \$15,000. British Columbia Electric Railway Company, paint shop on Prior Street destroyed with contents and one street car damaged by fire; estimated loss, \$10,000. Tudhope Motors, Limited, one automobile damaged; estimated loss, \$2,000. Origin, doubtful.

ADDITIONAL INFORMATION CONCERNING RECENT FIRES

Montreal, Que.—July 3.—Messrs. Morine Freres' loss was \$160; insured with the Liverpool, London and Globe Company.

Kenora, Ont.—June 29.—Rat Portage Lumber Company. Loss on stock, \$450; machinery, \$75,000; buildings, \$25,000; total loss, \$100,450. Insured with Lloyds', London: Buildings, \$15,000; machinery, \$41,500; total insurance, \$56,500.

Welland, Ont.—Welland Sanitary Laundry, building owned by Mr. L. V. Garner, loss probably \$1,500, insurance \$2,000 with Commercial Insurance Company; Machinery Laundry Company, loss, machinery, about \$1,000, insurance \$2,500, stock \$100; Mr. J. Clark's furniture, etc., insurance \$300, with Monarch Insurance Company.

Vancouver, B.C.—July 20.—Main Street conflagration. Adjusters J. S. Rankin, Vancouver, and G. Main, Seattle, are adjusting the large loss incurred. The Monetary Times has secured the following particulars: Messrs. Champion & White, loss, building \$35,000, insurance \$15,000, stock \$169,000, insurance \$60,000; Canada Malleable Company, loss \$8,000, insurance \$2,700; Balfour Guthrie, loss \$15,000, insurance \$13,000; Royal George Hotel building, loss \$48,000, furniture \$500, insurance \$10,000; A B C Motor Company, loss \$6,000, insurance \$4,100 (motors stored with this concern were privately owned, loss \$100,000, insurance about \$40,000); Far West Lumber Company, loss \$7,500, insurance \$5,000; Mr. W. H. Perley, loss \$500, insurance \$1,000; Palmer Land and Investment Company, owners Angelus rooming-house, loss \$5,000, insurance \$14,000, furniture otherwise owned, policy lapsed some days previously; Palmer Land and Investment Company, three frame buildings, loss \$12,000, insurance \$6,000; Mr. E. C. Gibbs, machine shop, loss \$3,500, insurance \$1,000; wharves, \$10,000, no insurance.

DEBENTURES AWARDED.

Vibank, Sask.—\$500 8% 1914, to Mr. J. O. O'Brien.

Medicine Hat, Alta.—\$200,000 to Messrs. Wood, Gundy and Company, Toronto.

Belleville, Ont.—\$13,000 5 per cent. 20-years, to Ontario Securities Company, Toronto.

Halifax, N.S.—\$352,700 4 per cent. 33 years, to Messrs. N. W. Harris and Company, Boston.

Wallaceburg, Ont.—\$40,000 5 per cent. 15 instalments, to Messrs. C. H. Burgess and Company, Toronto.

Saskatchewan, Alberta and Manitoba.—\$14,200 6 per cent. 10 and 20 instalment debentures, to H. O'Hara and Company, Winnipeg.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, July 17th, 1912.

FRATERNAL INSURANCE

Requirements of Colorado's New Law—Societies are Meeting Situation—Setting Houses in Order Regarding Rates, etc.

Since the enactment of the so-called "Mobile Bill" by the eighteenth general assembly of Colorado, which is an act for the regulation and control of fraternal benefit societies, and which became effective April 1st, 1912, a great deal of confusion has arisen within the ranks of the people carrying fraternal insurance, extending even to the officials of some societies, and with a view of setting at rest this disquietude, Mr. W. L. C. Clayton, insurance commissioner of the State of Colorado, has issued a bulletin which remarks on the inadequacy of fraternal rates of some few years ago, and consequent lack of provisions to insure the future security of fraternal insurance. It was realized that rates which only contemplated meeting obligations as they arise from day to day, or from year to year, were grossly inadequate. The urgent necessity was realized for establishing a minimum standard of fraternal insurance; rates that would permit proper reserves, based on the actual mortality experience, to be accumulated to protect the death certificates and insure their payment when due.

Five years ago, Actuary Abb Landis wrote:

"The officials of the largest and oldest of the American societies have manifested a desire to maintain the first conceptions of fraternal co-operation by confining themselves to the protection of the home, at the same time evincing a determination to so adjust the contributions of the members to the risks of protection as to remove the defect of placing them in the category of uncertain and unscientific charitable donations."

Uniform Terms and Requirements Agreed Upon.

The result of this nation-wide agitation was that in the year 1910, at Mobile, Alabama, during the meeting of the National Insurance Commissioners' Convention, which was attended by representatives from the National Fraternal Congress, also the Associated Congress, the uniform terms and requirements of the Mobile Bill were agreed upon. Since that time approximately one-third of the states of the Union have placed this act on their statute books, and we venture the prediction that all states will adopt this law within the next few years. Colorado fell into line in 1911.

With the view of helping both officers and members to a better understanding of this new legislation, the bulletin gives the following summary of requirements of the act, and explanation of rates as compiled by Actuary Upton.

Under the new fraternal law all fraternal societies admitted to do business in Colorado must observe the following: 1, Must have lodge system; 2, must have representative form of government; 3, must provide for death benefits; 4, must invest funds in same securities as a legal reserve life insurance company, except that a company organized outside of Colorado may invest in securities in accordance with the laws of its home state; 5, must issue certificates specifying the amount of benefits. (Members must accept laws of their society as binding on them, whether enacted before or after issue of their certificate); 6, must report annually to insurance department; 7, must value all certificates annually beginning December 21, 1912, but the reserve as determined by such valuation need not be entered as a liability in the annual statements or considered as a test of solvency, but statement of its reserve so determined must be furnished each member; 8, must submit to examination by department, and pay cost of same.

Admitted Assets Must Exceed 90% of Reserve.

9, Must appoint commissioner of insurance as attorney for service of process; 10, must have on December 31, 1917, admitted assets amounting to at least 90% of the reserve after providing for all other liabilities; 11, must not offer withdrawal equities (except old age benefits beginning at age 70 or later) unless a showing is made that a reserve is accumulated and maintained on a basis not less than that required by American Experience table of mortality and interest at 4% per annum; 12, must not use any portion of mortuary contributions for expense purposes; 13, must not admit members under 16 nor above 60 years of age; 14, must not omit from the statement of liabilities the present value of future installments where death benefits are paid in monthly or other installments; 15, must not issue certificates to beneficiaries other than immediate relative or some person really dependent on the member; 16, must not merge with another society or transfer members or funds without the approval of the commissioner of insurance. A society not previously admitted, must conform to all of the requirements heretofore given and in addition must charge contributions or assessments on a basis not less than that of National Fraternal Congress table and interest at 4% per annum.

The commissioner of insurance is bound by the following requirements: 1, Must relicense societies already admitted on payment of annual fee of \$50.00, so long as they comply with conditions recited numbered one to sixteen (1-16); 2, must refuse license to societies which do not comply; 3, must not during or after an examination make public any financial statement, report or finding until copy of same has been furnished the officers of the society and an opportunity given them to make answer; 4, must examine all societies at least once each 3 years. These, in the main, are the requirements and prohibitions on societies and commissioner.

The question of rates is one of contract; in this way societies are permitted to issue certificates covering every classification from monthly term to whole life and no requirement is made which compels any society now operating to change its rate, but the future requirements as well as the requirement that a statement must be sent each member annually after December 31, 1914, of the valuation of the certificates has induced several societies to anticipate a change and adopt new rates.

As a guide to members, a table follows showing least whole life and monthly rates possible under National Fraternal Congress table, and as an explanation will say that no portion of such contribution can be used for expense and any rate offered which is less than the rate shown here is not a whole life rate on basis of National Fraternal Congress table.

Age.	Monthly.	Annual.
20	\$.90	\$10.34
25	1.06	11.91
30	1.24	13.95
35	1.48	16.62
40	1.79	20.11
45	2.21	24.72
50	2.78	30.90
55	3.57	39.36
60	4.70	51.13

Effect of Bill.

That many fraternal societies, through their respective governing bodies, are meeting the situation bravely is best evidenced by a resolution passed at a recent meeting of the insurance commissioners at Chicago. It reads in part as follows:

"We commend the societies that have so promptly met the requirements of the Mobile bill and the National Fraternal Congress and Associated Fraternities of America for the splendid support given this bill."

The resolution goes into detail commending a given society for having placed itself on a permanent basis, concluding with

"... and urges on all friends of fraternal insurance the support of the action so taken, and that all attempts to nullify such action or to induce members of said society or of any society so re-rating to discontinue their membership be discouraged by informing members and the public as fully as possible.

An Evidence of Good Management.

The increase of rates to a necessary point is merely an evidence of good management and there should be no dissatisfaction within the rank and file, in fact, the individual membership should welcome this important move which means establishment. Some fraternal societies are even anticipating the requirements of the Mobile bill, and, so far as rates are concerned, are putting their houses in order at once. This is commendable, and it is indeed reprehensible that official organizers and solicitors of some societies are sufficiently unscrupulous to take advantage of the misunderstanding on the part of the enterprising fraternalists, even daring, in some cases, to represent through their official papers that their own society will not be required to raise its rates, etc., though their said rates may be greatly inadequate. A society, regardless of its present rates, if its rates be now less than those of the National Fraternal Congress table, will eventually be compelled to raise its rates to a minimum point of adequacy under the law.

LUCKY JIM ZINC MINES.

Premier Roblin is not a director of the Lucky Jim Zinc Mines Company as previously stated and there is no such person as J. H. Armstrong, attorney-general. The attorney-general of the province of Manitoba is the Hon. J. H. Howden. Hon. Hugh Armstrong, provincial treasurer of Manitoba, is a director of the company, as is also the Hon. Mr. Coldwell. Hon Hugh Armstrong is also president of the company and Mr. Coldwell is secretary and treasurer. The other directors are:—Messrs. T. G. Proctor, J. H. Morris, G. Weaver Loper, and T. J. Montgomery. It is anticipated that the mine will be shipping pay ore in the course of two weeks, and it is in a good position financially.

MINERAL WATER, NATURAL GAS, AND PETROLEUM

Production in Canada—Structural Materials and Clay Products

The value of the production of mineral water in 1910 for which returns were received by the Department of Mines, Ottawa, was \$199,563, as compared with a value of \$175,173 in 1909. The imports of mineral and aerated waters in 1910 were valued at \$202,306, as against a value of \$184,071 in 1909.

The value of the production of natural gas in 1910 was \$1,346,471, as compared with a value of \$1,207,029 in 1909 and \$1,012,660 in 1908. Shipments of peat for fuel purposes in 1910 were 841 tons valued at \$2,604, as compared with 60 tons valued at \$240 in 1909.

The production of crude petroleum shows another large falling off in 1910, the production being only 315,895 barrels or 11,056,337 gallons valued at \$388,550; as compared with 420,755 barrels or 14,726,433 gallons valued at \$559,604 in 1909. Exports of refined oil in 1910 were 2,818 gallons valued at \$462, and 7,768 gallons valued at \$934 in 1909.

While the production has been decreasing the imports have been increasing; the total output of the petroleum oils, crude and refined, in 1910 was 84,629,334 gallons valued at \$4,826,763, in addition to 1,362,235 pounds of wax and candles valued at \$80,106. The oil imports included: crude oil, 53,604,053 gallons valued at \$1,639,358; refined and illuminating oils, 7,656,727 gallons valued at \$502,364; gasoline, 16,679,691 gallons valued at \$1,693,296; lubricating oils, 4,081,257 gallons valued at \$718,381, and other petroleum products, 2,607,606 gallons valued at \$273,364.

The total imports in 1909 were 58,317,101 gallons, valued at \$3,353,311, in addition to 467,731 pounds of wax and candles valued at \$40,689. The oil imports in 1909 included: crude oil, 35,884,103 gallons, valued at \$1,186,400; refined and illuminating oils, 9,632,595 gallons, valued at \$705,971; gasoline, 7,452,762 gallons, valued at \$706,994; lubricating oils, 3,909,117 gallons, valued at \$558,632, and other petroleum products 2,038,524 gallons valued at \$195,314.

Phosphate, Pyrites and Quartz.

Shipments of phosphate or apatite in 1910 were 1,478 tons valued at \$12,578, as compared with 998 tons valued at \$8,054 in 1909. There were no exports reported in 1910, as against 895 tons valued at \$15,735 in 1909. The imports of phosphate rock (fertilizer) in 1910 were valued at \$72,950; phosphorus, 6,752 pounds valued at \$2,065, and manufactured fertilizers valued at \$388,467.

The production of pyrites in 1910 was 53,870 tons valued at \$187,064, as compared with 64,644 tons valued at \$222,812 in 1909. The exports of pyrites in 1910 were 30,434 tons valued at \$110,071, as against exports of 35,798 tons valued at \$156,644 in 1909. The imports of brimstone or sulphur in 1910 were 22,835 tons valued at \$474,619, as against 22,887 tons valued at \$458,961 in 1909.

The quartz production in 1910 was reported as 88,205 tons valued at \$91,951, compared with a production in 1909 of 56,924 tons valued at \$71,285. There were imported during 1910, 628 tons of silex or crystalized quartz, valued at \$11,996, and, in 1909, 559 tons valued at \$8,733.

Production of Salt, Talc and Tripolite.

The total sales of salt in 1910 were 84,092 tons valued at \$409,624 (exclusive of packages). The value of the packages used was \$173,446. In 1909 the sales were 84,037 tons valued at \$415,219, and value of packages used, \$175,612.

Exports of salt in 1910 were 275,200 pounds, valued at \$2,618, and, in 1909, 276,765 pounds valued at \$2,488. The total imports of salt in 1910 were valued at \$462,061, and included: 20,174 tons valued at \$97,326, subject to duty; and 108,794 tons valued at \$364,735, duty free. The 1909 imports were valued at \$431,221 and comprised: 112,554 tons of salt subject to duty, valued at \$352,165; and 16,857 tons duty free, valued at \$79,056.

The imports of soda products in 1910 included: soda ash or barilla 35,596,006 pounds, valued at \$306,167; soda bichromate 878,777 pounds, valued at \$32,842; caustic soda in packages of 25 pounds or more 13,848,170 pounds, valued at \$260,938; sal soda 9,715,272 pounds, valued at \$72,845, and sulphate of soda 17,728,543 pounds, valued at \$95,054.

The production of talc increased from 4,350 tons, valued at \$10,300, in 1909, to 7,112 tons, valued at \$22,308, in 1910.

There was a production of 22 tons of tripolite, valued at \$134, reported for 1910 and no production in 1909.

Structural Materials and Clay Products.

The total sales of cement in 1910 were 4,753,975 barrels, valued at \$6,412,215, as against 4,067,700 barrels, valued at \$5,345,802, sold in 1909, showing an increase of 686,266 barrels.

The exports of cement in 1910 were valued at \$12,914, compared with exports valued at \$113,362 in 1909.

The imports of cement in 1910 included: manufactures of cement, valued at \$7,718; hydraulic cement, 365 hundredweight, valued at \$349; and Portland cement, 1,222,586 hundredweight (349,310 barrels) valued at \$468,046. The imports in 1909 were: manufactures of cement, valued at \$6,374; hydraulic cement, 682 hundredweight, valued at \$614; and Portland cement, 497,678 hundredweight (142,194 barrels) valued at \$166,669.

The consumption of Portland cement in Canada in 1910 was approximately 5,103,285 barrels, as compared with 4,209,903 barrels in 1909.

The total value of the production of clay products in Canada in 1910 was \$7,629,956, as compared with a total value of \$6,450,840 in 1909. Brick and tile products alone were valued in 1910 at \$6,377,728, as against \$5,327,815 in 1909. The value of sewerpipe production in 1910 was \$774,110, as compared with \$645,722 in 1909. The only clay products exported in 1910 were: 390,000 building brick, valued at \$2,762, and the manufactures of clay valued at \$9,061; against 365,000, valued at \$2,255, in 1909, and manufactures valued at \$979. The total imports of clay products in 1910 were valued at \$4,331,397, and included: brick and tile valued at \$1,755,773; earthenware and chinaware, \$2,283,116, and clays valued at \$292,508. The total imports in 1909 were valued at \$3,247,539, comprising: brick and tile, \$1,249,450; earthenware and chinaware, \$1,781,759, and clays, \$216,330.

Lime, Sand Lime Brick and Slate.

The total production of lime in 1910 was 5,848,146 bushels, valued at \$1,137,079, as compared with 5,592,924 bushels, valued at \$1,132,756, in 1909. The exports of lime in 1910 were valued at \$44,762, as against exports valued at \$48,821 in 1909. The imports of lime in 1910 were 212,502 barrels, valued at \$138,847, and in 1909, 168,357 barrels, valued at \$118,239.

The total sales of sand-lime brick in 1910 by 13 firms reporting were 44,593,541, valued at \$371,857, an average value of \$8.34 per thousand. The sales in 1909 by 9 firms reporting were 27,052,864 brick valued at \$201,650, an average of \$7.45 per thousand.

The production of slate in 1910 was 3,959 squares valued at \$18,492, and 4,000 squares, valued at \$19,000, in 1909.

The imports of slate in 1910 were valued at \$142,285, and included: roofing slate, valued at \$67,063; school writing slate, \$31,397; slate pencils, \$6,948, and manufactures of slate, \$36,877.

The imports in 1909 were valued at \$135,221, comprising: roofing slate, \$71,914; school writing slate, \$34,085; slate pencils, \$6,154, and manufactures of slate, \$23,068.

Stone Production of all Kinds.

The total value of the production of stone of all kinds, in 1910, was \$3,650,019, as compared with a value of \$3,127,135 in 1909. The value of stone exports in 1910 was \$27,471, as against \$59,370 in 1909; and the total value of stone imported in 1910 was \$845,123, as against imports valued at \$683,801 in 1909.

The production in 1910 included: granite valued at \$739,516; limestone, \$2,249,576; marble, \$158,779, and sandstone, \$502,148. In 1909 the production of granite was valued at \$454,824; limestone, \$2,139,691; marble, \$158,441, and sandstone, \$374,179.

Classifying the output according to the purposes for which the stone was used, the production in 1910 comprised: building stone, valued at \$1,504,001; ornamental and monumental stone, \$147,421; paving and curbstone, \$239,668; rubble, \$352,000; crushed stone, \$975,379; and furnace flux, \$431,550; while in 1909 the production included: building stone, valued at \$1,170,550; ornamental and monumental stone, \$306,338; paving and curbstone, \$279,227; rubble, \$303,120; crushed stone, \$664,287, and furnace flux, \$403,613.

QUEBEC CREDIT MEN'S ASSOCIATION

Instead of electing officers of the new Quebec Branch of the Canadian Credit Men's Association at the meeting of the committee last week in the offices of Messrs. Ames-Holden and McCready, Limited, Montreal, for that purpose, the provisional committee was continued under the chairmanship of Mr. S.C. Matthews, of Messrs. Matthews, Towers and Company. Mr. Robert Wilson, chartered accountant, with offices at 82 Bank of Ottawa Building, has been appointed provisional secretary, and his offices, until a permanent office and secretary are found, will be the association's headquarters. The services of Mr. C. E. Luke were also retained to look after the membership, and the provisional committee formed itself into a membership committee to interview all of the trade in various lines of business, and another meeting will be held early next week. Mr. Delorme, of Laporte, Martin and Company, was added as a member of the committee.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Nelson, B.C.—The ratepayers will vote on a by-law to raise \$75,000 to purchase the gas plant in that city.

Melfort, Sask.—Until August 8th for \$50,000 6 per cent. 30-year school debentures. W. Wood, secretary-treasurer.

Findlater, Sask.—The village will borrow \$500 for permanent improvements. H. S. Woodward, secretary-treasurer.

Eburne, Point Grey, B.C.—The school board will submit a by-law for \$154,700 to the council for presentation to the people.

Kinley, Sask.—The village has been authorized to borrow \$3,500 for permanent improvements. F. Hopkins, secretary-treasurer.

Calgary, Alta.—The city council has passed a by-law providing for the construction of a filtration plant at a cost of \$400,000.

McTaggart S.D. No. 1143, Sask.—Until August 1st for \$4,000 20-year debentures. R. J. Jackson, secretary-treasurer, McTaggart.

Mercelin, Sask.—The village has been authorized to borrow \$2,000 for permanent improvements. E. A. Labrosse, secretary-treasurer.

Elfros, Sask.—The council board has been empowered to borrow \$2,500 for permanent improvements. J. N. Stewart, secretary-treasurer.

West Vancouver, B.C.—The ferry by-laws were voted on a second time and carried; this was necessary owing to a minor technicality regarding the first ballot.

North Vancouver.—The electorate of the district of North Vancouver voted favorably on all the eleven by-laws submitted to them involving over \$350,000.

Battleford, Sask.—Until August 3rd for \$15,000 25-year 5 per cent. debentures. J. P. Marshall, secretary-treasurer. (Official advertisement appears on another page).

Invermay R.M., No. 305, Sask.—The municipality has been empowered to borrow \$12,000 for permanent improvements. W. Hewson, secretary-treasurer, Invermay.

Hope Rural Municipality, Sask.—The municipality has been authorized to borrow \$6,000 for permanent improvements. W. G. Wright, secretary-treasurer, Semans.

Calgary, Alta.—A by-law of the city of Calgary to raise the sum of \$82,000 for the purpose of laying and constructing sewers, etc., will be voted on by the electors, August 8th.

Welland, Ont.—A motion to advertise for tenders for the sale of the \$75,000 waterworks debentures, and also the debentures of the sewers and sidewalks, was carried by the council.

St. Lambert, Que.—A by-law providing for the payment of \$11,000 to the St. Lambert Terminal and Development Company, will be shortly submitted for the approval of the electors.

St. Clement Rural Municipality, Man.—On July 29th the ratepayers will vote on a by-law to issue \$12,000 4 per cent. 30-year road debentures. Thomas Bunn, secretary-treasurer, St. Clements.

Ordal S.D., No. 1292, Man.—The ratepayers will vote on July 31st on a by-law to raise \$5,000 for school purposes. B. Marteinsson, secretary-treasurer, municipality of Bifrost, Hnausa, Man.

Regina S.D., No. 4, Sask.—Until September 2nd, for \$275,000 4½ per cent. 20-year school debentures. J. H. Cunningham, secretary-treasurer, Regina. (Official advertisement appears on another page.)

Melita S.D., No. 440, Man.—On August 1st the ratepayers will vote on a by-law to issue \$6,000 debentures, repayable in twenty years, interest 5 per cent. W. F. Thomas, secretary-treasurer, Melita.

Ottawa, Ont.—Until August 29th for \$12,000 40-year, \$727,000 30-year, and \$292,429.99 20-year debentures; interest, 4 per cent. Charles Hopewell, mayor. (Official advertisement appears on another page.)

Medicine Hat, Alta.—On August 18th the electorate will vote on a by-law to expend \$300,000 on the installation of a new waterworks plant, the first unit of which will have sufficient capacity for a population of 7,500.

St. Agnes R.C.S.D., No. 22, Sask.—Until August 10th for \$30,000 5 per cent. 40-year school debentures. Edw. J. Baker, Post Office Box 41, Moose Jaw, secretary-treasurer. (Official advertisement appears on another page.)

Stettler, Alta.—Until August 22nd for \$10,800 5½ per cent. 20-year waterworks, and \$4,000 5½ per cent. 20-year electric light debentures. R. Dick Ballantyne, secretary-treasurer. (Official advertisement appears on another page.)

Toronto, Ont.—A by-law to provide for the issue of debentures to the extent of \$300,000 for a civic abattoir and cooling plant was read twice, and one to provide \$230,000 for a new thirty-six inch water main was carried by the city council.

Saskatoon, Sask.—By-laws to raise by way of loans on debentures the sum of \$85,000 for the purchase of a site for the Quaker Oats Company, the sum of \$15,000 to supplement the sum of \$45,000 provided by a by-law for the purchase, alteration and equipment of King Edward School for city offices; the sum of \$55,000 for paying purposes.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended July 7th:—

	1911.	1912.	Increase or decrease.
C. P. R.	\$2,096,000	\$2,571,000	+ \$475,000
G. T. R.	943,095	1,012,051	+ 68,956
C. N. R.	346,500	391,900	+ 45,400
T. & N. O. R.	28,547	28,272	— 275
Halifax Electric	5,696	5,808	+ 112

The following are the railroad earnings for the week ended July 14:—

	1911.	1912.	Increase or decrease.
C. P. R.	\$2,170,000	\$2,701,000	+ \$531,000
G. T. R.	994,800	1,037,863	+ 430,063
C. N. R.	364,700	436,700	+ 72,000
T. & N. O. R.	28,241	26,699	— 1,542
Halifax Electric	5,270	5,686	+ 416

The Grand Trunk Railway has issued its statement of earnings and expenses for May and for the five months of the fiscal year. Taken altogether, the results are favorable, notwithstanding the fact that the revenue for this has been largely cut into owing to extraordinary outlays for extensions and improvements all over the system.

The roads in the Grand Trunk system report for May and five months as follows:—

Grand Trunk of Canada.

	1912.	1911.	Increase or decrease.
May gross	£601,700	£628,800	+ £62,900
Net	207,000	206,500	+ 500
Five months' gross	691,700	2,831,600	+ 221,500
Net	696,400	724,800	— 28,400

Canada Atlantic.

	1912.	1911.	Increase or decrease.
May gross	£41,500	£38,100	+ £3,400
Net	def 450	4,700	+ 3,250
Five months' gross	172,750	163,600	+ 9,150
Net	3,900	18,900	— 15,000

Grand Trunk Western

	1912.	1911.	Increase or decrease.
May gross	£114,500	£108,550	+ £5,950
Net	23,800	def. 150	+ 23,950
Five months' gross	549,600	552,350	— 2,750
Net	61,900	48,950	+ 12,950

Detroit, Grand Haven and Milwaukee.

	1912.	1911.	Increase or decrease.
May gross	£36,500	£34,500	+ £2,000
Net	800	def. 850	+ 1,650
Five months' gross	170,000	167,950	+ 2,050
Net def.	13,300	7,600	+ 5,700

While the annual statement of the Canadian Northern Railway is not yet prepared for publication, it will be shown that the gross earnings for the year ended June 7, will be approximately \$21,000,000 compared with \$16,360,000 for the previous year, an increase of \$4,600,000.

The general increase in business through the West is reflected in the fact that this increase of 29 per cent. in earnings compares with an increase of only 15 per cent. over last year in the mileage of lines being operated. At present the road is operating 4,297 miles of line against 3,731 miles last year.

Particularly in the movement of grain have traffic conditions been good. Between sixty and seventy million bushels of grain were carried in the year by the Canadian Northern west of Port Arthur, an increase over last year of over fifty per cent.

Two hundred and sixty miles of track have now been completed west of Cochrane, Ont., on the National Transcontinental Railway, according to latest reports, and an average of a mile a day is being laid. Rails have been laid from Superior Junction to Winnipeg, leaving a distance of 184 miles yet to be covered with steel between the former point and the present rail-head west of Cochrane. Those in charge of the work expect to have the entire line between Cochrane and Winnipeg finished by the end of September.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

Dividend No. 100.

Notice is hereby given that a dividend of two per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the two months ending 31st August next, and will be payable at the bank and its branches on and after Tuesday, the 3rd day of September, to shareholders of record of 15th August.

By order of the Board.

E. L. PEASE,
General Manager.

Montreal, P.Q., July 16, 1912.

Note.—Owing to the change in the termination of the bank's fiscal year from 31st December to 30 November, the above dividend has been declared for two months only. Subsequent dividends will be payable quarterly.

CARRIAGE FACTORIES, LIMITED

PREFERRED STOCKHOLDERS' DIVIDEND, No. 8

Notice is hereby given that a dividend of 1½ per cent. for the quarter ended 15th July, 1912, being at the rate of 7 per cent. per annum, on the paid-up preferred stock of this company, has been declared, and that the same will be paid on the 31st day of July to the preferred shareholders of record on the said 15th day of July, 1912.

By order of the directors.

W. F. HENEY,
Secretary.

THE CANADIAN BANK OF COMMERCE

Dividend No. 102.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches on and after Monday, 2nd September next, to shareholders of record at the close of business on the 17th day of August, 1912.

By order of the Board.

ALEXANDER LAIRD,
General Manager.

Toronto, 20th July, 1912.

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE.

A dividend of two per cent. on the preferred and one and one-half per cent. on the ordinary shares of the company for the quarter ending June 30th, 1912, has been declared payable July 15th, 1912, to shareholders of record of June 29th, 1912.

By order of the directors.

THOMAS GREEN,
Cashier.

New Glasgow, N.S., June 21st, 1912.

THE BANK OF TORONTO

Dividend No. 124.

Notice is hereby given that a Dividend of Two and three-quarters per cent. for the current quarter, being at the rate of Eleven Per Cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared, and that the same will be payable at the Bank and its Branches on and after the 3rd day of September next, to Shareholders of record at the close of business on the 15th day of August next.

The Transfer Books will be closed from the Sixteenth to the Twenty-fourth days of August next both days inclusive.

By order of the Board,

THOS. F. HOW,
General Manager.

The Bank of Toronto, Toronto.
July 24th, 1912.

MURRAY-KAY, LIMITED

Notice is hereby given that the regular quarterly dividend of one and three-quarters per cent. (1¾%), being at the rate of seven per cent. per annum, has this day been declared on the preferred shares of the Company for the quarter ending July 31st, 1912. Said dividend to be paid on the 1st day of August next to the shareholders of record at the close of business on the 20th day of July, 1912; and that the transfer books of the company will be closed from the 21st to the 31st of July, both days inclusive.

By order of the board.

J. E. FEATHERSTONHAUGH,
Secretary.

Toronto, July 15th, 1912.

THE BRITISH COLUMBIA PERMANENT LOAN COMPANY

Dividend No. 28.

Notice is hereby given that a dividend at the rate of 10 per cent. per annum has this day been declared on the permanent stock of the company for the half-year ending June 30th, 1912, and that the same will be payable at the head office of the company, 330 Pender Street, Vancouver, B.C., and at the branch offices in Halifax, St. John, Winnipeg, and Victoria, on and after July 15th, 1912.

JAMES LOW,
Treasurer.

Vancouver, B.C., July 11th, 1912.

MEXICO TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of one and three-quarters per cent. (1¾%), (being at the rate of 7½ per cent. per annum), has been declared on the capital stock of the Mexico Tramways Company for the quarter ending June 30th, 1912, payable on the 1st day of August, 1912, to shareholders of record at the close of business on the 13th day of July, 1912, and that the transfer books of the company be closed from 15th July to 31st July, 1912, both days inclusive. Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York, N.Y.; Mexico City, Mexico; London, England, and branches.

The holders of bearer share warrants on detaching from their share warrant coupon No. 13 and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York, N.Y., or London England, on and after the 1st day of August, 1912, will receive in exchange for each coupon the sum of \$1.75, representing the amount of the dividend.

By order of the board.

W. E. DAVIDSON,
Secretary.

Toronto, Canada, 28th June, 1912.

HUDSON BAY INSURANCE COMPANY

Notice is hereby given that a dividend of four per cent. (4%) has been declared on the paid up capital of the Hudson Bay Insurance Company for the half year ended the 30th June, 1912, payable August fifteenth. The transfer books will be closed from August 1st to August 15th, inclusive.

By order of the Board,

S. F. QUICK,
Secretary.

UNION BANK OF CANADA

Dividend No. 102.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, and that the same will be payable at its Banking house in this city, and also at its Branches, on and after Tuesday, the third day of September next, to Shareholders of record on August 20th, 1912.

By order of the Board,

G. H. BALFOUR,
General Manager.

Winnipeg, July 18th, 1912.

WANTED.—A strong Board Company requires the services of a thoroughly competent and experienced Fire Insurance Inspector. Liberal salary and excellent opportunities for advancement will be given to suitable man. Applications will be received in strict confidence. Apply Box 17 Monetary Times.

CANADIAN LLOYDS AGENCY

The latest story respecting the much discussed formation of a Canadian Lloyds is that Hon. George E. Foster will bring back from London plans for such an organization, a sort of clearing house for Canadian marine insurance, backed by Canadian capital with Government aid and under Government control. The plan is said to be for the Government to guarantee the difference between the insurance charged on the Canadian route and that charged by American ports such as Boston or New York, as a species of subsidy for the encouragement of Canadian shipping.

INSURANCE COMPANIES IN MANITOBA

At December 31st, 1911, there were 131 registered insurance companies and fraternal societies, also 75 licensed insurance companies, doing business under The Manitoba Insurance Act, reports Mr. A. E. Ham, inspector of insurance, classified as follows:—

	Register-	Licens-

Hail insurance companies	..	..
Total	131	75

During 1911 the following new companies were admitted by license:—Fire: Insurance Company of the State of Pennsylvania, Northwestern National Insurance Company, Niagara Fire Insurance Company, and Western Union Fire Insurance Company. Life: Western Life Assurance Company. Fraternal: Loyal Order of Moose.

The Hudson's Bay Insurance Company and the National Union Fire Insurance Company were transferred from licensed to registered companies in 1911. One company went into liquidation, viz., the Pioneers' Fire Insurance Company, Brandon, Manitoba, and Brandon Fire Insurance Company changed its name to Canadian Phoenix Insurance Company, February, 1911.

The Michigan Millers' Mutual Fire Insurance Company and Ohio Millers' Mutual Fire Insurance Company have withdrawn from the province.

During 1911 the following new companies were admitted by registration:—Life: British Columbia Life Assurance Company and the Travellers' Life Assurance Company of Canada. Fire: Continental Fire Insurance Company, New York; Employers' Liability Assurance Corporation, Limited (Fire), L'Union Fire Insurance Company, and the Factories Insurance Company. Weather: Canada Weather Insurance Company. Five companies ceased doing business in 1911, viz., Dominion Plate Glass Insurance Company, London and Lancashire Plate Glass Insurance Company, Montmagny Mutual Fire Insurance Company, Royal Victoria Life Insurance Company, and the State Life Insurance Company. Owing to The Canada Provident Assurance and Investment Company not doing any insurance business and is licensed under the insurance department for the purpose of making investments only no report is made this year.

CROPS IN SASKATCHEWAN

The present condition of the grain crops of Saskatchewan according to the seventh telegraphic report issued by the Department of Agriculture is excellent.

Crops sown on last year's summer-fallow and on spring plowing are showing to the best advantage and have not apparently suffered from the hot and dry weather of the last week of June. Grain sown on stubble has suffered somewhat from the drought and abundant growth of weeds.

The principal effect of the recent hot weather has been to force the grain into the shot blade rather sooner than was expected and with continued favorable weather the harvest will be earlier than last year by about two weeks. Already from 30 per cent. to 40 per cent. of the wheat is headed out. The central portion of the province seems to have been traversed generally by severe electrical and wind storms in June but with little damage to the grain crops.

Present indications are that considerably more harvest help will be required this season than last as more land has been brought under cultivation and the outlook for the crops in general is good.

Regarding the hay crop, diverse reports continue to be received from different parts of Ontario. Farmers in Eastern Ontario in Glengarry and Stormont Counties state that fields which usually yield 2 to 2½ tons to the acre, will not produce more than 1 to 1¼ tons this year. In the province of Quebec, a short crop is expected, New Brunswick is said to have a satisfactory hay crop. Potatoes, oats and other grains will not be so good there.

LABOR UNREST INCREASES

The record maintained in the Department of Labor shows industrial conditions to have been disturbed to a considerable extent by trade disputes during June, the number of disputes and the number of employees thrown out of work by such disputes being greater than those of the preceding month, and also greater than those of June, 1911. There were altogether thirty-seven disputes reported to the department as having been in existence during June as compared with twenty-nine during May and twenty-seven in existence during June a year ago. About three hundred firms and fifteen thousand employees were affected by these disputes, the majority of which were not terminated before the end of the month. The loss of time to employees through trade disputes during June was approximately 205,000 working days compared with 60,000 working days lost in May, and a loss of 355,000 working days in June, 1911. A feature of the month was the unrest prevailing among workmen in the building trades, fourteen strikes actually occurring during June among employees in these trades, and throwing out of work more than four thousand men. Two disputes, those of garment workers at Montreal and carpenters at Winnipeg, directly affected more than three thousand men each, and were not terminated before the end of the month.

Mr. G. A. Bonnellie of the Canadian Bank of Commerce at Main Street South, Winnipeg, has been appointed accountant at the Hastings and Cambie Streets branch at Vancouver. Mr. A. Milligan will succeed him as accountant at the former branch.

Mr. M. J. O'Brien, who is building 82½ miles of the Transcontinental Railway, states that by midsummer the line from the city of Quebec to Cochrane will be ready for service.

The freight and passenger traffic agreement, which has existed between the Canadian Pacific and the Northern Pacific railways for many years and which terminated some time this month, has been renewed for a period of 10 years according to Northern Pacific officers in New York. Under this agreement an interchange of freight and passenger traffic between the two roads takes place on the Canadian boundary line at Sumas, Wash. The arrangement covers the traffic handled in and out of Seattle and destined eastward over the Canadian Pacific, the latter having no line to Seattle. Renewal of the agreement is on exactly the same basis as the old agreement.

The capital stock of the Regina Brokerage and Investment Company, Limited, has been increased from \$100,000 to \$1,000,000.

The capital stock of the Broadview Hotel Company, has been decreased from \$100,000 to \$50,000 by the cancellation of 500 shares of its unissued stock.

Replying to a deputation of the Maritime League in London, Hon. Mr. Hazen, Canadian Minister of Marine and Fisheries, declared that the question of protection of trade routes in time of war by the conversion of merchant ships into cruisers hadn't been overlooked by the Canadian Government, and, further, he was sure he revealed no confidence by saying that this important question had been the subject of negotiations with the Admiralty.

Stettler, July 6th, 1912.

\$1,031,929.99

CITY OF OTTAWA, ONTARIO.

Debentures for Sale.

Tenders addressed to "The Chairman, Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa until 3 p.m. on Thursday the 29th August, 1912, for the purchase of \$12,000.00 40 year debentures, \$727,500.00 30 years, and \$292,429.99 20 years.

They are all a liability of the City at large, and bear 4% interest, payable 1st January and 1st July.

Two separate tenders will be received, one for \$40,000.00 30 year debentures, and the other for the remainder of the debentures \$991,929.99.

All tenders must be on the official form. The tender for the \$40,000.00 debentures must be accompanied with an accepted cheque for \$1,000.00 and the tender for the \$991,929.99 debentures with an accepted cheque for \$5,000.00.

Accrued interest from 1st July, 1912, must be paid in addition to the price tendered.

The \$40,000.00 debentures are in \$1,000.00 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York or London, at the option of the purchaser, and in denominations to suit.

Delivery of the \$40,000.00 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,

Ottawa, 29th June, 1912. Mayor.

DEBENTURES FOR SALE.

Debentures for sale, town of Battleford, Saskatchewan. Sealed tenders addressed to the undersigned and marked "Tenders for Debentures," will be received up till 6 p.m., 3rd of August, (Saturday), 1912, for the purchase of \$15,000 of twenty-five year debentures bearing 5 per cent. interest per annum. For further particulars, apply to

J. P. MARSHALL,

Secretary-Treasurer.

ANOTHER BRICK STOCK OFFERING

A block of 20,000 shares (\$200,000) of the stock at par with 25 per cent. bonus of the Union Brick Company, Limited, was offered this week by E. C. Hill, financial broker, Toronto. The company's capitalization is \$350,000, all ordinary stock. A property of 100 acres is being purchased at Streetsville, near the Canadian Pacific Railway with a supply of shale clay. It is proposed to erect a plant capable of manufacturing 100,000 bricks daily. The name of the man-

TENDERS FOR DEBENTURES.

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to September 2nd, 1912, for the purchase of \$275,000, or portion thereof, debentures repayable in twenty annual payments at the Bank of Montreal, Regina, with interest at 4½ per cent. per annum.

The issue is by the Regina Public School District No. 4, of Saskatchewan, the limits of which correspond with the limits of the city of Regina, and is for the purpose of erecting school building and altering and improving the present schools.

Purchasers to pay interest, bank charges and cost of printing debentures.

The highest or any tender not necessarily accepted.

J. H. CUNNINGHAM,

Secretary-Treasurer.

Regina Public School District, No. 4, of Saskatchewan.

TENDERS FOR DEBENTURES.

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m., August 10th, 1912, for the purchase of \$30,000 debentures, repayable in forty equal annual instalments, with interest at 5 per cent.

This issue is for the purpose of purchasing site and erecting thereon a four room school.

The highest or any tender not necessarily accepted.

EDW. J. BAKER,

Secretary-Treasurer.

The St. Agnes Roman Catholic

Separate School District No. 22,

Moose Jaw, Sask., July 7th, 1912.

TENDERS FOR PULPWOOD LIMIT.

Tenders will be received by the undersigned up to and including the 15th day of August next, for the right to cut pulpwood on a certain area situated on the Abitibi Lakes and River, tributary to the Grand Trunk Pacific Railway, and the Temiskaming and Northern Ontario Railway, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario,—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, Ontario, May 15th, 1912.

ager, a very important factor in a brick company, has not yet been announced. The following are the directors:—Messrs. J. W. McReynolds, public works contractor, of Cleveland; G. W. Monk, capitalist, Toronto, vice-president Canada Permanent Mortgage Corporation; G. P. Magann, railroad contractor, Toronto; E. C. Hill, general broker, Toronto; Alfred Rogers (of Elias Rogers Coal Company), wholesale cement dealer, Toronto; A. F. Webster, Cunard S.S. agent, director Sovereign Fire Insurance Company, Toronto; and David Carlyle, contractor, Toronto, president Carlyle and Beck, Limited, director Equity Fire Insurance Company.

WAITING FOR THE SENSATION

Just before sailing for Europe, a Captain J. Roy Saunders, associated with a London daily newspaper, gave a strongly worded interview respecting certain Canadian investments. In view of the fact that his opinions have been repeated, they are entitled to analysis. Three months have been spent by Captain Saunders in Canada investigating the various Canadian offerings presented in recent years to British investors. "You probably know," he is reported in an interview, "that during the last three years the floating of bogus Canadian stocks on the London market has gone on at such an utterly unprecedented rate that a great many big British interests have become entirely alienated from colonial investments, while a great many have been heavy losers. Needless to say I have encountered a tremendous number of propositions which are absolutely rotten. Yes; there is no other word to describe them. In no less than thirty-five separate and distinct cases in cities west of Winnipeg I have been forced to write down this adjective after the high-sounding names of apparently bona fide real estate and mining companies, many of which are already deluding the British investor."

When Captain Saunders returns to the sober financial atmosphere of London and begins to tabulate the list of bogus Canadian stocks floated on the London market in the last three years it will be found, we think, that they have not been placed at an "utterly unprecedented rate." Indeed, it will be difficult to make a list of any great length. He will also discover that few, if any, big British interests have become alienated from colonial investments or have sustained losses. Big British interests are not prone to such habits.

Captain Saunders has discovered thirty-five bad companies, mostly real estate and mining, west of Winnipeg. During the past eighteen months only, no less than 5,750 new companies have been incorporated with Dominion or provincial charters. Thirty-five unscrupulous real estate and mining companies is not a large number, compared with the numerous sound Canadian enterprises which have sought money of the British investor. Captain Saunders stated in the interview that for the next few years British capital would be wary of Canadian investments. "The reaction is already setting in," he said, "and I can advise that no big schemes be broached for the present." British capital usually flows to countries offering sound investments at attractive rates. If Canada can continue to offer such investments as in the past, and market conditions are satisfactory, British capital will continue to patronize Canadian investments. Surely Captain Saunders does not seriously assert that the temporary conditions in the London market, or, as he terms it, "the reaction," are due to the activities of the thirty-five companies he has in mind and some others. To date we have had over \$1,000,000,000 of British money to finance our development. The existence of the Canada of to-day proves that little of that sum has been wasted. Few of the investors who have placed their money here have had cause for regret.

The Monetary Times willingly admits that several unworthy Canadian promotions have been placed before, and in some cases swallowed by, the British investor. As a rule, these have been undertakings which, if worthy, could have been financed in Canada. Canadians with the true interests of their country at heart—and such Canadians are legion—are just as anxious for the maintenance of a high standard of national credit as Captain Saunders appears to be. The tone of his inter-

view would indicate that our leading bankers, reputable financial houses, financiers and industrial captains of integrity, together with the financial press, have encouraged the preparation of shady schemes for the British market, and that the Captain had made a sudden discovery. Nothing could be further from the truth. Canadian bankers and leading citizens in every walk of finance and business, together with a strong financial press, have done everything in their power to keep Canadian finance clean, and to encourage the investment of British capital by giving complete satisfaction to that already invested. No end of warnings have been written and wired to London when poor propositions have been sent over there for money. Captain Saunders cannot be ignorant of the fact that most Canadian flotations made in London, worth any consideration at all, are the subject of enquiry in Canada by London interests.

As Sir Edmund Walker has said, new conditions are confronting Canadian enterprise and investment in the Old Land. Difficulty, for instance, has been experienced by the city of Toronto in disposing of its securities in Britain, not because its credit is not good, but because money in the markets of the world is worth more. One important condition Canadians must meet is that they must pay more because money is dearer.

Captain Saunders promises a series of articles in his paper which "will create one of the biggest sensations in the history of British finance." We fear that the Captain has underestimated the discriminating power of the British investor and the legitimate desires of Canadians, at the same time overestimating his spell-binding powers. If his articles are written in the free style of his reported interview, and with such an obvious disregard of the leading facts, we may promise the Captain a present of his sensation for his own consumption.

As a sort of postscript to his interview, it is stated: "An agitation to establish some generally recognized bureau, which will make its sole business the examination of Canadian investment schemes has led to my tour, and will lead to the organization of such a bureau within the very near future."

The organization of such a bureau, we imagine, will have a poor reception at the hands of the London market. *The Monetary Times* has too high an opinion of the common sense of the British investor and the honesty of Canadian bankers, financiers and promoters as a whole to believe that any legitimate concerns desiring to raise funds in London will submit their proposal for analysis by the proposed private bureau.

TRAINING BANK CLERKS

Promotion in Canadian banking spheres is comparatively rapid. The multiplication of branch banks—there are now in Canada—creates a constant call for well qualified managers. They are in close touch with their head offices, but the contention that their training for manager is not always complete, is perhaps well made. We believe that many of the leading bankers in Canada favor an educative course for bank clerks, that they may be well fitted to assume the responsible duties of higher positions.

The Kansas banking department has evolved such a scheme.

The large number of small banks organized during the past four years, and the little banking experience possessed by many of their officers, has led to frequent complications in management, requiring assistance of the Kansas banking department to straighten things and put the bank in proper condition. Bank Commissioner Dolley has put in operation a plan which he expects to help overcome this. He has established what is in effect a school for bankers.

When a new bank is organized under the State laws, he proposes to see that the officers know what are their duties before allowing them to take up the man-

agement of its affairs. His plan is to call the president and cashier to his office, and require them to submit to an examination.

Questions to be given are not yet fully outlined, and they will vary in some particulars according to the needs of the special cases. In general, however, they will cover the Kansas banking law, the depositor's guarantee law, the negotiable instruments law, the State corporation laws, together with points touching practical and technical banking.

He also intends to include in the questions requests for information that will furnish an estimate of the judgment on financial affairs possessed by the applicant. Should the applicant not succeed in making a required average in the examination, he is to be given suggestions for study, and then given another examination. If he is still obtuse, it is not likely that his selection as an official of the bank will be approved by the bank commissioner. This method, it is believed, will secure a higher standard for bank officers, especially in the smaller communities, where, frequently, the men organizing a bank had no experience with the business whatever.

Admittedly, a banker may qualify largely by keeping in touch with current financial events and reading up-to-date financial literature. The value of the school of experience, too, cannot be underrated. At the same time, there would appear to be room for more assistance for the coming Canadian banker. It will be recalled that Professor Johnson, of New York University, who made a report for the National Monetary Commission of the United States regarding Canada's banking system, commented strongly on this phase. He expressed his regret because of "the seeming indifference of Canadian bankers with regard to the education of their employees."

"When a boy at the age of fifteen enters a Canadian bank, he leaves all hope of education behind," said Professor Johnson. "He will learn a great deal 'by doing' and by contact with strong and successful men, but he will have little chance to improve his mind by systematic study or through attendance upon lectures. His hours will be long, and, from the American point of view, his pay will be small. If he has an iron constitution, sound nerves, and an unconquerable stomach, together with a clear head, a steady will, and a good character, he will some day be manager of a branch, and perhaps a general manager. But he will have to work out his own salvation without the aid or encouragement of the world's best thought and experience. It is to be hoped that the older bankers of Canada will get a conviction of sin on this subject, and through their Bankers' Association make some provision for the intellectual growth of the young fellows in their employ. If they fail on this score, the time may come when the staffs of the Canadian banks, despite their prestige, may no longer contain men of the quality necessary to the making of a first-class general manager."

CANADA'S FIRE LOSSES

The fire losses in Canada for the first six months of the current year total \$14,740,499, an average of \$2,456,750 per month. This is equal to a daily loss of \$81,891. In other words, \$3,412 worth of property has been burned every hour since the new year dawned, or nearly \$57 every minute.

This is an appalling fire loss, and little is being done to check such extravagant waste of capital. The losses during 1909, 1910 and 1911 are as follow:—

	1909.	1910.	1911.
January	\$1,500,000	\$1,275,246	\$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150

	1909.	1910.	1911.
July	1,075,600	6,386,674	5,384,300
August	2,582,915	1,667,270	920,000
September	1,615,405	894,125	1,123,550
October	2,208,718	2,195,781	580,750
November	935,191	1,943,708	1,506,500
December	1,433,813	1,444,860	2,866,950
Total	\$18,905,538	\$23,593,315	\$21,459,575

Adding to these figures the total loss for the first six months of 1912, we have a fire loss in forty-two months of \$78,698,927, an average monthly loss of \$1,873,785. In addition there has to be recorded a disastrous list of fire fatalities. During June in Canada six people met their deaths in fires. During the first six months of the year 101 people were sacrificed in the same manner. In the forty-two months since January, 1909, no less than 893 persons lost their lives in fires, a monthly average of almost 22 persons. The following table gives the details:—

	1909.	1910.	1911.	1912.
January	16	27	27	27
February	8	15	12	11
March	16	20	18	24
April	18	37	20	15
May	21	15	28	18
June	16	52	13	6
July	4	15	110	..
August	17	11	22	..
September	10	10	13	..
October	26	16	17	..
November	34	19	20	..
December	33	19	17	..
Total	219	256	317	101

In June, burning buildings were responsible for three deaths and three were caused by clothes set on fire. The presumed causes for fires during June and the number of fires for which they accounted were as follows: Four, lamp explosions; three, children playing with matches; two each, cigarette stubs, incendiary, sparks, friction; one each, oil stove explosion, defective chimney, overflowing of a pot of soap grease. Forest fires did much damage and many fires were reported as of unknown origin.

The structures damaged and destroyed during June were 70 residences, 9 business sections, 5 stores, 4 each lumber mills, factories, 3 foundries, 3 each stables, barns, 2 each churches, hotels, freight sheds, 1 each rolling mill, flour mill, railway depot, roundhouse, power house, club house, ice-house, telephone exchange, pool room, barber shop, college, soda water works, grain warehouse, gasoline container, electric plant.

There were 500,000 staves, 15 tons hay, 6 horses, 2 miles wire fencing, 1 each buggy, motor launch, gasoline truck destroyed.

The National Board of Fire Underwriters of the United States, continuing its plan of education on the need of better protection, issued an exhaustive classification of fire losses recently, showing why the insurance companies are forced to ask higher rates in America than in Europe, and why rates in America itself necessarily vary. Taking thirty of the largest cities of the United States, the per capita loss in 1909 was shown to vary from \$1.36 in St. Louis to \$4.55 in Kansas City. Higher per capita loss was shown in some of the smaller centres, like the city of Racine, where it ran to \$24.29. The total annual fire loss is estimated at \$200,000,000, and fire specialists go so far as to assert that \$150,000,000 of this is waste from negligence or lack of precautions. The table of comparisons drawn up by the underwriters from consular returns in 1905, the only recent year in which statistics of the kind were gathered in Europe, showed an average loss of 61 cents per capita for thirty European cities as against \$3.10 for 252 American cities. Taking the number of fires to each 1,000 of population here and in Europe, it was found to be 4.05 in the United States against .86 in Europe.

The annual average losses for six nations in Europe were compiled from records of varying years and years grouped, with this result:—

Country.	Annual fire loss.	Loss per capita. Cents.
Austria	\$ 7,601,389	29
Denmark	660,924	26
France	11,699,275	30
Germany	27,655,600	49
Italy	4,112,725	12
Switzerland	999,364	30

Or an average loss per capita of 33 cents.

The fire loss per capita in the Dominion last year was \$3.02.

On Berlin, where the losses amount annually to less than those of one moderately large fire in the United States, the excellent conditions are due to the attention paid to the methods of construction. Building police have authority to compel the use of iron and steel girders, fireproof stairways and roofing, heavy fireproof ceilings, and all details that may diminish the risk of conflagration.

Canada cannot claim to be making untrammelled progress until its fire record has been improved considerably.

SMALL CHANGE

Vaudeville reasoning at Washington does not change the meaning of the Hay-Pauncefote treaty.

* * * *

Did the Russian at Berlin, Ontario, who raised a \$1 deposit in his pass book to \$10,000 feel as rich as his book looked?

* * * *

There is not much noise prior to Canadian bank failures—which, happily, are few—but the rumbling afterwards goes on for years.

* * * *

The mission of Mr. Richard T. Coady, the guardian of Toronto's purse-strings, to London for funds, has proved that at this time treasury bills are stronger than Treasurer Dick.

* * * *

A dividend of .003305 per cent. was recently declared by the liquidators of a Canadian company after deduction of legal expenses. There is nothing like being fractionally particular in these matters.

* * * *

A \$76,000 diamond is reported to have been found in the East Main River, Northern Ontario, in which district precious stones are said to be numerous. Salt deposits have not yet been discovered in the same region.

* * * *

Last week, near London, Ont., a bull charged a train, derailing the engine and eight cars. On the new Gowganda road, near Elk Lake, a big black bear met a couple of men, turned tail and fled. Our stock exchange pets must have been contesting their strength.

* * * *

The Wall Street Journal suggests that Moose Jaw would make appropriate headquarters for Colonel Roosevelt's party—half moose, half jaw. Yes, and looking westward to Alberta's natural gas city, he would have another splendid opportunity to talk through the "Hat."

* * * *

Active preparations are in hand for the annual convention of the Dominion Life Underwriters' Association at Montreal this month. It promises to be, as usual, a most successful gathering. This is one of the few occasions on which the managers, directors, superintendents, actuaries and agents of our life insurance companies have an opportunity to meet on common ground to discuss the progress and problems of their profession.

MUNICIPAL BOND MARKET

Quebec Has Placed Temporary Loan—Regina Wants a Million Dollar Loan

Several months ago, when municipalities were advised that lower prices for their securities would have to be accepted, they refused to take good counsel. Now the overseas market cannot absorb further issues at any price, and our civic authorities have been compelled to make temporary arrangements. Both Toronto and Montreal some time back received excellent offers for their debentures, but, thinking they could do better, and, contrary to expert advice, delayed matters until they were forced to make short term loans. Toronto has floated £1,200,000 one-year treasury notes on a 4½ per cent. basis, and Montreal £750,000 for six months at the same rate. Toronto was offered as high as 95 for its issue early this year, and in February Montreal's board of control submitted an offer of 97.15, which was refused by the city council. Certain aldermen appear to have a prejudice against the best advice. They are learning now how sound was the counsel which they received and rejected. On the other hand, the city of Winnipeg early in the season accepted the advice of its fiscal agents and placed its bonds at 98.

Respecting the recent flotation of £500,000 4½ per cent. debentures, by the city of Calgary, the London Economist says:—"Calgary's existing 4½ per cent. debentures stand at 102, and the present issue is a good security. The debt of these Canadian cities, however, is growing rather rapidly. It is a pity that an average date of maturity for the whole loan cannot be substituted in these cases, so that the issue may be more marketable. This particular example, though quite good in itself, has not appealed to the public, only 15 per cent. of the issue having been applied for."

The proceeds of the Calgary loan was required for electric railway and various public works. Repayment of the loan on maturity is provided for by sinking fund, and the debentures mature £319,600 on January 1st, 1932, and £180,400 on July 1st, 1942.

Toronto Mayor's View.

Mayor Geary states in London with regard to the Toronto loan which he went over to place, that "after obtaining all information and carefully considering same in the light of advice given it was decided not to be in the best interests of the city to accept any of the suggestions made as to price for an issue. The market is glutted with Canadian securities and is in addition in a very bad condition as evidenced for example by the low price of Consols. It is generally hoped that matters will improve within a year and therefore we obtained a temporary loan and have been successful in securing six millions for one year at four and a half per cent. discount. This arrangement is a very advantageous one, especially in view of the high rates paid for other similar issues."

The one year bills of the city of Toronto, which were placed in the London market on a basis to yield 4½ per cent., totalled £1,200,000.

Proposes to Annul By-Law.

Alderman McManamy has had notice served on the city of Sherbrooke, Que., to the effect that he is instituting proceedings to annul the by-law recently passed for the borrowing of \$615,000. He claims, among other things, that in borrowing this amount the city was exceeding its borrowing power.

It was resolved that the Portage la Prairie council raise a \$30,000 loan from the Merchants Bank to meet current expenses.

Regina Seeks Large Loan.

After an investigation of Regina's condition following the cyclone, Mr. J. Bruce Walker has recommended that the Dominion Government make a loan to the city of \$1,000,000 to be repaid in a number of years and bearing a low rate of interest, say 4 per cent. The matter is under the consideration of Hon. W. T. White, Minister of Finance.

The assessment of Canora, Sask., for 1912 is over \$925,000 which is double that of 1911. Its total debenture debt is \$43,000. The by-laws for the issuance of \$24,000 debentures for electric lighting purposes are under the Municipal Public Works Act and do not affect the 10 per cent. borrowing power of the town under the act.

The mayor of Prince Rupert recently wrote to the local manager of the Bank of Montreal regarding the offer made the city for the purchase of the treasury scrip remaining at

98. Mayor Newton desired the advice of the bank manager on the subject. This was given in a letter read in council to the effect that it would be inadvisable for the city to sell on its own responsibility bonds in the London market at present, as it would hurt the city's credit.

Notes of Municipal Bidding.

Seven bids were made for the Big Quill Rural Municipality, Sask., \$10,000 5 per cent. 20-year roads and bridges debentures. The offer of Messrs. W. L. McKinnon and Company, Toronto, was accepted. The other bids were from Toronto, Winnipeg and Regina bond houses.

For the Duval, Sask., \$3,000 6 per cent. 15-year debentures, three offers were received, and that of W. L. McKinnon and Company, Toronto, was accepted.

The city of Quebec on June 21st, placed a temporary loan at 3½ per cent., adding commission and stamp dues, the total discount was 4.05 per cent.

IMPORTANT BUILDING EXHIBITION.

An interesting exhibition will be held at Leipzig during the summer of 1913, to be known as "A Building Exhibition." As that year is the hundredth anniversary of an event of great interest to Germany, and as the Emperor will unveil a magnificent monument during the fair, it is certain that there will be a great attendance, reports Mr. J. T. Lethgow, acting trade commissioner at Berlin.

The exhibition will be divided into eight sections:—

Section I.—Architecture: 8 groups with 33 subsections. Section II.—The literature of architecture and building, technical educational institutions, office requisites for architects and engineers: 3 groups. Section III.—Building materials, their manufacture or preparation and use: 20 groups with 24 subsections.

Section IV.—Machines, tools and apparatus used in building: 5 groups and 2 subsections. Section V.—Sale and purchase of building land, building finance, estate agencies, insurances in connection with dwelling houses: book-keeping for builders and architects: 5 groups. Section VI.—Building sanitation for dwellings, factories and streets, protection of workers from injury, first aid and other provisions for their health and comfort; precautions against fire, old age and invalid insurance: 6 groups.

Section VII.—Gymnastics, games and sports. Section VIII.—Testing of building materials, technical demonstrations. Under section 3, group 2, wood—its preparation and use in timber construction—should be of special interest to Canadians. From section 4, sanitation for dwellings, factories and streets, protection of workers during work, and other provisions for their comfort and welfare, and particularly precautions against fire, might be studied with great advantage.

Applications for space should be addressed to Hofrat Horst Weber, Leipzig, who will forward prospectuses and give any desired information.

GREAT BRITAIN SHOULD PREPARE FOR CANAL

That Great Britain held the commanding position in the trade of the Latin-American nations, was a statement made by the Hon. John Barrett, Director-General of the Pan-American Union, at a recent lecture to the London Chamber of Commerce. Mr. Barrett, it will be recalled, contributed an interesting article to The Monetary Times respecting the relation of Canada to the Panama Canal. While Great Britain held the supreme position, Germany and the United States were forging rapidly ahead, he continued. The Panama Canal would prove of great advantage to British trade if British commercial houses would only rise to a realization of their opportunities. British exporters and importers, as well as the British government, must be prepared to use at once the same methods which the German, French, Japanese and Spanish nations were using to-day. Those and other countries were exploring the vast region which would be shortly opened to the trade of the world.

At present, only Great Britain seemed to be neglecting the opportunity of sending agents to get ready for the Panama Canal. "I am," he added, "one of those who believe that the Panama Canal will prove one of the most important changes in the commercial map of the world, and that the greatest benefit will not go to the United States but to the west coast of those twelve countries now conducting an annual foreign trade of £100,000,000. When the canal is completed that trade should rapidly increase in a few years to five times its present volume." Great Britain would have to get ready for the canal; if it did not it would be disappointed by not getting those practical results which might be expected. As to the toll question, Mr. Barrett said even if discrimination were made in favor of vessels of the United States, the benefits which British commerce and shipping would enjoy would make that question ultimately a secondary issue.

FIRST REPORT OF MONTREAL TRAMWAYS COMPANY

Result of Nine Months' Working—Earnings in Excess of Previous Twelve Months—Number of Passengers Carried

Monetary Times Office,

Montreal, July 31st, 1912.

The first comprehensive report of the Montreal Tramways Company has just been compiled. The appearance of this report has been awaited with interest, the reason being the many changes which have taken place in connection with the affairs of the company during the past year. It is only two years since the present management assumed control of the street railway. It was not until about a year ago that, in the reorganization, the Montreal Tramways Company took the place of the Montreal Street Railway Company. Many changes have been effected during the year, among these being the formation of the holding company known as the Tramways and Power Company, through the medium of which the desired object of the present control was brought about—namely, the joining up of the street railway interests with those of the Canadian Light and Power Company.

The common stock of the Tramways Company, which company succeeded the Street Railway Company in all its rights, franchises and privileges, was in the nature of a bonus stock to accelerate the exchange of street railway shares on the basis of the offer made public at the time. The public was unwilling to commit itself to any very definite views regarding the value of the tramways common stock, some claiming that it was too much of the nature of water to be of much value, and others assuming that its value was somewhere in the vicinity of \$30 to \$35 per share. Of late this stock has been advancing constantly and recently it reached par. This week buyers were asking 110 for it.

Specific Value Difficult to Approximate.

Difficult as it has been to place any specific value on Tramways Common, the work of valuing Tramways and Power has been much more difficult, inasmuch as the latter company is a holding company into which go the surplus earnings on the stock of both the Tramways Company and the Canadian Light and Power, so that it becomes necessary to know somewhat of the earnings of both companies before the value of Tramways and Power can even be approximated. The stock has been experiencing a somewhat interesting movement of late and prices advanced to 60, later declining again to slightly above 50.

The financial report just issued shows that the company has made progress since the last annual report. The result of the nine months makes a good showing as compared even with the entire previous twelve months, as the following will show:—

	9 Months, 1912.	12 Months, 1911.
Gross earnings	\$ 4,355,403	\$ 4,775,300
Op. expenses	2,618,943	2,679,805
Exp. p.c. of earnings	60.13	56.12
Net earnings	1,736,549	2,095,080
Pass. carried	104,458,960	118,268,080
Car earnings per passenger	4.06	3.94
Transfers	34,947,315	40,488,545
Total pass. carried	139,406,275	158,756,625
Car earnings per pass. total carried	3.04	2.93

It will be observed that the car earnings per passenger shows a considerable increase. This is not surprising to Montrealeers who have been raising objections to the overcrowding of cars. It is estimated that on the basis of passengers carried there should be an increase of 27,000,000 in passengers for the full year. The total carried last year was somewhat less than 150,000,000, while during the nine months period, according to report, somewhat less than 140,000,000 passengers were carried, making about 186,000,000 passengers per year.

Earnings Exceed Those of Previous Year.

It is also worthy of comment that the earnings for the nine months of this year are in excess of those for the full year ending September 30th, 1910, as well as for all full years previous thereto. The financial report for the nine months ending June 30th will, it is understood, be presented at the annual meeting on August the 6th and is as follows:—

Gross earnings	\$4,355,403.57
Operating expenses	2,618,943.65
Net earnings	\$1,736,459.92

From which deduct:—

City percentage on earnings	\$279,030.17
Interest bonds and loans	449,513.97
Interest debenture stock	600,000.00
Taxes	50,850.00
	1,379,393.84

Surplus	\$ 357,066.08
From which has been appropriated for:—	
Contingent account	150,000.00

Transferred to general surplus \$ 207,066.08

Few Shares not Exchanged.

No statement has heretofore been made of the number of shares of street railway which have actually been turned in for exchange. While President Robert in his report does not mention the actual number still outstanding, he states that only a few shares have not been exchanged. Reference is also made to negotiations in progress between the city and the railway for the purpose of securing a new contract.

The recent general manager, Mr. Duncan McDonald, has been succeeded by Mr. James E. Hutcheson, former superintendent of the Ottawa Street Railway, who has already taken up his work. It is understood that other changes will take place on the staff shortly.

DIVIDENDS PAYABLE DURING AUGUST

The following is a list of companies paying dividends in August:—

Company	Rate %	Period.	When Payable.
Canada Cement, pref.	1¾	Quarter	August 16

TORONTO POWER AND ELECTRICAL DEVELOPMENT COMPANIES

The proposal to issue Toronto Power consolidated debenture stock in exchange for the outstanding Electrical Development Company bonds is recorded in a circular issued by Mr. J. M. Smith, comptroller of the Toronto Power Company. The offer is a reply by the directors to a request by the holders of large amounts of Electrical Development bonds that they be granted the right to exchange each \$500 five per cent. bond for £103 of Toronto Power 4½ per cent. consolidated guaranteed debenture stock.

The circular continues:—"The directors are thus offering a great advantage to the holders of Electrical Development bonds, inasmuch as the present market price of the Toronto Power debenture stock offered in exchange is 100 and the present market price of the Electrical Development bonds in London is 96; the offer is therefore equivalent to paying a premium of 6¼ per cent. to holders of Electrical Development bonds on the exchange, and they will also obtain, by the exchange, an unquestionable security guaranteed unconditionally both as to principal and interest by the Toronto Railway Company.

"This offer will only remain open until September 1st, 1912. All Electrical Development bonds delivered up to the company in exchange for Toronto Power debenture stock, will, under the terms of the trust deed securing the latter, be kept alive and transferred to the trustees of the said trust deed as additional security for the said debenture stock.

"The interest on the Electrical Development bonds is payable half-yearly, on the 1st of March and 1st of September in each year. The interest on the Toronto Power stock is payable on the 1st of May and 1st November in each year.

"In order that the Toronto Power debenture stock offered in exchange for the Electrical Development bonds may rank pari passu in all respects with that already issued and quoted and be good delivery on the Stock Exchange, the Toronto Power debenture stock to be issued in exchange will carry the full half-year's interest due 1st November, 1912."

The amount of Electrical Development bonds outstanding is \$9,075,000, of which \$2,000,000 is already held by the Toronto Power Company.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

III.—TOLLS AND THEIR RELATION TO COMMERCE

Admitting the broad principle of equal rights for all nations, in respect of the Canal, the question arises as to the establishment of a free canal or the charging of moderate tolls. The consensus of opinion is everywhere largely in favor of the latter course. One of the leading advocates for a free canal is Mr. John Barrett, director-general of the Pan-American Union, who recently contributed an interesting article to *The Monetary Times* on "Canada and the Canal." He said:—

"If the United States would experience the largest benefits possible to its foreign commerce from the Panama Canal, it will make this interoceanic waterway as free to the ships of all nations as are the two oceans which it will connect. The only valid reasons for charging tolls are, first, to pay the cost of operation, maintenance and interest on investment; and, second, to protect the transcontinental railways from the competition of a free canal.

Carrying Trade of Free Canal.

"A free canal, at a conservative estimate, based on the data of trade experts, will carry in the first year \$75,000,000 more of the products of the United States than a toll canal, an amount equal to receipts of tolls required to cover operation and interest for five years. At this rate for ten years, without even counting the natural growth from year to year, the increase for that period will pay for the entire original cost of the Canal and liberal interest on the investment, or \$750,000,000. Stated another way, will the United States deliberately throw away an opportunity to increase the sale of its products \$750,000,000 in ten years in order to save \$75,000,000 in tolls?

Would Destroy Monopoly.

"An annual appropriation of \$3,000,000 to operate and maintain the Canal and the assumption of its own interest are a small burden to the United States Government compared to the entire annual budget of \$1,000,000,000 for the maintenance of the Government, but a direct annual tax of \$15,000,000 on ships and tonnage is not only a heavy burden to traffic, but means a loss of \$75,000,000 and more, each year, in the commerce of the United States.

"A free canal, in addition to increasing the commerce of the United States in ten years to fifty times the cost of operation, maintenance, and interest, will accomplish other results. It will absolutely destroy all possibility, in any shape or manner, of monopoly in interoceanic traffic."

Cites Canada's Example.

Citing the canal policy of Canada, the New York World, advocating a free Panama Canal, drew attention to the fact that this country has expended more than \$100,000,000 to provide ship canals from the Atlantic Ocean to the Great Lakes, a larger expenditure relative to population or resources than the United States will make at Panama, the cost of maintenance and improvements also being relatively larger. Nevertheless, United States vessels are allowed to go toll-free through these costly Canadian waterways. The United States tonnage through the Welland Canal is larger than the Canadian. The tonnage of both countries through the United States and Canadian canals at the Soo is larger than that of the Suez, and probably larger than that will be at Panama. "But Canada rejects the policy of cost tolls or profit tolls where they could be so easily collected," said the New York paper, "and it adopts the policy of making its artificial waterways as free as the high seas. The United States does the same with

its canal at the Soo. Can the United States afford to adopt a Panama Canal policy less generous to Canada or the nations than this Canadian canal policy is to the United States?"

Competition of Suez Canal.

The general answer has been in the affirmative. The Panama Canal bill, introduced in the United States House, allows the President to fix the tolls, but prohibits him from putting them higher than \$1.25 per net registered ton. This rate was selected because it was six or seven cents lower than the charge in the Suez Canal. The expectation is that the President will fix the rates at about \$1 per net registered ton, American measurement. This will be expected to give the Canal a marked advantage over the Suez route, so far as the cost of passage is concerned. In addition to this the bill gives the President the right to establish coal and supply depôts along the Canal. By that means the United States Government will sell coal and supplies to passing vessels probably at about cost.

Favor Low Tolls.

The common feeling, both in the United States and abroad, is in favor of comparatively low tolls. The low rates and reductions in rates on the operations of the Suez Canal, since the opening of that waterway in 1869, has helped to increase the tonnage from year to year, with only eleven exceptions. In 1906, the tolls were reduced to 7.75 francs per ton; in 1911, to 7.25 francs a ton; and in 1912, to 6.75 francs a ton. Vessels in ballast pay 2.50 francs less than vessels with cargoes. That this reduction in 1906 stimulated traffic may be inferred from the increase in the number of vessels using the Suez Canal, the increase in gross tonnage transported, and the increase in revenue in 1910 in comparison with the respective figures for 1905, the year preceding the reduction stated. The number of vessels increased from 4,116 to 4,533; the gross tonnage from 18,310,400 to 23,054,900 tons; and the revenues from 110,656,400 francs to 127,251,200 francs in 1910.

Recommend Toll of Dollar Per Ton.

One of the most interesting contributions to the rate question was that of the foreign commerce committee of the New York Chamber of Commerce. This body recommended a toll of \$1 per ton. They pointed out in their report that it is impossible to determine in advance at all closely the volume of tonnage that will pass through the Panama Canal, and also that it is almost dangerous to hazard even an estimate. "While it is doubtful whether the Panama Canal will be used ultimately to as large an extent as the Suez Canal, yet there can be no question but that a very large volume of shipping will pass through it. It is a lock canal, and its operation for large steamships is still a problem that will be solved only by actual experience. Trade for North American and South American ports will no doubt avail very largely of the Panama Canal. As regards trade for the Far East, it is somewhat problematical, as the distances across the Pacific are very great, necessitating a large portion of the steamship's room being taken for coal, there being so few coaling stations in the Pacific. This will add materially to the cost of Far East voyages to China, Japan, the Philippines, Australia and New Zealand."

Estimated Cost of Operation.

The nearest estimates of cost of interest and operation the committee were able to secure, and a portion of these were largely problematical, are as follows:—

Yearly cost of interest on bonds issued for construction of the Canal about.....	\$11,000,000
Yearly cost of upkeep of the Canal for improvements, repairs, contingencies and labor for operation	3,500,000
Total cost per year, which does not include provision for mortization of bonds	\$14,500,000

On the basis cost per annum of \$14,500,000 and tonnage carried of 8,000,000 tons, it would make the cost per ton \$1.82. This cost is high, and would no doubt be a handicap in making best and fullest use of the Canal. The committee was disposed to recommend a lower rate with the view of attracting a much larger volume of tonnage, and thereby increasing the revenues of the Canal. The toll of \$1 a ton on all tonnage passing through the Canal was the rate accordingly proposed.

Mr. William Jennings Bryan is another advocate for low tolls, and says that the United States Government should not charge any higher toll on the Canal than that necessary to pay for the cost of operation.

British Expert's Views.

Sir Owen Philipps, K.C.M.G., chairman of the Royal Mail Steam Packet Company, Elder Dempster & Company, and the Lamport & Holt Line, and director of the Pacific Steam Navigation Company, who is considered a leading authority on shipping, in an interview in London said: "The United States has the greatest opportunity before her to benefit the commerce of the world by making the Canal practically a free waterway, only charging sufficient to pay expenses. The Suez Canal never developed shipping, owing to the heavy charges of 6s. a cubic ton and 8s. per passenger. England receives a \$5,000,000 profit annually for her one-third share in the Suez Canal, which cost \$20,000,000. This profit comes chiefly from the pockets of British shipowners, for whom the Government has done nothing.

"The charging by cubic measure prevents liners of the Atlantic type from going through the Suez Canal, as the space of the saloons, corridors, and smoking-rooms is all charged for. The Panama charges should be on the cargo carried through the Canal. It must be realized that the Panama Canal never can pay commercially. The United States, regarding the work as the greatest undertaking in the world to-day, can divert trade there from all parts, as well as from the east and west coasts of the two American continents if the charges be so low as to make the Canal practically free to shipping. In this case the Suez will follow suit in less than ten years."

Position of the Railroads.

One of the United States arguments against rates so low as those proposed by Sir Owen Philipps is that they would be unfair to the transcontinental railroads.

It costs approximately ten cents per day per net registered ton to keep a vessel on the sea. If such a saving per day can be made, it seems that for all points on the west side of North and South America, north of a point of 1,500 miles south of Panama, the Canal has a monopoly of the traffic, and the volume of that traffic will be little affected by any toll which is likely to be imposed. South of the lower limit of that zone for a distance of 1,000 miles the Canal has a monopoly of the traffic so far as the Atlantic and Gulf seaboard of the United States are concerned, but in traffic from Europe the toll may become an important factor in determining what route ships shall take.

Effect on Trade Routes.

For the traffic between the Atlantic-Gulf seaboard of the United States and the west coast of South America, except that concerned with Patagonian wool. Dr. Emory R. Johnson estimates that a toll of \$1 per ton net register will not have any restraining influence on the use of the Canal. For the traffic between Europe and points on the west coast of South America from 1,500 to 2,500 miles south of Panama a toll of more than \$1 would likely divert shipping from the Canal, and for places in the agricultural district of Chile more than 2,500 miles south of Panama any toll above 75 cents would probably send ships through the Straits of Magellan.

The traffic between the United States eastern seaboard and Australia would mostly use the Canal if the

toll is fixed at \$1, and some of it, particularly that with New Zealand, might stand a higher rate without being diverted from Panama. It is estimated that no outbound ships from Europe to Australia would use the Canal, but about one-tenth of those returning may use the Canal, depending on tolls, coal, insurance rates, cargoes and other causes.

Europe and New Zealand.

The traffic between Europe and New Zealand would be largely affected by the Panama tolls; at \$1 a large part of the traffic in chartered vessels would move by way of the Straits of Magellan, while traffic by regular lines would incline toward the Canal, although any toll about 75 cents would be favorable to the Suez route.

So far as the traffic with the Orient is concerned, trade between eastern American seaports and points as

Bird's Eye View of the Panama Canal.

The view shows a section of the Atlantic division of the Panama Canal as it will appear when completed. In the foreground are the Gatun locks, which lie six miles from the Atlantic shore line. The Gatun dam and Gatun lake appear in the background. Ships will not pass through the locks under their own power, but will be towed by four electric locomotives, running on tracks upon the side of the centre walls.

—From the Scientific American

far south as Hong Kong belongs to the Panama Canal. Dr. Johnson believes that the United States cannot divert by means of low tolls at Panama a large tonnage from the Suez to the American route, but he considers that it will be desirable to make the Panama tolls lower than those at Suez, and to sell coal at attractive prices at Panama in order to ensure bringing to the Canal the major share of the commerce between our Atlantic seaports and Asiatic ports from Singapore to Yokohama.

(To be continued.)

MANITOBA TELEPHONE RATES INCREASED

Considerable increases have been made in the Manitoba telephone rates, as the result of the recent investigation of the government telephones. Commissioner Barry has announced a change of rates for telephone subscribers in the city of Winnipeg and the same has been approved by the Public Utilities Commissioner. The new rates went into effect July 1.

In future the charge per annum for a single party residence phone with an unlimited service will be \$30 per annum instead of \$25 at present, while business phones for a unlimited service will be at the rate of \$60 per annum instead of \$50 as at present.

The Public Utilities Commissioner will receive all complaints in regard to the new rates at his office for a period of one week from the date of the publication of the official notice of the change in rates. The new rates are retroactive dating back to July 1.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Shawinigan Water and Power Company.—The Shawinigan Water and Power Company's earnings for June of this year amount to \$102,875, as compared with June, 1911, \$84,648.

McIntyre Mining Company.—Owing to the changed character of the ore on the third level of the McIntyre mine an additional plant has been ordered so that cyaniding can be carried out. This plant will consist of chilling mills, rolls and cyanide tanks and will raise the capacity of the present plant to 100 tons per day and upwards. According to a statement by Mr. C. B. Flynn, the present plant earned \$12,000 in bullion last month and will this month produce \$14,500, which at the present rate of expenditure will make a good profit over running expenses.

Rio de Janeiro Tramway, Light and Power Company, Limited.—The statement of combined earnings and expenses of the tramways, gas, electric lighting and power, and telephone services, operated by the company for the month of June, 1912, is as follows:—

	1911.	1912.	Increase.
Total gross earnings	\$1,071,964	\$1,228,342	\$156,378
Operating expenses	509,054	587,496	78,442
Net earnings	562,910	640,846	77,936
Aggregate gross earnings from January 1st	6,107,773	6,992,476	884,703
Aggregate net earnings from January 1st	3,125,783	3,605,617	479,834

Brazilian Traction, Light and Power Company.—The following table will help investors to follow the relative values of Brazilian Traction and Rio and Sao Paulo:—

With the new stock at	Rio is worth	Sao Paulo is worth
86	137.6	236.5
87	139.2	239.2
88	140.8	242
89	142.4	244.7
90	144	247.5
91	145.6	250.2
92	147.2	253
93	148.8	255.7
94	150.4	258.5
95	152	261.2
96	153.6	264
97	155.2	266.7
98	156.8	269.5
99	158.4	272.2
100	160	275

Mexican Light and Power Company.—The earnings of the Mexican Light and Power Company and the Mexico Tramways Company for June show consistent increases over those for June of last year. The following is the statement of the Mexican Light and Power Company, Limited:—

		Increase.
Gross earnings	\$ 700,138	\$ 68,573
Net earnings	421,740	94,651
Aggregate gross earnings from Jan. 1st	4,320,663	318,773
Aggregate net earnings from Jan. 1st	3,088,328	662,957

Following is the statement of earnings and expenses from traffic only of the Mexico Tramways Company:—

		Increase.
Total gross earnings	\$ 558,355	\$ 66,227
Operating expenses	262,427	26,178
Net earnings	\$ 295,928	\$ 40,040
Aggregate gross earnings from Jan. 1st	3,271,421	272,079
Aggregate operating expenses from Jan. 1st	1,577,364	128,715
Aggregate net earnings from Jan. 1st	\$1,694,057	\$143,364

Canada Light and Power Company.—The annual meeting of the shareholders of the Canadian Light and Power Company is called for Thursday, August 6, the same day as the annual meeting of the Montreal Tramways Company.

At this meeting the shareholders will be asked to approve of an increase in the common capital stock from \$6,000,000 to \$7,000,000, the directors having already approved the proposal.

The approval of the shareholders is purely a matter of form as the chief interest is the Montreal Tram and Power Company, the holding concern.

There is now very little unexchanged Canadian Light and Power stock outstanding and the little there is is coming in rapidly in view of the high price offered for it.

It is understood that in providing for this increase of \$1,000,000 in Canadian Power the directors desire to be placed in a position to provide for future capital requirements.

This may come in the way of an extension of the company's interests in the city.

All the past extensions and developments have been already financed so that the fresh capital extension is purely for future requirements.

Canadian Northern Express Company.—The Canadian Northern Express Company reports to the United States interstate commerce commission for May and eleven months compared as follows:

	1912.	1911.	Increase.
Total receipts from op.	\$ 62,371	\$ 43,938	\$ 18,433
Exp. priv. debit	24,269	17,048	7,220

Hudson's Bay Company.—The following letter has been sent to the London Economist by J. L. Hamilton, M.R.C.S., 30 Sussex Square, Brighton, England:—"Sir,—As a shareholder too ill to attend the Hudson's Bay Company's meetings to voice my views, pray generously grant me the hospitality of your columns to protest against the directorate's proposals to extend their retail trade as universal providers by multiple palatial stores in Canada, which are too apparently doomed to financial failure.

"But if millions sterling are to be poured into and wasted in these ultra-speculative schemes, then, in justice to the shareholders, the company's shares should be sub-divided into two distinct classes of securities, so as to give each shareholder the option of selection.

"One class of shares to contain only farm lands, town sites, city properties, harbors and mineral rights, which are of increasing colossal value.

"The other class of shares to include the company's present and prospective retail trades, which are destined to prove augmenting losses."

Hudson's Bay shares are now being dealt in in London as of £1 each, the new share certificates of this denomination being now in process of production for delivery in exchange for the old £10 share certificates. The allotment letters of the new 5 per cent. cumulative preference shares were recently posted. In the market dealings began in these at ¼ to ¾ premium, which is equal to a percentage premium of 5 to 7½. The "rights" were then quoted 1s. to 1s. 6d. per new share of £5.

Dominion Sawmills and Lumber Company.—In the scheme of capital reconstruction of this company, the existing 6 per cent. first mortgage debentures, of which there is

outstanding £930,000, part of a total of £1,000,000, will be exchanged for an equivalent amount of 5 per cent. debenture stock in the new company, to be known as the United Sawmills and Timber Company, while a bonus of three fully-paid \$1 shares in respect of each £20 of debentures—say, 15 per cent.—will also be allotted. Interest on the 5 per cent. debenture stock in respect of each financial year, up to and including July 31, 1917, will be payable only if and so far as the net profits, before providing for the sinking fund, shall be sufficient to meet the charge. Redemption will be carried out by means of an annual sinking fund, to be provided not later than December 1, 1916, and calculated at the rate of \$1.75 per 1,000 feet (log scale) of the timber cut during the year ended the previous July 31. This sinking fund is only to be provided if and so far as the profits of the previous year, after payment of the interest on the 5 per cent. debenture stock and provision for special reserve shall allow, and is to be applied to purchases of the stock on the market below par or by drawings at that figure. Any deficiency in the sinking fund in one year is to be made good subsequently out of any surplus remaining after payment of interest on the income debenture stock. The 5 per cent. debenture stock is to be finally redeemed on July 31, 1940.

The \$2,000,000 of cumulative 7 per cent. participating \$100 preference shares are to be replaced by an equivalent amount of 6 per cent. income debenture stock, together with a bonus of 4 per cent. in fully-paid \$1 shares of the new company. Interest on the income debenture stock is only to be payable out of the profits after meeting interest and sinking fund requirements for that year on the 5 per cent. debenture stock, while provision must also first be made for the reserve fund. The income stock is to be redeemed by means of the operation of a sinking fund similar in all respects to that provided for the 5 per cent. debenture stock, excepting only that the payments to such sinking fund shall, so long as any of the 5 per cent. debenture stock is outstanding, be calculated at the rate of \$1 per 1,000 feet (log scale) of timber cut. After the whole of the 5 per cent. debenture stock has been redeemed, the sinking fund on the income stock will be calculated at \$2.50 per 1,000 feet. A special reserve fund will be created and utilized only for the equalization of interest payments on the two debenture stocks referred to. The \$4,201,200 of \$100 shares are to be exchanged on the basis of six new fully-paid \$1 shares in respect of every \$100 share now outstanding. Powers will be taken by the directors to create a prior charge of £100,000 if necessary, but it is not likely that this right will be exercised at once, as Messrs. F. J. Benson and Company have agreed to purchase for a sum of £100,000 a certain amount of 5 per cent. debenture stock and income debenture stock.

RIGHT USE OF WORDS

The man who knowing that Dick was short for Richard and therefore reasoned that richardnary was the correct title for a dictionary is dead, but his need is a modern requirement, namely the right word. The successful financier or merchant may have a useful working vocabulary, but increasing activities and new phases in the commercial sphere make additional words and frequent changes of phraseology necessary. No office or business is complete without a comprehensive dictionary of the "Webster" type, the first edition of which contained 70,000 words. The requirements of 1912 make an edition known as the "New International Dictionary" necessary. This contains 400,000 defined words and phrases, occupying 2,700 pages. Among the interesting features are "the divided page," an up-to-date gazetteer and biographical dictionary and 6,000 illustrations. It is splendidly bound and should be included in the business man's library.

Webster's New International Dictionary, G. and C. Merriam Company, Springfield, Mass., U.S.A. Price \$12.00.

An order in council has granted to Prince Edward Islands its share of the government aid to agriculture. It amounts to \$7,000.

An important addition to western manufacturing concerns will be the Consumers' Ice Company, which has decided to erect in Norwood, near Winnipeg, a plant costing \$350,000. They have already secured a site of two acres. The product of the works will be clear, pure, hygienic ice from natural artesian water under the Harrison process which is in use in Chicago, Detroit, Columbus, Indianapolis, Minneapolis, and many other large cities in the United States. The Norwood plant will be the first in Canada. The Consumers' Ice Company is made up of leading Winnipeg men, with the exception of Mr. Alexander Harrison, of Chicago, who is one of the leading shareholders. The directors are: Messrs. W. S. Thomson, president of the Algoma Steel Bridge Company, president; A. J. Andrews, vice-president; F. E. Cryder, managing director; J. R. Forman, secretary-treasurer; Dr. E. A. Jones.

STERLING EXCHANGE.

John Seath, jr., exchange broker, Traders Bank Building (Main 7244), quotes local rates as follows:—

Between Banks.			
	Buyers.	Sellers.	Counter.

Fort William			653,908	

Several deliberate attempts have been made to burn Elevator D at Fort William, which is owned by the Canadian Pacific Railway, and secret service agents of the company are now endeavoring to find the incendiary.

Mr. F. P. Jones, general manager of the Canada Cement Works, visited Medicine Hat to select a site for the erection of a cement plant. The city is to give 15 acres of land and free gas. A site for a glass factory was selected by Mr. W. J. Christie, of Winnipeg. This site will be 9 acres in extent, and has been given by the city.

ADVERTISER, 27, desires position as chief clerk or underwriter. Has had nine years fire insurance experience; past three years as inspector. Thoroughly acquainted with the various inside departments and has a sound knowledge of C.F.U.A. schedules. Box 75, The Monetary Times, Toronto.

REVIEW OF THE MONTH

Flotations in London—Investment Offerings—Bank Branches Opened and Closed.

NEW STOCK LISTINGS

The Montreal Stock Exchange has listed \$1,908,500 additional Richelieu and Ontario Navigation stock.

The Spanish River Pulp and Paper Company has listed the following additional stock on the Toronto Stock Exchange:—Common, \$1,000,000; preferred, \$2,500,000.

DIVIDEND CHANGES

The 8 per cent. dividend on Montreal Light, Heat and Power has been increased to 9 per cent.

A dividend has again been started upon the stock of the Canadian Converters Company, at the rate of 4 per cent. per annum. The previous dividend was 1 per cent., payable on November 15th, 1908.

An initial dividend of 3½ per cent. for the first half year of 1912 has been declared on the preferred stock of the Canada Foundries and Forgings, Limited.

A dividend at the rate of 7 per cent. per annum has been declared on the preferred shares of the Monarch Knitting Company, Limited, for two and a half months ended July 31st, 1912.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during July:—

City Realty Investing Company of Montreal, Limited.—Offering of 5 per cent. convertible gold debentures at 97½ and interest.

Tuckett Tobacco Company, Limited.—\$2,500,000 7 per cent. cumulative preferred stock at 95 and \$2,000,000 common stock at 40.

Fortier and Kilpatrick, Limited.—\$150,000 treasury stock at par.

Union Brick Company, Limited.—20,000 shares of \$100 each at par, with 25 per cent. bonus.

Canada Moving Pictures, Limited.—\$40,000 capital stock at par.

Bay View Boulevard, Limited.—\$600,000 preference shares at par.

Bell Telephone Company, Limited.—\$750,000 5 per cent. bonds. Sold in Canada and the United States.

Ritz Carlton Hotel.—\$500,000 5 per cent. first mortgage bonds at 95.

Great West Fisheries, Limited.—\$50,000 6 per cent. 30-year bonds at par.

Blairmore Brewing and Malting Company, Blairmore, Alta.—Over 7,000 shares of \$5 each common stock at par.

CANADIAN FLOTATIONS IN LONDON, (JULY)

The following flotations of interest to Canadians were made in London during July:—

British Maritime Trust, Limited.—35,000 shares of £5 each, at a premium of 5s. per share, and £500,000 5 per cent. first debentures of £100 each at par.

City of Calgary.—£500,000 4½ per cent. debentures of £100 each at 99.

British and General Debenture Trust Company, Limited.—200,000 shares of £1 each at par.

Investment Corporation of Canada, Limited.—£250,000 4½ per cent. debentures stock at 97½.

Mitford Calgary Colliery Company.—500 6 per cent. first mortgage participating debentures of £100 each at par, with 30 per cent. bonus of fully-paid ordinary shares of \$5 each.

Dorchester Electric Company.—£51,400 5 per cent. first mortgage bonds at 95, with bonus of 25 per cent. common stock.

The following flotations were omitted from the June list:—

British Columbia Electric Railway Company, Limited.—£200,000 in 5% cumulative preference shares of £1 each at 21/- per share; £200,000 preferred ordinary shares of £1 each at 22/- per share; and £200,000 deferred ordinary shares of £1 each at 24/- per share; offered to existing shareholders.

Corporation of Canada, Limited.—£250,000 4½ per cent. debentures at 97½.

Kindersley, Sask., Farm Lands, Limited.—£118,000 sixes.

BANK BRANCHES OPENED AND CLOSED.

The list for July will be completed next week.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended July 26th:—O'Brien, 138,780; McKinley-Darragh, 145,780; Cobalt Townsite, 54,000; Buffalo, 61,420; Temiskaming, 61,563; Beaver, 77,519; total, 539,062 pounds or 269 tons. The total shipments since January 1st are now 24,834,734 pounds or 12,417 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Gardner, No. 2215, \$1,600. O. Cox, Keoma.
Freda, No. 2403, \$600. H. B. Conway, Wiste.
Strong, No. 1788, \$300. A. Mursell, Hardisty.
Craighton, No. 2486, \$1,430. T. Agg, Munson.
Feadview, No. 2639, \$2,000. W. H. Hess, Excel.
Elcan, No. 2225, \$2,500. E. Williams, Elcan.
Royal, No. 2337, \$500. H. Broderson, Suffield.
Broadlands, No. 2593, \$2,200. B. Burlison, Excel.
Elmer, No. 2481, \$1,200. F. Tadman, Hand Hills.
Wideawake, No. 2711, \$1,400. A. Larson, Endiang.
Maxville, No. 2599, \$1,500. J. Claussen, Winnifred.
Alps, No. 2688, \$1,400. I. C. Ricketts, Garden Plain.
Red Deer, No. 104, \$10,000. M. A. Munro, Red Deer.
Paradise, No. 2669, \$800. H. Munsterman, Dusseldorf.
Fraserton, No. 2657, \$1,500. H. Anderson, Lonbutte.
Kimberley, No. 2689, \$2,200. S. T. Chappell, The Hub.
Gwynneth, No. 2738, \$1,200. J. L. McNeight, Camrose.
Whitby, No. 2391, \$1,000. H. E. Kingsley, Tomahawk.
Beauvallon, No. 2235, \$1,000. O. Laplante, Beauvallon.
Plateau, No. 2692, \$1,600. N. L. Sokvitne, Reid Hill.
Love Vale, No. 2643, \$1,600. R. G. Stearns, Fairacres.
Laurier, No. 2321, \$1,500. W. J. Lonergan, Flowerdale.
Enterprise Valley, No. 2676, \$1,500. W. J. Tabor, Delia.
National Park, No. 102, \$30,000. E. S. MacGregor, Banff.
Glen Banner, No. 2573, \$1,000. W. Rigney, Glen Banner.
Lucky Strike, No. 2589, \$1,700. O. Brownlee, Lucky Strike.
Holmberg, No. 2630, \$800. J. A. Holmberg, Lucky Strike.
Parkhurst, No. 2645, \$1,525. W. Koerner, Athabasca Landing.

Saskatchewan.

Baden, No. 704, \$1,000. F. Biko, Schulz.
Fleming, No. 45, \$2,000. H. Davis, Fleming.
Sunrise, No. 521, \$1,200. W. Rankin, Hanley.
Coral, No. 2107, \$1,500. A. J. Rutter, Forward.
Goodeve, No. 2697, \$500. J. Kendal, Goodeve.
Doyton, No. 772, \$2,500. F. R. Webster, Brock.
Diamond, No. 601, \$1,600. G. M. Ross, Francis.
Albert Springs, No. 878, \$2,000. S. Ellis, Ogema.
Virginia, No. 467, \$2,000. R. McCool, Zealandia.
Manville, No. 658, \$1,200. J. Mann, Skull Creek.
Morse, No. 1921, \$10,000. W. A. Nicholson, Morse.
St. Basilian, No. 103, \$1,400. G. Betz, St. Philips.
Edenwold, No. 101, \$2,000. P. Mang, Edenwold.
South Lake, No. 774, \$1,500. J. G. Knox, Tuxford.
Hazel, No. 633, \$1,300. D. W. Harvey, Brombury.
Mount Joy, No. 566, \$3,000. E. R. Gosling, Ogema.
Montcalm, No. 508, \$1,200. C. Berand, Villefranche.
Fairmount, No. 725, \$1,800. T. H. Dunbar, Biggar.
River Park, No. 843, \$1,700. J. N. Vogt, Aberdeen.
Kilshanning, No. 786, \$1,400. R. A. Pengelly, Cupar.
Freshwater, No. 626, \$1,500. W. B. Cornwall, Watrous.
Gerrond, No. 661, \$1,200. T. McNabb, Red Deer Hill.
White Star, No. 550, \$400. J. P. St. Denis, Prince Albert.

Maymount, No. 1555, \$1,200. P. E. Knowles, Maymount.

Lightwoods, No. 825, \$1,000. W. H. Prosser, Chagness.

Little Touchwood, No. 814, \$1,600. E. Blackbeard, Little Touchwood.

St. Paul's R. C. S., No. 20, \$100,000. P. L. Convey, Box 1364, Saskatoon.

The Mount Royal Foundry Company, Limited, has increased its capital stock from \$45,000 to \$100,000, such increase consisting of 550 shares of \$100 each.

BUSY NEW BRUNSWICK

Satisfactory Conditions Prevail Throughout the Province—Many Developments Projected

(Special correspondence.)

St. John, N.B., August 1st.

Business activity in all lines prevails throughout New Brunswick. Building operations are on a larger scale than last year, not only in St. John, but in other towns in the province. The scarcity of labor is a handicap in construction work. The general crop conditions have been much improved during the past few weeks. A period of hot and dry weather succeeded the cold season of early June, and has in turn been followed by copious rains. The crops should turn out somewhat better than was anticipated. Prices of all kinds of farmer's produce, including meats, are high. The early vegetables are on the market, nearly two weeks later than usual. There is still an active demand for lumber in the American market, and coastwise freights are high, so that both the lumbermen and owners of schooners derive benefit. The British lumber market continues dull with freights high.

Development of Industries and Resources.

Three Toronto engineers are making surveys in the oil shale region of Albert County, and Premier Flemming stated in a speech a few days ago that Sir William Mackenzie while in England would secure capital to develop this property, and that a plant to cost \$2,000,000 would be erected, giving employment to 1,400 men. Premier Flemming announces that he expects to see the enormous water power of Grand Falls harnessed within two years, and within three years a large paper mill in operation there. He also expresses confidence that pulp and paper mills will be established at Bathurst in Gloucester County. The premier further hopes by means of the government's ready-made-farm scheme to get many farms developed.

With regard to new industries, Mr. F. H. Anson of the Ogilvie Milling Company, has been appointed manager of the Atlantic Sugar Refineries, Limited, which is ready to erect a refinery at St. John as soon as arrangements are made regarding the site. Mr. Anson interviewed the city council, and the city council held a conference with Hon. Messrs. White and Reid, who promised to lay the matter at once before their colleagues in Ottawa, and it is hoped arrangements will soon be completed to begin the erection of a refinery. Another very important industry is that of the Canadian Sardine Company, which is erecting a small town at Chamcook, near St. Andrews, and it proposes to bring out in August 120 girls from Norway to work in the sardine factory, putting up the fish in pure olive oil.

St. John's Growing Period.

The main feature of the "Back to New Brunswick Week" at St. John was the formal opening of the great harbor works at Courtenay Bay. Work had already been in progress for some time on the breakwater, but Hon. W. T. White, finance minister, in presence of Hon. J. D. Reid, Lieutenant-Governor Wood, Hon. William Pugsley, George W. Fowler, M.P., Premier Flemming, members of the legislature and city council and assembled citizens, touched the electric button which set off the first blast on the site of the dry dock, which will be one of the largest in the world. Mr. White predicted great growth for St. John, and described it as a port in the development of which all Canada was interested, expressing his conviction that the great terminal works could not be provided too rapidly to meet the demands of the ever growing traffic to and from the rapidly expanding West.

The Maritime Nail Company, Limited, have built a new wharf in the rear of their plant and will build a two story addition to the factory. The Union Foundry and Machine Company, of West St. John, have greatly enlarged their foundry and machine shop and are building a new machine shop. The International Railway, which runs across the province from Campbellton to the Maine border, is of great benefit to the lumber operators and has resulted in an increase of population and settlement along the line.

The exports from St. John to the United States during the last three months were valued at \$695,000, an increase of \$50,000 over the like period last year. The work of constructing the railway from Fredericton to the Queen's County coal fields is progressing rapidly, rail laying has begun, and it is expected that the Canadian Pacific will be hauling coal from the mines over this branch before the end of November. —W.E.A.

The Metals Chemical, Limited, capitalized at \$1,000,000, has purchased the unused building of the Electric Steel Company at Hamilton, and will erect a plant that will employ one hundred men.

FUEL OIL FOR SHIPPING

May Enter Canada Duty Free—Growing Use of Oil in Navigation

Officials of oil companies have learned that the Canadian Customs Department will probably decide to admit fuel oil for shipping use free of duty to Canada. Since July 12, when a tank steamer with a cargo of fuel oil for shipping use reached Vancouver from San Francisco, and a duty of 2½c. a gallon was demanded, the companies engaged in the fuel oil trade have been awaiting a decision by the Minister of Customs on an appeal taken as a result of this duty. Many of the trans-Pacific steamers of the Canadian Pacific and Grand Trunk railroads use fuel oil, and the imposition of such a duty would mean a doubling in the price of the product of these and other companies operating oil-burning ships.

Within the last seven years, according to oil authorities, practically all the local steamers at Vancouver and on Puget Sound have been converted into oil burners, while to-day a large majority of the larger off-shore liners are burning fuel oil. The saving in space and operating expenses has appealed to owners, and with the improvement in atomizing the fuel, its use has become much more satisfactory. Many manufacturing plants also have discarded coal for oil, and this ever-growing market has brought the importations of oil to Vancouver and vicinity to unexpected proportions.

Oil Burning Engines.

Hon. Winston Churchill, the First Lord of the British Admiralty, recently announced that an investigation into oil fuel would be made. Oil burning engines are going to play an important part in many of the new crafts that are now being built and those in contemplation in the principal shipyards of the United States and England. According to a well-informed marine builder, there are no less than 242 steamers fitted for burning liquid fuel, the largest being the Toyo Kisen Kaisha liner's Tenyo Maru and Chiyo Maru of 13,454 tons gross and 13,431 tons gross respectively. In this connection it is of interest to note that the new Cunard liner Aquitania of 50,000 tons gross in the course of construction on the Clyde is to be similarly equipped, while the White Star boat of 18,000 tons which is now being built at Belfast for the Cape-Australian routes, and which is to be named the Ceramic is also to use oil. Quite a large number of the oil burners are now employed in the Pacific, two of them the Ventura and Sonoma recently inaugurated a service for the Ocean Steamship Company between San Francisco and Sydney, New South Wales. Another line of steamers burning oil fuel, the Crown Line, will soon be running between Pacific Coast ports and Australia.

Substitute for Coal.

The Colonial Transportation Company of Mexico is equipping its barges with oil engines and the use of oil for fuel promises to supersede other fuel upon nearly all the river and coastwise vessels on the east coast of Mexico. There is also an increased demand for crude oil for fuel by manufacturing plants in various parts of Canada and the United States.

Since the British coal strike in the early part of this year many of the large users of coal, including the railways, steamship companies and municipal corporations, have been considering more seriously than ever before the adoption of a substitute fuel. There has been an unprecedented demand for oil engines to replace or supplement steam engines. It is stated that the British towns of Barking, Reigate, Leatherhead, Fareham, Bude, Letchworth, Aldershot, Cosham, Chichester, Aberystwyth, Birmingham, Bath, Swadlincote, St. Albans, Leek, Hindhead, Rothesay, Oxford, Wakefield, Saltburn, Sheerness, Guildford, Baner, Bridgewater and Liverpool will soon be partially or wholly independent of coal for their electrical supply.

Independent of Coal and Steam.

Many municipal water works are also being made independent of coal and steam power. It is claimed by motor makers that many English firms are, as a result of the late strike, seriously considering the advantages of motor transport. Commercial travellers are using motor-cycles in increasing numbers when calling upon their customers, as they can travel, it is stated, a hundred miles upon a gallon of petrol (gasoline) and carry their samples, unless they are of great bulk, be entirely independent of the railways and be able to call upon a greater number of people than they possibly could if restricted to steam travel.

Owing to heavy demand on Canadian Pacific Railway cars occasioned by the record immigration to Western Canada this year the Calgary board of trade was unable to hold its proposed excursion.

PERSONAL NOTES

Mr. George Hadrill, secretary to the Montreal board of trade, has returned from a trip to England.

Mr. Stewart B. Playfair has been elected a member of the Toronto Stock Exchange.

Mr. W. E. Hobson, has been appointed assistant manager of the Home Investment and Savings Association of Winnipeg.

Mr. F. Willard Smith, who has been secretary of the Sovereign Fire for a number of years, will join the American Union Fire of Philadelphia.

Messrs. M. E. Manning and L. J. Lugsdin have been appointed general agents in charge of the Toronto district Ordinary Department, of the London Life Insurance Company.

Mr. S. J. Deery, floor representative on the Standard Stock Exchange, Toronto, of Messrs. J. P. Bickle & Company, is being admitted into partnership in the firm.

Mr. T. B. Macaulay, of the Sun Life Insurance Company, was wedded to Miss M. Allen, daughter of the late Rev. W. Allen, of New Southgate, at Torquay, England.

Mr. S. J. Moore, president of the F. N. Burt Company and the Metropolitan Bank, has returned from a five months' trip in Europe and Britain.

Mr. W. J. Thorold, director of the Canadian and General Trusts, Limited, of London, England, has been elected a director of the Sherbrooke Railway and Power Company to represent the English interests in the company.

Mr. Oswald M. Brown, of Messrs. Webb, Read, Hegan, Callingham & Company's London office, is visiting Montreal previous to making a tour of the firm's branches at Winnipeg, Calgary, Vancouver, etc.

Mr. M. M. Lambert, Canadian manager of the Guardian Assurance Company, Limited, left by the Laurentic on a visit to the head office of his company, and also to spend a three months' vacation in the Old Country.

Mr. A. Lindback, fire commissioner for the Province of Manitoba, who has been attending the convention of the Fire Marshals' Association, assembled at Detroit, has been elected president for the coming year of that association.

Mr. Anthony J. McMillan, former manager of the Le Roi Mining Corporation in Rossland, was on the Pacific coast last week. He arrived from London on business with an underwriting company he is organizing to deal in Western Canadian securities. The capital will be \$2,500,000.

Mr. E. H. Bisset has been appointed city manager at Winnipeg, of the Mutual Life of Canada. For the past twenty years he has been connected with the Canada Life, first in Brockville, then Toronto, and for the past five years as city manager at Detroit, Mich.

Mr. E. F. Garrow, manager of the Winnipeg branch of the North American Life Insurance Company, was tendered a banquet at the Manitoba Club by the business men upon his leaving for Toronto to assume duties as secretary and assistant manager of the company.

Mr. J. C. Watson, who has been for some years Montreal manager for the firm of Messrs. Chas. Head & Company, has been made a member of that firm. Mr. Watson will continue to manage the Montreal branch of the firm in his capacity as resident partner.

Mr. R. H. MacMicking, late manager of the Calgary branch of the Union Bank of Canada, was presented with a purse of gold, an illuminated address, and a bouquet of American beauty roses for Mrs. MacMicking at a banquet tendered him on the occasion of his promotion.

Sir Charles Hunter, the Earl of Stanhope, and the Earl of Winterton, with twenty or more British financial men interested in various Canadian enterprises, including the Sault steel interests and the Southern Alberta Land Company, will arrive at Montreal on August 23rd.

Mr. Frederick Keffer, of Greenwood, B.C., has been appointed acting general manager of the British Columbia Copper Company, pending the selection of a successor to the late Mr. E. G. Warren. Mr. Keffer was previously manager, but persuaded the company to relieve him of the duties of that position and making him its mining engineer.

Mr. Percy Cowans, of Messrs. McDougall and Cowans, has returned to Montreal after a trip to the Western provinces and to the Pacific coast. Mr. Cowans' mission to Vancouver was to discover whether it is likely to prove a profitable field for Canadian securities. He thinks there is a good opening there for trading in Canadian stocks and his firm will open an office in that city.

Mr. A. F. R. Roger, representative of the banking house of which the Right Honorable Lord St. David is head, was in Montreal and Toronto recently and is now on his way to the Western provinces. The London firm represented by Mr. Roger has loaned £70,000,000 to the Argentine Republic

during the past twelve years and now proposes to recognize the Dominion as a favorable field for investment.

Sir William Mackenzie returned to Toronto from England this week. Care should be taken, he said, not to make issues in London of a worthless nature, but Canadian securities are more popular with the British investor than are those of any other country. While we may have to pay a little more to secure loans in future, he does not think that there will be any lessening of our borrowings. We have need in Canada for much money for all sorts of legitimate purposes, and he could not think of any greater disaster than to have our borrowings in Britain curtailed. A little care in selecting our offerings and a little breathing space for the British investor would cure present congestion and right matters.

Mr. E. N. Killer, after four and a half years efficient service with the Yorkshire Insurance Company as inspector, has resigned to accept the important appointment of inspector and adjuster in Eastern Ontario for the London Mutual Fire Insurance Company, Canada's leading non-tariff company. Mr. Killer began his insurance career in 1892 in the head office of the Waterloo Mutual. Nine years later he left that company to become renewal clerk in the head office of the Anglo-American at Toronto. His next promotion was to the position of endorsement clerk with the London Mutual, which position he resigned to become examiner and underwriter in the head office of the Sovereign Fire. He left the Sovereign to become inspector for the Yorkshire. He has had a valuable all-round training in fire insurance work, and is a thoroughly well-posted official.

Mr. Arthur J. Hughes, who has resigned his position as director and secretary of the China Mutual Life Insurance Company, Limited, to assume that of managing director of the China United Assurance Society, Limited, of Shanghai, was connected with the Manufacturers' Life, then as secretary and manager of the Crown Life. From this last named position he went some years ago to China, to fill the office with the China Mutual which he now relinquishes. The new company is the first attempt to found a purely Chinese company under foreign management. It takes over a local Chinese company established some four years ago, with all its branches in China, Java, Sumatra, Singapore, the Straits Settlements and America. Mr. Hughes has associated with him as secretary and actuary, Mr. F. Defries, A.I.A. (England).

GRAIN GROWERS GRAIN COMPANY.

The Grain Growers Grain Company, which is the organization of the Western Canadian Farmer, held their meeting in Winnipeg on July 16th, under the presidency of Mr. T. A. Crerar. The years' statement showed a net profit of \$121,614, against \$69,000 the previous year and but \$790 five years ago. The paid-up capital is \$568,000, and, after paying a ten per cent. dividend, \$60,000 was added to the reserve fund, which now stands at \$200,000, this despite the difficulty in handling last year's crop, owing to low grades, tough wheat and traffic congestion.

The president said that the company had practically closed with the Canadian Pacific Railway a deal whereby they would lease the big terminal elevator "B" at Fort William, Ontario, and with the Manitoba Government for leasing its extensive system of internal elevators, both of which projects the meeting was asked to ratify. The company had also acquired timber limits in British Columbia estimated to contain 300,000,000 feet.

The profits of the company for previous years were as follows: 1911, \$69,575.46; 1910, \$59,663.78; 1909, \$53,000; 1908, \$30,190.24; 1907, \$790.54.

Speaking of future developments, Mr. Crerar favored the local unit method as practised by the farmers' elevators of Minnesota and the Dakotas, whereby other classes of merchandise were successfully handled by country elevators. It was necessary to secure best results to maintain the staffs all the year round, and lumber, binder twine and implements could be profitably handled during the summer months. He advocated the securing of a good coal area, as coal and lumber were rapidly going under control of combines. He favored selling to everyone, but giving a discount to their shareholders. Units would be built up by issue of stock to local subscribers, and there was no reason why in time the successful merchandising of the British co-operative societies should not be duplicated.

The company might further secure connection with a mortgage corporation and secure cheap money for farmers. The money power in Canada, he said, was becoming a menace and its evil possibilities might largely be overcome by co-operative credit societies.

A branch of the Bank of Nova Scotia has been opened in Lethbridge under the management of Mr. E. F. Macneill.

EIGHTY-SEVEN NEW COMPANIES

Several Million Dollar Concerns Have Been Granted Charters

Eighty-seven new companies with aggregate authorized capitalization of \$15,705,000 have been granted either Dominion or provincial charters. Thirty-one of them have head office in Ontario, twenty-two in Alberta, fifteen in British Columbia, ten in Quebec, eight in Manitoba and one, a navigation company, at Dawson City. The Canadian Crocker-Wheeler Company, an electrical machinery manufacturing concern, already in existence at St. Catharines, has received a Dominion charter and is capitalized at \$1,000,000. The Mitford (Calgary) Colliery Company, with capital of \$1,000,000 and head office at Calgary has obtained an Alberta charter. This company last month made a public issue in London of £50,000 6 per cent. first mortgage participating debentures with a bonus of 30 per cent. of common stock. Other large mining companies chartered in the West are the New Wellington Coal and Coke Company, Vancouver, and the Pelican Oil Company, Edmonton. The Howard Smith Paper Mills, of Montreal, Title Holding Company, of Vancouver, and the Marshall-Wells Alberta Company, Edmonton, are the remaining million dollar companies. The Regent Asbestos Corporation has been chartered with head office at Montreal. The Kindersley (Saskatchewan) Farm Lands, with capital of \$600,000 and Dominion charter, has also headquarters at Montreal. This company made a public issue in the London market this week of £118,000 6 per cent. debentures at par.

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Redcliffe, Alta.—Chad's, \$10,000.
Prince Rupert, B.C.—Lakelse Valley Homes, \$150,000.
Midway, B.C.—Rock Creek Land Company, \$500,000.
Lethbridge, Alta.—Grassy Lake Townsite Company, \$60,000.
Red Willow, Alta.—Creighton Ranching Company, \$50,000.
New Westminster, B.C.—Fraser Valley Dairy Company, \$50,000.
Windsor, Ont.—Cadillaqua Club, M. Jackson, D. McPhail, R. Unsworth.
North Vancouver, B.C.—North Vancouver Construction Company, \$10,000.
Kingston, Ont.—Great Gulf Lands, \$500,000. J. Ridden, W. H. Dyde, J. O. Hutton.
Oshawa, Ont.—Backett Motor Company, \$350,000. F. H. Storey, J. Gray, W. J. Hands.
North Bay, Ont.—Northern Planing Mills, \$75,000. R. McKay, A. Dods, G. Urquhart.
Brantford, Ont.—MacBridge Press, \$40,000. M. M. MacBride, R. E. Ryerson, J. Collins.
Owen Sound, Ont.—Creeper and Griffin, \$50,000. E. J. Creeper, G. N. Griffin, J. Minton.
Port Arthur, Ont.—J. J. Carrick Company, \$100,000. J. J. Carrick, D. McD. Hogarth, J. F. Teskey.
Oakville, Ont.—Oakville Arena Company, \$50,000. A. B. Currey, P. W. Beatty, W. J. Quinn, Toronto.
Haileybury, Ont.—Rahn Bee & Honey Company, \$40,000. N. B. Strong, E. W. Kearney, D. W. Lang.
Three Rivers, Que.—Maple Grove Sugar Company, \$5,000. A. Brunelle, M. C. Raymond, C. Tessier.
Beeton, Ont.—Kline Manufacturing Company, \$20,000. R. S. Burleigh, G. G. Plaxton, R. K. Grimshaw.
Fort Frances, Ont.—Monarch Hotel Company, \$40,000. P. D. Munroe, W. F. Langworthy, A. J. McComber.
Warton, Ont.—Warton Realty Company, \$100,000. J. E. Campbell, Hepworth; G. Kastner, C. Reckin, Warton.
Dawson City, Yukon.—Side Streams Navigation Company, \$50,000. S. C. Barrington, J. Raymond, C. F. Merrifield.
L'Islet Station, Que.—Brick Manufacturing Company, \$20,000. N. Boulanger, St. Eugene; O. Cloutier, C. Lecours, L'Islet Station.
Niagara Falls, Ont.—Lundy Company, \$40,000. L. S. Lundy, Stamford Township; F. W. Hill, E. W. Murphy, Niagara Falls.
Thorold, Ont.—Thorold Planing Mills, \$40,000. M. A. Wills, W. M. Mitchell, Stamford Township; C. N. Clendenning, Niagara Falls.
Beachville, Ont.—Beachville White Lime Company, \$40,000. J. W. Blow, Woodstock; S. Schell, East Oxford; J. Bremner, West Oxford Township.
St. Catharines, Ont.—Canadian Crocker-Wheeler Company, \$1,000,000. W. K. Baldwin, Baldwin's Mills, Que.; F. E. Lovell, Coaticook, Que.; R. A. Stinson, St. Catharines.

Burlington, Ont.—Burlington Lawn Bowling Club. J. C. Smith, W. J. Brush, C. N. Murphy. Smith, Dudley, Stuart Company, \$40,000. L. Smith, Burlington; J. Dudley, J. Stuart, Hamilton.

Hamilton.—Bartonville Pressed Brick Company, \$40,000. W. Theaker, J. L. Schelter, T. L. Sweeney. Windemere Park, \$40,000. C. B. Whitfield, W. Lees, T. Hobson. Business Realty, \$40,000. W. Less, T. Hobson, R. P. McBride.

Calgary, Alta.—Mitford (Calgary) Colliery Company, \$1,000,000. West Glengarry Company, \$10,000. Motor Car Supply Company, \$10,000. Territorial Investment Company, \$300,000. Calgary First Street West Syndicate, \$150,000. John Galt Engineering Company, \$10,000.

Vancouver, B.C.—British Pacific Estates, \$100,000. Independent Loan & Investment Company, \$300,000. British Columbia Federationist, \$20,000. Williamson & Jenkins, \$100,000. Title Holding Company, \$1,000,000. Consolidated Trust Company, \$250,000. Ensenada Dock & Trading Company, \$500,000. New Wellington Coal & Coke Company, \$1,000,000. J. W. Foster, \$75,000. River Land & Water-Frontage Company, \$350,000. Hodgson, Long & Aldridge, \$15,000.

Edmonton, Alta.—Pioneer Trading Company, \$100,000. Midland Construction Company, \$20,000. Radford Dredging Company, \$25,000. Delwood Land Company, \$10,000. Edmonton Bottling Works, \$20,000. Empire Agencies, \$25,000. Marshall-Wells Alberta Company, \$1,000,000. A. H. Esch & Company, \$30,000. Co-operative Builders, \$50,000. Camrose Clay & Lumber Products Company, \$100,000. Peace River and British Columbia Land Company, \$50,000. Pelican Oil Company, \$1,000,000. Whitecourt Investment Company, \$65,000.

Montreal.—Regent Asbestos Corporation, \$250,000. W. G. Mitchell, R. Chenevert, F. Callaghan. J. V. Boudrias, \$50,000. J. V. Boudrias, J. A. DeLongchamp, R. Bernard. Howard Smith Paper Mills, \$1,000,000. W. A. Merrill, L. de K. Stephens, J. J. Meagher. Lake St. Louis Land Company, \$50,000. A. Smart, J. A. Smart, C. E. Bickerdike, Lachine. Federal Engineering and Contracting Company, \$25,000. J. A. Pharand, A. Pharand, Montreal; L. N. Leamy, Verdun. Kindersley (Saskatchewan) Farm Lands, \$600,000. L. Macfarlane, G. Barclay, J. G. Cartwright. Food Specialists of Canada, \$50,000. W. J. Shaughnessy, H. H. Scott, A. Charters. Le Louvre de Paris, \$10,000. I. P. A. DesTrois-Maisons, J. A. L'Heureux, H. Gingras.

Winnipeg, Man.—Empire Lumber Company, \$300,000. M. C. Walston, L. H. Northrop, Winnipeg; V. Wurtels, Saskatoon. Manitoba Investments, \$500,000. J. Robinson, C. G. Stewart, H. Carstens. Dust Oil Company, \$5,000. J. O. R. Newman, T. J. Russell, E. Robins. Peerless Punctureless Tire Company, \$50,000. A. R. Bredin, Kildonan; G. E. Webb, J. M. Nichols, Winnipeg. Co-operative Printing, Publishing & Map Company, \$40,000. H. Schmidt, F. L. Harris, E. Berge. Hebrew Immigration Progressive Society. I. Ludwick, C. Dworetz, S. Lerner. Electric Motor Sales & Repair Company, \$20,000. W. S. Raymond, R. H. Mainer, W. C. Barton. Superior Elevator Company, \$150,000. W. L. Parrish, G. N. Heimbecker, F. B. Hamilton.

Toronto.—Exmouth Realty Company, \$250,000. W. K. Trower, J. J. Hoidge, M. E. Robins. Bassano-Alberta Land Corporation, \$100,000. H. C. Macdonald, H. J. Macdonald, J. W. Broudy. Dominion Leather Goods Company, \$40,000. J. H. Hunter, W. M. Cox, R. G. Roberts. Pittsburgh Lamp, Brass & Glass Company, of Canada, \$10,000. J. B. Taylor, W. A. J. Case, J. F. H. McCarthy. Merchants Realty Company, \$40,000. S. Beck, S. Weissman, R. Greenberg. National Land & Investments, \$100,000. S. C. Smoke, J. G. Smith, N. Sinclair. Terrene Land Company, \$150,000. S. C. Smoke, J. G. Smith, N. Sinclair. Highlands, \$40,000. E. L. Middleton, T. L. Monahan, A. E. Knox. Consolidated Motors, \$40,000. A. Hunter, A. H. Paterson, G. Tyrrell. Canadian Tool Steel Company, \$600,000. F. H. Phippen, A. J. Reid, G. G. Ruel.

DEBENTURES AWARDED.

Medicine Hat, Alta.—\$50,000, to Messrs. Wood, Gundy and Company, Toronto.
Greenfield Park, Que.—\$35,000 5 per cent. 30-years, to Messrs. Hanson Brothers, Montreal.
Strassburg, Sask.—\$5,000 6 per cent. 20 instalments, to National Finance Company, Toronto.
Duval, Sask.—\$3,000 6 per cent. 15-years, to Messrs. W. L. McKinnon and Company, Toronto.
Coleman S.D., Alta.—\$7,000 5 per cent. 10 instalments, to National Finance Company, Toronto.
Midhurst S.D., Sask.—\$7,000 5 per cent. 20-years, to Messrs. C. H. Burgess and Company, Toronto.
Nelson, B.C.—\$43,595 5 per cent. 10 instalments and 20-years, to Dominion Securities Corporation, Toronto.
Big Quill R.M., Sask.—\$10,000 5 per cent. 20 instalments, to Messrs. W. L. McKinnon and Company, Toronto.

TRANSPORTATION OF WESTERN CROPS

Various Suggestions as to Reasons for Car Shortage
—Fire Insurance in Calgary

(Special correspondence.)

Calgary, July 29th.

There is every prospect of a fight between the railway interests, the elevator people and the farmers, when the Dominion Railway Commission meets here this month. A committee of the board of trade appointed to gather data for use in helping to get out Alberta's crop this fall, brought out the statement that the car distribution clause was largely responsible for delay, in that a farmer entitled under the act to his car in the usual order, might take days to load it as against only hours if loaded by the elevators. The Grain Growers' Grain Company handled 28 million bushels last season and their records show that not one per cent. of the cars loaded over the platform by farmers had demurrage charged against them, a demurrage which begins 24 hours after a car is spotted.

The farmers generally will, if they think they are getting fair treatment, use the elevators rather than load over the platform, but if it was not for this latter privilege they would be absolutely at the mercy of the elevators. An attempt was made last fall to take away this privilege and give to an appointed grain commission the right to distribute cars. The farmers objected, and though they may differ on many points they are one in retaining their right to cars in the order of their applications. The elevator interests say that in addition to the delay caused by farmers with the cars allotted to them, the railways do not do what they might to facilitate rapid movement. To this the railways retort that too much of the rolling stock is held up by what amounts to practically fraudulent orders for cars and cite instances where such occurred.

Can Handle Forty Million Bushels.

With their number of cars suitable for hauling grain, the Canadian Pacific Railway is said to be in a position to move to Fort William from as far west as Calgary approximately 40,000,000 bushels before the freeze up by having each car make one trip. Not all these cars are available but they should average two and a half trips to the car before the close of navigation. It seems not improbable that both grain dealers and farmers will coincide in the contention that lack of motive power on the part of the railroads is a contributing factor to the congestion, notwithstanding the argument of the railways that they could handle the crop if others would but do their share in helping things along.

May Duplicate Saskatchewan's Plan.

The arrangement whereby the Saskatchewan Government loans 85 per cent. of the cost of building farmers' elevators is to be duplicated in Alberta if the advocates of that plan can induce the legislators in the provincial house to put a bill through.

More than one hundred sections have been filed in the land office here on account of the oil rush to what is supposed to be a natural oil basin near Okotoks.

Although Calgary's insurance rates are only 30 to 65 cents per \$100, an effort is being made to bring about a further reduction on account of the small fire losses of the past.

The Municipal Street Railway system netted a profit of \$14,840 for the month of June. Passengers to the number of 1,345,656 were carried giving a gross return of \$54,461.

The official announcement has been made of the erection at Edmonton of a union station costing approximately \$400,000 by the Grand Trunk Pacific and Edmonton, Dunvegan and British Columbia Railways, as soon as negotiations with the municipality for the closing of certain streets have been concluded. The building will have a length of four city blocks, it will be two stories in height and will have all modern conveniences for the comfort of the travelling public. Provision will be made for six sets of double tracks and four passenger platforms. The Edmonton, Dunvegan and British Columbia Railway will operate its own freight from its own terminals. Contracts for the erection of the new \$750,000 Grand Trunk Pacific hotel in the same place will also be awarded shortly in Montreal. When the time for receiving tenders expired on July 15th, six bids had been put in, all from firms of repute throughout the Dominion, but these will require some little consideration before any announcement is made. Steel will be on hand in the Albertan capital in three months' time and construction will be prosecuted throughout the winter as in the case of the Fort Garry at Winnipeg.

RAILWAYS, MINES AND FISHERIES

Being Extensively Developed in British Columbia—
Point Grey and Transportation

(Staff correspondence.)

Vancouver, July 29th.

At the annual meeting of the Victoria board of trade, Sir Richard McBride outlined the large expenditure by railways in British Columbia. The subject is an important one, since it indicates the faith these companies have in the future. A railway man from up country told The Monetary Times that few people realize just how much railway construction will be going on in British Columbia during the next four or five years, neither do they realize what it means to double track the Canadian Pacific Railway between Vancouver and Calgary. The big spiral tunnel at Field will be duplicated, and one of the longest tunnels on the continent, if not the longest, will be constructed under Rogers Pass. This tunnel will do away with several miles of snowsheds and will also give a better grade. The new double track will not be built along the old grades entirely. An effort is being made to secure better lines and surveyors are at work with this object in view. Then the Canadian Pacific Railway has in immediate view the construction of a tunnel from the depot yards under the business portion of Vancouver to its shops on False Creek, and also the erection of a new station, this being now under weigh.

Negotiations between the city and the Canadian Northern Railway re terminal sites at the head of False Creek have not greatly advanced this week.

Will Submit By-law Again.

The street car deadlock in Point Grey may be broken at last. After considerable warm discussion, it has been decided to once more submit the by-law to the ratepayers of that municipality. Winter will be here before much can be done, and it is almost imperative that some sort of a service should be provided. Reeve Harvey, of Point Grey, has also been in conference with the Greater Vancouver Tramway Committee, and it may be that the committee will make some concession in its effort to effect a consolidation of the franchises. If this consolidation is consummated, it will be important both for the company and the city.

Hon. F. Cochrane, minister of railways, was in Vancouver this week, and was the guest of public bodies. At North Vancouver he made an inspection of the harbor. It was after this little trip, and at the banquet tendered him, that he hinted at government control of the harbor was for the benefit of the people as a whole.

Copper Resources and Results.

British Columbia copper resources are getting publicity through the British Columbia Copper Company operations at Greenwood, and those of the Granby Company. With the price of copper fairly good, and a prospect that it will remain so, despite the recent break in the London market, operators in this province should meet with success. The properties are perhaps low grade, but they are being developed systematically and scientifically on a large scale and the best results are being obtained. It is reliably stated that Granby has brought production costs down to ten cents per pound, which leaves a nice margin for profit at the present market price. Granby develops by underground workings certain of the ore bodies indicated by the diamond drill before it goes ahead with extensive construction, and this policy is commended by mining men. Exploration and development work is being prosecuted at the company's Hidden Creek property and if the results prove satisfactory, it is the intention to erect a 2,000-ton smelter, which would make the production of the company about 50,000,000 pounds of copper per annum. This would place the Granby among the ten largest copper producers of North America, a very enviable position.

Fishery Returns May be Small.

The salmon season has started, but it is expected that this will be one of the lean years. Preparations have been made for a small pack on the Fraser River. Next year, according to what has happened in the past, the catch should be much larger than for the past two years, 1913 being the quadriennial run.

The British Columbia Packers' Association at its annual meeting this week had very satisfactory reports presented. All the old officers were re-elected, including Mr. W. H. Barker, president; and Mr. R. J. Ker, secretary-treasurer.

La Compagnie d'Assurances Generales centre l'incendie has received a Dominion license to transact fire insurance. The chief agency of the company has been established at Montreal, and Mr. Joseph A. Laurin appointed chief agent.

CANADIAN LAND DEBENTURE ISSUE

Farm Lands Company Tries London Market—Dominion Government May Guarantee Further Canadian Northern Bonds

The Union Bank of Canada, on behalf of the British and Overseas Agency, offered in London this week £118,000 6 per cent. debentures in Kindersley, Saskatchewan, Farms Lands, Limited.

Some regret is expressed in the London press, says a cable to the Montreal Star, that the prospectus does not frankly state details, such as the terms on which the Agency secured these debentures, which it now offers to the public at par.

The following issues have been listed on the London Stock Exchange: City of Regina £117,400 4½ per cents; South Winnipeg, Limited, £300,000 fives.

Applications have been made to list on the London Stock Exchange, Canadian Northern Manitoba guaranteed (renewed special application) £587,671 fours, and Southern Alberta Land Company £47,392 shares.

Canadian Northern Railway Guarantee.

The Dominion Government has offered to guarantee the bonds of the Canadian Northern line from Prince Albert to join the Government Hudson Bay line near Split Lake.

The Keystone Portland Cement Company, of Calgary, has been incorporated with a capital of \$700,000 and bonding powers of \$500,000 6 per cent. first mortgage bonds. The company is establishing its mills at Blairmore, Alta., and is expected to commence the manufacture of cement early next year. A bond issue will probably be made next week.

"Colonial" Loans in London.

The reception accorded three recent "colonial" loans in London is striking testimony to the congested state of that market. The Newfoundland loan of £400,000 3½ per cent. stock at 93 per cent, was only taken by the public to the extent of one-fourth, and the underwriters had the rest. Of the Queensland loan underwriters had to take up 89 per cent. The response to the city of Calgary loan of £500,000 4½ per cent. debentures at 99, notwithstanding the exceptionally favorable conditions was also poor.

Mr. W. R. Arnold, managing director of the Dominion Trust Company, Limited, who is just back from London, declares that the trouble being experienced in floating Canadian issues is due to two causes. In the first place there have been too many Canadian issues, and the market has been unable to digest them all. There is no such thing as a shaken confidence in Canadian enterprises, declares Mr. Arnold. The second cause is that offerings are being made with too low a rate of interest. With continental cities offering bonds at 4½ and 5 per cent., the English investor is beginning to look for a better return for his money than 3½ and 4 per cent. Canadian industrials and municipal issues must be prepared in future to pay a higher price for their capital.

Application has been made for the listing on the Toronto Stock Exchange of \$500,000 additional bonds of the Steel Company of Canada, which have just been issued. The total amount of bonds issued by the company is \$8,000,000.

CANADIAN CREDIT MEN.

Toronto wholesalers were urged to establish an adjustment bureau in Toronto by Mr. Henry Detchon, general manager of the Canadian Credit Men's Association, at a recent meeting of the eastern branch. He outlined the excellent results obtained through the establishment of such a bureau in Winnipeg, emphasizing the fact that the method of issuing writs against insolvent or weak debtors had been entirely discarded in the Western city. Instead of using the law, he explained, meetings of all the creditors were held and the best method of dealing with each case decided upon, thus saving hundreds of dollars. The bureau also takes over matters affecting the Legislature, insurance questions, insolvent estate, and investigation of weak accounts. Mr. Detchon dealt also with his trip to Montreal and the Maritime Provinces with the object of opening up the work there. In Montreal a branch of the association had been formed with a membership of 104, and would be open for business on August 1st. A small association known as the Maritime Credit Men's Association, with headquarters at St. John, had been taken into the Canadian organization, and was at present operating as a branch of the Canadian Credit Men's Association. The movement, he said, was fast becoming Dominion-wide, and its benefits were being recognized.

The British-Canadian Cannery plant at Port Robinson, Ont., has started work. The plant has been quickly erected and is up-to-date.

MONTREAL MAKES TEMPORARY LOAN

Seven Hundred and Fifty Thousand Sterling Placed at Four and a Half Per Cent.

The city of Montreal will follow Toronto's example and make a temporary loan on the English market. The city council this week decided to accept the offer of the Bank of Montreal to market in London a loan of £750,000 for six months at 4½ per cent. Adding commission and stamp dues, the total discount will be about 4½ per cent. Considerable discussion occurred at the meeting when it was elicited that the city would be indebted to the bank for temporary loans amounting to \$9,000,000, including the present loan. Controller Lachapelle stated that last February the civic board of control had submitted an offer to the council for a loan of \$5,000,000 at 97.15. This the council had not accepted. The same loan to-day could be made only at a loss of about \$200,000. Alderman Lariviere admitted that he had blocked that offer, having been told that it was possible to obtain an offer of 98.

Advice of Responsible Bank.

Alderman Ward said that the city was acting wisely in following the advice of a responsible bank. It was noted that the Bank of Montreal was but acting as the financial agent of Montreal, and, as accredited agent, was transmitting to the corporation the money quotations of the London market, thus giving to the council the benefit of the information it had in its possession.

Two More Loan By-Laws.

Two loan by-laws were submitted this week to the Montreal city council, by which the city is authorized to raise \$5,550,000 for public works during 1912. The following are details of Montreal's financial position:—

Value of assessable real estate, less probable reductions:	
According to roll of 1911	\$318,000,000.00
According to roll of 1910	319,550,000.00
Increase	\$ 61,450,000.00
Less:	
Value of the properties of the Harbor Commissioners assessed for the first time in the roll of 1911, provisionally reduced pending the decision of the Court, about \$	18,000,000.00
Net increase	\$ 43,450,000.00
Borrowing power of at 12%	\$ 5,214,000.00

Montreal's Borrowing Power.

The borrowing power of Montreal this year is 12 as compared with 15 per cent. a year ago.

One of the by-laws states that the city is entitled this year to borrow to the extent of \$5,214,000. The second by-law is for the raising of \$248,648 as part of the unborrowed loan power of last year. The acceptance of these by-laws enables the city to raise temporary loans, if desired.

THE LATE MASSEY MORRIS.

Withdrawn for many months from the activities of business, in the grasp of painful ailments that left no chance of prolonging his life, Mr. Morris awaited, in serene patience, the slow advance of death which came to him in his 53rd year.

Born at Lennoxville, Que., in 1859, he spent his business life practically in the service of the Canadian Bank of Commerce which he joined about 1880. He served the bank at London, Chicago, Seaforth and Toronto, was for some years inspector, and occupied from 1906 to 1910 the position of manager of the Toronto branch, in succession to the late Mr. J. C. Kemp.

His characteristics as a banker were thoroughness, a high sense of honor, a clear mind, and eminent fairness in dealing with subordinates. It follows, therefore, that his memory is cherished warmly, not only by his co-workers but also by those in the business world who were admitted to an intimacy which disclosed the noble qualities of his mind and heart.

An order-in-council has been issued requiring the Grand Trunk Pacific within 30 days from August 1st to lease the stretch of the Transcontinental from Lake Superior Junction to Transcona, a short distance from Winnipeg. As the Grand Trunk Pacific line from Port Arthur to Lake Superior already is in operation this will mean a line from Transcona to Thunder Bay, in full operation, under control of the Railway Commission. This action is in accordance with a recommendation by Major R. W. Leonard, chairman of the Transcontinental Commission.

JULY FIRE LOSSES

Considerably Less Than June—Twenty-three Large Fires

The Monetary Times' estimate of Canada's fire loss during July amounted to \$1,741,371, compared with June loss of \$4,229,412 and \$5,384,300 for the corresponding period last year. The following is the estimate of the July losses:—

Fires exceeding \$10,000	\$1,387,000
Small fires	127,888
Estimates for unreported fires	226,483

Total \$1,741,371

The following are the monthly totals of the losses by fire in Canada compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$1,275,246	\$2,250,550	\$3,002,650
February	750,625	941,045	1,640,153
March	1,076,253	852,380	2,261,414
April	1,717,237	1,317,900	1,355,055
May	2,735,536	2,564,500	2,251,815
June	1,500,000	1,151,150	4,229,412
July	6,386,674	5,384,300	1,741,371
August	1,667,270	920,000	
September	894,125	1,123,550	
October	2,195,781	580,750	
November	1,943,708	1,506,500	
December	1,444,860	2,866,950	

Total \$23,593,315 \$21,459,575 \$16,481,870

The fires at which loss was estimated at \$10,000 and over were as follows:—

Thornloe, Ont.	Lumber mill	\$15,000
North Bay, Ont.	Hotel	30,000
Haliburton, Ont.	Lumber mill	20,000
Montreal, Que.	Cooperage	30,000
Steveston, B.C.	Hotel	12,000
Cedars, Que.	Business block	50,000
Cobalt, Ont.	Business section	30,000
Montreal, Que.	Steamer	18,000
North Head, N.B. ...	Seventeen buildings	60,000
Bedford, N.S.	4 residences	25,000
Tilbury, Ont.	Mill, etc.	22,000
Toronto, Ont.	Hotel, etc.	12,000
St. Gabriel de Brandon, Que.	Electric plant	50,000
Pictou, N.S.	Milling plant	28,000
Point Tupper, N.S. ..	Freight shed, etc.	200,000
Westville, N.S.	Briquette plant	25,000
Morse, Sask.	business section	100,000
Dundas, Ont.	Factory	30,000
Montreal, Que.	Warehouse	30,000
Montreal, Que.	Limeworks	75,000
Vancouver, B.C.	Business section	500,000
Montreal, Que.	Factory	10,000
Windsor, Ont.	Steel works	15,000

The structures damaged and destroyed were 109 residences, 15 barns; 11 each stores, hotels; 6 factories, 3 warehouses; 2 each planing mills, flour mills, foundries, planing mills, saw mills, stables, electric plants; 1 each church, nunnery, college, laundry, lumber yard, business section, newspaper building, cooperage, mine plant, theatre, exhibition buildings, briquette plant, gashouse, lime works.

There were 50 each cattle, turkeys, and 10 horses destroyed, also 650,000 feet lumber, 24 freight cars, 20 automobiles and trucks, 15 tons hay, 10 cords wood, 4 motor boats, 2 each car loads of hay, buggies, 1 each car load of shingles, steamer, caboose, threshing machine, binder, grain chopper.

Of the presumed causes 7 were attributed to lightning, 5 incendiary, 3 each children playing with matches and crackers, 2 each to gasoline explosion, sparks, overheated ovens, 1 each rats chewing matches, tramps, upset lamp, stove explosion, engine backfired, defective flue, defective wiring, overheated machinery. Many fires were reported as of unknown origin.

The number of deaths from fire is 9, making 110 for the first seven months of 1912.

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	27	27	27
February	15	12	11
March	20	18	24
April	37	20	15
May	15	28	18
June	52	13	6
July	15	110	9
August	11	22	..

	1910.	1911.	1912.
September	10	13	..
October	16	17	..
November	19	20	..
December	19	17	..
Total	256	317	110

The fires at which fatalities occurred were as follows:—

Ottawa, Ont.	Clothing set on fire	1
Toronto, Ont.	Playing with matches	1
Windsor, Ont.	Burning building	1
Montreal, Que.	Smoking	1
Sydney, N.B.	Turpentine ignited	1
Ottawa, Ont.	Clothing set on fire	1
Quebec, Que.	Steam crane accident	1
Dundas, Ont.	Burning building	1
Sherbrooke	Burning dead flies	1

Total 9

ONTARIO CHARTERED ACCOUNTANTS

At the twenty-fifth annual meeting of the Institute of Chartered Accountants of Ontario at Niagara-on-the-Lake recently, the membership committee's report recommended that the degree of F.C.A. be conferred on members who had rendered conspicuous service to the institute or had acquired a reputation for character and skill in their profession.

The education committee's report urged the need of technical training for qualified accountants.

The Dominion Association will hold their annual meeting in Toronto on September 24th and 25th.

The following were the officers elected:—President, Mr. A. K. Bunnell; first vice-president, Mr. Osler Wade; second vice-president, Mr. Edmond Gunn; secretary-treasurer, Mr. Arnold Morphy; registrar, Mr. T. Watson Sims. Council:—Messrs. A. K. Bunnell, R. J. Dilworth, Edmond Gunn, W. T. Kernahan, W. P. Morgan, Arnold Morphy, W. R. Morris, Bryan Pontifese, J. M. Scully, C. S. Scott, George U. Stiff, J. I. Sutcliffe, W. B. Tindall, Osler Wade and R. E. Young. Auditors:—Messrs. G. A. McClatchie and R. A. McMichael. Representatives on the Dominion Association:—Messrs. George Edwards, W. T. Kernahan and George U. Stiff.

The president and secretary were appointed delegates to the American Association of Chartered Accountants, which meets in Chicago September 16th.

A gold medal was presented to Mr. A. R. McMichael, and scholarships to Messrs. M. E. Shaver and F. D. Burpee.

ROYAL CANADIAN AGENCIES

The Royal Canadian Agencies, Limited, with headquarters at Winnipeg, consists of an amalgamation of the previous business conducted by Messrs. W. Sanford Evans and Company, Messrs. Savage and McGavin, and H. F. Mytton. Messrs. Savage and McGavin have conducted a general financial agency business and have been associated with various important interests including coal properties on Vancouver Island. Mr. Savage is now a prominent resident of Victoria, Mr. J. C. McGavin for some years having been the active business manager of the firm in Winnipeg. They are also largely interested in farm lands throughout the West. Mr. H. F. Mytton is an Englishman who has been in Western Canada for the past 20 years. Up to 1911 he was best known owing to his connection with the Canadian Bank of Commerce. In May, 1911, he resigned the managership of that bank at Regina, Sask., to accept the Canadian managing directorship of the British Canadian and General Investment Company, Limited, which has become largely interested in Western Canadian financial matters. This position he still retains.

The Royal Canadian Agencies will continue the general investment business of Messrs. W. Sanford Evans and Company, and Savage and McGavin. This includes a general stock brokerage and real estate business in addition to fire and general insurance. It has taken over the Winnipeg agency of the L'Union Fire Insurance Company (of Paris, France), and the general agency of the National Surety Company of New York and one or two other companies.

The new company will handle Western industrial issues, and Mr. Mytton is at present in the Old Country with a view to concluding the financial connections of the company on that side of the water.

The head office of the company is in Winnipeg, but its interests will probably demand offices in other parts of the Dominion. The work of the company next year should prove of material interest to those who are anxious to encourage high-class financial enterprise in the development of the latent resources of Western Canada.

CANADIAN BUTTER

Inland Revenue Department's Laboratory Report—
Legal Maximum for Water Unnecessarily Large.

An official standard for butter was established by an Order-in-Council of November 3, 1910, as follows:—
Butter fat, is the fat of milk, and has a Reichert-Meissl number not less than 24 and a specific gravity not less than (40° C).
0.905 (40° C).

Butter is the clean non-rancid product made by gathering in any manner the fat of fresh or ripened milk or cream into a mass, which also contains a small portion of the other milk constituents, with or without salt, and contains not less than 82.5 per cent. milk fat and not more than 16 per cent. of water. Butter may also contain added coloring matter of harmless character.

The value of butter inheres in the amount and the quality of the fat contained in it. Legal butter must contain more than 17.5 per cent. of other substances than milk fat. These substances are essentially water, salt and curd. It is evident that by increasing the water content of butter, the purchaser may be defrauded, and for this reason a specific maximum for water is fixed by law.

Maximum Higher than Necessary.

This maximum (16 per cent.) is evidently much higher than necessary, and the following synopsis of water content actually found in the 157 samples purchased by inspectors from the inland revenue department during February and March and now reported on by Mr. A. McGill, chief analyst is instructive:—

Less than	1 per cent.	water in	5 samples.
"	2	"	6
"	10	"	112
Above	10	"	33
"	16	"	1
Total			157

It is by the introduction of water, rather than by an excess of salt, that the producer can increase the weight of his product, since modern taste objects to the presence of more than 3 or 4 per cent. of salt. This is seen in the following resume of the present collection:—

	Per cent. in.	Samples.
Salt	below 1	7
"	from 1 to 2	50
"	" 2 to 3	51
"	" 3 to 4	28
"	" 4 to 5	13
"	" 5 to 6	5
"	" 6 to 7	2
"	above 7	1
Total		157

What Best Butter Contains.

Where a butter contains 3 per cent. of salt, it is evident that not more than 14.5 per cent. of water can be present, if the butter is legal butter; that is if it contains 82.5 per cent. of milk fat, as required by law. It would appear from the above record of water content, that this allowance is ample; and indeed the best butters contain much less than 14.5 per cent. of water.

The following statement is instructive as showing that the best butter making provinces furnish a butter with comparatively low water content.

Samples of butter.	From.	Average Per cent. water.
10	Nova Scotia	8.38
10	Prince Edward Island	3.93
10	New Brunswick	5.66
10	Quebec	6.34
10	St. Hyacinthe	7.82
10	Montreal	8.23
10	Ottawa	5.13
10	Kingston	6.70
10	Toronto	6.14
8	London	6.14
9	Windsor	6.40
10	Manitoba	11.01
10	Calgary	11.36
10	Nelson	7.66
10	Vancouver	8.25
10	Victoria	9.73

This showing becomes more emphatic when considered in relation to the average price of butter in the different provinces.

Provinces.	Number samples.	Average price.	Average water content.
Nova Scotia	10	30.7	8.38
Prince Edward Island	10	29.5	3.93
New Brunswick	10	32.4	5.66
Quebec	30	37.1	7.46
Ontario	47	35.3	6.09
Manitoba	10	42.5	11.01
Alberta	10	44.0	11.36
British Columbia	30	41.2	8.55

It appears from the above, that the price of butter of good quality, varies from 29.5 cents per pound in Prince Edward Island, where it is cheapest, to 44.0 cents per pound in Alberta, where the ruling price is highest. But if we consider the cost of the essential component of butter, namely the milk fat, the difference in price at these two extremes is much greater. Alberta butter averages 2.35 per cent. of salt; Prince Edward butter averages 3.01 per cent. So that while 29.5 cents pays for 93.06 per cent. butter fat in Prince Edward Island, 44.0 cents pays for only 86.29 per cent. butter fat in Alberta. While the nominal difference in price per pound is expressed by the ratio 1 to 1.49 the real difference in cost for the butter fat is 1 to 1.608.

To Disadvantage of Consumer.

Judging not alone by the present examination, but as the result of analyses recorded in previous bulletins, I am convinced that the legal maximum of 16 per cent. for water in butter is unnecessarily large; and permits of the placing on the market of butter varying too greatly in actual value, to the disadvantage of the consumer and of the butter maker who is careful to avoid the retention of unnecessarily large amounts of water in his product.

The following tabulation of fat content gives more direct information regarding the milk-fat values of these butters:—

	Samples.
Below 82.5 per cent. fat (legal minimum)	4
82.5 to 85 per cent.	13
85 to 86 "	6
86 to 87 "	12
87 to 88 "	12
88 to 89 "	12
89 to 90 "	15
90 to 91 "	11
91 to 92 "	29
92 to 93 "	15
93 to 94 "	6
94 to 95 "	7
95 to 96 "	9
96 to 97 "	3
Above 97 "	3
Total	157

Four samples are adulterated, as having less than the legal minimum fat.

The fat is found to be genuine milk fat in every case. In one or two samples it exhibits somewhat exceptional character, but not such as to justify any suspicion of being of foreign origin.

Boracic acid is present in ten (10) samples. This does not constitute legal adulteration, under present regulations. The question of allowing preservatives in butter is under investigation. British law permits boracic acid up to one tenth of one per cent.

ONTARIO'S FIRE INSURANCE ACT.

On Thursday the new Fire Insurance Act of Ontario came into effect. Among the important changes which have been previously discussed at length in The Monetary Times, and which have to be plainly printed in the new policies will be the following:

"In future the insurance company will be liable for damages from lightning, whether or not the lightning causes an actual fire.

"The insured will have a standing permit for workmen making repairs fifteen days in the year instead of five as formerly.

"Policies must not state authorized capital of the company, unless full particulars of the amount paid up and other details are given."

Renewal receipts, if accepted by the insured, are an acceptance of the renewal of the policy, and the company may sue for the amount involved unless receipt is returned immediately. The company is liable for the insurance in case of loss from the moment the receipt is sent out.

INSURANCE NOTES AND HAPPENINGS

Lloyds' New Premiums—Agents' License Law in North Dakota

There have come into force the revised rates of premiums which Lloyd's underwriters have decided to enforce as the result of the disasters experienced by them of late, and the change will undoubtedly be productive of good results. It has been calculated that an all-round advance of 5 per cent. in the rates charged by the "Room" for insurance protection would not only recover before the end of the year the losses which have recently been sustained, but would also leave a substantial surplus. This estimate gives some idea of the enormous volume of business transacted, a factor which is very often left out of account by those who write in a rather sensational manner regarding the effects of such claims as were made in respect of the wrecks of the "Delhi," the "Oceana" and the "Titanic." Undoubtedly this succession of claims was a calamity for the "Room," but the net total was not so great as some people imagine. By way of illustration we may recall that, while a total loss was paid in respect of the bullion which the "Oceana" had on board when she went down, the greater part of this was recovered and realized in time to meet the sums which became due on the sinking of the "Titanic." In other words, although the "Oceana" ranked technically as a "total loss," practically the whole of the most valuable portion of her cargo was eventually salvaged at a cost of between £40,000 and £50,000.

Life Insurance Agents' License Law.

Much misunderstanding and misinformation is current regarding the statutory provisions in the North Dakota law relating to agents' licenses. In one quarter the impression prevails that officers of a domestic insurance company may solicit applications for insurance and issue policies by mere virtue of their official relations with such company.

This is not true. No special privilege or exemption hedges the officers of insurance companies. In their official capacity their duties are administrative or clerical, as the case may be; but soliciting insurance and issuing policies is an entirely different function, over which the State very properly has supervision. Section 4508, Revised Codes of 1905, provides that "Whoever solicits insurance on behalf of any insurance corporation or person desiring insurance of any kind, or transmits an application for a policy of insurance, other than for himself, to or from any such corporation, or who makes any contract for insurance, or collects any premium for insurance, or in any manner aids or assists in doing either, or transacting any business of like nature for any insurance corporation, or advertising to do such thing, shall be held to be an agent of such corporation to all intents and purposes." Agents must have licenses. In this connection an opinion recently rendered by the Attorney-General's department has been submitted:—

Agent Cannot Delegate Authority.

"It seems to me that the language of Section 4509, Revised Codes of 1905, clearly indicates that every officer, broker, agent, or sub-agent, of any insurance corporation of any kind, except county mutual insurance corporations of this State, must procure a certificate of authority from the commissioner of insurance before he can act or aid in any manner in transacting the business of such corporation in placing risks or effecting insurance therein. I, therefore, believe it is as necessary for an officer to hold an agent's license if he intends to solicit insurance for his corporation as for an employed agent of the company to have such license."

"The above opinion," says Mr. W. C. Taylor, State Insurance Commissioner, "bears heavily upon another phase of the matter. An officer of a bank, let us say, receives authority to act as agent for a company writing fire insurance or hail insurance, or both. The license is then treated as if it blanketed everyone connected with the bank, whereas it confers authority exclusively upon the individual to whom it is issued. The agent cannot delegate authority to others to represent him. Section 4509 provides that no agent or sub-agent of any insurance corporation of any kind, except county mutuals, shall act or aid in any manner in transacting the business of or with such corporation, in placing risks or affecting insurance therein, without first procuring from the Commissioner of Insurance a certificate of authority as provided by law. These requirements may seem harsh and unreasonable, but they are necessary if the integrity of this great enterprise—the insurance business—is to be maintained."

Insurance Against War.

The London Times says: "For some reason, which the underwriters are quite unable to explain, several independent enquiries were recently made for terms for war insurance. To cover the risk of an outbreak of war between this country and Germany within the next twelve months six guineas (\$30) per cent. is quoted. This risk had not

been seen in the market for a considerable time past. Very likely it may not be seen again for some weeks. It is assumed that some of the enquiries were connected with Stock Exchange dealings."

Carried Heavy Insurance.

Mr. John S. Huyler, the well-known candy manufacturer, who died recently, had insurance policies on his life aggregating \$279,694.

Mr. O. F. Dannecker, treasurer of the Western Life Assurance Company, of Winnipeg, was a visitor to the Toronto office of The Monetary Times this week.

The entire insurance for the Allis-Chalmers plants in Milwaukee, Chicago, Cincinnati and Scranton will be placed in Milwaukee this year as the receivers are under the jurisdiction of the local Federal Court, and the New England Mutual companies lose this \$15,000,000 risk, which was formerly divided among them. Messrs. George H. Russell & Company, of Milwaukee, were given the contracts to place through their correspondents in the other cities, placing the Milwaukee plant insurance themselves, and giving the risks on the plants in the other cities to their correspondents in those cities. This is one of the biggest insurance deals of the year.

ONE VIEW OF ENGLISH CONDITIONS

The governor of the Bank of England, Mr. A. C. Cole, at a Mansion House banquet, drew a sorry picture of financial conditions in England. Mr. Lloyd George, the Chancellor of the Exchequer, was the guest of honor at the function, and Mr. Cole's talk followed a speech of the Chancellor's which was thoroughly optimistic and took great credit to the Government for trade prosperity, debt reduction, etc. Mr. Cole recalled that the Bank of England had advanced a large sum to the Birkbeck Bank after its failure, in order that the distress of the depositors might be somewhat mitigated. The whole of that bank's securities were pledged to and deposited in the Bank of England. The Birkbeck Bank had to stop payment, not on account of the methods of its business, but solely on account of the depreciation of these securities. He had the percentage of the depreciation in these securities taken out class by class. The bank had over half a million pounds in brewery investments, and when the bank stopped payment the depreciation of these quoted investments amounted to 47%. The bank had also a quarter of a million invested in ground rents. As these were not quoted securities he could not give the definite figure of depreciation, but undoubtedly it was heavy.

This depreciation of home securities was equally, if not more important to the small investor as to the large holder. As regarded this present summer, the trade of the country had been fairly prosperous, and the current banking business had been satisfactory. Bankers, however, had again to write down securities, and consols were down to the lowest point that this generation had seen them. This was a question that demanded the serious attention of the Government for what would their position be if they came into the market as borrowers? The Prime Minister recently spoke of the amount of debt the present Government had paid off. He (Mr. Cole) a year ago stated that in his opinion the provision made for debt redemption was sufficient, but the question was, How were they going about it? The Government was entitled to take credit for the amount of debt it had redeemed by the appropriations from the new sinking fund. The appropriations from this fund had amounted for the last six years to £31,500,000. These appropriations would have been more if the Government had not cut down the new sinking fund. The other amount appropriated to the debt reduction, something over £15,000,000, came from what was known as the old sinking fund. The credit or discredit of that amount of redemption belonged to the departments which had inaccurately estimated the figures for the Budget.

After pointing out that the amount paid in death duties in the last six years was £129,000,000, Mr. Cole declared that these payments, necessitating forced sales of gilt-edged securities, kept down the price of all securities in the gilt-edged market.

After September 3rd the Traders Bank of Canada will cease to exist, its absorption by the Royal Bank of Canada then actually taking place. The headquarters of the Royal Bank will remain at Montreal. Mr. Strathy is to be the manager of the Ontario department. Ontario customers will look to his office as to loans and other phases of the former Traders Bank business.

Port Arthur has entered into a tentative agreement with Mr. F. G. S. Ham, of London, Eng., one of the manufacturers who recently made a tour of Canada, providing for \$100,000 plant and the employment of 250 men. Mr. Ham is to deposit \$1,000 as a guarantee of good faith before the date of the special election at which the ratemakers of the city will be asked to approve the by-law will be fixed.

WESTERN CANADA

Crop Conditions Are Excellent—Grain Growers Lease Government Elevators—General Lookout is Encouraging—Many Industrial Developments

Monetary Times Office,
Winnipeg, July 30th, 1912.

The outlook for a splendid crop in practically all parts of Western Canada is bright. Abundant rains have fallen during the past fortnight which have been of great value to the crops, so that unless the unforeseen happens a bountiful harvest is assured. Warm weather is needed to develop the wheat, as it has been somewhat backward in that regard.

Taken altogether, the West is in splendid condition, prospects are good for an earlier harvest by at least two weeks than last year. The big trouble will be the getting of sufficient labor and the necessary railroad facilities. If all things are as should be regarding the weather, there will undoubtedly be much congestion, even though the railroads strain every effort to handle the crop, as we understand they are doing.

Extensions in Other Lines.

No other company handles so much wheat as does the Grain Growers' Grain Company. But nevertheless the directors have in view a vast extension of the company's business along other lines. The company, for instance, has a weekly paper, *The Grain Growers' Guide*, which is now on a good financial footing. It contemplates entering into the supplying of lumber and for that purpose has secured a controlling interest in timber limits of British Columbia on which 300,000,000 feet stand. Control of coal areas is looked for also. Meanwhile negotiations are pending for the leasing of a terminal elevator at the lake front from the Canadian Pacific Railway and negotiations have been completed for the leasing of the elevators which the Manitoba Government purchased and failed to operate successfully. Another enterprise is the control of a loan company through which loans can be made to farmers at a lesser rate than now prevails.

An important announcement following the annual meeting of the Grain Growers' Grain Company, of Winnipeg, which was held last week was the leasing by the company of the 173 elevators from the Manitoba Government for approximately \$75,000 a year, or six per cent. of their value.

This action of the Grain Growers should tend to relieve the situation among farmers in the various localities where the elevators are.

Growth of Wheat Shipments.

On the occasion of the visit of H.R.H. the Duke of Connaught to the Winnipeg Grain Exchange during his sojourn in the city the council of the Exchange presented him with a statement of facts regarding the business now handled in this city. The following paragraph is taken from this report: "The first export shipment of grain from the Canadian west was less than two hundred bushels, and was sent out in sacks. To-day grain is shipped by the carload, in trains running as high as fifty to sixty cars each. We have, at the head of the Canadian lakes, 30,000,000 bushels storage capacity; the Canadian fleet of lake freighters has a capacity of 9,000,000 bushels; and our ports are thronged during the open water with the enormous lake freighters from the American ports. The first shipment went out in bags, on a river steamer to St. Paul. To-day freighters carrying 360,000 bushels sail from our lake ports to eastern terminals. Winnipeg as a handler of grain has surpassed the famous markets of Chicago and Minneapolis, in 1911, 101, 320,250 bushels of wheat being handled at Winnipeg, as against 96,647,850 bushels at Minneapolis, and 42,629,751 bushels at Chicago."

The bright crop prospects has had its good effects and has stimulated confidence in the general outlook.

Loan companies report an active business for this time of year. Many farmers were in the city during the past week attending the Industrial Exhibition and incidentally attending to business. Exhibition week is always a busy one with wholesale and other business houses.

Collections are quiet and not up to expectations, but during the next ten days an improvement is confidently looked for.

Many Cities' Activity.

Over \$13,000,000 has been expended in new buildings in Winnipeg this year, and the figure is increasing at the rate of \$100,000 a day. On an average thirty permits a day since April 1 have been granted at the building inspector's office, which continues to be one of the most active spots in the city. Residences, factories, stores, apartment blocks, warehouses, churches and office buildings are equally balanced in the big expenditure. The Canadian Pacific Railway will in 1913 build a new station in Moose Jaw at an approximate

cost of \$750,000. Plans for the structure are already past the sketch stage, and are at present being completed at Winnipeg.

Commissioner Casson returned to Estevan from Winnipeg this week, bringing with him the documents closing the deal between the Canadian Northern Railway and the International Harvester Company. The latter will at once erect temporary warehouses and establish its distributing depot at Estevan.

Permits have been taken out in the town for business blocks, bank buildings, warehouses and residences to the value of \$411,006. This marks a new high water mark in activity and gives a conception of the progress city-wards which Yorkton this year is making.

Calgary and the Motor Industry.

"It costs about \$125 per carload to ship motor cycles to the West, whereas the cost of shipping raw material for a similar number of cycles would only be about \$25," is one of the statements in a letter received from the head of a firm of motor manufacturers by Commissioner McDonald, of Regina.

Mr. McDonald has been in communication with this firm for some weeks past, and says that there is but little doubt that a plant will be established at Regina, providing sufficient stock will be subscribed by Regina citizens to warrant the opening of a branch here.

The Alliance Securities, Limited, have in view the erection of a handsome four story brick and stone office building on a valuable business site at Edmonton. The new building will be known as the Alliance block.

HILL ROADS IN CANADA.

The Canadian Northern Railway has granted trackage rights from Emerson, Man., on the international boundary line, to Winnipeg, 68 miles, to a new company formed in the interest of the Great Northern and the Northern Pacific. The new corporation is known as the Midland Railway of Manitoba. The agreement is for 20 years with a provision for extending it to a total of 999 years.

Trains of the United States roads are allowed to be run into Winnipeg but are not to do any local business unless by order of the Railway Commission, in which case the Canadian Northern is to have 80% of the gross receipts. The rental of the Winnipeg Terminal is to be \$2.50 for each revenue train movement, with 50 cents additional for every car above eight, and certain other charges.

The line to be used is a part of the 355 miles of Northern Pacific's road in Manitoba, all of which was leased in 1901 to the provisional government for 999 years and sub-leased by it to the Canadian Northern.

BUILDING ACTIVE AT WEYBURN.

The following buildings have been completed this year or are in course of construction at Weyburn:—

Department store, five stories, 100 x 120, for the McKinnon company, to cost \$100,000; business block, one story, with provision for five, 100 x 120, for Dr. Mitchell, to cost \$45,000; Collegiate Institute, to cost \$80,000; post office and customs house, to cost \$65,000; Canadian Pacific Railway depot, to cost \$50,000; Canadian Pacific Railway freight sheds, addition, \$15,000; warehouse and store for the Saskatchewan Furniture Company; Weyburn Sash and Door and Glass Company, factory; Weyburn Bottling Company, factory; Canadian City and Town Properties, Limited, Winnipeg, office building; Anglican church, addition; Last West Lumber Company, complete yards and sheds; Western Canada Sawmills Company, complete yards and sheds; Rogers Lumber Company, complete yards and sheds; Mr. F. St. John, livery barn; Mr. H. A. Staveley, office building; Messrs. Goodwyn & Company, Winnipeg, office building; Walker Lumber Company, office building; Mr. M. F. Brown, business block; one hundred and twenty houses, including \$20,000 residence for Mr. F. Moffet.

The buildings for which plans are in course of preparation are as follows:—

Municipal hospital; telephone exchange; Weyburn Creamery Company, factory; Canadian City and Town Properties, Limited, Winnipeg, business block, 100 x 110, to cost \$90,000, two stories; Messrs. W. B. Proctor & Company, Toronto, business block, 50 x 120, to cost \$60,000, four stories; Messrs. Mergens & Moffet, Weyburn, business block, 60 x 120, to cost \$60,000, two stories; Mr. R. E. Sinclair, Toronto, business block, 100 x 120, two stories, to cost \$75,000; one hundred and fifty houses.

The following buildings are those contemplated and under consideration:—

Steam laundry, tent and mattress factory, fire hall, city hall, hotel by Toronto syndicate, business block by Newfoundland syndicate.

MANUFACTURE OF RAILWAY TIES

No Change in Methods—Two Plants Being Established for Use of Chemical Treatment

Approximately 70% of ties purchased in Canada in 1910 were hewn. It is apparent that methods of manufacture of ties are not undergoing any great general and permanent changes. Sawn ties were 30 per cent. of the total, which is the same proportion as in 1909. The only important species which has a majority of sawn ties is oak, 95 per cent. of which were sawn ties. Cedar ties were 81 per cent. hewn, and 61 per cent. of the jack pine ties were hewn. Hemlock and Douglas fir were about evenly divided in the method of manufacture. In the case of tamarack, 98 per cent. were hewn ties, while the minor varieties were principally sawn ties. The hewn ties are nearly all pole ties, the sawn ties are made chiefly from larger timber.

Sawn ties cost on the average 36 cents per tie. Hewn ties cost 3 cents more, or 39 cents per tie. Oak was the most expensive of sawn ties, costing 74 cents per tie. White pine was the cheapest of the sawn ties, costing only 23 cents per tie. In hewn ties, oak was also the most expensive, costing 68 cents, and spruce ties were the cheapest, costing 25 cents per tie.

The steam railways use 96 per cent. of all the ties. The decrease in use of ties in 1910 is due chiefly to decreased purchase by the steam railways, which used 5,159,697 ties less in 1910 than in 1909. All the white pine and chestnut ties purchased in 1910 were purchased by steam roads.

Hewn cypress ties were imported, but not used by steam roads.

Sawn and Hewn Ties.

With electric roads 61.4 per cent. of the ties purchased were hewn, as contrasted with the steam roads, where 70 per cent. were hewn. Douglas fir constituted 50 per cent. of the sawn ties and cedar constituted 34 per cent. Cedar made up 57 per cent. of the hewn ties and Douglas fir 20.7 per cent. The species which are chiefly used sawn are cedar, Douglas fir and oak. The species which are chiefly used hewn are hemlock, tamarack, cypress, spruce and jack pine. All the cypress and jack pine ties used were hewn. The average price of hewn ties was 37 cents, or 2 cents per tie less than was paid by steam roads. It is interesting to note that whereas with steam roads hewn ties cost 3 cents per tie more than sawn ties, with electric roads sawn ties cost 9 cents per tie more than hewn ties.

Imports from the United States of cross-ties in 1910 amounted to \$1,096,832. Exports in 1910 were 1,995,582 ties at a value of \$463,508. Of this total \$376,913 was to the United States. The balance of imports over exports was \$633,324, which represents about 891,000 ties at the average price paid for ties in Canada in 1910.

Chemical Treatment Increases Durability.

Two plants are now being established for the chemical treatment of railway ties. One is being erected at Fort Frances, Ontario, and the other is being started at Winnipeg. It is stated that a plant will also be erected at Vancouver. The plant at Fort Frances will be capable of treating 2,000 ties per day. The zinc-chloride-aluminium patent immersing process will be used, which both prolongs the life of the timber and renders it fireproof. It is questionable if this process will give as good results in Canada as would creosote.

This is a matter which for some years has been necessary for the preservation of the forests of Canada. At the same time it would have reduced the annual cost of railway maintenance. The average life of untreated ties as reported by the steam roads is: cedar, 9 years; tamarack, 8 years; hemlock, 7 years; Douglas fir, 7 years; jack pine, 6 years; spruce, 6 years. As may be noted from the tables, cedar is the species principally used, because of its durability, but the supply of cedar is rapidly becoming exhausted. Unless preservative treatment of ties is introduced, the species of short life will have to be used untreated, which, on account of the necessary frequent renewal, will increase the cost of mileage maintenance. If treated ties were used, which would cost about 30 cents extra per tie for creosoting and equipping with tie plates, the inferior species, which are very plentiful and cheap in Canada, could be used with economy. With such a treatment these woods would last at least 15 years, and if protected from wear would probably last much longer.

Western Lodgepole Pine.

The lodgepole pine of the West would be greatly increased in usefulness by this treatment. This species is used chiefly for mining timbers and props and occurs, fire-killed, in vast areas on the mountain slopes of Alberta and British Columbia. It cannot be used for lumber, on account of checking, and, if untreated, it lasts only about 5 years

when used for railway ties. At present this wood stands dead and perfectly seasoned and would take chemical treatment readily, after which it would make lasting and economical ties. By the use of such inferior qualities of timber, railway companies would assist conservation and at the same time decrease the cost of railway maintenance.

FURNESS-WITHY REPORT.

The latest report of Furness, Withy and Company is of special Canadian interest on account of the company's activities in the navigation of the Great Lakes of Canada through the British Maritime Trust. A note of a recent issue in London made by the Trust appeared in last week's Monetary Times. Furness, Withy and Company have a leading position in the Argentine frozen meat trade secured by the purchase of shares of Houlder Brothers and by the formation of the British and Argentine Steam Navigation Company, whose share capital is entirely owned by Furness, Withy and Company. The following is a comparison of the leading accounts of the company during the past two years.

	1910-11.	1911-12.
Gross profits	£393,134	£446,705
Dividends, &c.	139,604	209,722
Subsidy, &c.	9,197	9,281
Total	£451,935	£665,708
Income-tax and fees	11,203	12,501
	440,732	653,207
Depreciation	179,603	240,000
Prof. div. and interest	70,620	70,620
Ordinary dividend	150,000	200,000
	(7½%)	(10%)
To reserve	50,000	125,000
Balance	9,491	17,587
Brought forward	112,405	102,914
Carried forward	102,914	120,501

The profits of the company last year were the largest in its history.

FROM VIEWPOINT OF POLICYHOLDERS.

The first instance of life insurance was in 1583, stated Mr. W. Trant in a paper read before the Regina Underwriters' Association, when a man named Gibson insured his life for twelve months. He died within the year and the insurers refused to pay on the ground that he had lived over twelve lunar months, though he had died within twelve calendar months. There was a lawsuit and the money had to be paid, rather an ominous beginning of the business of life insurance.

An interesting early experiment was the insurance of 2,000 healthy lives under 55 years of age for £500 each, on the following terms: There was an entrance fee of 1s., and a first premium of 5s.; then whenever one of the 2,000 died the survivors paid 5s. each. If anyone cared to work out the probabilities of profit to the insurers, it would be found they could only make a legitimate profit on the use of the small amount of money in hand.

It was soon recognized that if life insurance were to become a legitimate business the element of chance must be eliminated. Insurance was too much like betting, and in order to be a permanent success the meaning of the word "making oneself safe against something" would have to have the predominant influence. In other words, insurance must be upon a scientific basis.

The first question for the applicant for insurance to be certain about was the accuracy of the actuarial tables, and the great thing, therefore, for a would-be insured was to have confidence in the assurers. This applied to the business of life insurance more than to any other. The applicant had to accept the tables, he had to feel that the premiums were not too small or bankruptcy of the company would result, and he had to feel that the premiums he paid would be prudently invested and not form a fund for wildcat speculation. He must have confidence respecting these things. How was that to be assured? The answer was found in the report of the proceedings of the Underwriters' Association at its convention in Toronto. A unique feature of the speeches then delivered by the underwriters was that they realized the importance and responsibility of the very things mentioned above. He (Mr. Trant) knew of no other body of men who realized their own obligations and duties. Other people were preached to by outsiders, who spoke of duties, obligations and responsibilities. The underwriters recognized these things themselves, set them out to themselves, preached to themselves. Herein was the great ground for confidence on the part of those who wished to be insured.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Melfort, Sask.—Until August 8th for \$50,000 6 per cent. 30-year school debentures. W. Wood, secretary-treasurer.

Regina S.D., No. 4, Sask.—Until September 2nd, for \$275,000 4½ per cent. 20-year school debentures. J. H. Cunningham, secretary-treasurer, Regina.

New Kennedy S.D., No. 1573, Man.—To-day a by-law will be voted on to borrow \$2,000. Peter Braun, secretary-treasurer, Rural Municipality of Rhineland.

Kincardine, Ont.—A by-law to issue debentures for the amount of \$3,000 for the purpose of purchasing a school site, erecting a school house, was recently passed.

Canora, Sask.—An issue of \$20,000 5½ per cent. 30-years and \$4,000 5½ per cent. 20-years debentures for lighting purposes will be offered some time during August.

Rural Municipality of Lorne, Man.—On August 10th a by-law will be voted on to issue \$4,500 debentures for school purposes. P. E. Bourque, secretary-treasurer, Somerset.

Swan River, Man.—The ratepayers will vote on August 23rd on a by-law to raise \$4,000 debentures for a traffic bridge across Swan River. B. E. Rothwell, secretary-treasurer.

Imperial, Sask.—Tenders are called for \$15,000 6 per cent. 15-year waterworks debentures. J. G. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

Nokomis, Sask.—Until September 2nd for \$15,735.72 6 per cent. 20-year debentures. W. A. Armour, secretary-treasurer. (Official advertisement appears on another page.)

Stettler, Alta.—Until August 22nd for \$10,800 5½ per cent. 20-year waterworks, and \$4,000 5½ per cent. 20-year electric light debentures. R. Dick Ballantyne, secretary-treasurer.

Duck Lake, Sask.—Until August 31st for \$4,000 5½ per cent. 20-year, and \$6,000 5½ per cent. 20-year Government guaranteed general debentures. F. Hopwood, secretary-treasurer.

South Vancouver.—A by-law to raise money for the improvement of the interurban thoroughfare which is estimated to cost \$200,000 is being drawn up and may be submitted to the electors.

Govan, Sask.—Until August 20th for \$15,000 20-year 6 per cent. town hall and fire protection debentures. A. Graham, secretary-treasurer. (Official advertisement appears on another page.)

Springfield Rural Municipality, Man.—On August 17th the ratepayers will vote on a by-law to raise \$3,500 20-year debentures, for boring a well. C. Christopherson, secretary-treasurer, Oakbank.

Ottawa, Ont.—Until August 29th for \$12,000 40-year, \$727,000 30-year, and \$292,429.99 20-year debentures; interest, 4 per cent. Charles Hopewell, mayor. (Official advertisement appears on another page.)

Calgary, Alta.—A by-law, as it will be presented to the people of Calgary, provides for an appropriation of approximately \$405,000, which will cover the expense of a modern filtration system of water supply.

St. Agnes R.C.S.D., No. 22, Sask.—Until August 10th for \$30,000 5 per cent. 40-year school debentures. Edw. J. Baker, Post Office Box 41, Moose Jaw, secretary-treasurer. (Official advertisement appears on another page.)

Brookville, Ont.—A special meeting of the town council was held recently, when a by-law was introduced and passed, authorizing the Mayor and Clerk to sign a contract with the Hydro-electric Commission for the delivery of 1,000-horsepower.

Kindersley, Sask.—The citizens are asked to vote on a by-law authorizing the expenditure of \$90,000 to construct waterworks and electric light plant, and the government is giving a grant of \$20,000 for the construction of a dam in connection therewith.

West Vancouver, B.C.—Councillor Merrick, manager of the West Vancouver ferries service, gave formal notice at a meeting of the council that he would introduce a motion at the next meeting authorizing the municipality to borrow \$120,000 for the purchase of 1,200 shares of stock in the West Vancouver Ferry Company.

Berlin, Ont.—At a meeting of the finance committee of the city council, it was decided to submit the following by-laws to the electors:—To grant \$15,000 to the Tuberculosis Association for the establishment of a sanitarium, \$7,000 for the West Ward sewage system, \$6,000 to aid in the construction of a county bridge over the Grand River at Bloomingdale, over which the Berlin and Northern Railway will pass; \$6,000 for the erection of municipal barns, \$17,000 for the purchase of two new street cars and addition to car barns, and \$5,000 for the establishment of a municipal abattoir. There is also the Parks Boundary By-law, which is for the setting aside of seven acres of Victoria Park as an athletic ground, the question of which has created a controversy.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Amherst, N.S.—July 23.—Mrs. S. Bent's barn. Loss and origin unknown.

Belleville, Ont.—July 30.—Gasolene launch. Loss and origin unknown.

Toronto, Ont.—July 29.—Factory, Gledhill Avenue. Loss and origin unknown.

Kazabazu, Ont.—July 25.—Bush fires did considerable damage in this district.

Mortlach, Sask.—July 23.—Mr. H. D. Thexton's barn. Loss \$1,000. Origin unknown.

Halifax, N.S.—July 24.—187 Upper Water Street. Loss unknown. Origin, supposed incendiary.

Anstruther, Ont.—July 30.—Mr. G. Tucker's barn with contents. Loss \$2,000. Insurance \$500.

Three Rivers, Que.—July 30.—Tourville Lumber Company's sawmill. Loss and origin unknown.

Sherrington Park, Que.—July 27.—Motor launch. Loss unknown. Origin, supposed gasolene explosion.

Longue Pointe, Que.—July 27.—Notre Dame de Victories Church. Loss unknown. Origin, electric wiring.

Port Alberni, B.C.—July 20.—Gasolene launch caught fire, and drifted to shore, starting bush fires. Loss unknown. Origin, gasolene leak.

Winnipeg, Man.—July 29.—Messrs. J. Gunn & Sons' warehouse, corner Jarvis and Schultz Streets. Loss \$4,000. Origin, spontaneous combustion.

Welland, Ont.—July 29.—Mr. D. Bald's farmhouse and barns. Loss unknown. Insurance \$1,200 buildings, \$1,200 contents, in Waterloo Mutual. Origin unknown.

Palmerston, Ont.—During last week Grand Trunk Railway had a caboose, car load baled hay, 10 cords of wood destroyed. Loss unknown. Origin, supposed incendiary.

Hamilton, Ont.—July 21.—15 Oak Avenue. Loss and origin unknown. July 21.—Mr. J. H. Assum Store, 84 James Street North. Origin, heat from bake oven. Loss slight.

Peterboro, Ont.—July 22.—Messrs. J. J. Turner & Sons' factory. Loss, stock \$160, buildings \$50. July 26.—Canadian Pacific Railway freight car. Loss \$100. Origin, spark from stove.

Montreal, Que.—July 25.—Messrs. B. Simon and Company's mattress factory, 179 St. Urbain Street. Loss \$2,000. Origin, overheated machinery. July 29.—Mr. H. Germain's residence, 253 Carillon Street. Loss unknown. Origin, supposed coal oil lamp. Rear of 2117 Papineau Street. Loss and origin unknown. July 30.—Canadian Quilting Company's premises, 622 St. Paul Street. Loss \$10,000. Origin unknown. This had previously been damaged by fire this year.

ADDITIONAL INFORMATION CONCERNING RECENT FIRES

Napanee, Ont.—Mr. F. F. Miller's gasolene launch. Loss \$1,000, no insurance.

Toronto, Ont.—University Schools. Loss, stock \$253, building \$715. Insured with 33 companies.

Port Hope, Ont.—Mr. L. E. Hall's planing mill. Loss, stock \$600, buildings \$100. Insured with Gore Mutual.

Steveston, B.C.—Richmond Hotel, owned by Mr. J. B. Johnson. Loss, stock \$1,600, buildings \$3,000. Insured with Hudson Bay Company. Stock \$2,000, buildings \$1,500.

Port Dalhousie, Ont.—Frame house occupied by Mr. S. Allerthorne Dyke, owned by Captain Crawford, Buffalo. Loss, furniture, personal effects, etc., \$3,500. Insurance \$1,500, Ontario Fire Insurance Company.

REGINA'S JUNE FIRE LOSS

June 4. 1323 Lorne Street. Defective stove pipes. Damage \$15. June 7. Utopia Cafe. Sparks from chimney. No damage. June 7. J. Fenwick's stable, Albert and 16th Avenue. Children and matches, Damage \$250. June 10. Rose Lodge Apartment. Coal oil stove. No damage. June 13. C. Ellis, stable 2275 Rae Street. Children and matches. Damage, \$216. Insurance \$300. June 17. Regina wholesale liquor store. Cigarette dropped on awning. Damage \$10. June 22. Regina Brewery Company. Storehouse for kegs, etc. Damage about \$600. June 23. Box 54. False alarm. June 26. 1019 Robinson Street. Sparks from rubbish fire. Damage \$10. June 29. 1004 Lorne Street. Coal oil stove. Damage slight. June 30. Lorne and 8th Avenue; Hamilton and 6th Avenue. Caused by cyclone wrecking houses. Buildings were wrecked by the cyclone, but damage by fire was very slight.

JULY MUNICIPAL BOND SALES

Totalled Nearly Two Million Dollars—Halifax Placed Largest Block

The municipal bond sales in Canada for July as compiled by The Monetary Times amounted to \$1,967,376 compared with \$1,690,344 for June and \$1,594,566 for the corresponding period last year. Seven provinces were in the market. The largest sales were made by Halifax, Brandon, Medicine Hat and Moose Jaw.

The following are the particulars by provinces:—

Ontario	\$490,931
Nova Scotia	364,700
Saskatchewan	345,233
Manitoba	288,879
Alberta	282,733
New Brunswick	160,000
Quebec	35,000
	\$1,967,376

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$ 881,838	\$ 420,337	\$2,133,531
February	1,272,977	1,037,287	2,596,378
March	1,169,730	6,271,925	1,726,716
April	6,805,078	3,910,288	927,160
May	5,964,896	3,946,047	1,928,748
June	2,187,588	3,983,670	1,690,344
July	1,536,424	1,594,566	1,967,376
August	1,312,953	1,493,507	
September	2,841,486	1,748,778

FOR AND AGAINST THE MUNICIPAL BONUS

The representatives of many cities in Western Canada met at Winnipeg recently to discuss the question of granting bonuses to prospective manufacturers. The following resolution was passed: "That this meeting of mayors and representatives of city councils and industrial commissioners are of the opinion that the granting of cash, or lands, or any bonus, or exemption from taxation, or the guaranteeing of bonds of corporations, to firms or individuals establishing factories in Western Canada, should be discontinued and discouraged hereafter, and that representatives at this conference should join in an agreement to secure an endorsement of our respective city and town councils and commercial organizations to carry out the text of this resolution. Further, believing that a campaign of education should be inaugurated along these lines, we recommend that an organization be formed, comprised of the industrial commissioners and secretaries of boards of trade of all cities and towns concerned, to carry out this campaign of education and create a closer co-operation among themselves for the mutual protection of their communities."

Several delegates were opposed to the principle of bonusing. On the other hand, the delegates representing Saskatoon, Medicine Hat, Port Arthur, Fort William and Moose Jaw, thought that sufficient opportunity had not been given for the discussion of the above resolution, that the meeting of delegates was not sufficiently representative of the cities and towns of Western Canada, and that a reasonable measure of encouragement for new industries to assist in their establishment is justifiable.

Mr. N. G. Neill, industrial commissioner for Port Arthur, defended a proper use of the system. He said: "We encourage the manufacturer by our tariff wall. Any attempt to discourage by the cities would be inconsistent. Port Arthur has never been injured by manufacturers. I do not think that the competition between towns is as serious as many believe. What any town or city must use, in bonusing, is common horse sense. The manufacturer increases population and ultimately reduces taxation. He increases the value of property. What we should avoid is a drastic policy in this matter."

The following resolution was adopted at the close of the meeting:

"That in view of the many important questions arising at this meeting, the convention adjourn to meet again at the city of Regina, on November 1, and that each city be requested to take the matter up in the meantime and submit various questions for discussion, to the acting secretary, thirty days previous to whatever date might be named, and that lists of such suggestions be forwarded to each city and town interested. Further, that the first order of business to come up at the meeting at Regina would be the question of bonusing manufactories."

The Alliance Investment Company (Canada), Limited, is placing an additional \$500,000 of stock in the market. Mr. W. B. Leitch, of Montreal, is the company's fiscal agent and hopes to have the issue subscribed within a few weeks. The company has 432 shareholders in Canada and Great Britain and they are absorbing a part of the issue. The shares have been placed on the market at \$12.50 each, a premium of 25 per cent. The addition to the company's capital is sought in order to extend their building operations. At present the company has more orders for first-class houses than it can fill.

The ANGLO-CANADIAN Mortgage Investment Corporation Limited

MOOSE JAW, Sask.

Among other things this corporation has for its objects the purchase of agreements for sale and mortgages; to buy and sell real estate as agents for private investors; to operate and manage any property acquired by the company in the course of its business. Its primary object is, however, the investing of its funds in Canada at higher rates of interest than can be obtained by the single investor, and to provide a safe channel through which English and Eastern capital may be safely invested.

AS AN INVESTMENT

The stock of the Anglo-Canadian Mortgage Investment Corporation, Limited, ensures safety and profit. Managed by directors of high financial standing, it offers the highest possible security for all funds and business which may be entrusted to its care.

Complete prospectus, forms of application for stock, &c., may be secured from H. DAVISON PICKETT, Sec.-Treasurer.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of July, 1912, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper; and Robert Musgrave Coates and William George Flood, solicitors' clerks; all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To underwrite, subscribe for, purchase or otherwise acquire and hold either as principal or agent, and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in the bonds or debentures, stocks, shares or other securities of any government or municipal or school corporation or of any bank or of any other duly incorporated company or companies or corporation or corporations; (b) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (e) To construct, maintain, alter, make, work or operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighbourhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the

company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (k) To issue and allot as fully paid-up shares of the company hereby incorporated, in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same, or any part thereof, in bonds or debentures of this company; (l) To draw, make, accept, endorse, discount and execute promissory notes, bills of exchange, warrants, and other negotiable or transferable instruments; (m) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company, and necessary to enable the company to profitably carry on its undertaking; (n) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (o) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (p) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (q) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (u) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (v) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Brazilian Traction Light and Power Company, Limited" with a capital stock of one hundred and twenty million dollars, divided into 1,200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State, of Canada, this 12th day of July, 1912.

THOMAS MULVEY,
Under-Secretary of State.

2-2

Dated at Toronto this 22nd day of July, A.D. 1912.

BRAZILIAN TRACTION LIGHT AND POWER COMPANY, LIMITED.

WINNIPEG'S GOOD FINANCING.

Mayor Waugh, of Winnipeg, does not believe that a municipal corporation should gamble on the rise and fall of the money market. He thinks that cities should place their issues as early as possible and at the most favorable time at what the market offers. The mayor's opinions are expressed in a statement recently prepared by the city treasurer of Winnipeg. The experience of that city, says its treasurer, is that it is important to get a good fiscal agent and then act on the advice given. The agent is in a good position to feel the pulse of the market. The treasurer's statement continues:—

"Early in the year Mayor Waugh insisted on having compiled a statement of the expenditures for the year, allowing a substantial amount for local improvements, taking care of an over expenditure of last year on power works, allowing for the construction of hospitals and extension of water works system, totalling in all over four and half millions of dollars. The matter was then before the Bank of Montreal, the city's fiscal agents in London. On account of the large number of loans having just been placed in London, including the Canadian Northern Railway government guaranteed loan of \$25,000,000, the market was very congested, but as there was no indication for improvement or return to former high prices, it was felt that delay was dangerous and the city accepted the

offer of the Bank of Montreal to place the issue at 98 with a slight interest bonus.

"The wisdom of doing so is now shown in the condition that cities like Montreal and Toronto, which refused to accept what the market offered, now find themselves. Montreal has thirteen million dollars of unsold securities and Toronto about half that amount and the London market declines to accept either issue at any rate at the present time. The financial papers state that Montreal is raising £750,000 by short date treasury bills, which in an ordinary market should cost about 3½ per cent. and which now cost 5 per cent. The press also states that Toronto has disposed of a million pounds of 4s. at 91¼ net to the city which is over \$150,000 less than the price realized by Winnipeg. The Winnipeg School Board participates in the result of the city's good financing by reason of its having included its issue along with that of the city, thereby saving some \$30,000, which it would probably have lost had it sold its bonds in Canada. By disposing of its stock early the city has not been hampered in any way for want of funds and local improvements will be constructed this year considerably in excess of the work done in 1911."

The name of Hercules Motor Trucks, Limited, has been changed to that Drednot Motor Trucks, Limited.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

CANADIAN PACIFIC RAILWAY COMPANY.

Issue of \$18,000,000 Ordinary Capital Stock.

Special Interest Payment.

As intimated in the President's Circular to the Shareholders, dated January 3rd, 1912, an Interest payment at 7% or \$3.18 per share, will be paid on October 15th next, on the first four instalments (\$120) from the due date of each instalment to September 30th, 1912, on the shares of the above New Issue represented by the Certificates of Subscription, to holders of record at close of business August 16th next, who have paid these instalments on or before their respective due dates. Notice is hereby given that this interest payment will be mailed from New York to the registered addresses of holders, or their duly appointed Attorneys, on October 14th, 1912. For the purpose of this payment the Certificate of Subscription books will close August 16th at 3 p.m., and re-open September 16th, 1912.

W. R. BAKER,

Montreal, July 31st, 1912.

Secretary.

By order of the Board.

ALEXANDER LAIRD,

General Manager.

Toronto, 20th July, 1912.

THE ROYAL BANK OF CANADA

Dividend No. 100.

Notice is hereby given that a dividend of two per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the two months ending 31st August next, and will be payable at the bank and its branches on and after Tuesday, the 3rd day of September, to shareholders of record of 15th August.

By order of the Board.

E. L. PEASE,

General Manager.

Montreal, P.Q., July 16, 1912.

Note.—Owing to the change in the termination of the bank's fiscal year from 31st December to 30 November, the above dividend has been declared for two months only. Subsequent dividends will be payable quarterly.

Mr. Albert Hindle, on the charge of firing the sawmill of Mr. W. J. Curran, of Grey County, was committed for trial by Magistrate Creasor. The fire took place on July 6.

The total capital value of the fruit growing industry in British Columbia, Ontario, Quebec and the Maritime Provinces is, in round numbers, \$12,000,000. This is the estimate of the chief of the markets division of the dairy and cold storage branch of the Department of Agriculture, and published in the printed report of the proceedings of the third conference of fruit growers of Canada, held in Ottawa this year, copies of which can be obtained from Publications Branch, Department of Agriculture, Ottawa, which also issues a valuable pamphlet on agricultural topics.

An interesting map showing the rural municipalities and local improvement districts of the Province of Saskatchewan has been issued by the Provincial Government

at Regina. It forms a striking example of municipal development in that province, and demonstrates the wonderful railway extension and general progress of that particular portion of the Western prairies. The map is procurable at a cost of fifty cents, payable in advance, at the Department of Municipal Affairs, Regina. For use in conjunction with this map a printed list of all urban and rural municipalities has been issued, which includes the chief officials of all cities, towns and villages, and areas of local improvement districts and rural municipalities, with their divisions, and the names and addresses of councillors, respectively, representing them; also the Reeves of rural municipalities and all secretary-treasurers. This list is procurable at the same price and from the same source as Saskatchewan's municipal map. The above information will prove of particular benefit to business offices throughout the prairie provinces.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

YOUNG GENTLEMAN, well educated, desires position with good company, sound business experience and good correspondent, understands trust and loan company work, also stock, debentures, etc. Box 65, The Monetary Times, Church Street, Toronto.

VANCOUVER'S JUNE FIRE LOSS

Vancouver's property loss by fire for the month of June was \$17,976, the insurance paid was \$11,300, leaving the loss above insurance \$6,676. The department responded to a total of 56 alarms during the month, 4 of which were for chimney fires, 10 were false alarms, 1 was a smoke scare, 2 were for fires outside of the city limits, 21 were fires where damage resulted and 18 were for small fires where no property loss occurred.

A complete list of fires where damage occurred follows:—

June 2nd. Telephone alarm at 9.55 a.m. Fire in attic of kitchen at 346 Union Street, caused by a defective chimney. Building owned by E. Hesson and occupied by Mr. Belansoff and used as a dwelling. Damage \$200.

June 3rd. Telephone alarm at 11.08 a.m. Fire on roof of Japanese dwelling at 469 Powell Street, caused by sparks from chimney. Building owned by R. J. Jackson and occupied by I. Iwashita. Damage \$100.

June 5th. Telephone alarm at 1.15 a.m. Fire on roof of dwelling at 318 Hastings Street East, caused by sparks from chimney. Building owned by Dr. Glen Campbell and occupied by W. Mason and used as a dwelling. Damage \$50 covered by insurance. Telephone alarm at 11.55 a.m. Fire on roof at 1303 Hornby Street, caused by flying sparks. Building owned by Mr. Brehaut and occupied by Mrs. McEllroy. Damage \$100 covered by insurance. Alarm from box 523 at 12.40 p.m. Fire in kitchen at 343 Harris Street, caused by a defective chimney. Building owned by D. McKay and occupied by Mr. Ingran and used as a dwelling. Damage \$150 covered by insurance. Telephone alarm at 1.20 p.m. Small fire on roof at 129 Robson Street, caused by sparks from chimney. Building occupied by Mrs. McLennan and used as a residence. Damage \$3.00.

June 7th. Alarm from box 151 at 3 p.m. Small fire on roof of dwelling at 2171 Wall Street, caused by flying sparks. Building owned by C. J. Thornton and occupied by A. Grant. Damage \$5.00 covered by insurance. Telephone alarm at 4.40 p.m. Fire on roof of two-story frame dwelling at 385 Cordova Street East, caused by flying sparks. Building owned by A. G. Ferrera and occupied by J. McPherson. Damage \$25.00 covered by insurance. Alarm from box 541 at 6.50 p.m. Fire on roof of building under construction at 643 Harris Street, cause unknown. Building owned by Chong T. Fong. Damage \$15.00.

June 9th. Alarm from box 412 at 3.39 a.m. Fire in a two-story frame building at 1853 Second Avenue West, owned by G. Eastfield and occupied by A. Julian and used as furnished cabins. The fire had a good start on arrival of the fire apparatus and quickly spread to the adjoining buildings on the east and west, both of which were practically destroyed along with the building where the fire originated. Two other dwellings also suffered slight damage from this blaze. Cause of fire unknown. Damage \$9,825 partly covered by insurance.

June 9th. Alarm from box 10 at 9.45 a.m. Small fire on roof of kitchen at 815 Hamilton Street, caused by flying sparks. Building owned by H. Smithson and occupied by Mrs. Connell. Damage \$15. covered by insurance. Telephone alarm at 1.50 p.m. Fire on roof at 1139-43 Georgia Street, caused by sparks from chimney. Building owned by Tregent & Morris and occupied by Mrs. Trainor and Mrs. Manuel. Damage \$75 covered by insurance.

June 13th. Alarm from box 128 at 10.48 p.m. Vacant shack destroyed in the 2300 block, Cambridge Street. Fire of incendiary origin. Damage \$50.

June 23rd. Verbal alarm at 1.30 a.m. Fire in basement in the Parson's house at Saint Luke's Home, 301 Cordova Street East, caused by spontaneous combustion. Building

WANTED.—A strong Board Company requires the services of a thoroughly competent and experienced Fire Insurance Inspector. Liberal salary and excellent opportunities for advancement will be given to suitable man. Applications will be received in strict confidence. Apply Box 17 Monetary Times.

WANTED.—Stock salesman to handle company with bright prospects. Nature speculative but better and safer than many so-called investments. No exaggeration necessary. Apply Box 85, Barrie, Ont.

owned by St. Luke's Home. Damage \$55 partly covered by insurance. Verbal alarm at 7.22 p.m. Small fire on roof at 245 Hastings Street, East, caused by sparks from chimney. Building owned by Blanche Douglas and occupied by Wong Kee and used as a restaurant and candy store. Damage \$5.

June 24th. Alarm from box 228 at 4.08 p.m. Fire in wood shed in rear of 236 Seventh Avenue West, occupied by Mrs. McEwan. Building destroyed. Cause of fire unknown. Damage \$50.

June 25th. Telephone alarm at 6.14 p.m. Small fire on roof at 1247 Richards Street, caused by flying sparks. Building owned by Mrs. Logan and occupied by Mrs. J. Davidson. Damage \$3.00.

June 26th. Alarm from box 1319 at 2.15 p.m. Fire in a two-story frame dwelling at 1452 Thirteenth Avenue West, caused by children playing with matches. The blaze started under the front verandah and did considerable damage to both building and contents. Building owned and occupied by R. H. Greggor. Damage about \$1,500 covered by insurance.

June 27th. Verbal alarm (also box 36) at 8.40 a.m. Fire at 332 Powell Street, caused by a leaking gas pipe. The building, which was a two-story frame structure, was owned by K. Lavagnino and occupied by K. Sawanda, barber shop, Takasahia, clothes cleaner and Ito & Yamamoto, restaurant and rooming house. Damage \$1,250. Telephone alarm at 10.12 p.m. Fire in basket of linen in the kitchen at the Vancouver Club, 901 Hastings Street West, caused by a lighted cigar being rolled up in a table cloth. Damage \$100 covered by insurance.

June 30th. Telephone alarm at 4.49 a.m. Fire in a new dwelling under construction at the corner of Walnut and Cornwall Street, presumably caused by spontaneous combustion. Both building and contents were a total loss. Owned by R. Hudson. Damage \$4,200 partly covered by insurance.

Total number of alarms, 56; chimney fires, 4; false alarms, 10; property involved, \$91,750; loss, \$17,976; insurance paid, \$11,300; loss above insurance, \$6,676; hose laid at fires, 11,250 feet; chemical used at fires, 1,380 gallons.

ANOTHER CAR COMPANY

The National Steel Car Company has capital of \$6,000,000, consisting of \$3,000,000 of 7 per cent. cumulative preferred shares and \$3,000,000 ordinary shares. The present issue consists of \$1,500,000 of 7 per cent. cumulative preference shares, and \$2,000,000 of ordinary shares, all of which have been subscribed.

The head office of the company will be in the Transportation building, Montreal, and the works of the company will be established at Hamilton, Ontario. The directors of the company are Sir John Gibson, Messrs. William Southam and J. J. Scott, of Hamilton; Sir Henry M. Pellatt, of Toronto; William G. Ross, C. H. Cahan, Mortimer Davis and Basil Magor, of Montreal; William Barclay Parsons, W. K. Brice and M. H. Coggeshall, of New York city.

The company will be under the management of Mr. Basil Magor, formerly president of the Magor Car Company of Passiac, New Jersey, who has been for many years successfully engaged in the manufacture of freight cars of various types. The works have been designed by Messrs. Barclay, Parsons and Klapp.

The company's plant will have a capacity of about 30 cars a day, or about 9,000 a year. It expects to turn out cars by January, 1913. It has waterfront privileges and good shipping facilities. The duty on cars imported from the United States is approximately 30 per cent. Canadian roads, including the Grand Trunk Pacific and Canadian Pacific, use an average of 25,000 cars yearly.

The United States Senate relations committee have agreed to recommend ratification of a treaty, signed July 20 by the United States and Great Britain, promulgating fishing regulations in Newfoundland waters. The treaty carries out, with some modifications, the rules and methods of procedure recommended by The Hague Tribunal, September 7, 1910.

The governments of Manitoba, Saskatchewan and Alberta have taken action in the matter of obtaining men for harvesting and the railroads are attempting to supply the demand, but even this early it is predicted that the labor shortage will be acute. The Deputy Minister of Agriculture for Saskatchewan states that 26,000 men will be needed in that province alone. Altogether it is estimated about 60,000 men can find work in Western Canada this summer.

That this year's crop will be the largest ever grown in Western Canada is the prediction made by farmers from all sections of the prairie provinces, by crop experts, by heads of elevator companies, and the Manitoba department of agriculture. Not only will the total yield be the largest, but, judging by the present conditions, the yield per acre will outstrip all previous years. One of the best known agriculturists of Western Canada states that harvest of various crops will take place during the following periods: Barley, August 1st to August 20th; fall wheat, August 10th to 25th; spring wheat, August 18th to September 12th; oats, August 25th to September 10th. This will put all grains in stock by the middle of September, fully three weeks ahead of the ordinary season.

DEBENTURES FOR SALE

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to 6 o'clock p.m. on the 31st day of August, 1912, for the purchase of \$4,000 5% per cent. Government Guaranteed General Debentures repayable in twenty equal annual payments with interest.

The highest or any Tender not necessarily accepted.

F. HOPWOOD,

Secretary-Treasurer.

Duck Lake,
July 22nd, 1912.

IMPERIAL, SASK.

Debentures for Sale.

Tenders will be received by the undersigned for the purchase of \$15,000 6% waterworks debentures, 15 years. Full particulars, together with further conditions, can be secured from

J. G. HOBMAN,

Secretary-Treasurer.

Imperial, Sask.,
July 26, 1912.

TOWN OF GOVAN DEBENTURES.

Tenders will be received by the undersigned up to August 20th, 1912, for the purchase of 20-year 6% Debentures of the Town of Govan amounting to \$15,000.00 for the purpose of building a Town Hall and providing water tanks for fire protection.

A. GRAHAM,

Secretary-Treasurer,

Govan, Sask.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, July 17th, 1912.

Sealed tenders will be received by the undersigned until 8 p.m. September 2nd, 1912, for the purchase of \$15,735.72 6% Debentures repayable in twenty equal annual instalments of principal and interest.

W. A. ARMOUR,

Secretary-Treasurer,

Town of Nokomis, Sask.

The general activity in construction work of all kinds throughout Central Alberta is shown by the fact that notwithstanding the influx of population to Edmonton and district during the past few months, the city authorities report that they cannot obtain the labor required for the prosecution of necessary municipal works.

The Share and Debenture Corporation are shortly offering to the investing public \$75,000 in preferred stock and \$125,000 common stock for the Superior Match Company, of Owen Sound. The preferred stock pays 7 per cent. and carries with it a bonus of 20 per cent. common stock. The factory of the Superior Match Company is located on the Georgian Bay, in the centre of the white pine district, has shipping facilities on both the Canadian Pacific Railway and Grand Trunk Railway to Ontario and Western Canada. The initial capacity of the factory is 240 cases a day.

TENDERS FOR DEBENTURES.

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m., August 10th, 1912, for the purchase of \$30,000 debentures, repayable in forty equal annual instalments, with interest at 5 per cent.

This issue is for the purpose of purchasing site and erecting thereon a four room school.

The highest or any tender not necessarily accepted.

EDW. J. BAKER,

Secretary-Treasurer.

The St. Agnes Roman Catholic
Separate School District No. 22,
Moose Jaw, Sask., July 7th, 1912.

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to 6 o'clock p.m. on the 31st day of August, 1912, for the purchase of \$6,000 5% per cent. Government Guaranteed General Debentures repayable in twenty equal annual payments with interest.

The highest or any Tender not necessarily accepted.

F. HOPWOOD,

Secretary-Treasurer.

Duck Lake,
July 22nd, 1912.

TENDERS FOR PULPWOOD LIMIT.

Tenders will be received by the undersigned up to and including the 15th day of August next, for the right to cut pulpwood on a certain area situated on the Abitibi Lakes and River, tributary to the Grand Trunk Pacific Railway, and the Temiskaming and Northern Ontario Railway, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario,—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, Ontario, May 15th, 1912.

The Minto Coal Company, Limited, has been organized to take over the coal interests which have been acquired in Queen's and Sunbury Counties, in the Grand Lake district of New Brunswick during the past few months by Sir Thomas Tait. The new company will have an authorized capitalization of \$400,000, and will afterwards carry on extensive coal mining and development. Those named in the formal application for incorporation are:—Sir Thomas Tait, Montreal; Mr. John Henderson, engineer, of Northfield, Sunbury county; Messrs. A. R. Slipp and R. B. Hanson, solicitors, of Fredericton; and Mr. Victor E. Mitchell, K.C., of Montreal. The organization of the new company means that the Fredericton and Grand Lake Coal and Railway Company will, for the present at least, be interested as well in the Gibson and Minto Railway now under construction across the river from Fredericton and Minto.

UNITED STATES MANUFACTURES

The extraordinary growth of manufacturing power in the United States and of the exports of manufactures, are reflected in the figures for the fiscal year 1912, just issued by the Bureau of Statistics of the Department of Commerce and Labor at Washington. That bureau, which has just completed its figures showing the exportation of manufactures, states the total value of manufactures exported in the fiscal year at \$1,021,753,918, of which \$674,302,903 was the value of manufactures ready for consumption and \$347,451,015 that of manufactures for further use in manufacturing. This does not include foodstuffs which have undergone a process of preparation or manufacture, since the bureau groups articles of that class under the general heading of "foodstuffs" exported.

This 1,022 million dollars' worth of manufactures exported in the fiscal year 1912 is more than double that of 1903, three times that of 1898, four times that of 1896, five times as great as in 1894, practically six times as great as in 1890, and ten times as great as in 1876, the value of manufactures exported in a single year never having reached as much as 100 million dollars until the year 1873. Comparing 1912 with 1902, a decade earlier, the totals are: Manufactures ready for consumption, in 1912, 674 million dollars, against 322 million in 1902; manufactures for further use in manufacturing, in 1912, 347 million dollars, against 132 million in 1902; total manufactures exported, in 1912, 1,022 million dollars, against 454 million in 1902, having thus increased about 125 per cent. during the decade.

This growth in the exports of manufactures is more rapid than that of the other classes of merchan-

dise. Manufactures formed 47 per cent. of the exports of 1912, against 33½ per cent. in 1902 and 18 per cent. in 1892. This increasing share which manufactures form of the exports, occurs chiefly at the expense of foodstuffs, which formed but about 20 per cent. of the exports of 1912, against approximately 38 per cent. in 1902 and 50 per cent. in 1892.

The principal articles forming the billion dollars' worth of manufactures exported are: Iron and steel, copper, mineral oil, manufactures of wood, leather and manufactures thereof, cotton manufactures, cars and carriages, automobiles, and paper and manufactures thereof. The total value of iron and steel manufactures exported in the year was 268 million dollars, against 99 million in 1902, a decade earlier, and 29 million in 1892, two decades earlier. The chief growth in the exports of iron and steel manufactures has occurred since 1899, the total value of the exports of iron and steel never having touched the 100 million dollar line until the year 1900, and only crossed the 200 million dollar line in the year 1911, when the total was 231 million, against 268 million in the year just ended. Machinery alone amounted in 1912 to 115 million dollars' value, and this does not include agricultural implements, of which the year's exports amounted to 35½ million dollars, or automobiles and parts thereof, which amounted to practically 28 million dollars. Automobiles show perhaps the most rapid growth in the list of manufactures exported, having been, as above indicated, 28 million dollars in 1912, against less than one million in 1902, a decade earlier. The total value of complete automobiles exported in the year is 21½ million dollars, and to this must be added about four million dollars' worth of parts of automobiles and 2½ million for tires, making the grand total for automobiles and parts thereof, including tires, about 28 million

dollars, against $\$1\frac{1}{4}$ million in 1908 and less than one million in 1902.

The United States has more than 60 per cent. of Canada's import trade, and we are, therefore, ranked as one of the best markets for its manufactures. That fact accounts for the eagle eye which is continually focused upon Canada's commercial missionaries, who are negotiating various trade agreements, such as that with the West Indies and the proposed reciprocal arrangement with Australia. United States manufacturers appreciate, perhaps more than we do at home, the great value of the expanding home markets of the Dominion.

CONSOLS

The decline of Consols to the lowest point on record has elicited innumerable explanations therefor. An English broker visiting Canada attributes the drop in price to the lessening interest for that class of security by the British people. Ten years ago everybody who had saved a little cash bought Consols. Many people knew of no other investment. Nowadays few people who are in touch with London buy Consols. The high cost of living and the numerous other safe investments at home and abroad, which produce a higher return on invested money, have turned the flow of money from British Government issues.

An interesting table of prices of leading securities in January, 1906, compared with those of to-day, has been compiled by the Financial News. The stocks include India and Colonial loans, Bank of England stock, and a few representative European State issues. The fall (or rise in one instance) is worked out in percentages, so as to facilitate comparison, and the results are the following:—

	Jan., '06.	Now.	+ or —	%
Consols	89 $\frac{3}{8}$	74 $\frac{1}{8}$	—15 $\frac{1}{4}$	—17
India 3 $\frac{1}{2}$ %	104 $\frac{3}{4}$	91 $\frac{1}{4}$	—13 $\frac{1}{2}$	—12 $\frac{3}{4}$
India 3%	96 $\frac{1}{2}$	77 $\frac{3}{8}$	—18 $\frac{7}{8}$	—19 $\frac{1}{2}$
Canada 3% '28	97 $\frac{1}{2}$	89 $\frac{1}{2}$	—8	—8 $\frac{1}{5}$
Cape 3 $\frac{1}{2}$ %	98	96 $\frac{3}{4}$	—1 $\frac{1}{4}$	—1 $\frac{1}{4}$
Natal 3%	87	82 $\frac{1}{4}$	—4 $\frac{3}{4}$	—5 $\frac{1}{2}$
N. S. W. 3 $\frac{1}{2}$ % '24..	100	97	—3	—3
Bank of Eng. stock..	293 $\frac{1}{2}$	242 $\frac{1}{2}$	—51	—17 $\frac{1}{2}$
Austrian 4% gold....	99	96	—3	—3 ..
French 3% Rentes....	99	91 $\frac{1}{2}$	—7 $\frac{1}{2}$	—7 $\frac{1}{2}$
German 3%	89	79	—10	—11 $\frac{1}{4}$
Portuguese 3%	70	64 $\frac{1}{2}$	—5 $\frac{1}{2}$	—8
Russian 4%	82 $\frac{1}{2}$	92 $\frac{3}{4}$	+10 $\frac{1}{4}$	+12 $\frac{1}{2}$
Spanish 4%	92	92	—	—
Turkish Unified 4%..	90 $\frac{3}{8}$	89	—1 $\frac{3}{8}$	—1 $\frac{1}{2}$

Many conflicting conclusions can no doubt be drawn from these figures. One feature seems beyond question—the relatively larger decline in three per cents. compared with securities having a higher rate of interest, and this is illustrated most plainly in the case of India stocks, where the Threes have fallen more than the Three-and-a-Half per Cents., though all recent issues have been made in the latter denomination.

Sir Felix Schuster, who, by the way, is a director of the Grand Trunk Pacific Railway, has made the most interesting contribution to the discussion respecting the depreciation in British Consols. Gilt-edged though Consols might be, their decline was due principally, said he, to their comparatively low return—an investment development by no means confined to England, but one noticeable in all the investment markets in Europe, and in similar arenas outside of Europe as well. Commerce, through a substantial activity in trade, all the world over had made large demands upon money in recent years. Because of the higher return thus earned much money had gone into trade and not into Consols or other low-yield investments.

Again, the colonies and several countries undergoing rapid development drew on Europe for capital, to which London contributed, and in supplying this

heavy demand large sums were withdrawn from home investment channels to the consequent loss in value of all securities yielding low interest returns. Another circumstance, which Sir Felix emphasized, was the rapidly increasing and already vast public expenditures in most of the European countries, which, of necessity, led to a decrease in their saving and investment power. England's death duties, for illustration, threw on the investment market a constant supply of gilt-edged securities, and these operated adversely to Consols.

The effect of all the factors cited was inevitably unfavorable to securities having low interest rates. Other causes were, as we have shown heretofore, the extension of the area of trustee investments, the large and frequent Government issues for Irish land purchase, and, probably, the apprehension of further similar offerings. Idle and unwarranted rumors had also been circulated which undoubtedly affected Consols, and how far these causes would continue to operate, Sir Felix frankly observed, no one could foresee. Foreign investments yielding high returns were admittedly attractive; but there was always a certain risk in such undertakings. The test of the wisdom of embarking in such ventures would come later, when a demand for fresh money arose. Then, when capital was not so easily available, sentiment might once more change in favor of home investments, and the yield—considering the security—offered—prove attractive to investors and trustees alike.

FARMERS BANK POLICE ENQUIRY

The enquiry to be held by the Toronto police commissioners in connection with the Farmers Bank case, will be held, it is understood, behind closed doors and the results communicated to the press after the sittings. This is, we think, contrary to police ethics and to public interest. Certain papers were missing when needed at the Farmers Bank enquiry. They have not been found. The questions immediately arise: Have they been destroyed, and if so, by whom, and for what reasons? It is stated that as a result of their disappearance steps have been taken by the police to prevent another occurrence of the kind. *The Monetary Times* does not think that such action and the proposed "closed doors" session are sufficient to meet the seriousness of the case. It is to be hoped that Toronto's police chief and his staff will be able to find the missing papers or learn where they have gone and in what manner they have been disposed of. A promise of better attention to such matters in the future is not enough. The public should know the answer to the numerous questions raised by the loss of the documents. The press should not be asked to accept a specially prepared statement respecting a private session of the police commissioners on a matter of the most vital public importance. The press should be admitted to the proceedings.

WESTERN CANNERIES REVIVED

The career of Malcolm's Western Canneries, later known as the Central Canada Meat Packing Company, and now labelled the Western Canada Cold Storage and Packing Company, continues. Mr. F. H. Malcolm, whose personality will remain for long in a special niche of the Canadian promoters' gallery, organized the company. Mr. C. F. Flower, of Birtle, Manitoba, reorganized it, and somebody else has shown that a reorganized company can be reorganized.

While the language of the prospectus of the Western Canada Cold Storage and Packing Company is extremely optimistic, detailed estimates of operating costs, profits and other such matters are omitted. Possibly those who prepared the pamphlet were fearful lest they should make an error such as that committed by Mr. F. H. Malcolm in his prospectus, where he esti-

mated his profits without allowing for the cost of raw material.

The prospectus under review says that "the profits of this business are well known to be very substantial," and much more in the same tone.

It is interesting to know that Mr. F. H. Malcolm, "investor," is one of the "shareholders of the company, any of whom are eligible for election as directors." Did Mr. Malcolm acquire his shares in this company according to the calls specified in the prospectus, viz., \$10 per share on application, \$10 per share on allotment, and the balance in calls of \$10 per share at intervals of not less than two months?

The Western Canada Cold Storage and Packing Company has capital of \$550,000 in shares of \$100 each, and is making an issue of 10 per cent. preference stock. Regarding this stock the prospectus says: "The preferred shares are entitled to a preferential dividend at the rate of 10 per cent. per annum upon the capital paid in (non-cumulative), and after this has been paid then the common stock will be paid a dividend of 10 per cent., after which further profits will be divided equally between the common and preferred stock of the company." The company is authorized under its charter to issue debenture bonds for working capital conducting operations.

One of the amusing statements in the prospectus is that the "company has very large orders in sight for the supply of its products to the British Admiralty (Gibraltar and Malta), aggregating over \$2,000,000 as a commencement." We presume that British Admiralty glasses are necessary to bring those large orders into proper focus.

The prospectus bristles with generalities, but lacks necessary details. It should have had at least a business-like and complete estimate of the cost of operation and the likely profits. Again, we think that a statement is due to the public as to what was paid by the Western Canada Cold Storage and Packing Company or its promoters for the property, assets, etc., of the Central Canada Meat Packing Company, and also regarding the fate of the shareholders of that company. We note that Sir Richard Scott, who was a shareholder of the old company, is associated with the new concern. We fear that this enterprise, even although in new hands, will not attract the funds of the careful investor. Its past career has been too chequered, and it has failed, after ample time, to give remunerative results to the shareholder.

WHEAT AND THE PANAMA ROUTE

The statement of Mr. E. J. Chamberlin, president of the Grand Trunk Railway system, respecting the value of the Panama Canal as a factor in diverting prairie grain westward, is virtually a challenge to the widely held views that considerable grain will be diverted that way, and that Vancouver is likely to become the greatest shipping port on the Pacific Coast. Mr. Chamberlin has given his opinion that the railroads will continue to haul grain eastward despite the opening of the Panama Canal. As one of the reasons for that conviction, the Panama route would prove too hot, he says. Many railroad officials, both in Canada and the United States, disagree with the views of Mr. Chamberlin, although they regard that particular point as the only contention of value. Even so, a substantiation of it must be left to the future.

The general contrary opinion held by transportation men and shippers alike is that the bulk of export grain, or that portion emanating from territory lying west of a central line through Saskatchewan, will be moved westward to Vancouver and then through the Panama Canal for European ports in preference to the longer eastward haul to the Atlantic seaboard.

As the Wall Street Journal reminds us, the problem of expeditiously handling its increasing annual grain

crops is one that has already given Canada concern, and the opening of the Canal has come to be regarded by many as the solution of it. It is argued that with a free use of the natural outlet supplied by Vancouver, the pressure at the lake heads would be relieved to a material point, and that after the close of navigation on the Great Lakes the rolling stock of the road could be concentrated on the western divisions, over which grain could be hauled throughout the winter.

SMALL CHANGE

Panama Bill may become the President's new nickname.

* * * *

Wall Street had a story that the Dominion Government will buy the Canadian Pacific Railway. And this is a comparatively cool summer!

* * * *

When any item of the cost of living is increased, for temporary reasons, the causes usually become permanent. In other words, it always goes up and never comes down.

* * * *

So many important reported financial deals have been denied by our leading financiers and later actually consummated that we may be forgiven if in future we take such strenuous denials with a pinch of salt.

* * * *

The frivolous reasoning at Washington respecting Panama Canal tolls and the attempted evasion of the Hay-Pauncefote treaty has been interrupted by a statement of Senator Percy, of Mississippi. It is a refreshing utterance. "I regard the bill," he said, "as being directly opposed to the principle of the Hay-Pauncefote treaty and as a blow at our national honor. The United States is too great a country to stoop to such practices as that embodied in the measure now before the Senate. The adoption of the proposal would be entirely unworthy of a nation of the first class, and I sincerely hope it will never become law."

FOR LIFE INSURANCE MEN

The following articles in *The Monetary Times* next week will be of special interest to the delegates attending the annual convention of the Dominion Life Underwriters' Association at Montreal:—

WESTERN CANADA

Ideal Crop Weather During the Past Week—Many Harvesters Needed—Winnipeg's Assessment Drops to Twelve Mills

Monetary Times Office,
Winnipeg, August 6.

The weather conditions for the past week have been ideal throughout the three prairie provinces, is the way J. Bruce Walker, Commissioner of Immigration, put it last week after an extensive trip through the Western provinces, and, as a consequence, he says the crop outlook is extremely promising. The generous rains of July have had a good effect upon cereal vegetation, and the straw, which at one time gave evidence of shortness, is now long, strong and healthy. The ever-increasing area coming under wheat and oat cultivation makes the assurance of a crop practically independent of local climatic conditions consequently there is no more in the bright lexicon of the farming community of the West such a word as "fail."

Manitoba Yield Will be Greater.

Mr. Walker states that this year's crop will be 50,000,000 bushels ahead of the best Western record. In Manitoba, while the acreage sown to wheat is about the same as last year, the yield will be much greater, and to-day the outlook is for an excellent crop in both quality and quantity.

In Saskatchewan the wheat and oat crop is good and will give a generous yield per acre. Something over 151,844 acres of new land came under wheat this year, that is, about 2.90 per cent. over last year's area. The total area of wheat in Saskatchewan will this year reach the enormous total of 5,385,000 acres, which exceeds all the rest of the Dominion of Canada by half a million acres. With the continuance for a couple of weeks of the present ideal conditions, it is a conservative estimate to say Saskatchewan alone will yield 150,000,000 bushels of wheat of the very best quality.

In Alberta the conditions are equally gratifying and the yield expected to be equally bountiful. Over the whole Western country the crop is from ten days to two weeks earlier than last year. In Alberta they are now cutting barley, while within the next two or three days winter wheat cutting in the southern part of the province will be practically general.

Fifty thousand extra harvesters will be required for this year's 220,000,000 bushel crop. The need of this help is real and urgent and without it the progress of the West must come to a halt. Sufficient harvest help is our greatest and most pressing Western problem.

According to the Canadian Pacific Railway crop report for the past week, the crop in Western Canada, up to the present, as a whole, shows less signs of damage than usual. Examinations have been made of many districts and the signs of rust are not sufficient to cause any alarm.

Chicago Visits Winnipeg.

A delegation from Chicago Chamber of Commerce, which visited Winnipeg and the Canadian West recently, made a report to the foreign trade committee of the chamber upon its return to Chicago. This report refers in glowing terms to the reception which the delegates received in Winnipeg and generally throughout the West. Concerning Winnipeg it says in part: "The city is being managed in a manner that is not excelled, perhaps, by any municipality in the world. It would be impossible in any city to find men of a higher type, judged from any standpoint, than are the municipal officers of the city of Winnipeg. The most serious matters with which they are concerned are those of the municipality. There seems to be a determination on the part of each official not only to do his duty, but to do all that his capacity will permit to advance the interests of the city."

"The growth of Winnipeg is marvellous, when it is remembered that thirty years ago it was a mere trading post with only a handful of settlers. At this time it owns, controls and operates nearly every public utility, including power, light, heat, and water supply. In the matter of local government, it is only fair to say that the Canadians have a superior form and conduct public affairs far more efficiently and capably than the same are conducted in the States. Americans who have become citizens of Canada, when interviewed, uniformly state that they are better satisfied with the conduct of public affairs in Canada than they were when they were citizens of the United States, and feel that in becoming citizens of Canada they have surrendered no part of the liberty which they had enjoyed in our country, but feel they have a greater security in the protection of the law in the country of their adoption than they had here."

In spite of the increase of the estimates for the coming year the taxes for Winnipeg will not be increased in most cases. The large increase in the amount of the taxable property will make the rate of the assessment lower, and will be dropped from 13½ mills of last year to 12 mills this year. Three by-laws are to be submitted to the citizens of Winnipeg, amounting in all to nearly \$3,000,000. The measures are for

the expenditure of \$750,000 on electrical distribution, for conduits and street equipment; the expenditure of \$70,000 on two fire halls; the building of two subways, one on Princess to cost \$60,000; and the other under the Canadian Pacific Railway tracks to cost \$1,200,000.

MANY GUARDIAN LIFE POLICIES FILED

With Insurance Department at Ottawa—Final Work of Obliterating J. M. Spence's Company, Which Adopted Extraordinary Method to Conceal Big Operating Deficit

The end of the Canadian Guardian Life Insurance Company is in sight. Notice has been given by the Minister of Finance that assets will be retained, sufficient in amount to cover the full equitable net surrender value of its policies (including bonus additions and accrued profits) which have not been transferred or surrendered or in respect of which opposition has been filed. The assets so retained are being tendered to those policyholders pro rata according to the values of their respective policies. The policyholders have until September 10th to accept the amounts offered, otherwise they will be deemed to have refused.

Many Policyholders Have Filed.

Apparently a large number of policyholders have taken the advice frequently tendered by The Monetary Times, and have applied to the Department of Insurance at Ottawa for the surrender value of their policies, rather than accept the proposals of Mr. J. M. Spence, former president of the company, and now connected with the Intercolonial Life Insurance Company, of Edmonton. Mr. Spence desired his old policyholders to reinsure in his new company, a proceeding which The Monetary Times unhesitatingly advised against.

No less than 104 policies have been filed with the Department and complete particulars necessary for valuation given. The total amount tendered by the Department in respect of these policies, is \$17,850. In addition complete information necessary for the valuation of 18 policies has not been obtained by the Ottawa authorities. The amount tendered by the Insurance Department on account of these policies is \$1,265, subject to revision, "should information subsequently received prove the company's records to be inaccurate."

Notes of Some Policies.

The largest policies among those filed with the Department are for \$2,000, held by Mr. James Cowan, Burkton, Ont., and Mr. W. E. Bulmer, Toronto; and for \$2,500, held by Dr. J. G. Clarke, Meaford, Ont. There are a large number of \$1,000 policies. The smallest amount tendered by the Department of Insurance is \$1.03 on the \$250 policy of Eva Moore, Ottawa. The largest sum offered by the Department is \$908 on the \$2,000 policy of W. E. Bulmer, Toronto. Mr. F. T. Daville, Toronto, is tendered \$254 on his \$300 policy. The amounts naturally vary according to circumstances, such as premiums paid, etc.

According to the report of the Canadian Guardian Life Insurance Company to the Dominion Government for 1910, there were held 4,599 shares representing stock subscribed of \$459,700, of which only \$42,983 was reported paid up. The largest block was that of J. M. Spence (in trust), \$60,000, of which \$6,000 was said to have been paid up.

Company was Closely Examined.

The Canadian Guardian Life Insurance Company has had since its incorporation in 1901 eight secretaries. In a special report made early in 1911 by Messrs. Clarkson and Cross, Toronto, on behalf of the Dominion Insurance Department, it was shown that the company lost on operation between December, 1904, and November, 1910, \$61,223. The dividend declared by the company in 1910 was among those contributed by the specific surrender of three shareholders, who were also directors, of \$15,000 of share subscriptions, upon which \$1,500 had been paid. The chartered accountants who examined the company's affairs made the following significant remark with regard to this: "We are unable to express an opinion as to the legality of this method of financing." The report continued: "We are obliged to conclude that the vote of \$1,000 a month to the president, as salary for the years 1909 and 1910, an increase from \$250 a month during the preceding years, was made for the purpose of enabling him to acquire shares for the benefit of the company, and we find that on the 19th of November last, on page 304 of the directors' minute book, they cancelled this increase, thus restoring his salary to the previous rate of \$3,000 per annum." This was described by the examiners as "the very extraordinary method adopted by the board to avoid showing an operating deficit."

Mr. J. M. Spence was last heard of as president of the International Life Insurance Company, with headquarters at Edmonton. We presume that very few of his former policyholders or shareholders will experience a burning desire to follow him further as insurance and investment counsellor and guide.

MOTOR BOAT INDUSTRY

Hong Kong Secures Canadian Orders for Craft of Varying Individual Types—Cost Lower Than That of United States Manufacturers

An interesting commercial incident is recorded in a bulletin of the United States consular reports. It shows that encroachments are being made by Hong Kong builders on United States export trade in motor boats, notably with Canada. One Hong Kong yard has made several important contracts for building motor vessels of various sizes, ten motor launches or yachts just being completed for a Vancouver firm in a series of thirty-one vessels, varying in length from 25 to 60 feet. These vessels have been priced a little below the price for such vessels in central and eastern United States. They were made to special plans, however, and are not standardized like similar vessels in the United States, and the Canadian trade could, therefore, be more perfectly catered for. Such Hong Kong trade is greatly aided by much lower ocean freight charges to the Canadian Pacific coast than rail freight thither from eastern United States points, where such boats are constructed at a minimum price. The cost of constructing such vessels on the Pacific coast, because of high cost of labor and of certain materials, is too great to permit competition with Hong Kong yards.

Voluntary Trade Orders.

Possible business in Canada and the United States on either coast seems not to have been canvassed by Hong Kong builders, trade coming to them through low cost of construction. The capacity of Hong Kong yards in such manufacture is practically unlimited. The yards are prepared to handle any size or shape of vessel from the smallest launch to large ocean-going steamers, the large docks taking the largest vessels on the Pacific with considerable margin. The Hong Kong yards now have almost a monopoly of the Philippine business in all lines of larger vessels, and previous to free trade between United States and Philippines had nearly all the business in vessels of all sizes and grades. The free admission of American motor boats and a 50 per cent. ad valorem duty on vessels from elsewhere stimulated Philippine imports of smaller American vessels. Hong Kong vessels are also sold in Australia and in various other portions of the Pacific.

The boats constructed for Canadian orders made of teak, the interiors finished largely in Philippine hardwoods, particularly Philippine "mahogany." There is a growing use of Philippine hardwoods in all such work in Hong Kong dockyards and elsewhere in the Far East.

Motors Used are of Various Makes.

Motors for the boats for Canada have been largely of American make, including the product of Canadian factories of American concerns. Among the motors so far used are the Canadian Fairbanks, the Atlas, the Eastern Standard, the Western Standard, the Loew Victor (Cleveland), the Speedway (Morris Heights), and the Atlas Gas (San Francisco). The heavy passenger and freight boats built for use by China upon the West River in public service have nearly all been fitted with Gardner (English) motors, a Martin (English) and Thornycroft (English) having been used respectively on two pleasure boats and one German motor (Deuch) being used on a pleasure boat for a German patron. It is significant that most motors for the heavy commercial boats so far have been of English make—heavy, slow-revolution motors with few working parts and employing kerosene as a rule—while motors for the lighter, faster, and more attractive vessels, particularly those for Canada and Australia, have been from the United States.

Vessels Made to Order Not Standardized.

All construction, both of large vessels and launches, in the Hong Kong yards is to order, and vessels are built individually, i.e., not from standardized parts, so there is probably no prospect of building such vessels for the general trade in large numbers except upon specific order. Nevertheless, the fact that a considerable trade is already being done without any particular effort to secure it, merits attention. Hong Kong shipbuilders have for several years been producing motor vessels of many sorts for use on Chinese inland waters, which trade they will probably hold indefinitely for all except, perhaps, a few small, fast, light boats for special purposes. The fact that they will also be able to compete successfully with United States, English and other boats in several parts of the world may be taken as thoroughly established.

Surveyors have been sent out to locate townships in Northern Ontario along the Algoma Central Railway between the Canadian Northern and the Transcontinental. If there is any demand it is then likely that they will be provided with roads and thrown open for settlement. The land is good.

GRAND TRUNK PACIFIC AFFAIRS

Matters Being Considered by Government and Railway—As to the Transcona Shops

In view of the misleading reports in the daily press respecting Grand Trunk Pacific affairs, Mr. E. J. Chamberlain, president of the road, has issued the following statement:—

"The Grand Trunk Pacific Railway have been operating the section of the National Transcontinental Railway between Winnipeg and Lake Superior Junction since August 1, 1911, handling all of last season's grain business and other traffic offered over that line without any detriment to the public. The Government are now asking that the Grand Trunk Pacific execute a permanent lease of that portion of the line between Winnipeg and Lake Superior Junction, known as district 'F,' and negotiations are pending between the Government and the company on that point, but do not, so far as a matter of accommodation, in any way affect the public.

How the Contract Reads.

"The contract between the Government and the Grand Trunk Pacific relative to the Transcontinental, that section between Moncton and Winnipeg, which was to be constructed by the Government and is known as the eastern division, provides that:—

"Pending the completion of the eastern division by the Government the company shall be entitled to lease from the Commissioners to be appointed under the said act, and to operate such portions of the eastern division as may from time to time be completed, upon such terms, etc., but does not bind the railway company to take over any sections unless they desire to do so, until the entire line is completed.

"Negotiations are in progress between the Government and the company relative to a further lease of the section above referred to when it is fully completed and pending the completion of the whole line. Notwithstanding reports in the papers throughout the country, that portion of the Transcontinental line is not yet completed. There is considerable work to be performed on the entrance into Winnipeg, connecting up the Transcontinental with the Grand Trunk Pacific and the Canadian Northern at the Union Station. There is also considerable other work on the line necessary to be done before the terms of the contract are complied with.

As to Transcona Shops.

"With regard to the Springfield, or Transcona shops: Major Leonard, chairman of the Transcontinental Railway Commission, has decided that the shops are not part of the contract between the Government and the railway, while the company contend that they are part of the Transcontinental contract. If Major Leonard's contention is eventually sustained, the taking over of the line between Winnipeg and Lake Superior Junction would not include the taking over of the shops by the Grand Trunk Pacific Railway. On the other hand, if the Grand Trunk Pacific's contention that the shops are a part of the Transcontinental Railway is sustained, the taking over of the line would also mean the taking over of the shops and placing them promptly in operation."

PERSONAL NOTES

Mr. T. G. Meredith, of London, has been appointed city solicitor of Toronto.

Mr. C. H. Eason has been appointed general manager of the Bank of New Brunswick, and will assume the duties in a few weeks.

Mr. A. E. Ames, head of the Toronto brokerage firm, and former president of the Toronto stock exchange, is on a trip across Canada.

Mr. T. Bradshaw, of Messrs. A. E. Ames and Company, Toronto, is visiting Vancouver in connection with that firm's activities in the West.

Mr. R. S. Rideout, of the Dominion Trust Company, Vancouver, has been appointed accountant at the Regina branch of the company.

Mr. H. K. Wicksteed, chief engineer of location of the Canadian Northern Railway, has been inspecting work in British Columbia and looking over the situation of the Burrard peninsula.

Mr. Jean Vanophem, of Brussels, managing director of a development company which has holdings on the Pacific Coast, will investigate mining possibilities in British Columbia. He is now on a business trip to Alaska. He reports that Belgian capital will continue to be invested largely in Canada.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

IV.—GENERAL CHANGES THE PANAMA CANAL MAY EFFECT

It is doubtful whether anyone can state definitely what changes will be effected by the opening of the Panama Canal. Even Professor Emory R. Johnson, the expert on transportation and commerce at the University of Pennsylvania, who has probably given more study to this question than any other individual, admits that "the effect which the Canal will actually have upon the industrial and commercial development of the United States as a whole is not easy to determine; indeed, careful analysis can only indicate the more important changes to be expected."

It is therefore, possible only to gather and cite facts and figures, analyzing the probable effects of the Canal thereupon. It is generally admitted that Canada will benefit largely as a result of the new waterway. Our geographical position as the northern part of North America emphasizes that fact. Many of the benefits accruing to the southern portion of North America, the United States, will consequently be equally as beneficial, or nearly so, to Canada.

The outstanding influence of the Canal upon American trade will be increased transportation facilities. With the opening of the Tehuantepec National Railway a few years ago, freight rates were given from Canadian eastern points to British Columbia ports via that railway, and certain commodities were shipped and are still being shipped that way. Such articles, for example, as wire nails, etc., were shipped from Montreal by the Elder Dempster Line to Atlantic Mexican ports, and the Canadian customs department sent an officer down to supervise the bonding of these goods across Mexico, which were then brought up on the Canada-Mexico Pacific Line. Regular shipments are now going that way, and rates are quoted from Liverpool via the Tehuantepec Railway. With an all-water route, without the expense of two transshipments, a considerable trade should develop.

Change Conditions of Industrial Competition.

The opening of the Panama Canal will change the conditions of industrial competition, and the benefits will not all be secured by the United States. "Half of the traffic passing the Canal," says Professor E. R. Johnson, "at least during the first decade of its operation, will not touch the shores of the United States at all—it will be the commerce of Europe with western South America, and, to some extent, with other sections of the Pacific. While the United States will trade with foreign Pacific countries under more favorable conditions than exist at present, the same will be true of Europe, which now has a long lead over the United States in the trade of most sections of the Pacific. The Canal will enlarge our trade with western South America, but Europe will also expand her commerce with that region."

Unite East and West.

One of the chief objects of the Canal is for Eastern United States manufacturers to reach the Pacific Coast of South America. The total exports of the neighboring republic to the whole of South America for the year ended June 30th, 1912, was approximately \$135,000,000. Prior to 1911, the value of exports to South America had never reached \$100,000,000. The increase in exports to South America, while occurring in a large number of articles, is especially notable in lumber, leather, mineral oils and railway materials.

How increased trade in this direction is generally regarded in the United States may be gathered from the following expression in a New York journal:—

"The South American countries offer a great field for United States exports, and the control of these markets should not be allowed to fall into the hands of rival commercial nations. President Taft's attempt to secure reciprocity with Canada ended in failure, but this should not serve as a discouragement to similar efforts in other directions. There should be reciprocity treaties concluded at once with Brazil, Argentina, Chili, and the other South American States, so that by the aid of an American Zollverein, the United States might place its commercial interests on the two continents on a solid footing."

Other Probable Effects.

Another effect predicted by Professor Johnson is that the competition between Europe and the eastern part of the United States for the trade of the Pacific Coast States will be keen. To what extent the Canal will draw industry back to the Atlantic seaboard cannot be prophesied in advance of the opening. It is probably safe to assume that the producers and carriers of the Middle West will find an effective method of dealing with the situation that may develop.

Other effects which appear probable as the result of a brief examination are the knitting together of the Atlantic and Pacific coasts of the United States and Canada. The trade of the two coasts must be considerably developed by the new shortened and cheap water route. Seafreights to and from Atlantic and Pacific seaports should be greatly decreased. Sea freights from Atlantic ports, China and Japan should be much lower than the transcontinental freight rates, plus the Pacific freight.

Likely Distribution of Business.

Here is a British expert's view of the likely distribution of business: "The trade of the west coast of America, both south and north, is very largely in the hands of sailing ships, and these will not use the Panama Canal any more than they do the Suez Canal now, the dues preventing them doing so. Therefore, only a part of the Pacific trade will bring business to the Canal; but, as has been said, the American coastal trade will be largely developed, the trade between Europe, and especially England, and the west coast will receive an impetus, and probably new routes will be formed, but hardly at the expense of the Suez route, since the Atlantic route offers very little advantage over the Mediterranean route, even to Japan and New Zealand, and none at all to ports not so far east.

Suez and Panama.

"Practically no comparison can be drawn between one canal and the other, for the one has the whole of Europe to draw upon at the one end, and has India, China, the Straits Settlements, Japan, Australia, and the east coast of Africa at the other, whereas the other has but a limited European trade and the North American eastern ports at one end and the west coast of the two Americas, and perhaps part of New Zealand and a part of Japan at the other end. Probably it will pay its expenses, but to a great extent it will have to create its own business. Naturally, the Americans are enthusiastic over the completion of the great work, and they are quite right in estimating its value to themselves very highly, but it will not really have much influence upon European trade."

New Steamship Routes.

There may not be many changes in existing steamship routes, but new routes will be created. These will probably include lines from Europe to the west coast of America and from Japan to the east coast of North America. It is thought by some that ships going to the Far East from Europe will still use the Suez Canal. On the other hand, Baron Kimotsuki thinks that the traffic of the transcontinental railways of America, as well as the trans-Siberian Railway, will be greatly affected by the opening of the Canal. The Yoro

views the question much in the same light as does the Baron, and remarks:—

"If the United States should fix the amount of toll for the passage of the Canal at \$1 per ton, as recommended by President Taft, the Suez Canal, which at present charges about \$1.45 per ton, will be obliged to reduce the toll, else those European vessels now going to the Far East by the Suez Canal will take the opposite direction and reach their goal by way of Panama."

Trade in Panama Zone.

Within easy reach of the Canal, by water, is a population estimated at 14,000,000, buying and selling goods annually to a value of \$135,000,000. The Panama Canal will give access to this territory. It will also provide the western coast of America with shipping facilities and will save 7,000 miles in the trip from New York. It has been estimated that the transcontinental business transacted now by the railways represents four million tons a year. The freight rate on this enormous tonnage is two, three, or four times as high as it will be by water on the new short route. For instance, about one million tons of California fruit are sent east at an average cost of \$25.76 a ton. Shipowners believe that on a modern sixteen-knot steamer, with refrigerating facilities, this fruit can be shipped from California to New York at \$7 a ton.

Competition Among Different Routes.

Regarding the question of competition among different routes, Professor Joseph French Johnson, giving evidence before the United States House Committee on interstate and foreign commerce, said that it made practically very little difference where the tolls were fixed with respect to the Tehuantepec route, as that route would be put out of business in any event. Professor Johnson added that the question of trade through the Canal was largely a mathematical proposition. Knowing the number of days saved as compared with the route around the Horn, knowing further the amount saved on each day's journey for a ship of given size starting from various points, it was a comparatively straightforward, although complicated, proposition to find out whether it would make money by going through the Canal or not. Such computation showed that ships going north of Yokohama from Europe would probably not find it well to use the Canal, while ships going to Sydney might use it and ships going to other points in the same general part of the world might not. Quite a number of considerations beside the tolls and the price of coal had to be taken into account in connection with the very long voyages.

Wealth of Central America.

Commander E. Hamilton Currey, R.N., a well-known writer on maritime affairs, points out in a recent article in the South American supplement of the London Times that while the potentialities are not as great at Panama as they were at Suez, estimates of the effect that it will have on trade are probably within rather than without the mark. The development of the potential wealth of Central America should follow rapidly upon the opening of the Canal. With it will come the building of railways, which will pour their produce into the zone of the Canal. The Canal zone and its hinterland, however, are only two of the places which will be directly affected. Produce on the western coasts of both North and South America, which is valueless owing to the only means of transport available being by rail, will immediately become a valuable asset when it can be borne to its destination by sea.

More Ships for More Traffic.

To-day there is more than can be carried away, and once the Canal is opened the cry will be for more and more ships to take care of the traffic. Millions of acres of fertile land await settlement on the western coast of South America, and a new factor will be introduced in the emigration movement from Europe. The

increased facilities for trade between the Atlantic seaboard and Australia and the Far East also make for expansion. Many complex questions of economics, particularly as to the effect that the Canal will have on east and west railway traffic on the North American continent, as well as on existing maritime routes, enter into any estimate of what relation the Canal will have to the world's commerce. In the light of history and experience, however, it may reasonably be held that what temporary disturbances may be created will more than be offset by the obvious advantages to come from the stimulus to trade, particularly trade between the two Americas, which has been slower than it should be.

Canada Second Only to United States.

In view of these facts Canada's interest in the Panama Canal and its development appears to be second only to that of the United States.

Canada's relations with the West Indies make peculiarly interesting the probable effect of the Canal upon those islands. They will lie in the track of a great part of the world's ocean traffic as soon as the Canal is open. An impetus should, therefore, be given to the development of the resources of those islands. The competition of various lines for the import and export trade will bring lower freight rates; the question of

Steam Shovel at Work in Culebra Cut, with Large Rock in Mouth of Shovel.

direct and more frequent European mails will be settled; and increased passenger traffic will make the advantages of the equable climate of these islands better known, especially in Europe, as a place of permanent residence. That a new era of prosperity will thus come to the West Indies seems to be assured.

Canada's Banking Move.

The Colonial Office in London has for some time been seeking information in the West Indies respecting the possible influence of the opening of the Canal upon those islands. That considerable benefits will be enjoyed by the islands is believed by the general manager of the Royal Bank of Canada, Mr. E. L. Pease, who early this year announced that the bank intended to extend their branches in the West Indies, feeling sure that the islands in and countries bordering on the Caribbean Sea would be materially benefited by the advent of the new waterway.

(To be continued.)

Mr. M. A. Ryan, president of the Ryan Boiler Works of Duluth, manufacturers of upright stationary boilers, has closed negotiations for several acres of land for the establishment of a factory in Winnipeg.

Until further notice the Toronto Stock Exchange will close on Saturdays. In view of the small amount of business being transacted and the prospect for a dull period during the next month, a petition was circulated and largely signed by the brokers asking that Saturday sessions be abandoned temporarily. At a meeting of the Stock Exchange Committee it was decided to accede to the request of the petitioners.

GRAND TRUNK CONSTRUCTION

Labor is Scarce—Prince Rupert to Have the Next Hotel

Mr. A. W. Smithers, chairman of the Grand Trunk Railway, has arrived in Canada for his annual inspection trip. He will go as far as Prince Rupert where the Grand Trunk Pacific will build its next hotel. In an interview at New York, Mr. Smithers said:—"We are pushing the Grand Trunk extension through as fast as we can. I do not see anything to interfere with our work if we can get labor, and considering the high price we are paying, there should not be much difficulty in that. All the railroad companies are doing all they can toward harvesting and marketing the crop, but scarcity of laborers is at the bottom of the trouble. There is a splendid prospect for agricultural laborers coming from Europe for many years to come. In addition to the large number of farms which we are opening up in Canada, there is a constantly increasing acreage being planted.

Wheat the Backbone of Prosperity.

"I look upon wheat as the backbone of Canadian prosperity. I do not mean the present high price because Canada will do well if the price should drop 25c. a bushel.

"There are no new developments since I left here six weeks ago in the Boston-Providence connection of the Grand Trunk. Those connections are being pushed forward as fast as possible.

"We have a great deal of work ahead at Winnipeg, where we are building hotels; also at Edmonton and Regina.

"I think if the crop materializes all it promises now it will give a new impetus to immigration. I think that all the railroad companies and all the governments should do all in their power to encourage immigration of agricultural laborers to this country. There are vast fields yet to be opened up and the mainstay of continued prosperity is agricultural cultivation."

Tofield-Calgary Branch.

The Board of Railway Commissioners has made an order allowing the Grand Trunk Pacific to operate the new Tofield-Calgary branch as far as Trochu, 121 miles south of Tofield. Grading on this branch has already reached Calgary, and steel is laid to mile 134 beyond Trochu.

Rapid progress in track laying is being made on the several branch lines of the Grand Trunk Pacific, over 11 miles of the heaviest steel having been laid in two days last week.

The Pullman Company has just delivered to the Grand Trunk the first of the new equipment for the Boston Chicago tourist service. The cars are new design 16-section sleepers.

The Russian East Asiatic Steamship Company has contracted to bring out from Europe 800 laborers monthly for construction work on the National Transcontinental Railway, the eastern division of the Grand Trunk Pacific. The usual immigration restriction will be waived in this case. The labor supply is not equal to the demand for railway construction work.

The Western Canada Irrigation Association holds its annual convention at Kelowna, B.C., on August 13 and four following days, when valuable papers will be given by prominent authorities in the irrigation world.

Planning to establish sixty milk and cream factories in various parts of the Dominion, Mr. A. F. MacLaren, of Toronto; Messrs. B. F. MacLaren and T. B. Miller, of Red Deer, recently visited Edmonton in connection with the development of the milk industry in Alberta.

Classified expenditures on the Panama canal show to June 1, 1912, that expenditures for fortifications of the canal are growing monthly, being to that date, \$864,829. Other expenditures are:—Civil administration, \$5,644,424; law department, \$23,012; sanitation, \$14,672,578; construction, \$149,590,877; general items, \$86,939,469; total \$257,735,189.

The United States Senate has ratified the North Atlantic fishery treaty with Great Britain, settling questions involving the Newfoundland fisheries, which have been in controversy for many years. The treaty was signed by the representative of Great Britain and the United States June 20, and carries out the decision of The Hague court rendered September 7, 1910. It will become effective as soon as ratifications can be formally exchanged between the two countries.

The Dominions Development, Limited, is a private company registered in London, England, with a capital of £50,000 in £10 shares, the first directors of which are Sir William Howell Davies, M.P., Messrs. W. H. Crowe, W. M. Law, and Captain T. C. Benson. The company is formed to acquire any real or personal property, concessions, licenses, rights or privileges, and prospect, examine and explore any territories and places in Canada and elsewhere. Its registered office is at 14 Clifford Inn, Fleet Street, E.C.

CANADA'S PACIFIC COAST

Opinions on the Shipment of Wheat via Panama Canal—Development of Coal Areas

(Staff Correspondence).

Vancouver, August 4th.

Mr. E. J. Chamberlin's recent statement that the Panama Canal will not affect the shipment of grain eastward, has caused considerable comment on the coast. Vancouver and New Westminster have been looking for almost immediate shipments of grain, especially in view of the great congestion that annually occurs on the prairie, and which is growing greater with the expansion of production of wheat. Mr. Chamberlin declares that the tropical heat will so affect grain in transit that it cannot be shipped via Canada's western Canadian ports, which will include Prince Rupert, once the Grand Trunk Pacific is completed. This point has been raised before though not by an official and public man of Mr. Chamberlin's standing. As an argument it may be stated that grain is shipped every year and has been shipped for many seasons past from Seattle, Tacoma and Portland, the ultimate destination being Europe. This grain passed through the tropics in transit, and it has not been so ruined that the traffic has ceased.

This point is argued also by Senator R. H. Pope, who was on the coast recently. He says that this danger may be relieved if not entirely avoided by giving the wheat a chance to dry after it is threshed.

Reasons for Loans to Farmers.

He makes the suggestion that the government should advance farmers money on their crop at a reasonable interest to enable them to hold it until they can sell advantageously.

This point will apply further than in reference to quick marketing of wheat for export. Farmers cannot afford to hold their wheat, for they need the money badly by autumn, and as a result they sell as soon as they can get the grain to the nearest elevator. The result is that they often have to take what is offered, accept the buyer's grading and are subject to many methods whereby they are deprived at times of their full measure. If Mr. Pope's suggestion could be carried into effect it would mean a great deal to the farmer on the prairie who is doing much to give Western Canada stability.

Insofar as quick marketing affects export via the western ports of Canada, those interested in the question here do not anticipate that the flow of grain to the Pacific coast can be stopped. In the meantime, the necessary preliminary arrangements are going ahead to provide facilities for shipment.

This week another railway move has been made. The Pacific Great Eastern has filed its plan through North Vancouver, and makes the announcement that five surveying parties are in the field on the projected route to the north. Mr. D'Arcy Tate, of the Grand Trunk Pacific, is on the coast and the statement is given out that the Grand Trunk Pacific will buy out the new company. When Sir Richard McBride made public his railway policy in the House last winter, The Monetary Times pointed out that the Pacific Great Eastern was really intended for the Grand Trunk Pacific's accommodation between Fort George and Burrard Inlet. This was denied at the time, but present developments seem to show that the statement was right.

Coal and Lumber Resources.

It looks as if coal will be extensively mined in the northern part of the province within the next year or two, though it is hardly probable that mines will be in operation before the completion of the Grand Trunk Pacific, which would provide facilities for shipment to interior points. Eastern Canadians and London financiers are interested in the British Columbia Anthracite Syndicate, which has large coal land holdings in Groundhog Basin in the Skeena district. This company obtained a charter at the last session of parliament to build a line from Tidewater to their property. A route map has now been filed with outlet for the railway on Portland Canal. Sir Donald Mann has acquired options on coal lands in the same basin, and has filed a route map at Victoria for a line from Stewart to the coal fields. Development of these coal measures on the coast will aid the proposal to establish iron works on the Pacific shore. The iron ore is here, and all that has been wanting is coke at a price low enough to warrant the initiation of the enterprise.

Timber as an investment has been recognized during the past two or three years, and it is realized that it will greatly increase in value during the next five years. That is why a considerable amount of money from Europe has come into British Columbia. Visiting timbermen from the United States are quick to tell what is going to happen for they can see conditions of fifteen or twenty years ago in the middle states being duplicated on the Pacific coast. For that reason, Mr. Hans Dierks, of Kansas City, who was here recently, advises owners to sit tight, for lumber manufacturers will have to come to British Columbia, and this opinion is held by other prominent lumbermen.

READY MADE FARMS FOR NORTHERN ONTARIO

Every old Ontario visitor to New Ontario, with its 20,000,000 acres of splendid agricultural lands and its valuable timber, can and should influence a greater share of immigration to that country. Seeing the possibilities and extolling them, is not sufficient. They should be talked as the salesman talks his goods. The strongest influence, irrespective of politics, should be thrown into the campaign for the development of Northern Ontario. Much has been done to open this vast and resourceful territory for the settler. Much remains to make it attractive to him.

The call of Western Canada is loud, insistent and seductive. Men are trekking there because they know crops can be raised during the first year of their settlement. Northern Ontario lands are covered with a valuable blanket of timber. That has its advantages, but to the immigrant who wants to farm, good soil without a covering makes a strong appeal. That can be obtained in Manitoba, Saskatchewan, Alberta and British Columbia.

With enterprise and full appreciation of the situation, the best combination extant can be offered by Northern Ontario to the incoming settler. Provide for him, at the lowest possible cost the ready made farm — buildings and enough land cleared to raise sufficient crops to feed the farmer and his family, with a small margin. Give him roads, too. Then Ontario will obtain its fair proportion of the stream of immigration from Great Britain and Europe. Add to the ready made farm and roads, the existing and important factors of satisfactory railroad facilities, markets close at hand, excellent soil, timber for building and firewood, and Northern Ontario will be able to offer something which the settler will seriously consider before leaving for the Western prairies. Had Western Canadians by some chance, been allotted this great Northland as their territory, it is safe to say they would have brought it to a far more healthy state of circulation than have the people of old Ontario itself. To those people the country belongs, and they will reap the greatest reward from its development.

Building the Government Railway into Northern Ontario. Mr. J. L. Englehart, chairman, is an enthusiast respecting the possibilities of the Northland.

The crowd that will seek Northern Ontario's Land Offices when ready-made farms are offered to the settler at Low Prices.

UNITED STATES SHIPS EXEMPT.

By a vote of 44 to 11 the United States Senate Wednesday refused to strike from the Panama Canal bill the provision exempting American ships from payment of tolls for passage through the Panama Canal.

DEBENTURES AWARDED.

Invermay, Sask.—\$12,000 5 per cent. 20 instalments, to Messrs. Nay and James, Regina.

Elfron, Sask.—\$10,000 6 per cent. 20 years, to Messrs. Wood, Gundy and Company, Toronto.

McTaggart S.D., Sask.—\$4,000 6 per cent. 20 years, to Messrs. H. O'Hara & Company, Toronto.

Macklin, Sask.—\$5,500 6 per cent. 15 instalments, to Messrs. W. L. McKinnon & Company, Toronto.

North Sydney, N.S.—\$5,000 5 per cent. 30 years, to Messrs. J. C. MacIntosh and Company, Halifax, etc.

COMING BOND ISSUES.

The bonds of the Lake Erie and Northern Railway, reference to which appears elsewhere in this issue, will likely be offered to the public shortly, with a bonus of common stock. The company will have the following securities:

First mortgage 5% bonds	\$1,100,000
Second mortgage 5% bonds	500,000
Common stock	1,500,000

A special meeting of the shareholders of the Transportation Building Company is called for August 22nd, when they will be asked for permission to issue \$1,350,000 6 per cent. first mortgage bonds.

NEW RUSSELL MOTOR FACTORY.

The Russell Motor Car Company are building an addition to their plant, consisting of a four-story machine shop, equipped with the latest machinery for automobile manufacture. The cost of the building will be approximately \$100,000. This increase to the plant of the company will result in the employment of about 200 more skilled workmen, and bring the total number of employees to over 1,200. The company has now completed and occupies its new office building.

The Imperial Drydock Company, of St. John, N.B., have accepted the offer of \$75,000 from Messrs. Norton Griffiths Company, Limited, for their franchise and all other rights.

The Dominion Bridge Company has secured a new charter of incorporation, increasing its capital stock to \$10,000,000. The company is primarily interested in the contract for the Quebec bridge superstructure, which is in the hands of the St. Lawrence Bridge Company.

An approximate estimate of the loss to the Canadian Pacific Railway, the Dominion Coal Company, and the British and Chilian Steamship Company as a result of the collision of the Empress of Britain and steamer Helvetia in the Gulf of St. Lawrence, by which the Helvetia was sunk and the bows of the Empress of Britain were badly battered, is given at nearly three-quarters of a million dollars.

The O'Keefe Brewery Company, Toronto, have obtained authority from the provincial government to increase their capital stock from \$600,000 to \$2,000,000. It is proposed to issue 14,000 shares of new stock of the par value of \$100 each, of which 7,000 shares, when issued, will be common stock and 7,000 preferred stock. The preferred shares of new stock will have a first fixed, preferential dividend of 7 per cent per annum.

BOND ISSUES ARE NUMEROUS THIS YEAR

Survey of the Market During the First Half Year—Many New Features—Temporary Financing Has Been Considerable—Increasing Patronage of Investors

The market for Canada's bonds has been one of unusual interest during the first six months of the current year. Its chief features have been the strength of issues in Canada, the growth of United States buying, the congestion of the London market, the necessity of a large amount of temporary municipal financing, the growing tendency of municipalities to market their issues overseas, and the greater patronage of the average investor.

Bond and debenture issues in Canada since January totalled \$29,721,000. The largest were those of the Montreal Tramways and Power Company, which has issued \$7,000,000 of debentures; \$1,350,000 of short term notes (three years); and \$5,000,000 three-year collateral trust gold notes. All these were purchased by United States bond houses. The Bell Telephone Company sold \$1,750,000 of its 5 per cent. bonds to a Canadian house and a United States firm on joint account. Of that sum, \$750,000 have been issued. Half of the amount was placed in the United States, the other half being absorbed by Canadian investors. The balance of the issue will be placed in the market about the end of September.

Other large bond issues in Canada during the first half year of 1912 were as follows:—

Company.	Amount.
American Sales Book Company, Limited	\$ 500,000
Upper Fraser River (B.C.) Lumber Company....	550,000
Peter Lyall and Sons' Construction Company	1,250,000
Ontario Pulp and Paper Company	1,500,000
Sawyer-Massey, Limited	750,000
Eastern Car Company	1,000,000
Riordon Pulp and Paper Company	750,000
City Realty Investing Company	1,000,000
Ritz-Carlton Hotel	500,000
Canadian Interlake Line	520,000
Dunlop Tire and Rubber Goods, Company	500,000

These issues, with two exceptions of 5 per cent., bore interest at 6 per cent. One issue was made at 95, two at 96, one at 97½, and the remainder at par. A large number of bond issues carried a bonus of common stock.

Purchases by United States Houses.

In addition to the purchase, by United States houses, of the Montreal Tramway securities and, on joint account, with Canada, of Bell Telephone bonds, \$1,000,000 consolidated first mortgage sinking fund 6 per cent. bonds of the Sherwin Williams Company of Canada, were also purchased by a United States firm. In 1910, 1½ per cent. of our total bond issues were sold in the United States, and last year 6½ per cent. The proportion during the current year will be still larger.

The industrial, railway and general bond market has been uniformly active since the beginning of the year. From inquiries made by The Monetary Times, there appear to be few blocks of first class bonds unabsorbed, the majority of issues being rapidly placed and in many cases oversubscribed. The comparatively recent innovation of small denominations has become an important factor in the market and has broadened considerably the bond purchasing field. Another impetus to bond buying has been the tendency of the public to forsake the stony path of highly speculative, and in many cases, worthless stocks, such as those of oil and "paper" mining companies.

The opinion is growing among Eastern financial houses that greater attention should be paid by them to the securities purchasing power of the Western provinces and particularly of the Pacific Coast. Several firms have announced their intention of opening offices in Vancouver and of studying the possibilities of Western Canada as a bond buying area.

Sales of Municipal Bonds.

The domestic municipal market has not exhibited such activity as in the case of the general bond market. This is due to more than one reason. The sales of municipals for the first six months of the current year are \$8,000,000 less than for the corresponding period in 1911, as shown by the following table compiled by The Monetary Times:—

Month.	1911.	1912.
January	\$ 420,337	\$2,133,531
February	1,037,287	2,596,378
March	6,271,925	1,726,716
April	3,910,288	927,160
May	3,946,047	1,028,748
June	3,983,670	1,690,344

\$19,569,554 .. \$11,002,877

The broadest reason for the decline in municipal bond activity is perhaps the slowly changing appetite of the average investor and the improving quality of the average industrial bond. These influences have meant the purchase of securities yielding 6 and 7 per cent. instead of municipals giving a smaller return. On the other hand, there is no lack of appreciation of municipals. They still represent the backbone of the assets of many large financial institutions as well as of private investors. Our life insurance companies at the end of last year, for instance, had \$127,000,000 invested in bonds and debentures, a large proportion of which were municipals. During the last six months of 1911, the life insurance companies purchased more than \$1,000,000 of Canadian municipal securities.

Naturally the increasing number of municipalities which are raising funds in London makes the home market less active. Cities whose requirements would not justify a loan in London a few years ago, have grown so rapidly, as have also their needs, that the London market has become the most attractive, and probably most suitable, for their financing.

Canadian Municipals in London.

This year, as an example, nine of our municipalities have raised funds abroad. They are as follows:—

City of	Amount.
Victoria	£ 308,623
Calgary	500,000
Regina	117,400
Vancouver	991,900
Saskatoon	229,726
Winnipeg	960,000
New Westminster	101,300
Edmonton	595,000
North Vancouver	126,100

Total

£3,939,049

Only one Canadian municipality, the city of Quebec, issued a loan in London in 1905, not one in 1906, and only three in 1907. Since January, 1905, to the end of June, 1912, Canadian municipalities have borrowed £19,174,161, or approximately \$95,870,805.

It is seldom that United States houses bid for our municipals. In July, a Boston firm purchased the block of \$352,700 4 per cent. debentures, maturing in 1945, of the city of Halifax, paying 93.32, which was a good price.

Much Temporary Financing.

The pathway of municipal financing this year has been far from smooth. The congestion of the London market last fall has gradually become more acute until now it is impossible to float overseas a Canadian municipal, or for that matter, any low rate bond, at any price. This fact has undoubtedly led many cities, which refused early in the year to take expert advice and accept what were then good offers, to regret their shortsighted action.

In view of these facts, a great deal of temporary financing has been arranged. Only in a few cases have details been made public. Our banks know best what large aggregate loans are being carried by them for municipalities which await a turn for the better in the London market. Of the numerous temporary loans made during the past six months, the following have been tabulated by The Monetary Times:

City.	Amount.	Loan.
Toronto	£1,200,000	One year bills 4½ per cent.
Montreal	750,000	Six months 4½ per cent.
Prince Rupert	200,000	Three year notes 5 per cent.
*Moose Jaw	266,748	Treasury notes
Alberta (province)	1,500,000	Six months treasury bills 4½ per cent.
Quebec	160,000	Six months notes 3¾ per cent.
Victoria	320,000	3 15/16 to 4¾

*Negotiations still proceeding.

Alberta's High-Priced Action.

When the province of Alberta placed its six months treasury bills through a London bank at 4½ per cent. it was predicted that such a remarkable figure would penalize every province and city borrowing in London on similar security for temporary accommodation. That has proved correct. At the same time, six months bills of two Canadian cities and

one Western suburban city, whose identity is unknown, were simultaneously placed at 3½ per cent. The city of Victoria placed £322,000 treasury notes in London at this time. Notes aggregating £500,000 were offered and probably would have been able to sell the entire amount had it not been for the action of the province of Alberta. The city's fiscal agents refused to pay such a high rate of interest as that agreed to by Alberta. The Victoria loan was raised at a rate of interest ranging from 3 15/16 to 4¼ per cent. It was necessary for the city to take some action in disposing of either notes or debentures as they were carrying a considerable overdraft with their bank.

It is unnecessary here to enlarge upon the congested state of the London market, not only for Canadian securities but for almost all issues. The congestion, however, applies largely to municipals and government guaranteed loans. Despite the conditions, Canadian borrowings in London for the first six months of the current year have been almost as large as for the corresponding period last year, as the following table, compiled by The Monetary Times, shows:

January to June.	Amount.
1911	£22,299,597
1912	21,654,201

Left With the Underwriters.

A considerable portion of the £21,000,000 of Canadian securities floated in London this year is still on the underwriters' hands. An idea of the situation in that respect may be gathered from the following table showing the result of several issues:

Issue.	Percentage left with Underwriters.
St. John & Quebec Railway	95
Robert Simpson Company	90
Algoma Steel Corporation	93
Canadian Northern Railway	64
City of Edmonton	82
City of Calgary	85

Some issues met with even a poorer reception than those noted above. In an uncongested market those figures might not have such serious significance as they actually possess. The fact that a large proportion is left with the underwriters means that they are responsible for its disposition, which in an easy market is not necessarily a difficult matter. But there are many millions of securities remaining unabsorbed in the overseas market and every new issue has only tended to make the situation worse. The underwriters cannot possibly place them and conditions in the fall are not likely to improve.

Had to Increase Commission.

Many recent borrowers in London, notably Newfoundland and the city of Edmonton, had to increase the underwriting commission from 1 to 1½ per cent. in order to induce the market to guarantee the issues. Such a policy could not long continue, as the knowledge that such high terms were offered tended to restrain the public from subscribing, investors knowing that they would be able later to buy the securities at a discount.

Our governments have done little financing this year. Ontario in April placed provincial loans of \$2,000,000 and \$210,000 4 per cent. bonds on the Canadian market. These are gradually being absorbed in Canada and the United States. Honorable A. J. Matheson, the provincial treasurer of Ontario, during his recent visit to London, examined money market conditions with a view to placing the remainder of the \$5,000,000 loan to be raised for Northern Ontario development. The first \$1,000,000 was secured some time ago through a bank and it is expected that the rest will be placed as soon as the market improves.

The Quebec provincial government for the first time in the history of the province is able to meet its loan obligations from revenue sources. The accruing payments of the loan of 1886 are being met in that way. The Dominion Government will probably pay off the 4 per cent. loan of \$7,300,000 negotiated in 1907, and which falls due on October 1st.

The following changes have taken place in the staff of the Metropolitan Bank:—Mr. H. L. Enman, manager of the Parkdale branch, Toronto, has been appointed manager of the branch at Queen and McCaul Streets, Toronto, succeeding Mr. E. B. MacKenzie, who recently assumed charge of the bank's new branch in Hamilton; and Mr. W. A. Stratton has been appointed manager of the Parkdale branch.

Conditions have become so bad that one line of steamships have been taken off the Great Lakes and Montreal trade entirely since July 2nd. These are the boats of the Great Lakes and St. Lawrence Transportation Company. This was done only after the Wallace, Keefe and Davidson boats, of their fleet, had lost a total of 27 days waiting to unload their cargoes of grain at Montreal, at a loss of \$135 per day, a total of \$3,645.

PROGRESS IN NEW BRUNSWICK

Natural Resources Being Utilized and Developed— Industrial World Active

(Special Correspondence).

St. John, N.B., August 5th.

There is continued activity in business of all kinds in New Brunswick, and an active demand for labor. The conditions are such that this demand will increase instead of diminish during the next year or two, as the development of oil shales in Alberta County proceeds, and the natural gas in the same county is utilized, the coal output in Queen's and Sunbury counties developed, and the pulp and paper industry increases.

Sir William Van Horne, Hon. William Pugsley, Colonel McLean, M.P., H. A. Powell, K.C., and A. J. Gregory, K.C., held a conference in St. Andrews last week in relation to a pulp and paper proposition. While no detailed information was given out, it is announced that these gentlemen represent interests connected with the development of the power of the Grand Falls on the St. John River. Premier Flemming said quite recently that he expected to see pulp and paper mills in operation at Grand Falls within three years. He said further that he expected to see pulp and paper mills established at B. Thurst, in Gloucester County. The Partington Pulp and Paper Company of St. John are having a survey made of their timber areas on the Nashwaak.

High Freight Rate for Lumber.

The lumber exports from St. John to the United Kingdom are the smallest for some years. The chief reason is the very high rate of ocean freights, which are around fifty shillings compared with a former rate of thirty-two shillings. The manufacturers are converting as much as possible of their product into lumber suitable for the American market, where there is a much better demand than usual; and deals for the British market are being stored to await lower freights or higher prices.

Many industries and over two hundred houses are using at the present time natural gas at Moncton. The town anticipates considerable industrial expansion as a result of the introduction of natural gas. The gas has also been piped to Hillsboro for the big plant of the Albert Manufacturing Company, in its plaster mills, and for use in the homes of the people.

Industrial Schemes and Announcements.

The Canadian Pacific Railway Company has awarded the contract for a million-bushel elevator at West St. John, to be built of reinforced concrete at a cost of about half a million dollars. A large steel industry will be established at Courtenay Bay near the great dry dock, for which excavation has been begun by the Norton Griffiths Company. A plan is being considered by the city council and board of trade by which at a cost of a million and a quarter some 90 acres could be reclaimed from the tide at the extreme south end of the city, next to the site of the proposed sugar refinery, and could be utilized as a site for many new industries having deep water wharves round them.

The iron foundries at Woodstock and Chatham have been amalgamated and the business in future will be conducted by the Maritime Foundry Company at Chatham.

New Companies' Plans.

The New Brunswick Lime and Cement Company, with \$500,000 capital is being organized. It has purchased the property at Greenhead, near St. John, and is having it cleared up and will begin manufacturing lime and probably cement. There will be a great demand for cement in connection with the Courtenay Bay works, and the company hopes to find a large local market.

A plan is proposed to divide docks at what is called the Ledge on the St. Croix River, a short distance below St. Stephen. A company called the St. Croix Docks Company, Limited, with \$49,900 capital has been organized to promote this project.

The Millerton Extract Company, Limited, with \$98,000 capital is seeking incorporation to carry on business at Millerton, New Brunswick. The old tanning extract company at that place, which got into financial difficulties, has paid off all its liabilities.—W. E. A.

The railway commission has ordered that the construction of the bridge over the Second Narrows to connect Vancouver with North Vancouver must be commenced within 30 days of the approval of the plans. The scheme is backed by all surrounding municipalities and will be erected by the Burrard Bridge and Tunnel Company at a cost of two million dollars.

NEW INCORPORATIONS.

Large Number of New Concerns Have Obtained Provincial or Federal Charters

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Rossland, B.C.—D. Thomas, Limited, \$20,000.

Upper Bonnington, B.C.—Bonnington Falls Orchard, Limited, \$100,000.

Victoria, B.C.—Gold Plate Mines, Limited, \$250,000. Mitchell Innes, Limited, \$30,000.

Welland, Ont.—Morwoods, Limited, \$40,000. O. H. King, A. J. Wise, and E. M. Rowland.

Beloeil, Que.—Beloeil Lumber Company, \$100,000. F. X. Delage, A. Rioux P. Lemieux, Beloeil.

Queenston, Ont.—The Auburn Nurseries, Limited, \$150,000. W. O. Burgess, A. H. Burgess, and H. L. Cummings.

Hull, Que.—The Hull and Ottawa Garage Company, \$40,000. J. Fortin, C. G. Gravelle, and V. P. Ledur, Hull.

Haileybury, Ont.—Gordon-Davies, \$250,000. M. H. Robertson, V. E. Gray, and M. K. Lennox, Toronto.

Toronto, Ont.—York Publishing Company, \$50,000. L. M. Coulter, D. M. Anderson, and H. B. Anderson, Toronto.

Hamilton, Ont.—Canada Steel Goods Company, \$600,000. A. F. Hatch, W. W. Stewart, G. E. McLachlan, Hamilton.

Orono, Ont.—Orono Telephone Company, Limited, \$5,250. H. Souch, C. Smith, N. Colville, G. Cain, and S. D. Souch.

Lachine, Que.—Dominion Bridge Company, \$250,000. A. J. Brown, G. H. A. Montgomery, and W. R. L. Shanks, Montreal.

Three Rivers, Que.—Maple Grove Sugar Company, \$5,000. A. Brunelle, C. Raymond, Chs. Tessier, Sainte Anne de la Perade.

Sault Ste. Marie, Ont.—Gamble-Robinson Fruit Company, Limited, \$40,000. R. A. Gamble, H. L. Robinson, and E. C. Duncan.

St. Jean, Que.—North America Jewelry Company, \$50,000. J. P. Meunier, St. Jean; C. H. Mailbiot, Iberville; P. Trahan, St. Jean.

Berlin, Ont.—The W. E. Woelfe Shoe Company, Limited, \$40,000. W. E. Woelfe, A. A. Armbrush, H. J. Sims, L. M. M. Woelfe, and M. Martin.

Fort William, Ont.—Silver Islet Mining Company, Limited, \$500,000. J. C. Swinburne, H. L. Palmer, J. C. Mathe-son, G. Ruberry, and E. A. Moore.

Emo, Ont.—The Emo Iron Mine and Development Company, Limited, \$200,000. J. H. McDonald, H. T. Hunter, E. W. Wright, E. M. Gardiner, and E. Graeb.

Kelowna, B.C.—McKenzie Company, Limited, \$50,000. South Kelowna Irrigation Company, Limited, \$50,000. Nanajmo Pressed Brick and Terra Cotta Company, Limited, \$100,000.

Hamilton, Ont.—Dominion Theatres, Limited, \$150,000. E. R. Marshall, J. S. Marshall, E. D. Marshall, L. F. Stephens, and H. L. Lees. Stanley Heights, Limited, \$40,000. C. S. Walters, L. F. Stephens, and T. H. Crompton.

Winnipeg, Man.—Associated Builders' Finance Company, \$100,000. W. P. Alsip, H. H. Pigott, R. J. Kennedy, Winnipeg. Overseas Development Corporation, \$40,000. J. W. Sifton, J. F. Wallar, and A. C. Gray, Winnipeg. The Winnipeg Baseball Association, \$10,000. J. Erzinger, A. M. Blackburn, and T. Montgomery, Winnipeg.

Vancouver, B.C.—A. F. Calhoun, \$100,000. Hoy and Sons, Limited, \$50,000. Boston Shoe Store, Limited, \$25,000. Lynn Creek Zinc Mines, Limited, \$2,000,000. Lulu Shingle Company, Limited, \$10,000. North West Securities Corporation, Limited, \$100,000. Port Moody Investments, Limited, \$60,000. Richlands Irrigation and Development Company, Limited, \$25,000. Richlands Orchard Company, Limited, \$250,000. Carl Pitner and Company, Limited, \$5,000. Ardley Land Company, Limited, \$75,000. Briggs Canadian Finance Company, Limited, \$100,000. British Columbia Valleys, Limited, \$10,000. Canadian Any Lite Company, Limited, \$250,000.

Toronto, Ont.—Burleigh Ranching Company, Limited, \$50,000. R. C. Strickland, J. R. Crawford, E. Pullen, and W. Vickers. Worthington-Rowe, Lumber and Development Company, Limited, \$100,000. G. J. Rowe, M. Rowe, and P. Charlebois. British Land Company, Limited, \$40,000. W. S. Dinnick, G. M. Wright, and R. M. Walton. Central Garage and Supply Company, Limited, \$150,000. R. B.

Haley, E. S. Beynon, and R. J. Haley. The International Chinese Club. Jung Ling, Lee Suey, Lee Tan, Jung Yuen, and C. Lee Gue. The Ontario Retail Grocers' Association. D. W. Clark, J. Diprose, J. Main, W. J. Mellen, W. C. Miller, and T. Shaw. Anchorite Mining Company, Limited, \$250,000. S. S. Cuddy, W. H. Cliphsham, and M. L. Chambers. The Chatham Land Company, Limited, \$40,000. C. L. Hawley, F. J. O'Leary, and L. Le Vasseur. North Toronto Lawn Bowling Club. E. B. Stockdale, C. N. Kerr, F. W. Arnold, J. Logie, J. P. Patterson, A. J. Brown, D. D. Reid, P. B. Rapp, A. Bryce, J. W. Brownlove, A. J. Walker, and H. S. Jones. Brookfield Athletic Club. T. J. McNichol, J. W. Courtenay, and H. C. McNichol. The Rapids Power Company, Limited, \$200,000. W. G. Thurston, E. W. Boyd, and J. L. Sharkey.

Montreal, Que.—The Franco-Belgian Investment Company, \$100,000. H. Robitaille, C. O. Lacroix, A. P. Mathieu. South Longueuil Lands Corporation, \$100,000. H. J. Elliott, L. A. David, G. L. Alexander, Montreal. Cais and Company, \$99,000. H. J. Elliott, L. A. David, G. L. Alexander, Montreal. The Scala Theatre Company, \$50,000. L. Macfarlane, G. Barclay, and W. B. Scott, Montreal. B. F. Sturevant Company, \$50,000. W. R. Lorimer Shanks, F. G. Bush, and G. R. Drennan, Montreal. North British Securities, \$25,000. A. E. Rollit, W. E. Gilby, and G. S. McFadden, Montreal. The Fire Prevention Company, \$50,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan, Montreal. Goulds Pump Company, \$50,000. W. R. L. Shanks, F. G. Bush, and F. R. Drennan, Montreal. Montreal Cafetarias, \$50,000. W. F. Empay, A. R. McMaster, and W. J. S. McMaster, Westmount. Le Louvre de Paris, \$10,000. J. P. A. Des Trois-Maisons, J. A. L'Heureux, and H. Gingras, Montreal. The National Loan and Realty Company, \$50,000. A. Smith, D. Boulanger, and L. J. Foisy, Montreal. Ph. Morin, P. Morin, C. Coutre, A. Blanchet, Montreal, \$20,000. The Clubmen Manufacturing Tobacco Company, \$10,000. J. H. Bearegard, L. A. Lacombe, J. B. St. Pierre, Montreal.

Unclaimed balances in Canadian banks total \$676,147, unclaimed dividends \$3,659, and drafts or bills of exchange of \$49,851.

Growing of tobacco in the Kelowna district of British Columbia has been successful this year. About 100 acres are in cultivation at the central plantation, and next year the acreage will be largely increased.

At the request of the Canadian Manufacturers' Association the Dominion post-office department will issue stamps in one and two cent denominations in rolls of five hundred. An extra charge of six cents will be made to cover cost of manufacture.

Applications have been made to list on the London Stock Exchange Hudson Bay Company 200,000 five per cent. preference share of £5 each; Anglo-Canadian Finance Company, 200,000 shares of 10s. each, and Toronto Power Company 800,000 sterling four and halves.

New capital stock to the amount of one million dollars will be issued by the Bank of Nova Scotia at 240 to shareholders on record July 31st. The reason for the new issue is the increasing business of the bank, and the fact that the circulation is now up to the limit allowed by law.

At the next meeting of the municipal councils of South Vancouver, Point Grey, Burnaby and Richmond, the joint harbor committee of the boards of trade of these districts, will ask the councillors to co-operate with the boards in securing a government commission to control the construction and administration of a joint harbor for the North Arm of the Fraser River.

That it is illegal to insure a ship beyond its real value is the decision in a dispute successfully contested in the English courts by Lloyds. The case is that of the British Standard, which was lost in May, 1910, while on a voyage from Cardiff to Rio De Janeiro with coal after coming in contact with some submerged obstruction. To prevent the wreck from becoming a danger to navigation, the master took steps to cause the vessel to sink. It was said, at the Board of Trade enquiry, that the steamer had either been scuttled or prematurely abandoned, but the matter has since come before the courts, where the judge stated that the insurance company had not proved that the ship could have been saved. But it transpires that, in addition to the insurance policies taken out with certain companies, sufficiently covering the value of the vessel and cargo, together with disbursements, she was also insured through the "Clubs" which exist for that purpose. The judge maintained that this was a serious matter, and the court, after going into all the details, expressed the opinion that there was over insurance to the extent of about £6,000. Thus the principle has been established that all policies taken out with underwriters are rendered void by the concealment from them of over-insurance.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Crewe, Ont.—August 3.—Mr. J. Culbert's barn. Loss unknown. Origin, lightning.

Amherst, N.S.—June 29.—Robb Engineering Works. Loss, \$20,000. Origin unknown.

Irvine, Alta.—July 29.—Great West Hotel. Loss, \$20,000. Origin, explosion of gasoline lamp.

London, Ont.—August 2.—Hospital for the insane damaged. Loss, \$300. Origin, defective wiring.

Vancouver, B.C.—August 2.—Max Freed Furniture Company's premises. Loss, \$70,000. Origin, unknown.

Milverton, Ont.—August 5.—Public School. Loss, \$9,000, with about \$5,000 insurance. Origin unknown.

Toronto, Ont.—August 4.—Canadian Pacific Railway sleeping car. Loss unknown. Origin, lighted gasoline.

Medicine Hat, Alta.—July 30.—Medicine Hat garage. Loss unknown. Origin, a small gasoline tank caught fire.

Wyoming, Ont.—August 2.—Reeve Wilson's farm dwelling. Loss unknown. No insurance. Origin, supposed incendiary.

Toronto, Ont.—August 5.—Mr. J. Trollope, 177 Dundas Street, automobile and rear of 291 Arthur Street. Loss on automobile unknown; other premises, \$460. Origin, can of gasoline ignited.

Otonabee, Ont.—July 30.—Mr. T. Armstrong's barns. Loss, \$2,000, insured with Anglo Saxon Company. Origin, arson. The culprit, P. Doherty, was sentenced to 15 years in Kingston Penitentiary.

Woodstock, Ont.—July 27.—95 Chapel Street owned by Mr. Mitchell, 64 Wilson Street. Loss, building \$28, contents \$50. Insurance, building \$800, with Waterloo Mutual. Origin, match ignited when stepped on.

Fort William, Ont.—August 1.—Mr. J. R. Gillespie's drug store, owned by Mr. J. Enzer. Loss, \$40. Insurance, stock \$4,000, building \$2,000. Origin, boy lit match over wood alcohol barrel. August 3.—Two boat houses and gasoline launches (1 owned by Mr. Ross, Myles Street) destroyed. Loss each, launch \$600, house \$100. Canadian Pacific Railway officials' launch and house slightly damaged. Origin, from smoking in Mr. Ross' launch.

Hamilton, Ont.—July 28.—Dominion House Furnishing Company, 118-120 James Street, owned by Mr. M. Epstein. Loss, building \$55, stock \$46. Insurance, buildings \$6,000, stock \$8,000, total \$14,000, with the following companies:—German-American, Liverpool, London and Globe, Fidelity, Underwriters, Perth Mutual, North British Mercantile. Origin, electric current by switch being left on in elevator. August 1.—Frame building, owned by Mr. A. Mercer, 18 Grant Avenue. Loss, \$400. Insurance, \$1,000, with Hartford Fire Insurance Company. Origin, supposed incendiary. August 2.—Mr. A. Mutter's residence, 29 Erie Avenue. Loss and origin unknown.

Montreal, Que.—August 1.—Montreal Abattoirs, Limited, premises. Loss estimated \$200,000. Origin, overheated insulation on the walls. That there was insurance to the extent of \$250,000 was stated by Mr. Daniel Brogan, secretary-treasurer of the company, though of this there was only \$35,000 on the building and machinery in question and \$45,000 on stock. Following were the companies with amount of insurance held:—Liverpool and London and Globe, \$42,500; Guardian, \$15,000; Phoenix, London, \$12,500; North American, \$12,500; Northern, \$11,250; Union, \$11,250; Norwich Union, \$10,000; Factories, \$10,000; L'Union, \$10,000; New York Underwriters, \$10,000; Hartford, \$10,000; Fidelity-Phoenix, \$10,000; Continental, \$10,000; Royal Exchange, \$8,750; Providence, Washington, \$7,500; Law, Union and Rock, \$7,500; Quebec, \$7,500; Employers' Liability, \$7,500; Caledonian, \$6,250; General, \$5,000; North British and Mercantile, \$6,250; London, \$5,000; Fidelity Fire Underwriters, \$5,000; Mount Royal, \$5,000; Scottish Union and National, \$5,000; Connecticut, \$5,000; Acadia, \$3,750; St. Paul, \$3,750; German-American, \$3,750; Pacific, \$2,500. The amount of damages was not declared, as it was stated this had not yet been assessed. July 31.—Messrs. Galarneau and Gareau's stable, 927 Colonial Avenue. Loss, \$2,000.

At a meeting of the tanners' section of the Canadian Manufacturers' Association, held in the board of trade building, Montreal, it was decided to advance the price of leather ten per cent.

Mr. E. M. Trowen, secretary of the Ontario Retail Merchants' Association, asked Sir William Meredith, the Commissioner who is investigating the subject of workmen's compensation for the Ontario government, to leave the retail merchants out of any scheme he might recommend to the government.

ADDITIONAL INFORMATION CONCERNING RECENT FIRES

Little Branch.—Mr. J. S. Finno's residence. Loss, \$1,000. No insurance.

Morse, Sask.—Messrs. Trail and McDonald. Loss, building \$3,000, stock \$500. Insurance \$2,500, Ontario Fire Insurance Company.

Dundas, Ont.—Messrs. Jones Brothers' factory, store room. Loss, stock \$5,200, building \$1,400, insurance \$6,600. Origin unknown.

Longue Pointe, Que.—Notre Dame des Victories. Loss, building \$5,000, contents \$3,711. Insurance with Mount Royal, \$2,000. Des Fabriques, \$3,000.

Amherst, N.S.—Mr. H. Hansen's barn, owned by Mrs. M. S. Bent. Loss, building \$165. Insured with National Fire Insurance Company. Horse valued at \$100 was burnt. Origin unknown.

Peterborough, Ont.—Messrs. J. J. Turner and Sons. Loss, stock \$250, buildings \$45. Insured with the following companies:—Atlas, British America, Western, Perth Mutual, Traders, Monarch, Wellington, Economical, Rimouski, Merchants, Law Union and Rock.

Louisville, Que.—Tourville Lumber Mills Company, mill and contents. Loss, building and machinery, \$75,000; stock, \$1,600. Insured in the following companies:—On mill and machinery: Royal Insurance Company, \$10,000; Guardian Assurance Company, \$7,500; North British and Mercantile, \$5,000; National Union Fire Insurance Company, \$10,000; Insurance Company of North America, \$2,500; total, \$35,000. On lumber: Royal Insurance Company, \$25,000; Liverpool and London and Globe, \$30,000; Guardian Assurance Company, \$10,000; North British and Mercantile, \$10,000; Insurance Company of North America, \$5,000; total, \$80,000. Origin unknown.

The Canadian Fairbanks-Morse Company have increased their capital by the issue of \$1,000,000 of preferred stock. The company will increase its Toronto plant by the erection of a new factory, and make other extensions.

FIRE HAZARDS

Cannot Easily be Really Ascertained—Companies Show Earnest Disposition to Save All That is Possible for Policyholders

At the close of the last century twenty-two companies in all had been formed in the United States. We can imagine that gradually, as the business extended, manufacturing risks and specially hazardous risks came to be separated and cautiously insured, said Mr. H. W. Eaton, manager of the Liverpool, London and Globe Insurance Company, in an address recently at New York, but even then at rates which could not actually measure the hazard. The early fire companies may, indeed, in the first instance have established a uniform rate for all class of manufacturing risks, trusting in time to gather, from their experience of losses, such information as would lead them to discriminate between the different hazards. Gradually different rates, designed to provide for the loss, for the expense of conducting the business and for a profit, were placed on trial.

The fire hazard cannot in this day be really ascertained, nor can elaborate fire statistics and recorded experience of offices enable us to accurately adjust rates; moreover, in the case of manufacturing risks especially, the very change in processes from year to year would render comparatively useless statistics of any but recent periods. The losses affecting particular hazards, due to fires beginning in hazards of a different class, furnish a difficulty in loss classification not yet adequately dealt with by the fire underwriter.

Conflagrations Disturbing to Loss Classifications.

And this difficulty is intensified—as you can well understand—in the case of conflagrations, which are utterly disturbing to loss classification. Could we disregard calamities of the kind as something exceptional, our task would be made easier, but we know from painful object lessons that every rate must be loaded with some fraction designed to provide accumulations in favorable years, and so gradually form a safety fund for emergencies of the kind. Were the companies merely to build up a rate designed to cover the losses to be expected in ordinary years, in addition to justifiable expenses, and a modest profit, then in the hour of danger, when the insured property owner called for a protection so plainly promised in his policy of insurance, we would surely be denounced—and justly—as traitors to our trust. And yet, such an addition to the rate as I have indicated as so needful for the protection of the insured is, and has for years been, denounced as an act of extortion to be penalized in various ways by acts of the legislatures rendering less possible, or impossible, organization of companies for this and other purposes which it can be demonstrated has benefited, and is benefiting, the interests of the insuring public.

Fixed Rates for Selected Classes.

For selected risks of various classes the underwriter has fixed rates deemed for the time being adequate to the hazard, rejecting those deemed either uninsurable or undesirable at rates the assured has shown a willingness to pay. The rates named by underwriters upon approved risks of a general class have sometimes been uniform, and whilst many hazards embraced in such a class have occasionally really differed from one another in some degree, the underwriter has not always found it practicable to recognize the distinction. This has brought upon underwriters the charge of discrimination. For this we have had to answer, and, in the general impossibility of measuring hazards of continually varying quantity, the underwriters are likely to have to answer to the ignorant for ages to come.

In the earlier days of fire insurance the underwriter was prepared with rates for risks as they stood, without suggestion to the assured of improvement by which such rates could be reduced. As time proceeded, the fire underwriter was no longer willing to take each risk as he found it, and to fix a rate deemed to be adequate. He was concerned to suggest to the property owner methods by which, in the case of buildings about to be erected, changes in the plans could be made in character of building materials, in separation of processes, in use of fire protection devices, in protection of window and other openings, in limitation of areas, and in isolation of buildings, whereby the risk of fire occurring could be diminished and chances of extension reduced. And, in like manner, the underwriter became willing to investigate—often at considerable expense—the character and lay-out of buildings already in existence, and to show in what manner alterations could be made to diminish the fire hazard.

To Save Policyholders all that is Possible.

In the case of every improvement so made, the underwriter was willing, and indeed anxious, to make allowances in rate designed to encourage the changes recommended. In the year 1890, in order to satisfy the particular desires of a

number of manufacturers who preferred the stock to the mutual principle of insurance, the Factory Insurance Association was formed, and has carried on, with high marks of appreciation on the part of its customers, a system of insurance relating to standard risks of high character, associated with a periodical and efficient inspection, whereby rates have been brought down to a very low level of cost. And in this, as well as in all other methods of rating adopted in recent years, evidence is surely found, not of a disposition on the part of the insurance companies to afflict the insuring public with extravagant and unjustifiable rates, but of an earnest disposition to save policyholders all that is possible with the aid of trained service in matters of fire prevention and extinguishment.

Co-operation of Companies is Desirable.

To accomplish such results, and to do our full duty to the insuring public, co-operation on the part of the companies is desirable and, indeed, indispensable. We will sum up the elements of co-operation:—

1. The establishment and maintenance of systems of inspection against dangerous conditions, such as the inspection of premises by experts for the purpose of discovery and correction of ill-constructed flues, bad systems of electrical and gas installation, use of improper receptacles for ashes, accumulation of rubbish and the dangerous storage of oils and combustibles.

2. The proper maintenance of fire protection devices of various kinds, such as automatic sprinklers, fire alarm telegraphs and hand fire extinguishers and the continued efficiency of fire doors and shutters.

3. The elaborate and systematic examination of buildings and processes carried on therein, with particulars of adjoining hazards, to the end that information may be obtained by which one risk can be measured with another and differences be justified.

Rates Adjusted From Time to Time.

4. The establishment of some system by which rates once made may be varied from time to time by reason of changes in hazard, and that such variations may be uniform and be justified, and that, concession having been made in rates as the price of heavy outlay for extinguishing appliances and other expenditures on the part of the insured, the latter may have reasonable guarantees that such concessions may be continued for at least the full term to be expected by the nature of such expenditure.

5. The premium to be paid by the assured being based on the loss cost and a reasonable charge for expenses, that co-operation may be secured by which such expenses, including rates of brokerage and commission, may be kept within proper bounds.

6. That changes in the organization and equipment of fire departments may be recommended, and, as far as possible, enforced; that improved water supplies and methods of distribution may be encouraged; that better building laws may be brought about, including prohibitions of shingle roofs in new construction, and provisions against maintenance where existing; that municipal regulations may be made or improved regarding the storage of combustibles; that merchandise in public storage stores may be kept separated, such as fibre from non-fibre, and generally that municipal authorities be stimulated to make changes to reduce the fire waste and risk on conflagration.

7. That organized systems of protection to property from damage at fires may be established and maintained, by which such property may be either removed or protected from damage by water.

Passage of Fire Marshal Laws Encouraged.

8. That the passage of fire marshal laws may be encouraged whereby States may make critical examination as to the origin of every fire.

9. That a fund may be maintained for the conviction and incarceration of incendiaries.

Every one of the subjects of action by underwriters above set forth are really designed in the interests of the public to lessen the fire waste and render the cost of fire insurance cheaper to the insuring public. You have been already told that the loss cost furnishes the basis for the charges made for fire insurance, and if the fire underwriter were content to take each risk as he finds it, and be unconcerned as to elements entering into the fire hazard, then surely rates for fire insurance would soar so high as to be a matter of great national concern. If in what has been done you will believe that the fire underwriter has gone to considerable lengths in an endeavor to reduce the fire waste, then his work will be worthy of your commendation.

The capital stock of the Sidney Brick and Tile Company, Limited, has been increased from \$50,000 to \$200,000 by the issue of 1,500 shares of new stock of the par value of \$100 each.

STATE INSURANCE IN WISCONSIN

Rate of Premium Somewhat Lower Than Private Companies—May Stimulate Better Understanding of the Business Among the People

Wisconsin is to have government insurance beginning next month. "The law," says Insurance Commissioner Ekern, of that state, "provides for life insurance and annuities on a basis that is absolutely safe. It uses the same assumptions for death claims and for interest earnings as the safest American old line insurance companies."

The rate of premiums would probably not be much lower than those of private insurance companies, but the security would doubtless be considered better. The liability of the state, however, is not to be beyond the amount of money contained in the insurance fund. This fund, of course, will be derived from premiums, interest, earnings and similar sources.

Four Kinds of Policies.

At the outset four different kinds of policies will be issued. They will be whole or ordinary life, twenty payment endowment, ten payment endowment and term to age of 65 years. Later a system of annuities will be offered. The annuities will begin when the beneficiaries reach the age of 65 years. No annuity can exceed \$300 a year.

The law provides that policies shall be issued to persons between the ages of 20 and 50 years. Life insurance is to be granted in years of \$500 or multiples thereof, but no person will be permitted to carry more than \$3,000.

The premiums for life insurance are to be based on the American experience table of mortality, with additions for extra hazards, interest at three per cent., and additions for expenses and contingencies amounting to \$2 a year per \$1,000 of insurance and one-sixth of the value of the insurance distributed equally through the premium payments.

Many inquiries regarding the cost of the insurance and time when the system will be put in operation have been received by the insurance commissioner, but no applications will be accepted until the system is put in force. Commissioner Ekern believes that the number of persons who will take out state insurance will run into the thousands, and policies will probably be issued in September.

Medical Examination of Applicants.

Each applicant must be examined by a physician under the direction of the state board of health. The application must be accompanied by a premium for at least three months, and by a medical examination fee of \$2. The state insurance commissioner and the state board of health are to pass on all applications for insurance, and their decisions are to be final. If the application is rejected the deposit is returned, less the medical examination fee and fees paid for making out the application and remitting the premium.

The life fund will operate with a reserve on the same plan as the present old line insurance companies. Loans may be made on a policy to an amount, which together with interest at six per cent. per annum shall not exceed the reserve.

On the non-payment of a premium the sum is to be charged as a loan against the policy as long as the reserve is sufficient. The whole or any part of a loan may be paid by the insured or other interested person at any time. The policy may be surrendered for cash on any anniversary after six months' notice in writing.

Commissioner Ekern said that he expected the state insurance system would prove highly successful, and would not only not injure the business of private insurance companies, but would stimulate it, because of a better understanding of the science of insurance among the people generally.

What Life Men Say.

Interviewed respecting the forthcoming state system, President Dunham, of the Travelers, said that the state of Wisconsin going into the life insurance business would not make any material difference with the Travelers' business in that state. The laws there have been radical some two or three years, but the Travelers has complied with them and continued to do business. The state scheme does not intend to issue policies for more than \$3,000 to any one person, and its competition will not be any more serious than that of any insurance company, and besides the state insurance does not have solicitors. Vice-President English, of the Aetna Life, said that, although the Wisconsin laws have been onerous for a few years, and have entailed a lot of extra work for the company, the Aetna has continued to do its insurance business there, where it has a number of policies in the rural communities for moderate amounts on each policy. Mr. English did not think the state insurance as offered by Wisconsin is particularly attractive, as the state's liability for death losses does not go beyond the amount of the premiums

received. He does not consider that the state in the business of insurance is going to be able to conduct life insurance at much less rates, and certainly not on any better security than the old line companies. Vice-President Robinson, of the Connecticut Mutual Life, said that his company got out of Wisconsin some time ago, but he thinks the state about as good a place as any to try the experiment of state life insurance, regarding the success of which Mr. Robinson has his doubts.

OUR MINISTER OF TRADE WILL BE BUSY.

Hon. George E. Foster, who has returned to Ottawa from England, will go to Australia in February to complete negotiations for a preferential trade treaty. Mr. Foster will be absent from Canada most of next session as he sails again for England in October to take part in the sittings of the Imperial Trade Commission which will last until December. In February he goes to Australia, and on March 1st the commission will meet in New Zealand, thence going to Australia. After Australia the commission will either sit in South Africa or Canada. The sittings Mr. Foster attended in London were principally preparatory. They made arrangements for collecting statistics on the Empire's resources, production, trade, etc. After the hearings are held in all the colonies the commission will meet in England to prepare their report.

"The undertaking," remarked Mr. Foster in an interview, "is a tremendous one. Since the commission met the question of emigration from the United Kingdom to the colonies has been added to the work of the commission. They will make inquiries into the whole question and make recommendations to avoid overlapping of work and to induce co-operation as to agencies. The commission will also inquire as to methods of transporting and distributing those leaving the Motherland for the colonies. It will add materially to the work of the commission."

"I noticed," he added, "a very decided change in public opinion in the United Kingdom. The importance of the overseas Dominions has become more fully realized. Great Britain appreciates the wonderful resources of the colonies and the rich fields for development in Canada, Australia and South Africa. It is realized that they are now important factors in the Empire's future, and there is a strong sentiment in favor of co-operation with the overseas Dominions in working out the Empire's destiny. The feeling that the colonies are weak and unimportant is gone."

GOVERNMENT ACCIDENT INSURANCE IN NEW ZEALAND.

Besides life insurance the Government Insurance Department of New Zealand carries on the business of accident insurance. The official report for the year 1910 has recently come to hand. Mr. J. H. Richardson, the Government Insurance Commissioner, reports as follows:—

"The premium income amounted to £21,364, as against £26,337 in 1909, a decrease of £4,973. The business for 1909 was swelled by a large number of mining risks having been placed with the Department for reasons mentioned in my last report, but as there anticipated, much of this business has now reverted to the companies which formerly held it.

"The income from interest was £2,544, an increase of £365 on that for the previous year.

"The claims (including those in course of settlement at the close of the year) amounted to £12,522. Since commencing business on the 7th June, 1901, the sum of £108,631 has been paid by the branch in compensation for accidents.

"The total expenses (including taxes and commission) were £6,620, as against £7,182 in the previous year.

"The financial position is most satisfactory, but the changes that are made from time to time in the legislation regarding compensation to workmen, which constitutes the chief business of the branch, render it difficult to get the premiums on a scientific basis, and, with the exception of those for the more important industries, they are still in a more or less experimental stage. The position is also complicated owing to the fact that the intense competition obtaining in the business has in several important trades occasioned the reduction of the rates to a basis that is unprofitable."

The revenue account for 1910 shows the amount of accident funds, January 1st, 1910, \$33,320 (£1 taken as equivalent of \$5); premiums, 1910, \$106,815; interest, \$12,715, making a total on the debit side of \$150,860. On the credit side the items are: Claims, \$62,610; commission, \$12,810; land and income tax, \$1,365; salaries, \$15,755; expenses of management, \$3,170; amount of accident funds, December 31st, 1910, \$55,145.

A branch of the Canadian Bank of Commerce has been opened at Cornwall, Ontario, under the management of Mr. A. E. Currie, formerly of Parrsboro, N.S.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Coal Company.—The output of the Dominion Coal Company for July amounted to 410,000 tons, and for seven months 2,534,000 tons. These figures are new high records.

Twin City Rapid Transit Company.—The earnings of the Twin City Rapid Transit Company for the third week of July were \$158,085, an increase over the corresponding period last year of \$5,862, or 3.85 per cent.

Nova Scotia Steel and Coal Company.—The July output of the Nova Scotia Steel and Coal Company is as follows:—Coal mined, 75,000 tons; coal shipped, 90,000 tons; pig-iron, 6,500 tons; steel ingots, 7,670 tons.

The output of coal is the best this year. The company shipped 40,000 tons of iron ore from Wabana last week. Shipments for the month were 94,000 tons.

Black Lake Asbestos Company.—Black Lake Asbestos affairs under old management will be wound up this week. Tenders for the purchase of Black Lake Asbestos assets close Saturday, and as there will be probably only one tender for the property, it will go to the reorganized company representing the old interests, over 90 per cent. of the bondholders having agreed to the scheme arranged by the bondholders' committee.

Canadian Pacific Railway.—Interest payment at 7 per cent., or \$3.18 per share, will be paid by the Canadian Pacific on October 15th on the first four installments (\$120) from the due date of each installment to September 30th, on the \$18,000,000 common stock represented by the certificates of subscription, to holders of record August 16th who have paid these installments on or before the due dates. Books close August 16th and will reopen September 16th.

Robb Engineering Company.—The Montreal Trust Company and Francis M. Edwards, of Boston, have been appointed receivers for the Robb Engineering Company, of South Framingham, on the petition of Boston and Canadian bondholders. The company was incorporated in Nova Scotia, and has outstanding liabilities of nine hundred thousand dollars. The proceedings seek to foreclose a mortgage covering the issue of 1907 of \$650,000 six per cent. twenty-year bonds, on which the July first semi-annual interest was defaulted.

Duluth-Superior Traction Company.—The Duluth-Superior Traction Company comparative weekly statement of gross earnings for month of July:—

	1912.	1911.	Increase or decrease.
First week	\$24,988.20	\$25,898.45	— \$910.25
Second week	22,025.40	23,045.95	— 1,020.55
Third week	24,521.55	25,102.95	— 581.40
Remainder of month	33,372.15	33,655.40	— 283.25
Month to date	104,907.30	107,702.75	— 2,795.45
Year to date	644,921.70	633,289.25	+ 11,632.45

Ontario Power Company.—The Ontario Power Company of Niagara Falls, and the Ontario Transmission Company, Limited, report for the six months ended June 30th, 1912, compared as follows:—

	1912.	1911.	Changes.
Gross earnings	\$538,772	\$408,974	+ \$129,798
Net earnings	451,104	336,311	+ 114,793
Other income	11,205	8,060	+ 3,145
Total income	462,309	344,371	+ 117,938
Interest charges	323,793	292,638	+ 31,155
Surplus	138,516	51,732	+ 86,784

Canada Cement Company.—The contract for cement let by the Winnipeg city council at its last meeting to the Canada Cement Company at a net price of \$1.95 per barrel is not to be carried out. Instead, Mr. W. F. Lee is to get the contract at a price said to be just 6½ cents per barrel higher than that quoted by the company.

The board of control has recommended to the council the cancellation of the contract let to the Canada Cement Company on the stated ground that the company has refused to sign a contract, and at the same time recommends to the council that the only other tender, that of Mr. W. F. Lee, be accepted. Meanwhile the city is getting a temporary supply from Mr. Lee which was needed, as the city was out of cement.

Montreal Tramways Company.—"I think the statement of the company for the past nine months is, to say the least, satisfactory to shareholders," said Mr. E. A. Robert, president

of the Montreal Tramways Company, Limited, at the first annual meeting of the shareholders this week.

The board of directors was re-elected as follows:—Mr. E. A. Robert, president; Mr. J. W. McConnell, vice-president; Messrs. F. Howard Wilson, Wm. C. Finley, Hon. J. M. Wilson, J. M. McIntyre, Geo. G. Foster, K.C. The sum of \$27,500 was voted by the shareholders in remuneration for the directors. In previous years the sum of \$27,400 was voted by the board of directors and shareholders. This year it was left entirely in the hands of the shareholders.

Windsor Hotel Company.—It is stated in well-informed circles that Manager W. S. Weldon, the present manager of the hotel, will continue in his present capacity for some time, but it is likely the lease of the hotel will be granted to an outside syndicate.

The Belmont interests of New York, it is understood, have offered \$160,000 per annum for the rental of the Windsor, this being 8 per cent. on the paid-up capital of the company operating it.

Mr. Frank J. Gallagher, president and managing director of Freeman's, Limited, representing a syndicate of Montreal and New York capitalists, is supposed to have made an offer of \$200,000 for the annual lease of the hotel, and the directors of the company will shortly hold a meeting to consider the proposal.

The Windsor Hotel Company is capitalized at \$2,000,000, so that Mr. Gallagher's offer represents an annual return to the shareholders of 10 per cent. on their investment.

Canadian and Empire Investment Trust.—The second annual meeting of this company was held at the registered offices, 75 Lombard Street, London, E.C., recently, Mr. W. M. Macleod, chairman of the company, presiding.

The secretary (Mr. Macdonald Marling) read the notice convening the meeting and the auditors' report.

In presenting the second annual report and statement of accounts, the directors have very little to add beyond the hope that the shareholders will consider them satisfactory, said the chairman. The revenue for the year amounted £14,739 19s. 6d., or a little more than 8½ per cent. on the paid-up capital. After writing off preliminary expenses, £1,470 7s. 8d., and providing for expenses of management, there remains, with the sum of £483 17s. 9d. carried forward from last year, £10,558 7s. 11d., or over 6 per cent. on the paid-up capital. Of this amount £2,280 6s. 3d., the amount of profit on sales, has been carried to reserve, and the directors recommend a dividend on the preference stock at the rate of 5 per cent. per annum for the six months ended 30th June, 1912, making, with the interim dividend paid in January, 5 per cent. for the year, and 4 per cent. on the ordinary stock for the year, leaving £960 11s. to be carried forward.

Brazilian Traction, Light and Power Company.—It is announced by the board of directors of the Sao Paulo Company that if the exchange of its shares for those of the Brazilian Traction, Light & Power becomes effective, a special dividend of five-sixths of 1 per cent. will be declared on the Sao Paulo stock for the month of July. This will be equivalent to a dividend for one month at the rate of 10 per cent. a year. The special dividend, when declared, will be to stock of record of September 1st, 1912, and will adjust all dividends on Sao Paulo stock up to August 1st, 1912. All holders of certificates of deposit in respect of certificates of shares and share warrants of the Sao Paulo Company will receive this dividend.

On the new basis of exchange of stock of the Brazilian Traction, Light and Power Company, the distribution of the new stock will be as follows:—For the Rio de Janeiro Tramway, Light and Power Company, \$72,000,000; for the Sao Paulo Tramway, Light and Power Company, \$27,500,000; for the Sao Paulo Electric Company, \$5,000,000; unissued stock, \$15,500,000; aggregate of stock of the new company, \$120,000,000. The estimated revenue of the Brazilian Traction, Light and Power Company is sufficient to justify the board of directors in commencing to pay dividends on its stock at the rate of 6 per cent. per annum. If the expected increase in the revenues of the company in 1913 and 1914 is realized, it is stated that an increase will be made in the dividend rate.

No date is fixed for the taking effect of the exchange. All the steps have been taken to the merger and no special meeting of stockholders will be necessary. As soon as a substantial majority of the stocks of the three companies, satisfactory to their boards of directors, has been deposited, the merger will be declared effective. Extensive plans have been made for an enlargement of the business of the two traction and lighting companies. The Sao Paulo Electric Company, the

third corporation in the merger, was organized in 1909. It is now completing a hydro-electric development of 50,000 horsepower and is installing machinery of 30,000 horsepower. In addition, an extensive system of transmission lines is being constructed. It also is operating a plant of 4,500 horsepower. It has a contract with the Sao Paulo Tramway, Light and Power Company to deliver a minimum of 15,000 horsepower, beginning September 1st, 1913.

Deposit receipts for Rio and Sao Paulo shares are now being traded in on the Toronto Stock Exchange. Rio deposit receipts have made their appearance and brought just a fraction below the prevailing price for the stock. Sao Paulo deposit receipts are also expected to be dealt in.

BRITISH COLUMBIA'S ADVANCES

Validity of Municipalities' Tax Sales—Railways Continue Their Activities—Vancouver and Victoria's Growth

(Staff Correspondence).

Vancouver, August 3rd.

Municipalities throughout Canada might well profit by the experience of South Vancouver. Decision has been given by the Privy Council to the effect that the tax sale held ten or twelve years ago is not valid, and owners of that time who let their land go for taxes may recover. The particular case in view is that of Mr. R. A. Anderson, a former mayor of Vancouver. About 1900, land in South Vancouver was not of particular value. There was little of the present Vancouver in sight at that time, and Mr. Anderson, like many others, did not think it paid to hold on. The point on which he contested the sale, now that the land is very valuable, was that the South Vancouver council held its meetings in Vancouver, outside the municipality. Most of the aldermen at that time found it convenient to meet in the city, where most of them had their businesses, and because South Vancouver was uncleared country.

Will Have Far-Reaching Effects.

The case went through the local courts, the Supreme Court Judge in the first instance throwing the case out, after strongly criticising the plaintiff for trying to reclaim only because the land had grown in value. Now the Privy Council has decided that the judgment of the Supreme Court of Canada was right in allowing the action to Mr. Anderson.

The case will have very far-reaching effects in and about this city. Property in South Vancouver, North Vancouver, West Vancouver and Point Grey will be affected. Already, actions are being brought to recover land in North Vancouver, on the same contesting point.

It has been suggested that the provincial government pass legislation to validate these tax sales and so prevent litigation and much loss. Some lawyers hold the view that if present owners have to relinquish their rights, the municipalities will be liable, and if that is so they are apt to be bankrupted, for the aggregate value of the land, the titles of which are clouded, runs into the millions.

Necessity of Water Supply.

Nothing has been heard since the big fire on Main Street two weeks ago, when the property loss amounted to \$375,000, of the water question. It was stated at that time that the pressure was deficient, and certainly the fire was prevented from doing greater damage only by fire-proof construction. Since that time, ratepayers in a section of Fairview, south of Broadway and north of Shaughnessy Heights, appeared before the water committee with the complaint that at certain hours of the day they were absolutely without water. If a fire were to break out there at such a time, great damage would be done, for the houses are of frame construction and close together. The engineer is to change the location of the regulating valve, but it is not known yet if this will bring about the desired result, and if not then a portion of South Vancouver supplied from the city will have to have its water supply shut off. The question is not so serious as long as nothing happens. Last year, the water committee completed negotiations for the acquisition of lands in the Seymour Creek watershed, the purchase of which had been strongly recommended by the city's consulting engineers, but this year's committee has not bothered with the matter yet, and the deal was not consummated. Now the chairman of last year is getting busy and will bring the matter up to see if it is not possible that the labors of last year may have effect. Vancouver has been practically immune from disastrous fires for many years, but they are liable to happen at any time. A blaze would show what it could do if it once started among Vancouver's frame houses, situated as they are, closely together.

Railways are causing an undercurrent of activity in North Vancouver, Vancouver and New Westminster. On the north

shore, the Pacific Great Eastern, which will pass to the Grand Trunk Pacific, and the Canadian Pacific Railway are getting busy. In addition, the railway commission has practically ordered the Vancouver, Westminster and Yukon to do something. In Vancouver, the Canadian Northern's desire to get a location is the centre of discussion, while in New Westminster, that company has been spending a couple of millions in securing waterfront on the Fraser River. This latter expenditure means much for the Fraser River, and developments are looked for.

Figures for the past month indicate that activity in trade continues, despite the report that it is rather quiet. Increases are shown along all lines, although the building to date is a few dollars behind the amount for the first seven months of last year. The better conditions in the lumbering industry are shown by the fact that during July 72,189,219 feet of logs were scaled, as against 44,010,997 in the same month of 1911. This confirms the statement in *The Monetary Times'* columns about a month ago.

In Victoria, expansion is shown. Bank clearings show a remarkable gain in July, and the gain for the first seven months of this year amounts to \$40,199,259. Progress is shown in the building returns. To date they already surpass by \$1,324,125 the value of the permits for the whole of 1911. Development is starting on Vancouver Island, and the capital city is coming into its own.

Mr. G. T. Somers, president of the Sterling Bank of Canada and president of the Crown Life Assurance Company, who is on the coast this week, announces that his bank is to invade the western field. Up to the present, the western boundary of the bank's activities has been Manitoba, but he says it will soon be established in British Columbia.

CAN LEGAL PRACTICE BE REMODELLED?

The possible remodelling of legal practice is the subject of an interesting article by Mr. A. T. Drummond, of Toronto, in the current issue of the *Queen's Quarterly*. Why should not the simplicity in proceedings, the facilities for early hearing of cases, the absence of technicalities and formalities, the desire for fairness in reaching a decision and the practical finality of that decision, characteristic of the proceedings of the Dominion Board of Railway Commissioners, be equally characteristic of the Courts of Law? he asks.

"The profession of law seems to be tardy of change," continues Mr. Drummond, "and to indicate a lack of initiative on the part of its members, and a lack of courage to meet modern conditions. Reforms have been relatively few, and some of these not sufficiently crucial in their nature to gain the appreciation of the public. The cause does not lie in lack of ability in the profession. Possibly, if we were behind the scenes, we might find that the reason was somewhat personal to the members and that the advantage of the public was rather overlooked."

"What particular changes should be effected in the wide range of subjects special to the profession is a matter of detail, not intended to be discussed here. The members of the bar know that there is great scope for development if they were only sufficiently courageous to admit it. On the other hand, the general public, especially those who have had, for instance, to endure with patience the sacrifice of time and the great expense of a long contested, even if a successful, suit; cannot help realizing that what has been done in one Court of Record—the Board of Railway Commissioners, where decisions often involve vast interests—can also be done, more or less effectively, in the other Courts of Record. In this age of change, many—perhaps most—subjects have to be looked at from a standpoint entirely different from that of a hundred years ago, and with our broader views and greater knowledge, we are of necessity less bound down by the methods, and the opinions of the men who preceded us. In the ordinary dealings of everyday life, a leading principle which increasingly appeals to our better natures is that of fairness, and the methods we prefer to employ include the shortest and the least expensive road, and the constant application of common sense. How often progress would be retarded if we were always fettered by a fixed routine and if mere formalities, or a precedent of even fifty years ago, were allowed to delay or block final results."

Sir William Ralph Meredith made it clear that the Ontario commission on workmen's compensation was not going to be fettered by academic discussions. The point at issue was what would be a proper arrangement. It was intimated that the draft bill to be submitted to the government would be twofold:—First, that an administering commission be appointed with power to draw up rates, make plans and elaborate a scheme for making collections for the state fund; second, to bring the entire scheme into operation a year later by proclamation.

CALGARY MAKING PROGRESS

Interest Being Shown in Oil Prospecting—Large Brick Company Acquires Another Plant—Live Stock Industry

(Special Correspondence.)

Calgary, August 6th.

The refusal of the Hudson's Bay and Canadian Pacific Railway land departments to grant any more leases immediately adjoining the oil properties has added interest to these developments. At the beginning of the year fifty cents per acre, in quarter sections, with a royalty, was the price at which any of these lands were open for prospecting; now they cannot be leased. One of the development companies holds several sections. The two original prospecting companies have machinery on the way to Calgary, and by early spring the correctness of the experts' opinions should be determined.

Clay Products Company.

With the acquisition of the dry press brick plant of the Calgary Terra Cotta Company, it is said, the Tregillus Clay Products Company, when its various units are completed, will be the largest brick manufacturing company in Canada. The plants are within two and a half miles of the centre of the city on the main line of the Canadian Pacific Railway. One plant is now turning out 25,000 bricks per day, to be used in constructing the others, all of which are to be operated throughout the winter in preparation for a share of the trade which this year had to be so largely supplied from outside sources.

City's Business and Building Returns.

The constantly increasing volume of Calgary's business is well illustrated in the receipts at the office of the Dominion customs department. For the month of July these were \$217,597, an increase of \$63,472 over the same month of 1911.

Calgary's municipal street railway earnings for the past month were \$58,000, and for July, 1911, \$38,736, an increase of nearly \$20,000. The new scenic car, costing an average of \$20 per day to operate, is making a profit of from \$20 to \$100 per day.

Building permits for July, exclusive of the Canadian Pacific locomotive and car shops at Ogden, numbering 315, are valued at \$1,350,516, making for the first seven months of the present year, a total of \$9,891,186 and an increase of 65 per cent. for the month of July this year.

To Stimulate the Live Stock Industry.

Dr. J. G. Rutherford, formerly chief veterinary at Ottawa for the Dominion Government, has been appointed superintendent of animal husbandry in the agricultural branch of the Canadian Pacific department of natural resources, with headquarters at Calgary. This appointment is in conformity with the plan of the company to stimulate the live stock industry of the west, and follows very closely upon the Dominion's selection of an expert sheep man.

The Western Trade Routes Association, the outcome of the Panama Canal conference held in Calgary, will meet in Vancouver towards the end of August, after which there will be started in earnest the campaign that is to bring home to every one in Canada the importance of the Panama Canal to this section of the American continent, says President L. P. Strong.

The Canadian Pacific Railway Company is to double-track about eight miles from its Ogden shops right through Calgary to Sunalta, at a cost of \$250,000.

Messrs. John Gunn and Sons, of Winnipeg, have secured the contract for the Canadian Northern bridge across the Bow River inside the city limits, at a price said to be \$150,000.

The Department of Railways and Canals will build an addition to the Port Colborne grain elevator, thus increasing its storage capacity from 800,000 to 2,000,000 bushels.

Speaking of the quality of the cattle at the Canadian National Exhibition, a famous British judge and breeder last year said that the champions at Toronto would easily be champions at the best shows in Scotland. This means that cattlemen can see at Toronto Exhibition the finest types of cattle in the world.

The model military camp at the Canadian National Exhibition at Toronto this year will be occupied by corps of cadets from Australia, New Zealand, South Africa, England, Scotland, Ireland, Wales, Newfoundland and the provinces of the Dominion. The boy soldiers will be in camp during the entire Fair, and will take part in the performance in front of the grand stand every afternoon and evening.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended August 2nd:—La Rose, 202,250; Nipissing, 129,870; Buffalo, 57,970; Cobalt Townsite, 87,250; McKinley-Darragh, 82,750; Cobalt Lake, 68,280; Hudson Bay, 63,580; Kerr Lake, 40,000; Temiskaming, 61,995; total, 793,758 pounds or 396 tons. The total shipments since January 1st are now 25,628,692, or 12,814 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

CEMENT BOND OFFERING.

An issue of \$300,000 6% first mortgage 15-year sinking fund gold bonds of the Keystone Portland Cement Company, Limited, is being offered by Messrs. W. J. Budd and Company, Calgary, at par with 50% stock bonus. The company has capital stock of \$700,000 and bonding powers of \$500,000. Its head office is at Calgary and its mills at Blairmore, Alberta. The financing of cement companies in Canada in past years has not been very successful probably owing to poor management and keen competition.

The Keystone Portland Cement Company has its raw materials, limestone, rock, shale and coal within a thousand feet, with ample water. This saves freight and extra handling of raw materials and should enable the company to manufacture cement at a comparatively low figure. The prospectus estimates the total profits from the cement, brick and lime departments at \$261,000. The interest on \$500,000 bonds at 6% would reduce the amount by \$30,000 and a sinking fund to redeem bonds by another \$25,000. That would leave a balance for reserve and dividends on stock of \$206,000.

The directors and officers are as follow:—Messrs. A. A. Miller, Brussels, Belgium, president, late general manager Canadian Coal Consolidated Company, Limited, Frank, Alta.; W. J. Budd, Calgary, vice-president, director British Columbia Portland Cement Company, Limited; R. C. Ross, Spokane, Washington, United States of America, director British Columbia Portland Cement Company, Limited; C. A. McDonald, Edmonton, financial agent; John George, Paulson, Sask., gentleman; D. Sutor, Calgary, manager, Calgary Iron Works; H. M. Budd, Vancouver, broker; and A. E. Stillman, secretary-treasurer.

STONE & WEBSTER AND SASKATOON.

Messrs. Stone & Webster, with whom the city of Saskatoon last month made an arrangement in connection with the construction of the street railway, have issued a combined statement of the capitalization and earnings for the year ended December 31st, 1912, of the electric railway, electric lighting, power and gas companies managed by the Stone & Webster Management Association. Figures from thirty-eight companies are included in the statement. In it are not included the securities corporations of the firm, nor the properties under construction, such as the Mississippi River Power Company, the Dallas Southern Traction Company and the Eastern Texas Electric Company. The territory covered by the companies is in ten states, and extends from the Atlantic to the Pacific, and from Nova Scotia to Florida.

These companies, for 1911, disbursed, for interest on bonds and notes and dividends on stocks \$7,060,654. The equivalent of 1,130 miles of single track is owned by the traction companies, and in 1911 they carried 300,330,000 passengers. The total connected electric light load is equivalent to 2,341,880 16-candlepower incandescent lamps. The total connected commercial power load is approximately 130,400 horsepower. The total combined power station capacity, of which approximately 96,720 horsepower is hydro-electric, is 210,872 horsepower. The total output of manufactured gas for the year was 1,390,157,200 cubic feet.

The thirty-eight operating companies have bonds and coupon notes outstanding aggregating \$77,901,500, \$30,447,900 of preferred stocks, and \$53,183,200 of capital and common stocks outstanding, or an aggregate capitalization of \$161,532,600.

The earnings of the thirty-eight companies for the year ended December 31st, 1911, were: Gross earnings, \$22,848,480; operating expenses and taxes, \$13,815,732; net earnings, \$9,032,747; interest charges, \$3,692,878; net operating revenue, \$5,339,869; income from other sources, \$121,386; total net income, \$5,461,255; dividends paid, \$3,367,775; surplus, \$2,093,470.

The city of Saskatoon will pay for the construction of the street railway by the issue of \$500,000 debentures direct to Messrs. Stone and Webster.

CROPS EAST AND WEST

Small Decrease of Wheat Acreage—Condition of Live Stock Satisfactory—Fruit Report Favorable

A bulletin on the crops and live stock of Canada is issued by the Census and Statistics Office. The correspondents of the office report that in the Maritime Provinces and generally throughout Eastern Canada the weather of June continued cold and wet, and growth was therefore slow. In the northwest provinces the weather of June was not and dry, and rain was badly needed at the beginning of July. Rains have since fallen, however, and conditions have improved. Prospects for spring-sown crops are generally favorable.

According to the revised figures obtained at the end of June, the total area under wheat this year is 10,047,300 acres, compared with 10,387,159 acres as returned by the census of 1911. The area sown to fall wheat in 1911 was 1,097,900 acres, but winter killing has reduced this area to 781,000 acres. The area sown to oats is estimated at 9,494,600 acres, as compared with 9,233,550 acres in 1911, and to barley 1,449,200 acres as against 1,403,969 acres in 1911.

Nearly Nine and a Quarter Million Acres of Wheat.

In the three northwest provinces spring wheat covers 9,029,000 acres as against 8,946,965 acres in 1911, the increase being in Saskatchewan and Alberta. Including fall wheat the total wheat acreage in the three provinces is 9,246,100, as compared with 9,301,293 acres in 1911, the decrease being accounted for by the large area of fall wheat winter-killed in Alberta. Oats in the three provinces occupy 5,037,000 acres, and barley 826,100 acres, as compared with last year's census figures of 4,563,203 acres for oats and 761,738 for barley.

Live Stock Shows Decrease.

Whilst not equal to the exceptionally high figures recorded this time last year, the condition of spring sown crops is generally good. The highest figures for spring cereals are recorded in Prince Edward Island and British Columbia, the per cent. condition ranging from 97 to 99 in the former and from 90 to 95 in the latter province, the average for the Dominion being from 80 to 89. Fall wheat remains low, being only 70 for Canada, 73 for Ontario and 71.6 for Alberta. Last year the condition was also low, viz., 75 for Canada; the average of the four years, 1908-1911, was 81.5. Spring wheat is 89.73 per cent., compared with 94.78 last year and 88.25 the four years' average; oats, 86.43, against 94.46 in 1911 and 90.42 average; barley, 88.58, against 93 in 1911, are 80.08 and mixed grains 84.98, and 89.28 average. Rye is 87.84, peas, hay and clover show a condition per cent. of 85.59, against 84.97 in 1911; alfalfa 90.59, against 82.31, and wheat, oats and barley range from 80 to 88 per cent., figures which are exceptional records by from about 10 to 15 per cent.

Increased Number of Horses and Dairy Cattle.

The estimated numbers of live stock show further decreases except as regards horses and dairy cattle, the former being 70,400 and the latter 14,500 more than last year's estimates. The census figures of 1911 are not yet available. The condition of all live stock in Canada is uniformly excellent, the number of points being 97 horses, 98 cattle, 97 sheep and 96 swine.

The fruit crop report from the Department of Agriculture speaks favorably for a good season throughout Canada.

A branch of the Metropolitan Bank is being opened in Hamilton under the management of Mr. E. B. MacKenzie, who has for some years been manager of the Queen and McCaul Streets branch in Toronto.

With two dozen vessels constantly using the St. Lawrence route, the dimensions of which vessels are greater than the dry dock at Levi, the inadequacy of the present facilities is amply demonstrated. Attention has again been directed very forcibly to the matter by the recent injury to the Empress of Britain through her collision with the SS. Helvetia. The Levis dock only provides an entrance of 59 feet, while even the Richelieu and Ontario Company, in its steamer Montreal, requires a width of 75 feet. Shipping men are renewing the agitation for a dry dock of ample size to accommodate the largest ships visiting the St. Lawrence, and are of the opinion that lower rates of insurance, both on hulls and cargo, would be the result. It is claimed that the new floating dock which will shortly reach Montreal will not be sufficient to serve the ships coming to Quebec, although it will be a great aid. Mr. Andrew Allan, president of the Shipping Federation, is urging upon the government the need of the immediate construction of a dry dock at Quebec, and it is thought the difficulties which have hitherto prevented a favorable decision will be removed.

A NEW FINANCIAL COMPANY.

Messrs. H. F. Gordon and Company, Limited, have recently been incorporated in Winnipeg for the purpose of carrying on a general insurance and investment brokerage business. The principals are Mr. George W. Rawlings, son of the late Edward Rawlings, founder and president of the Guarantee Company of North America of Montreal, and Mr. Herbert F. Gordon, for a number of years connected with the latter company in various capacities. Both are young men of energy and ability, and well known in Western financial circles.

TIGHT MONEY IN VIEW.

Money a little tighter within three months is the prediction of Mr. Aird, assistant general manager of the Canadian Bank of Commerce on his return from a trip to Europe. "The great increase in the industrial activity," he says, "and the heavy demand for business in our own country for manufacturing purposes will tighten the market. You will probably see the Bank of England rate advanced from about three to about four and a half per cent. A large amount of money will be necessary to finance the crops in the Canadian West, and this, with the general commercial expansion, will make rates for money higher."

PROBABLE CAUSE OF MONTREAL ABATTOIRS' FIRE.

Overheated insulation on the walls was the only likely theory that was put forward as the cause of the destructive fire which occurred at the packing house of the Montreal Abattoirs at Point St. Charles on Thursday afternoon last, on which occasion so many firemen were disabled by smoke and chemical fumes. At the enquiry held by Fire Commissioner Latulippe all the witnesses agreed that the fire broke out very suddenly, and most of them were unable to suggest any cause whatever. The theory of a pan of grease being upset, which was mentioned at the time of the fire, was not referred to.

Mr. Joseph Lancaster, mechanical engineer, gave it as his opinion that the fire was caused by overheated insulation of the walls, or that there was some defect in the electric wiring. Thomas Lavoie, plant engineer and inspector, said that he had examined all shafting each morning and evening to avoid undue heating, and he had no idea as to the cause of the outbreak. He had been over the building that day, and was in his office a few minutes before the fire started. The fire had broken out between the second and third floors. Eug. Parker, superintendent, stated that all plant was in good condition, and he was unable to understand how the fire could have occurred.

LAKE ERIE AND NORTHERN RAILWAY COMPANY.

At a meeting of the directors of the Lake Erie and Northern Railway Company, an agreement was concluded with Messrs. G. W. Farrell and Company for the purchase of the entire issue of \$1,100,000 5 per cent. mortgage bonds.

The Lake Erie and Northern Railway was incorporated by a special act of the Federal Parliament in May, 1911.

The Dominion Government has granted a subsidy of \$6,400 per mile, or a total grant of approximately \$340,000.

The charter provides for the construction of an electric railway from Port Dover on Lake Erie through the towns of Simcoe, Waterford, Brantford and Paris, to the town of Galt, a distance of 53 miles. Connections will be made at Galt with the main line of the Canadian Pacific Railway for an interchange of traffic on completion of the road.

The directors of the company comprise a number of the prominent manufacturers in that district and consist of Messrs. John Muir, Harry Cockshutt, Lloyd Harris and John Sanderson, of Brantford; Richard Thompson, general manager of Penmans, Limited; F. H. Deacon, of Toronto; Martin Todd, general manager of the Galt, Preston and Hespeler Railway, and G. W. Farrell, of Montreal.

Mr. Lloyd Harris, one of the directors of the Lake Erie and Northern Railway Company, stated this week that the directors will call for tenders at once and hope to have construction started this fall.

The towns through which the line will pass—Galt, Paris, Brantford, Simcoe, Waterford to Port Dover—have voted to take second mortgage bonds totalling \$500,000.

The directors believe that the field is a most promising one for both freight and passenger business, the 53 miles through which the line will pass being thickly populated.

The Canadian Pacific Railway is reported to have entered the United States market for from 1,000 to 3,000 freight cars.

TWO NEW MONTREAL STOCK ISSUES

Shawinigan and Canadian Light and Power Companies —Transportation Proposals

Monetary Times Office,
Montreal, August 7th.

Two new stock issues have been announced in Montreal during the past week in connection with well-known public utility concerns. These issues are of additional stock in each case and are as follows:—

Shawinigan Water and Power Company .. \$5,000,000
Canadian Light and Power Company 1,000,000

In the case of the Shawinigan Water and Power Company, the authorized capital is \$20,000,000, the issued capital being but \$10,000,000, so that the new issue would simply bring the capital up to \$15,000,000, being 75 per cent. of the total authorized. The ratio would be one new for each two old shares now held. The stock of the company is now selling at \$153 per share, and it is generally assumed that the issue price will not be very far below the present selling price. The company has been carrying out works of extension during the past year or so, a new power house with a capacity for five electrical units of 15,000 horse-power each, having been constructed and two of these units having been installed, leaving three to be installed according to future requirements. Altogether, the Shawinigan Falls power development has a possibility of 175,000 horse-power, the dams and river works for this entire amount having been completed. The company is selling 45,000 horse-power, as water power, to manufacturing establishments at Shawinigan Falls, and in addition is delivering, or is able to deliver, 85,000 as electrical power, making a total of 130,000 horse-power. The remaining 45,000 can be added by the installing of the three additional units which the new power-house was constructed to accommodate. The company is inquiring into the possibility of adding to their total capacity by the construction of storage dams in the upper waters of the river.

No difficulty is expected in disposing of the \$5,000,000 new stock.

Canadian Light and Power Company.

The issue of \$1,000,000 new stock of the Canadian Light and Power Company was authorized at the meeting of shareholders held in Montreal last Tuesday. The situation in connection with the Canadian Light and Power Company is not so well known as in the case of the Shawinigan Company, but the stock will probably all be subscribed for. The present authorized and subscribed capital of the company is \$6,000,000, so that it will be necessary to receive also the authorization of Government before making the issue of \$1,000,000 new stock.

In its official statement, the company places the present development at St. Timothee, 30 miles west of Montreal, at 22,500 horse-power. As the delivery of power only began in last September, no financial statement was made at the annual meeting of the company, at which the authorization for the issue of the new stock was given.

The probabilities are that there are very few individual shareholders now in Canadian Light and Power Company.

Arrangement for Exchange of Shares.

An arrangement was carried out whereby the shares of the Canadian Light and Power Company were exchanged for shares in the Montreal Tramways and Power Company. The latter was the holding company organized for the purpose of acquiring the shares of the Tramways Company, the Canadian Light and Power Company, and other power concerns in the vicinity of Montreal. The Tramways Company and the Canadian Light and Power each received one share and a half in the Tramways and Power Company for each of their old shares, so that the \$6,000,000 Canadian Light & Power represented \$9,000,000 Tramway and Power stock.

The Street is a little curious to see how the \$1,000,000 Canadian Power stock will be sold. The Tramways and Power Company, as owner of the great bulk of Canadian Power stock, would likely be the biggest purchaser. Whether it will raise the required money through the sale of more gold notes or through the sale of its own stock is one of the points upon which there is considerable surmising.

There has been much market activity in the Canadian Power stock, but holders are asking 82 and buyers are bidding 78 per share at the present time. These prices compare with several points higher at the end of July. Tramways and Power stock has been a little easy also. At the end of July it was selling at \$55.75 a share, while now it is quoted around \$52 a share.

Tramway matters have occupied the centre of interest in financial circles in Montreal during the past week. The result of the operations of the Montreal Tramways Company for the nine months ending June 30th came in for considerable discussion, and was generally regarded as satisfactory. On Tues-

day the annual meeting of the company was held, and on the same day was the annual meeting of its close connection, the Canadian Light and Power Company. Both meetings were of a formal character, and nothing of particular interest transpired at either, save that at the latter the issue of \$1,000,000 new stock, referred to previously, was authorized.

Meantime, the Tramways Company and its proposed rival, the Autobus Company, have come in for much discussion at the city hall and throughout the city generally. At a special meeting of the city hall the aldermen made the claim that the Tramways Company could take far more effective steps to do away with the congestion if it so desired, and one of the aldermen proposed to compel it to construct underground lines in accordance with powers it had obtained from the legislature. However, action was confined to the issuing of instructions to the company to cut out a number of stops.

Considerable discussion has gone on over the Autobus proposals. One alderman proposes to prevent any trafficking in charters, it being his idea that the company should not fall into the hands of any rival concerns, such as the Tramways Company. It is claimed that the company ought to be prevented from selling out. The mayor, however, holds the view that the company should not be hampered unnecessarily, as it is entering upon a venture. No cash deposit should be insisted upon, for the same reason, and also because of the shares which are being offered the city free. Neither should the company be compelled to keep the streets clear of snow.

A Montreal story states that the T. Eaton Company are shortly to bring out a \$10,000,000 bond issue, the funds to be used for the erection of a new store at Yonge and Carlton Streets, Toronto. The Monetary Times was unable to obtain confirmation of the report yesterday.

MANITOBA CHARTERED ACCOUNTANTS

New Standard for Examinations—Six Men Successful in Finals—Dominion Convention

Perhaps the most important matter dealt with during the past year was the adoption of a new standard for examinations and an increased term of service in a chartered accountant's office, for candidates presenting themselves for examination, said Mr. H. M. Cherry in his presidential address at the annual dinner of the Chartered Accountants Association of Manitoba at Winnipeg recently. Hereafter, it will be necessary for candidates to serve three years before qualifying. This requirement is undoubtedly necessary and is in the interest of both the public and the candidate. Our intermediate examination has in the past been open to all who could satisfy the council of their general educational standing and good character. The experience of the examiners has been that candidates who served in a practicing chartered accountant's office had the advantage of training which enabled them to obtain a higher standing in examinations, and it has been found that nearly all the successful candidates at the intermediate examination have been men with such a training.

Empowered to Grant Exemptions.

The new provisions require that a candidate shall have passed the matriculation examination in arts for the Manitoba University, or its equivalent, and serve one year in a practicing chartered accountant's office prior to the intermediate and two years prior to the final, making three years in all. It is also proposed to introduce a course in political economy as it is felt that such a course will be valuable to all candidates in their practice as chartered accountants. The council is empowered to grant such exemptions as they deem necessary for the next year or two, so that no injustice will be done to candidates who entered for examination prior to July 1st, 1912.

Annual Meeting of Dominion Association.

Our association now has forty-one members and in future will be entitled to two representatives on the council of the Dominion Association.

The next annual meeting of the Dominion Association will be held at Toronto in September, and following the course laid down, the annual meeting for the year 1913 is due to be held in Winnipeg. Accountancy interests throughout the West would benefit greatly by holding the annual meeting here, and the resulting publicity would give a better understanding of what we as chartered accountants stand for, and would, undoubtedly, hasten the time when definite professional recognition will be received from governing bodies and the public generally. The educational value would be worth many times the expense and trouble involved.

The successful graduates were Messrs. A. Armstrong, Basil Jones, Arthur E. Phillips, R. C. Macdonnell, J. Hopkinson and W. A. Lake who received certificates. Another interesting event was the presentation to the candidate making the best all round showing in the intermediate examination with the Henderson medal. This fell to Mr. W. T. Fowis.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Covan, Sask.—Until August 20th for \$15,000 20-year 6 per cent. town hall and fire protection debentures. A. Graham, secretary-treasurer.

Regina S.D., No. 4, Sask.—Until September 2nd, for \$275,000 4½ per cent. 20-year school debentures. J. H. Cunningham, secretary-treasurer, Regina.

Palmerston, Ont.—Palmerston has carried the by-law submitted to its property-owners for the establishing of a factory for manufacturing trunks and valises.

Berlin, Ont.—The city council has selected Saturday, August 31st, as the date for voting on the five money by-laws mentioned in last week's Monetary Times.

Cratton S.D., Sask.—Up to August 15th for the purchase of \$60,000 5 per cent. 30 instalments debentures of the Gratton S.D., Sask. D. S. Brennan, secretary, Regina.

St. Agnes R.C.S.D., No. 22, Sask.—Until August 10th for \$30,000 5 per cent. 40-year school debentures. Edw. J. Baker, Post Office Box 41, Moose Jaw, secretary-treasurer.

Nokomis, Sask.—Until September 2nd for \$15,735.72 6 per cent. 20-year debentures. W. A. Armour, secretary-treasurer. (Official advertisement appears on another page.)

Imperial, Sask.—Tenders are called for \$15,000 6 per cent. 15-year waterworks debentures. J. G. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

St. Laurent, Que.—The question as to whether the St. Laurent town council should float a loan of \$65,000 for permanent works in the town was submitted to a referendum and carried.

Toronto, Ont.—The bill to provide city of Toronto general consolidated loan debentures to the amount of \$300,000 to finance the abattoir scheme was given its third reading and passed.

Village of Carlstadt, Alta.—Tenders are called for \$3,000 6 per cent. debentures. S. F. McEwen, M.D., secretary-treasurer, Carlstadt. (Official advertisement appears on another page.)

Bassano, Alta.—Up to September 16th for \$150,000 5 per cent. 30-year water and sewer debentures. Geo. B. R. Bond, secretary-treasurer, Bassano. (Official advertisement appears on another page.)

Herbert, Sask.—Up to September 1st for \$8,000 5½ per cent. 20 annual instalments school debentures. D. J. Weins, secretary-treasurer, Herbert. (Official advertisement appears on another page.)

Municipality of Macdonald, Man.—Up to August 28th for 20 debentures, face value of each being \$343.12½. H. Grills, secretary-treasurer, Sandford. (Official advertisement appears on another page.)

Calgary, Alta.—The by-laws for the establishment of a police patrol system to cost \$40,000; extensions to the electric light system, \$200,000; and the paving of the Eighth Street West Subway, \$6,000, were carried.

Pincher Creek, Alta.—Nearly one hundred and forty signatures were handed in at a special meeting of the town council in favor of again submitting the money by-law recently defeated, to the burgesses.

London, Ont.—The water commission decided to accept the recommendation of the parks board, that the city council be asked to issue debentures to the amount of \$15,000 for permanent improvements to the parks.

Medicine Hat, Alta.—A by-law to authorize the issue of debentures of the city of Medicine Hat to the amount of \$300,000 for the purpose of improving the waterworks system, will be voted on by the ratepayers August 15th.

Montreal, Que.—Up to September 12th for \$500,000 4 per cent. 30-year bonds of Montreal city Protestant board of school commissioners. C. J. Binmore, secretary-treasurer, Montreal. (Official advertisement appears on another page.)

Tilbury, Ont.—On August 26th the ratepayers of Tilbury will vote on a by-law to loan \$5,000 to the Imperial Rubber Company, a newly organized concern, composed of American and Canadian stockholders, to assist in establishing a factory.

Belleville, Ont.—The by-law to ratify and confirm an agreement between the Wood Chemical Company of Canada and the corporation of the City of Belleville, and to authorize the issue of debentures to the amount of \$5,000; to provide for the cost of a site for the company, was carried.

Winnipeg, Man.—The three measures for expenditures of \$750,000 on electrical distribution for conduits and street equipment, the expenditure of \$70,000 on two fire halls; and the building of two subways, one at Princess Street to cost \$600,000, and the other under the Canadian Pacific tracks to cost \$1,200,000, will be submitted to the electorate.

GOVERNMENT SALE

PRINCE RUPERT LOTS

Acting under instructions from the Government of British Columbia, I will hold an auction sale of Prince Rupert lots on Wednesday, August 28th, 1912. The sale will be held at Prince Rupert, beginning at 3 p.m., and continuing on Thursday, the 29th.

The lots to be offered will be in sections 1, 5, 6, 7 and 8, about three hundred in all, and will comprise some of the choicest lots on the townsite.

Take Canadian Pacific Railway steamer from Vancouver August 24th, or Grand Trunk Pacific steamer August 26th. Fare each way, including meals and berth, \$18.

It will pay you to attend this sale.

If you cannot come yourself, send a representative. For further information apply to

C. D. RAND, Agent.

Head Office: VANCOUVER, B.C. Branch Office: PRINCE RUPERT, B.C.

BOND MARKET

Issues Preparing for London—Municipal Notes—Lethbridge Holding for Ninety-eight

When the London market recovers from its present congested state, there is likely to be an avalanche of new Canadian issues, municipal, industrial, railway, and financial particularly. Arrangements will be made at the annual meeting of the Central Railway of Canada in September for the marketing of the balance of the \$4,860,000 five per cent. bonds placed on the market some time ago. These were offered in England at 95 and interest, but were only partly taken. Funds are required for the building of the road.

The Canadian and Empire Trust, Limited, formed two years ago to invest in Canadian securities, is also waiting for the market to take a better turn. Its capital of £168,930 in the ordinary course would have been supplemented by an issue of debenture stock, but monetary conditions are not favorable to the raising on economical terms of capital carrying fixed interest at a low rate. Pending an advantageous opportunity for the issue of debenture capital the directors are financing developments on bankers' loans.

Montreal Central Bonds.

The Montreal Central Terminal Company will make a new bond issue and increase its capital. The bonds will be five per cent. first mortgage, due in 1962. The purpose of the issue is to provide funds for construction work. The company was organized several years ago to build a bridge across the river. This idea was later abandoned, and the company now plans to build a railway tunnel to cost about \$12,000,000. The company has charters which permit it to operate a steam railroad.

Lethbridge has had offers of 96 for its \$750,000 bonds, but the city is holding out for 98. It received 98½ for its last issue. The city will not curtail its proposed expenditure.

Fort William is Wise.

At Fort William, Ont., it has been decided by the city council that, in view of the fact that municipal bonds are not in demand in money markets at present, not to proceed with the proposed street railway extensions.

It is understood that the loan secured in London by the city of Toronto could not be obtained at a lower rate than 5 per cent. This is probably the highest price paid for a Canadian municipal loan abroad. The advance for the one year will cost the city \$300,000. A few weeks ago the Province of Alberta made a temporary loan at 4½ per cent., which fact created a stir in the market. Toronto has had to do even more to obtain its funds.

Notes of Municipal Bidding.

For Invermay, Sask., \$12,000 5 per cent. 20 annual instalment debentures five bids were received, and that of Messrs. Nay & James, Regina, was accepted. Winnipeg, Regina and Toronto bond houses made the other tenders.

For the Newcombe Rural Municipality, No. 260, Sask., \$12,500 6 per cent. 15-year road debentures five bids were received, two from Winnipeg, two from Toronto, and one from Regina. The offer of Messrs. Brent, Noxon & Company, Toronto, was accepted.

Seven bids were made for the Elfros, Sask., \$10,000 6 per cent. 20-year debentures. The offer of Messrs. Wood, Gundy & Company was accepted. The other bids were by Toronto, Winnipeg and Regina bond houses.

MacKinnon, Sask., received four bids for its \$5,500 6 per cent. 15 instalments bonds, and that of Messrs. W. L. McKinnon, Toronto, was accepted, as noted in the debentures awarded.

The improvement of roads following the adoption, last winter by the Quebec provincial government, of a law that enables any rural municipality to borrow the money required to improve its roads under easy conditions is very noticeable. According to that law, a town municipality may borrow any amount of money to macadam or gravel all its roads, or any part thereof, under the following conditions: The money is borrowed through the government at an interest that will not exceed four per cent. annually. The government promises to pay one-half of the interest, and furthermore, to pay the annual sinking fund until the whole of the debt is cleared, forty-one years, so that practically the municipalities only pay two per cent. interest on the money they get to perform the works. The government sent out in every county, in every town, in every village, official lecturers, with the result that actually of the 1,003 rural municipalities that are counted in the province, about 700 are now working on the improvement of their roadway.

Municipal Financing.

At South Vancouver, when Mr. A. B. Springford, the municipal clerk, recently submitted his financial report to the council, it was found that the appropriation for roads in Ward VI. had been exceeded, and in order to continue

road work there, money would have to be borrowed from the representatives of the other wards till the council could secure the remainder of its road money from its fiscal agents, Messrs. Wood, Gundy & Company. One million dollars has been paid to the council, and \$495,000 remains to be paid. Mr. Springford expressed the hope that this amount would be forthcoming at least within a month, and it was decided that Ward VI. should receive \$5,000 of Ward IV.'s unexpended appropriation until the rest of the bonds were sold. If \$5,000 did not prove to be sufficient, another similar sum will be borrowed from Ward III., and if still more were needed another ward will loan \$5,000.

The details of expenditure of the various civic committees of Vancouver for the first six months of the year have been prepared by the city controller. The general taxes for 1912 collected up to June 30th are \$307,874, against \$3,078,749 estimated for the year. The total revenue receipts to June 30th are \$762,678 against \$4,239,616 estimated. As regards the revenue in arrears at end of December, 1911, \$144,479 has been collected out of \$363,986. Debenture accounts show \$4,072,041 for appropriations and expenditure, and \$7,240,519 for debentures.

The financial statement of the city auditor presented to the Ottawa board of control indicates that the overdraft at the end of the year will likely be above \$100,000. The board of works had an appropriation of \$100,000, but already \$11,481 more than this sum has been expended. The city hall appropriation starts the last five months with a deficit of \$1,135, and Porter's Island has cost \$1,809 more than the \$9,000 which was estimated for the year.

Mr. Patrick Doherty, who pleaded guilty at Peterborough to setting fire to Mr. Thomas Armstrong's barns in Otonabee, was sentenced to fifteen years in Kingston penitentiary.

Members of the Guelph lodge of the Ancient Order of United Workmen, together with representatives from Galt, Hespeler, Morriston, Rockwood, Acton, Georgetown, Erin, Hillsburg, Elora, Fergus, Drayton and Palmerston, protested at a recent meeting against the raise in the rates of the Order on fraternal insurance to the older members.

The first application for the issuance of new stock for shares lost with the Titanic has just been passed upon by the State Court, New York, on a motion by a firm of brokers for an order compelling the New York Central Railroad to issue a new certificate for 100 shares sent from London by registered mail on that steamship. The court granted the order.

The fourth annual convention of the Provincial Association of Fire Chiefs for the province of Ontario will be held at Woodstock on September 12 and 13, at which will be shown an exhibit of all tools and equipments associated with modern fire department equipments. Fire Chief Bain (the president of the Association), Woodstock, Ont., will supply information regarding the exhibits, etc.

That natural gas does not come under the term "mines of minerals," is the opinion of the judicial committee of the Privy Council, on which is based the judgment dismissing the appeal of the Canada Company. The appeal was taken by the company against judgment in favor of a farmer named Farquharson. The case was a test to determine as between the Canada Company and the purchasers from the company, what rights were reserved under the form of conveyance adopted by the company in disposing of lands in the south-western Ontario oil region.

A large new floating dock left England to-day for Montreal. The dock is capable of taking the largest merchant vessel trading in the St. Lawrence. The basis is now ready, so that when the dock reaches Canada Montreal will possess facilities which have hitherto been lacking. A floating dock has been preferred because it can be towed to any point of the Atlantic seaboard of the Dominion. The dock is 600 feet long and 135 feet wide over all, the walls from the bottom to the top of the dock being 50 feet. Ships of 100 feet beam can be docked, and as the ends are open a vessel of any length can be accommodated. It has been constructed at the works of Messrs. Vickers, Barrow-in-Furness, and will be towed across the Atlantic.

Tilbury, Ont., ratepayers will vote on a by-law to loan \$5,000 to the Imperial Rubber Company to assist in the establishment of a factory. The company will repay the loan in ten annual instalments of \$500 each without interest, and guarantees to employ in the factory an average of not less than thirty men during the first three years after the first day of December of the present year, and to expend on its pay-roll an average of not less than \$15,000 during each of these three years, and for the next seven years to employ an average of not less than forty hands each year, and to expend on its pay-roll an average of not less than \$20,000 in each of the last seven years. The town is to provide a suitable site for the factory, and will exempt the company from taxes, other than school rates and for local improvement purposes, for ten years, and will give the company free water, not to exceed fifty barrels each day, for ten years.

ANALYSES OF COMMERCIAL PRODUCTS

Inland Revenue Department's Definition of Cider— Need of Legal Minimum Gas-producing Power for Baking Powder

Since this is a first inspection of cider under legal definition, states a report issued from the inland revenue department at Ottawa, it is open to question whether the penalties prescribed by the Act need be enforced. It may be reasonable to regard this inspection and report rather as a means of bringing these recently enacted standards to the notice of the trade, and the public, and the following terms should be of interest to those concerned in the manufacture of cider.

Sixty-nine samples of beverages sold as cider or as sweet cider were reported upon by the chief analyst, Mr. A. McGill.

These terms are defined by order-in-council taking effect from March 13, 1911.

Cider is defined as follows:—

Cider, hard cider, is the product made by the normal alcoholic fermentation of apple juice, and the usual cellar treatment, and contains not more than seven (7) per cent. by volume of alcohol, and in one hundred (100) cubic centimetres (20° C.) of the cider, not less than two (2) grammes nor more than twelve (12) grammes of solids, not more than eight (8) grammes of sugars, in terms of reducing sugars, and not less than twenty (20) centigrammes nor more than forty (40) centigrammes of cider ash.

Of thirty-three samples sold as cider, twenty-seven samples meet the requirements of legal definition, and must be recognized as genuine, under the Act. Six samples which fail to meet the standards named, appear to have had water added to the apple juice. This is indicated by the small amount of mineral matter (ash) present. Six samples contain preservatives.

Eight out of Thirty-six Meet Requirements.

Apple juice or sweet cider is defined as follows:—

Apple juice, apple must, sweet cider, is the fresh juice obtained from apple, the fruit of *Pyrus malus*, has a specific gravity (20° C.) not less than 1.0415 nor greater than 1.0690; and contains in one hundred (100) cubic centimetres (20° C.) not less than six (6) grammes, and not more than twenty (20) grammes of total sugars, in terms of reducing sugars, not less than twenty-four (24) centigrammes nor more than sixty (60) centigrammes of apple ash, which contains not less than fifty (50) per cent. of potassium carbonate.

Out of thirty-six samples sold as cider, only eight are found to meet the requirements of the legal definition. It may be urged, in some cases, that the definition quoted does not apply since the articles are labelled with modified names as "Champagne Cider," "Raspberry Cider," &c.; but so long as the word cider appears upon the label, and the beverage is supplied to our inspectors on a demand for cider, it seems proper to judge the article as cider.

Arranged in Classes.

Regarding the Canadian baking powders, Mr. McGill says: The baking powders found upon the Canadian markets may be arranged in four classes, on the basis of their essential acid components, as follows:—

	Samples.
Alum phosphate powders	68
Cream of tartar "	46
Acid phosphate "	31
Alum powders	5
Total	150

No complaint, upon the ground of wholesomeness, has been formulated against cream of tartar or acid phosphate powders, to my knowledge. The wholesomeness of such as contain alum, either as the sole acid component, or in combination with acid phosphate of lime has been frequently questioned and is at present an unsettled point.

Will Deteriorate by Keeping.

It is in the nature of a baking powder to deteriorate (in the sense of yielding gas) by keeping; the rate of deterioration depending much upon the hygroscopicity of the materials; their initial dryness; the way in which it is packed, and the conditions under which it is stored. It is clear that so far as length of time in stock, and conditions of storage are concerned, the manufacturer of the powder is irresponsible; for this reason, the retail vendor must be held responsible for the strength (gas producing power) of the article he sells. He should assure himself of the quality of the goods he buys, for his own protection; and this is pro-

vided for in section 33 of the Act; for their condition as he sells them, he must hold himself responsible.

Since we have, as yet, no legal minimum prescribed for the strength of baking powders, none of those now reported can be described as adulterated under the Act. Baking powder of very varying strength is offered for sale; and emphasizes the necessity of fixing a minimum gas producing power for a legal baking powder.

RAILWAY EARNINGS.

The following are the railroad earnings for the week ended July 21:—

	1911.	1912.	Increase or Decrease.
C. P. R.	\$2,120,000	\$2,593,000	+ \$473,000
G. T. R.	960,016	1,047,951	+ 87,935
C. N. R.	337,000	426,100	+ 89,100
T. & N. O. R.	37,066	30,441	— 6,625
Halifax Electric	5,262	5,628	+ 366

The following are the railroad earnings for the week ended July 31:—

	1911.	1912.	Increase or Decrease.
C. P. R.	\$2,170,000	\$2,701,000	+ \$531,000
G. T. R.	1,339,472	1,544,003	+ 204,531
C. N. R.	427,700	575,000	+ 147,300
T. & N. O. R.	47,833	41,374	— 6,459
Halifax Electric	7,591	7,440	— 151

The official figures on the fiscal year of Canadian Pacific Railway ended June 30 show gross earnings of \$123,319,541, and net of \$43,298,243.

These compare as follows with last year:

	1912.	1911.	Inc.
Earnings	\$123,319,541	\$104,167,808	\$19,151,736
Expenses	80,021,298	67,467,977	12,553,321
Net profits	43,298,243	36,699,830	6,598,412

The heaviest monthly gross receipts were for April, May and June, when they exceeded \$11,300,000, the only other month approaching these figures being October, 1911, when they ran as high as \$11,200,000.

The smallest monthly gross was \$7,328,781 in January.

In four months of the fiscal year the net earnings exceeded \$4,000,000. These were August, October and December, 1911, and April this year.

The gains in gross over the preceding year ranged from \$733,872 in September to \$2,629,325 in April, and gains in net went from \$5,848 in September to \$1,239,150 in February.

The company's figures for June and the fiscal year are as follows:—

	June 1912.	July 1st to June 30, 1912.
Gross earnings	\$11,311,397.20	\$123,319,541.23
Working expenses	7,464,794.51	80,021,298.40
Net profits	3,846,602.69	43,298,242.83

In June, 1911, the net profits were \$3,024,671.05; and from June 1st to June 30th, 1911, there was a net profit of \$36,699,830.57. The gain in net profits over the same period last year is therefore, for June, \$821,931.64; and from July 1st to June 30th, \$6,598,412.26.

The Canadian Northern traffic earnings and expenses for the month of June, with comparisons, are as follows:—

	June, 1912.	June, 1911.	Inc.
Gross earnings	\$1,769,500	\$1,465,600	\$303,900
Expenses	1,347,800	1,147,400	200,400
Net earnings	421,700	318,200	103,500
Mileage in operation	4,297	3,698	599

For the year ended June, 1912, earnings and expenses compare as follows with the previous year:—

	June, 1912.	June, 1911.	Inc.
Gross earnings	\$10,538,600	\$15,190,500	\$4,330,100
Expenses	14,422,500	11,033,700	3,388,800
Net earnings	5,116,100	4,165,800	950,300
Mileage average	3,888	3,383	505

The Hippodrome and Circus at the Canadian National Exhibition, Toronto, will be on a scale never before attempted in this country. Trained elephants and educated horses will feature. Chariot races will give a flash of old-time splendor to the performance. The finest high wire and acrobatic troops of the amusement world will be there in abundance, while a great gathering of clowns and other laugh makers will help to keep the crowd in constant good humor. Four stages and an arena will be constantly occupied during the performance.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

\$1,031,929.99

CITY OF OTTAWA, ONTARIO.

Debentures for Sale.

Tenders addressed to "The Chairman, Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa until 3 p.m. on Thursday the 29th August, 1912, for the purchase of \$12,000.00 40 year debentures, \$727,500.00 30 years, and \$292,429.99 20 years.

They are all a liability of the City at large, and bear 4% interest, payable 1st January and 1st July.

Two separate tenders will be received, one for \$40,000.00 30 year debentures, and the other for the remainder of the debentures \$991,929.99.

All tenders must be on the official form. The tender for the \$40,000.00 debentures must be accompanied with an accepted cheque for \$1,000.00 and the tender for the \$991,929.99 debentures with an accepted cheque for \$5,000.00.

Accrued interest from 1st July, 1912, must be paid in addition to the price tendered.

The \$40,000.00 debentures are in \$1,000.00 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York or London, at the option of the purchaser, and in denominations to suit.

Delivery of the \$40,000.00 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,

Ottawa, 29th June, 1912.

Mayor.

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to 6 o'clock p.m. on the 31st day of August, 1912, for the purchase of \$4,000 5½ per cent. Government Guaranteed General Debentures repayable in twenty equal annual payments with interest.

The highest or any Tender not necessarily accepted.

F. HOPWOOD,

Duck Lake, Secretary-Treasurer.
July 22nd, 1912.

IMPERIAL, SASK.

Debentures for Sale.

Tenders will be received by the undersigned up to September 15, 1912, for the purchase of \$15,000 6 per cent. waterworks debentures, 15 years. Tenders to include bank charges and cost of printing debentures. Full particulars, together with further conditions, can be secured from

J. G. HOBMAN,

Imperial, Sask., Secretary-Treasurer.
July 26th, 1912.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale, apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, July 17th, 1912.

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to 6 o'clock p.m. on the 31st day of August, 1912, for the purchase of \$6,000 5½ per cent. Government Guaranteed General Debentures repayable in twenty equal annual payments with interest.

The highest or any Tender not necessarily accepted.

F. HOPWOOD,

Duck Lake,
July 22nd, 1912.

Secretary-Treasurer.

TENDERS FOR PULPWOOD LIMIT.

Tenders will be received by the undersigned up to and including the 15th day of August next, for the right to cut pulpwood on a certain area situated on the Abitibi Lakes and River, tributary to the Grand Trunk Pacific Railway, and the Temiskaming and Northern Ontario Railway, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario,—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, Ontario, May 15th, 1912.

GEO. B. R. BOND,

Secretary-Treasurer,

Bassano, Alta.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 13th day of July, 1912, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper; and Robert Musgrave Coates and William George Flood, solicitors' clerks; all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To underwrite, subscribe for, purchase or otherwise acquire and hold either as principal or agent, and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in the bonds or debentures, stocks, shares or other securities of any government or municipal or school corporation or of any bank or of any other duly incorporated company or companies or corporation or corporations; (b) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (e) To construct, maintain, alter, make, work or operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighbourhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (k) To issue and allot as fully paid-up shares of the company hereby incorporated, in payment or part payment of any property, movable or immovable, property rights, lease, business franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same, or any part thereof, in bonds or debentures of this company;

(l) To draw, make, accept, endorse, discount and execute promissory notes, bills of exchange, warrants, and other negotiable or transferable instruments; (m) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company, and necessary to enable the company to profitably carry on its undertaking; (n) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (o) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (p) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (q) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (u) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (v) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Brazilian Traction Light and Power Company, Limited" with a capital stock of one hundred and twenty million dollars, divided into 1,000,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State, of Canada, this 13th day of July, 1912.

THOMAS MULVEY,

Under-Secretary of State.

Dated at Toronto this 22nd day of July, A.D. 1912.

BLAKE, LASH, ANGLIN & CASSELS,

Solicitors for

BRAZILIAN TRACTION LIGHT AND POWER COMPANY, LIMITED.

A by-law to grant a \$5,000 site and a limited fixed assessment for 10 years to the Wood Chemical Company of Canada was carried by the ratepayers of Belleville, Ont. The company is capitalized at \$500,000. Buildings are to be started in three months to cost \$150,000. From forty to sixty men will be employed at the start. The company owns 124 square miles of timber lands in Herschel, Sabine and McClure townships. Material will be brought in by the Central Ontario and Canadian Northern Railway. The products are acetate of lime and wool alcohol. One of the by-products is charcoal.

STOCKS AND BONDS—TABLE NOTES.

(u) Unlisted.

†Canadian Consolidated Rubber Bond Denominations, \$100, \$500 and \$1,000. Steel Company of Canada, \$100, \$500, \$1,000. Sherwin Williams, \$100, \$500 and \$1,000. Penmans, Ltd., \$100, \$500 and \$1,000. Canadian Cottons, \$100, \$500 and \$1,000. †Quarterly Quotations for Coniagas, Crown Reserve, La Rose, Nipissing and Trethewey will be found among the Toronto Exchange figures.

Quotations of Cobalt and Porcupine Mining Stocks are those of Standard Stock and Mining Exchanges.

Montreal Steel Stocks are commonly termed "Switch" on the Exchange. They are quoted as Montreal Steel in our tables.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

*Also a bonus of 10% per annum for 1911.

**Trethewey pays no regular dividend. They have paid:—1906, 4%; 1907, 4%; 1908, 15%; 1909, 25%; 1910, 10%; 1911, 20%; to June 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Co., 12 St. Sacramento Street, Montreal.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.

(1) Aug. 1-12

(2) Aug. 17-Sept. 3

(4) August 24-31

(5) August 16-24

Mr. T. W. Hunter, who has been associated with Messrs. Smith, Mackenzie and Hall, of Toronto, during the last eight years, has been admitted into partnership.

The Canadian Pacific Railway will begin the work of double-tracking the line between Ruby Creek and Hammond Pit, B.C., immediately. The distance is about 57 miles, and to parallel the present line will cost upwards of \$3,000,000.

The contract for fifty-seven miles of the Kettle Valley, B.C., Railway has been let. The line is to run from Pentiction through Naramata to the Hydraulic Summit, near Kelowna. The successful contractors were Messrs. Grant Smith & Company, of Spokane. The work is to start at once from Pentiction.

Mr. T. Harry Webb, of Messrs. Webb, Read, Hegan, Collingham and Company, Montreal, who has just returned from a business trip to Europe, is at Montreal, previous to proceeding to Western Canada.

By a vote of 43 to 14, the United States House of Representatives adopted a provision giving the President control of all affairs at Panama, with power to appoint a Governor "to complete, govern and operate" the Canal and Canal zone.

The Bank of Nova Scotia has opened branches at Lethbridge, Alta., where Mr. E. F. MacNeill has been appointed manager; Gagetown, N.B., with Mr. G. M. Schurman in charge, and Ville St. Pierre, Hochelaga county, Que., where Mr. B. W. Gavey is manager.

PRESIDENT TAFT'S PEN

The passing of the Panama Canal administration bill last week by the United States senate was a serious step to be taken by a responsible nation. It contains a provision exempting United States merchant ships from the payment of canal tolls, while foreign ships remain subject to them. That exemption directly violates the Hay-Pauncefote treaty, which was ratified in 1911. The United States senate has not only ignored the existence of the treaty, but also the protest of Great Britain at the proposed passage of the bill. Fifteen senators voted against the legislation. They alone endeavored to uphold the honor of the United States against its impairment by the forty-seven senators who voted in favor of discrimination despite the treaty.

The Monetary Times does not believe that the people of the United States endorse their senate's questionable action. The responsible press of the republic reflects that opinion. President Taft has, as usual, cleverly balanced himself on the fence of discussion, instead of voicing the only just and honorable course to be taken by the country of which he is, at present, chief executive. His proper course now is to withhold his signature from the bill as passed by the senate.

Senator Percy, of Mississippi, rightly regards the bill as being directly opposed to the principle of the Hay-Pauncefote treaty and as a blow at national honor. "The United States is too great a country," he says,

"to stoop to such practices as that embodied in the measure before the Senate. The adoption of the proposal is entirely unworthy of a nation of the first class."

In his Chicago speech, Mr. Roosevelt stated that the United States had deliberately, with their eyes open, and after ample consideration and discussion agreed to treat all merchant ships on the same basis. "It was partly because of this agreement," he continued, "that there was no question raised by foreign nations as to our digging and fortifying the Canal; and, having given our word, we must keep it. When the American people make a promise, that promise must and will be kept."

The United States can gain little by its extraordinary action. On the other hand, that action besmirches its honor. It boldly invites retaliation on the part of other nations. It minimizes prospects of the early enjoyment by the Canal of large traffic. It places the new waterway in a contentious instead of a harmonious atmosphere. It arouses disgust for the senators who have lightly repudiated the pledges made by the United States to the British government at the time the treaty was negotiated. It creates a new standard of treaty ethics which every other nation must ignore. It gives to the Hague court a case which the national pride of the United States should have withheld therefrom. President Taft still has the opportunity of scratching his pen across the senate's bill. But politics will probably insist.

UNITED STATES BANKERS AND CANADA'S BONDS

At a meeting of United States investment bankers in New York last week, Mr. G. B. Caldwell, of the Continental Trust and Savings Bank of Chicago, spoke of the large amount of capital being placed in this country. "During the past two years," he said, "we have been sending large amounts of capital to Europe and to Canada, yet our railroads are unable to secure capital at home needed for financing necessary improvements at rates they can afford to pay. Some have borrowed abroad, while many others are at standstill. In sharp contrast to the situation is the extensive railroad construction now being carried on in Canada under the fostering influence of a liberal Government policy."

Mr. Caldwell placed too much emphasis upon the amount of United States capital placed in Canadian investments and scarcely touched the reasons for the attractiveness of Canadian railroad securities. Nearly all the 4 per cent. perpetual debenture stock and the 4 per cent. preferred stock of the Canadian Pacific Railway is held in Great Britain. Of the common stock, holders in Great Britain have approximately 65 per cent. and only 20 per cent. is divided between Canada and the United States. The shares of the Grand Trunk are almost exclusively held in England. Ninety-eight per cent. of the securities of the Canadian Northern Railway are held in the United Kingdom.

The United States are not large purchasers of our bonds generally, although they are receiving year by year greater patronage from that direction. In 1910, 1½ per cent. of our total bond issues were sold in the United States, and last year 6½ per cent. The proportion during the current year will be still larger. The chief investments of the United States in Canada, as is generally known, are in the shape of branch industrial plants, and in the purchase of lands, timber and mines. Mr. Caldwell, therefore, may breathe more easily regarding the amount of United States money being placed in Canadian bond issues.

Our railroads are, as he says, receiving liberal government assistance, mostly in the form of bond guarantees. These naturally add attractiveness to the securities. Our best industrial bonds also are in high favor, in view of the facts that Canada is in the midst of strenuous development, has a legitimate call for immense sums for that purpose, is enjoying good crops and an era of prosperity. So long as we protect Canadian credit by selling only first-class securities, we may expect their world-wide patronage. With periodical depression, these conditions should continue, in varying degrees of strength, for at least another half century.

Mr. Caldwell's cry was not so much that he and his colleagues respected Canadian securities less as that they desired United States securities respected more. "There is a demand," he said, "that security for our bond and stock issues should be improved, and if we form this organization we shall be better prepared to take our share of the responsibility which progress will require, and, I believe, be able to reap that result which attaches to the legitimate promotion of United States industries."

The purposes of the Investment Bankers' Association of America, the organization to which he referred, were set forth as follows in the preamble of its constitution: "To promote the general welfare and influence of investment banks or bankers, likewise banking institutions operating bond departments, and to secure uniformity of action, both in legislation and in methods of handling securities, together with the practical benefits to be derived by personal acquaintance, and for the discussion of subjects of importance to the banking and commercial interests of the country, which affect the investing public, and for protection against loss by crime, or through wilful and irresponsible dealers in

investment securities, and to surround the offerings of its members with greater safeguards, whereby they will enjoy the broadest markets possible, both at home and abroad."

That is an ambitious programme, and, if carried through, should help to place United States bonds where Mr. Caldwell and his associates desire. The name of the Association would suggest that Canada may be represented, for the word "America" has been chosen instead of the words "United States."

CANADIAN LIFE COMPANIES ABROAD

Ten Canadian life insurance companies were doing business in other countries as well as in Canada last year. These companies had a net amount in force on December 31st, 1911, in countries other than Canada of \$147,114,897. The details are as follow:—

Company.	Net amount in force (outside Canada).
Canada	\$28,635,786
Confederation	7,775,581
Federal	700,881
Great West	1,366,566
Imperial	2,113,451
Manufacturers	18,125,272
Mutual (of Canada)	513,890
National	76,750
North American	4,531,993
Sun	83,274,757

These companies have transacted the insurance business abroad in varying degree. The outside business of the Sun Life, for instance, exceeds by \$2,000,000 its net amount in force in Canada, which is \$81,000,000. More than one-third of the amount in force of the Manufacturers Life and the Canada Life is outside Canada; one-seventh, Confederation Life; and one-tenth, North American Life. Only a small proportion of foreign business is included in the figures of the National, Mutual, Imperial, Great West and Federal. The premiums for last year were as follows, compared with the premiums obtained by the companies in Canada:—

Company.	Premiums in Canada, 1911.	Premiums in other countries, 1911.
Canada Life	\$2,759,993	\$1,793,392
Confederation Life..	1,621,593	412,360
Federal	783,495	36,557
Great West	2,101,741	28,814
Imperial	1,079,668	113,729
Manufacturers	1,556,112	1,012,304
Mutual (of Canada).	2,431,297	22,765
National	440,676	2,993
North American . . .	1,479,357	174,505
Sun	2,883,390	5,391,261

The number of policies of these ten companies in force in foreign countries at the end of last year was 88,944, and 13,862 new policies were taken during 1911. The claims paid by these companies in other countries than Canada last year amounted to \$1,731,353.

MONTREAL'S GRAIN TRADE

Considerable publicity has been given to a statement that Montreal will lose its grain trade to Buffalo unless much is done to improve the grain-handling facilities of the port. Montreal has not the slightest intention of permitting the grain trade of the port to be lost for want of enterprise on its part. The time has long since passed when there was any danger from inertia. Both commercial and financial circles express the utmost confidence that the Harbor Commissioners, as at present constituted, will not only be able to deal with the situation, but will actually do so.

At present, the grain storage capacity of the port is as follows:—

	Bushels.
Harbor Commissioners' Elevator No. 1.....	1,000,000
Harbor Commissioners' Elevator No. 2.....	2,600,000
Grand Trunk Railway Elevator "B".....	1,050,000
Montreal Warehousing Company's Elevator "C"	600,000
Montreal Warehousing Company's Elevator "A"	500,000
Total	5,750,000

The Canadian Pacific Railway formerly had a capacity of about 1,000,000 bushels in its elevators there, but these have been demolished during the past few years. The Harbor Commissioners' Elevator No. 2, although not fully completed, is now receiving grain.

The grain-congestion at Montreal has been considerable, but the completion of the elevator and the installation of new machinery will unquestionably give some relief. In addition, there is being installed a set of conveyers to connect the two elevators, so that grain may be taken from boats or barges and elevated into, say, No. 1 Elevator and thence conveyed to Elevator No. 2, and loaded into ocean-going boats. The completion of such a system will add largely to loading and unloading facilities.

There is every reason to believe that a programme will not long be delayed which will add to the elevator capacity of the port. The only question at issue is as to how quickly additional elevator space can be furnished, and whether the requirements will not increase at a more rapid rate than facilities. The feeling in Montreal is that this matter may safely be left to the Harbor Commissioners, who are thoroughly alive to the interests of the port.

TORONTO'S BOND SALE

Mayor Geary, of Toronto, in a solicited interview and acting Mayor Church in a gratuitous statement have apparently mistaken the main point of criticism levelled at the city's financiers.

It is not claimed that Toronto did worse with its bonds than other borrowers in London in the present market, nor that Toronto's credit is poor. Neither is it contended that Mayor Geary and City Treasurer Coady did not do what was best in view of the circumstances prevailing in the overseas market. Nor is credence placed in the insinuation that the Mayor and city treasurer combined business and pleasure. Neither is it denied that the trip was "the hardest summer's work" Mayor Geary ever did. Nor is the mayor's analysis of London market conditions disputed.

The points which neither mayor, acting mayor, city treasurer nor anyone else in high civic official places, has yet explained are why the city did not accept the sound advice tendered early in the year respecting an immediate sale of its debentures before the market declined, and why it did not accept one of the offers made for its bonds, offers which were several points higher than that spurned in London the other week because it was too low?

The city of Winnipeg took counsel similar to that rejected by Toronto and Montreal. Winnipeg obtained 98 for its bonds. Toronto and Montreal have been compelled to make temporary loans at high rates of interest.

NEED FOR HOUSES

The city of Fort William has signed contracts with five industrial companies for the establishment of plants there within a year. These firms will employ at least 1,500 men, which may mean an increase, taking an average of four to a family, of 6,000 in the population

of Fort William. How will homes be provided for these people? This question must be answered before the city can hope to secure further industries. It is said many citizens are building houses to rent at from twelve to twenty dollars a month, but such enterprise and capital is naturally limited.

The situation would seem to create a favorable opportunity for capital to become interested in the building of houses at Fort William—and this applies to other cities also. The return upon such investment should prove rapid and remunerative.

SMALL CHANGE

Lord Mersey's Titanic report was justice tempered with Mersey.

* * * *

The dictagraph will likely solve the problem of the cost of living—honestly.

* * * *

The Panama Canal problem having pleaded not guilty, must now be tried by the Hague Court.

* * * *

It is a little risky to swell the Canadian crop chest with pride just yet lest a weather button break.

* * * *

The cost of living is to be given another tanning, the price of leather having been advanced ten per cent.

* * * *

The directory gives Montreal a population of 530,437, but the modern directory is more influential than the ancient stork.

* * * *

Trading in deposit receipts is something unusual for the Toronto Stock Exchange. Trading in I.O.U.'s would prove exciting in these days of credit.

* * * *

They have high expectation of life in Danville, Illinois, where a 50-years old man has been fined for embezzlement and given 156 years to pay the fine.

* * * *

A Philadelphia man on being held up, swallowed four twenty-dollar bills. This looks like a bad debt unless the swallower is deposited in the nearest bank.

* * * *

A Canadian representative on the Privy Council is suggested. How would Mayor Geary, Toronto; Mayor Brown, North Toronto; Mayor Waugh, Winnipeg, or N. E. Temere, Quebec, do?

* * * *

Here is a note of warning in a letter to *The Monetary Times* from Le Pas, Manitoba: "The town is full of surveyors for big real estate firms. Lots on muskeg are offered for sale at \$300. People in Winnipeg and Eastern Canada will be swindled if they buy. Even lots which the old timers here say are covered in spring with water four feet deep are bought by the unsuspecting public."

* * * *

The London and British Columbia Industrials, Limited, is selling stock in the Night and Day Company, Limited. The latter concern will do "a banking business by night and day." Advertisements predict that it will within a few years become "the strongest financial power in Western Canada." There is no need or general desire for night banking. Our population is too small and our savings well provided for in banks which are content to close at sunset. We question the propriety, too, of the company using the term "banking business," it having no bank charter.

VANCOUVER'S JULY FIRE LOSS.

The approximate loss by fire during the month of July was \$291,880; the insurance paid was about \$163,980, leaving the property loss above insurance paid \$127,900. The approximate total damage done at the Main Street fire was about \$289,000. The department responded to a total of 42 alarms during the month, one of which was at Seventeenth Avenue and Main Street, South Vancouver; 5 of the alarms were false calls, 1 was a chimney fire, 17 were for fires where damage occurred, and 19 were small fires, rubbish piles, tar pots, bush fires, etc., where no damage resulted. The total hose laid at fires was 21,900 feet, while 1,809 gallons of chemical was used. A complete list of fires where damage occurred follows:—

July 1st.—Alarm from Box 37 at 12.52 p.m. Fire in clothing store at 624 Main Street; cause unknown. Building owned by Mr. Cameron and occupied by J. P. Bloom. Damage \$1,350, covered by insurance.

July 3rd.—Alarm from Box 24, at 9.55 p.m. An automobile on fire at the corner of Abbott and Hastings Street, caused by back fire in carburetor. Damage \$150.

July 5th.—Alarm from Box 31 at 3.27 a.m. Small fire in basement at 445 Carrall Street, cause unknown. Building owned by Sam Sing and occupied by Chinese, and used as a printing office and stores. Damage \$100, covered by insurance.

July 6th.—Alarm from Box 8 at 2.22 p.m. Small fire on roof of dry kiln at the Cascade Mill plant, False Creek, caused by flying sparks. Damage \$15. Telephone alarm at 11.15 p.m. Small fire in two-story frame building at 923 Pender Street East, caused by a candle being upset. Building owned by A. McCallum and occupied by J. Roy and used as cabins. Damage \$5.

July 8th.—Alarm from Box 847 at 11.10 a.m. Fire on roof of building under construction at 25th and Fraser Avenue, caused by a tar pot being upset. Building owned by Mr. Hicks. Damage \$15. Alarm from Box 716 at 9.12 p.m. Fire in a two-story vacant frame dwelling at 739 Broadway East, owned by Geo. Hunter. The fire started in the attic from some cause unknown and burnt off the roof. Damage \$525, covered by insurance.

July 10th.—Telephone alarm at 5.01 p.m. Fire in basket of clothes on porch in rear of 750 Cordova Street East, caused by children playing with matches. Building owned by Mrs. Mold and occupied by Mrs. Newton and used as a dwelling. Damage \$25, covered by insurance.

July 11th.—Alarm from Box 262 at 1.45 p.m. Fire in a two-story frame dwelling at 2334 Victoria Street, owned and occupied by George Caldwell. The blaze was in the attic and was caused by a defective chimney. Damage \$200, covered by insurance.

July 14th.—Telephone alarm at 1.20 a.m. Fire in a Chinese laundry at 1815 Fifth Avenue West, caused by an overheated chimney. Building owned by Gow On, and occupied by Lee Yick Lung. Damage \$25.

July 18th.—Telephone alarm at 1.32 p.m. Small fire on roof at 334 Main Street, caused by sparks from chimney. Building owned and occupied by Mr. McArthur, and used as an office. Damage \$10, covered by insurance.

July 19th.—Alarm from Box at 6.05 a.m. Armature in an electric motor burnt out in rear of P. Burns butcher shop, 14 Hastings Street West. Damage \$75. Alarm from Box 8 at 3.16 p.m. Fire in an old stable at the Cascade Lumber Mill yard, False Creek, caused by flying sparks. The building was used for the storage of shingles. Damage \$15. Telephone alarm at 4.30 p.m. Fire in partition at 146 Hastings Street West, caused by an overheated flue. Building owned by Franklin and Baynes, and occupied by The White Lunch, and used as a restaurant and rooming house. Damage \$60, covered by insurance.

July 20th.—Telephone alarm at 12.29 a.m. Fire on the west side of Main Street in the 900 Block. On arrival of the fire apparatus, Champion and White's warehouse, in the rear of their main building at 941 Main Street, was all ablaze, and the flames were shooting skyward and into the brick block. Both the brick and warehouse were destroyed and the flames quickly spread to several frame buildings in the immediate vicinity, covering a space of about two acres before the blaze was brought under control. The origin of the fire was unknown. The following firms were the principal losers by the fire:—Champion and White, builders' supplies, warehouse, building and stock; Palmer Brothers and Henning, buildings and stock; Canada Malleable Steel Range Company, stock; Commercial Motors, Limited, machine shop and about 50 automobiles which were stored there; Royal George Hotel, slight damage to building and contents; Angeles rooming house, both building and contents damaged; British Columbia Electric Railway Company, paint shop and one street car damaged; Tudhope Motors, Limited, slight damage to contents. Far West Lumber Company, stock. Total damage about \$289,000. Insurance paid, about \$161,500.

July 28th.—Alarm from Box 36 at 1.38 a.m. Fire in the ground floor of building at 251 Powell Street, caused by a defective chimney. Building owned by the Canada Mio Company, Limited, and occupied by Japanese and used as a rice mill, offices, rooms, etc. Damage \$300, partly covered by insurance. Alarm from Box 243 at 10.48 a.m. Small fire on roof at 1541 Third Avenue West, caused by a defective chimney. Building owned by Mrs. A. C. Fraser, and occupied by S. Osterman, and used as a rooming house.

Total number alarms, 42; false alarms, 5; chimney fires, 1; property involved, \$614,178; loss, \$291,880; insurance paid, \$163,980; loss above insurance paid, \$127,900; hose laid at fires, 21,900 feet; chemical used, 1,809 gallons.

WESTERN CROP REPORT.

(Staff Correspondence.)

Monetary Times Office,

Winnipeg, August 13th.

The weather conditions are continuing favorable to the maturing of the crop. That is the latest report received by the Canadian Northern Railway concerning the state of the crop throughout the West. The continued fine and warm weather is maturing the grain rapidly. Slight damage is reported from frost in some localities, but it is not general and not of a serious nature. The following is a more detailed report:

The Kamsack division reports that the crop conditions are good but with too much rain in the past few days, and as a result the growth is a little backward. Around Verigin, in the Humboldt division, the crops are growing splendidly, and all coarse grains well out in head. At Humboldt a slight damage has been done by hail. Cutting will start about the end of August.

There is a good report from the North Battleford division. At Lamont the damage from frost in the grain is ripening nicely and they expect to cut about the 10th or 12th. At Dalmeny the average yield will be 23 bushels per acre. In the Vermilion sub-division, around Maidstone, wheat is 32-36 inches above ground. Flax is all out in bloom. The warm weather benefited the grain but more is required. Lashburn reports a slight damage from frost with the weather clear and warm. While the yield will not be as large as usual the quality will be better.

The Edmonton division has had fine weather in the past week, and indications are that the wheat is ripening very fast, the conditions being good. At Lamont the damage from frost in some localities is greater than at first expected, farmers cutting it for green feed rather than let it stand and ripen. But the majority of the crop is making satisfactory progress.

The crop continues to look fine at Findlater, in the Saskatoon division. They expect 20-23 bushels per acre. The weather is ideal and the harvest will begin about the 15th. At Girvin, rain is needed, it being very hot and dry. A large amount of grain has been destroyed by hail, and slight red rust is reported. Harvest will be general by the 20th. Prince Albert will also start cutting about this date. Buck Lake reports are all that the grain is looking well.

In the Battle River division, at Munson, the grains are ripening fast. The rain has done no damage so far. The flax is all in bloom and oats will be about 60 per cent. of a full crop. Oats will average 60 bushels to the acre and wheat 25-28.

FOREIGN EXCHANGE

Glazebrook & Cronyn, exchange and bond brokers, report exchange rates as follows:—

PERSONAL NOTES

Sir Maxwell Aitken arrives in Canada from London this week.

Mr. Samuel Hale has been appointed as general manager of the Algoma Steel Corporation.

Mr. W. J. Lindsay, of the Matheson-Lindsay Grain Company, has been appointed manager of Grain Growers' Grain Company's elevator system.

Mr. T. S. G. Pepler, of the Ontario Securities Company, Toronto, has returned from a visit to England.

Mr. N. B. Harris, of Messrs. N. W. Harris and Company, the Boston house interested largely in Montreal tramway securities, was in Montreal this week.

Mr. E. Denhold Young, senior partner of Messrs. Young & Falconer Edinburgh, and chairman of the Dominion Agency, Limited, London, is a visitor to Canada.

Dr. Hammann has left Berlin, Germany, for Canada, where he will establish a branch of the German-Canadian Economic Association with the object of developing trade relations.

Sir George Askwith, chairman of the Industrial Commission of the British board of trade, and successful mediator in industrial disputes during the past few years, is to be sent shortly by the British Government to Canada to investigate the working of the Industrial Disputes Investigation Act in the Dominion.

Mr. C. B. Gordon has been elected as a director of the Royal Trust Company. This is a tribute to one of Canada's young financiers. His work as president of the Dominion Textile Company has been successful, and his promotion brings him into directorial association with many leaders of finance and business.

Mr. H. B. Walker, manager of the Canadian Bank of Commerce at Montreal, who is back from a holiday trip to the Old Country, states that there is no abatement in England of the interest which has been aroused there in the growth and development of our country, and there is just as much faith as ever in its future prosperity and development. There is a disposition to exercise more caution in investments. This is a natural sequence of events.

Messrs. Playfair, Martens & Company announce the dissolution of partnership between Mr. Stuart B. Playfair and Mr. A. H. Martens, each of whom has entered into a new partnership. Mr. Stuart B. Playfair has entered into partnership with Mr. P. L. Paterson, and will conduct business under the firm name of Messrs. Playfair, Paterson & Company, with offices at 36 King Street East, Toronto. Mr. A. H. Martens has formed a partnership with Mr. W. W. Baldwin. The new firm will be known as Messrs. A. H. Martens & Company, with offices at 14 King Street East, Toronto.

Dr. J. D. P. Ten Bosch, of The Hague, Holland, general manager of the Holland-Canada Mortgage Company, has been recently visiting Western Canada. This company has now about \$3,500,000 placed in mortgage loans through Canadian trust company channels. Its success has been largely instrumental in leading to the organization of other Dutch loaning companies, of which there are to-day several in the Western field. Among the points visited by Dr. Ten Bosch, in company with Mr. J. G. Coster, Canadian manager, were Brandon, Virden, Estevan, Drinkwater, Regina, Saskatoon, Moose Jaw, Mortlach, Swift Current, Calgary, Edmonton, Wetaskiwin, Lethbridge, Vancouver and Victoria.

Mr. R. E. Frizzell has been appointed as district manager of the Imperial Life Assurance Company of Canada for Edmonton and the surrounding territory. Mr. Frizzell brings to this new and responsible position skill and experience gained during a number of years' successful connection with the company's Calgary agency. Mr. R. J. Robinson, who has for some time been connected with the Edmonton agency, will continue his association with the company. The company's office will be continued in its present location on Jasper Avenue until September 1st, when it will be removed to the third floor of the Hart Building, on the north-west corner of Queen and Jasper Avenues.

Mr. G. T. Somers, president of the Sterling Bank, who has returned to Toronto after a six weeks' Western trip, thinks that the great needs of Western Canada are equalization of freight rates and flour mills. "The people of the Western provinces," he says, "are highly incensed over the local freight rates, and are demanding that an equalization be made, and that either the rates in the West be lowered or otherwise equalized with those charged in the East. Western people have some real grievances which should be adjusted. If they could have freight rates equalized and the government could see its way to pay a bounty on the manufacture of flour for export, I believe that the Western prairies would be dotted with flour mills; and, further, that it would satisfy the people of the West very largely, and do away with any cause of complaint they may have at the present time. If

the wheat were milled out there and the flour exported, there would be plenty of offal with which to feed stock. What farmers require is such offal."

On August 29th the ratepayers of Crowland township will vote on the following by-laws: Welland Terminals, Limited, by-laws provides for the fixing of the assessment of seven acres, block Q, plan 24, for ten years at \$5,000, and granting the company the right to lay switches on Orchard Avenue, east from the Grand Trunk. Northern Steel assessment by-laws provides for the fixing of the assessment of fourteen acres in lot 20, to be used as an industrial site at \$10,000 for a period of ten years, and granting the company the right to use Lincoln Street from the Grand Trunk Railway east to the works for a railway siding; also a by-law to grant the Canadian General Securities Corporation the privilege of constructing an electric railway, water mains, gas lines, and electric lines upon roadways in its property, known as Welland South. The boundaries of the areas specified are: Welland River, Toronto, Hamilton and Buffalo Railway line, Niagara, St. Catharines and Toronto Railway line, Welland Canal Feeder, and the township lines between Crowland and Humberstone, and Crowland and Wainfleet.

PUBLICITY BUREAU WAS A SUCCESS.

"That this board of trade has heard of the efforts put forth and the work accomplished by the publicity bureau, and hereby recommend its continuance and commend it to the active and enthusiastic support of citizens of Ottawa," was a resolution moved by Mr. W. H. Dwyre and seconded by Mr. Barrett, and which received unanimous endorsement at a meeting called to discuss the joint letter recently addressed to the Ottawa board of trade by a number of local merchants requesting the abolition of the publicity bureau on account of its alleged failure to accomplish that for which it had been established. Mr. H. W. Baker is the energetic commissioner.

BANK BRANCHES OPENED AND CLOSED IN JULY.

Twenty-six branches of Canadian chartered banks were opened during July and six closed; during June, twenty-one were opened and seven were closed; during May, fifty were opened and six were closed; during April, twenty-four were opened and eight were closed; during March, thirty-eight were opened and six were closed; during February, sixteen were opened and three were closed; during January, twenty were opened and five were closed. Houston's Bank Directory gives the following particulars for July:—

Branches Opened.

Big Valley, Alta.		Merchants Bank of Canada.
Cornwall, Ont.		Canadian Bank of Commerce.
Donalda, Alta.		Merchants Bank of Canada.
Englehart, Ont.		Bank of Ottawa.

Tavistock, Ont.		Traders Bank of Canada.
Wawota, Sask.		Dominion Bank.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

V.—SAVINGS IN DISTANCES

The steaming time between New York and San Francisco (including a half day for passing the Canal and another half day for coaling at the isthmus) will be about twenty-three days for 10-knot ships and nineteen days for 12-knot vessels. The present time taken by the railroads for moving carload freight from the Atlantic to the Pacific seaboard is about three weeks; thus freight vessels will have approximately the same schedule as freight cars. Fifteen-knot vessels will make the run between New York and San Francisco in fifteen or sixteen days, including a day for detention and coaling at the isthmus. Vessels with a speed of 15 knots are of the passenger rather than the freight class, and will probably not be operated in large numbers. The only considerable passenger traffic between the two seabords will consist of immigrants westbound and of excursionists in both directions. The Panama Canal is to be regarded as a coastwise highway for freight rather than for passengers.

Savings in Distances.

To make more clear the likely effects of the Canal we may examine the question of distances. The following savings will be effected for those ships using the new route. This table was specially prepared for *The Monetary Times* by the naval hydrographic office of the United States government:—

FROM	TO	VIA PANAMA	VIA MAGELLAN STR.	MILES SAVED
Vancouver-Boston		6217	13891	7674
Vancouver-Halifax		6392	13780	7388
Vancouver-Montreal		7235	14506	7271
Vancouver-New York		6049	13920	7871
Vancouver-Charleston		5639	13871	8232
Vancouver-New Orleans		5470	14336	8866
Vancouver-Galveston		5574	14512	8938
Vancouver-Liverpool		8623	14287	5664
Vancouver-Hamburg		9142	14668	5526
Vancouver-Antwerp		8880	14406	5526
Vancouver-Bordeaux		8673	14047	5374
Vancouver-Gibraltar		8408	13556	4948
Vancouver-Naples		9383	14331	4948
Montreal-Sydney		10997	13688	2691
Montreal-Sydney	(Via Tahiti)	10877	13688	2811
Montreal-Yokohama	(direct)	10885	13048	2163
San Francisco-Bish'ps Rk.		7341	13221	5580
Valparaiso-Bishops Rock		7012	8466	1454
New York-Yokohama		9699	13079	3380
New York-Shanghai		10573	12384	1811
New York-Sydney		9811	13402	3591
New York-Sydney	(Via Tahiti)	9691	13402	3711
New York-Melbourne		10194	12933	2739
New York-Wellington		8851	14129	5278
New York-Wellington	(Via Tahiti)	8522	14129	5607
New York-Manila	(direct)	11364	11544	180
New York-Hongkong		11212	11628	416
New Orleans-Shanghai		9994	13742	3748
New Orleans-Melbourne	Tsugaru Str.	9366	13443	4077
New Orleans-Wellington		7943	14639	6696
New Orleans-Manila		10785	12902	2117
New Orleans-Hongkong		10633	12986	2353
Wellington-Liverpool		11096	13553	2257
Wellington-Liverpool		11096	14462	1366

The above distances are all given in nautical miles.

The distance saved in sailing from Montreal, New York and Liverpool, via the Panama Canal, to ports northward of Panama will be approximately the same, and to ports northward of San Francisco the distances saved will be identical.

The opening of the Canal will place Vancouver nearer to Liverpool by 5,664 miles, a gain of about three weeks' steaming. A vessel from New York to Eastern Canada centres would save 7,871 miles by the Panama Canal, or a month's steaming. American Atlantic ports will be brought much nearer the Orient.

United States Ports and London.

New Orleans will also be placed nearer to most of those ports than is London, the commercial centre of the principal rival in the Oriental trade. The steamship distance from London via the Suez Canal to Yokohama, as given by an accepted authority, is 11,245 miles, against the distance from New Orleans via the Panama Canal to Yokohama, 9,268 miles; London to Shanghai,

10,650 miles; New Orleans to Shanghai, 10,254 miles; London to Melbourne, Australia, 11,250 miles; New Orleans to Melbourne, 9,427 miles; London to Wellington, New Zealand, 12,615 miles; New Orleans to Wellington, 7,939 miles, thus placing New Orleans 396 miles nearer to Shanghai, 1,723 miles nearer to Melbourne, 1,977 miles nearer to Yokohama and 4,676 miles nearer to Wellington, New Zealand, than is the chief commercial centre of the United States' chief rival in the Oriental trade, London, England.

Distance and Probable Effects.

New York will have an advantage of 2,500 miles and New Orleans 3,500 miles over Great Britain and Europe in reaching the west coast of North and South America. It is difficult to predict the effect of the Canal upon freight traffic between Europe and Valparaiso, the Cape Horn route being only 2,100 miles longer than the Canal route. Passenger ships probably will pass through the Canal, serving the east coast of South America by means of auxiliary ships sailing from West Indian ports. Trade between Europe and Japan will not be influenced by the Canal, as the Panama route

WHOLESALE SECTION, WATER STREET, VANCOUVER.

The Panama Canal will bring Vancouver and other Pacific Coast Ports nearer to Liverpool over 5,000 miles, and many similar savings in distances will also be effected.

will be 1,000 miles longer than the one now followed. From New York to Shanghai, on the other hand, the difference in favor of the Canal will be 1,400 sea miles. The present route from Europe to Australia is 800 miles longer than the route via the Canal, which is scarcely enough to effect any great change. It is assumed that a part of the business from New Zealand to Europe, which to-day comes via Cape Horn, will pass through the Canal hereafter, saving 1,600 sea miles. The Canal route will be selected also by passengers who wish to avoid the rounding of Cape Horn. The chief part of the steadily increasing business between New York and Australia and New Zealand should, therefore, proceed via the Canal rather than by the Cape of Good Hope, saving 2,300 sea miles. The probable changes in navigation routes will create equally great changes in the distribution of the coal trade, for which English firms have made preparations already. It is stated that English firms are now making arrangements to open coaling stations at Nukulofa, the capital of the Friendly Islands, and upon Pitcairn Island.

British Columbia's View.

An unusually interesting birdseye view of some of the bearings of the Panama Canal was given by Mr. F. B. Vrooman, B.Sc. (Oxon.), Ph.D., a well-known British Columbian, in an address given in London early this year. "Draw your lines," he said, "from New York to Valparaiso; from Victoria to New York; from Liverpool to Yokohama. Make Panama the hub of your commercial wheel. Number the trade routes which centre there to diverge again. You will see at a glance that not only is a new day dawning for Central America and for the north of South, and for

the west coast of North America, but for some far-away lands as well. You will see new trade routes which the logic of events will lay out where never before they had been possible. Here is a brand-new ocean waterway to be. It will bring the Hudson and the Mississippi, the Orinoco and the Amazon but little more than a possible week's sail from the Pacific Ocean; and it will bring the Gulf of Mexico and the Caribbean Sea, with their many seaports and with their vast resources, within a few days of it. The mouth of the Mississippi (and that means an increasing share of the trade from the largest, and, economically, most important single area in the world—the great interior plain of North America in both the United States and Canada) will for purposes of commerce be brought 581 miles nearer Valparaiso, Shanghai and Vancouver, Sydney and Wellington, Melbourne and Honolulu. Jamaica and the British Possessions of the West Indies will be thrown across the very highways of world commerce and world progress. The whole shipping from Boston and New York to British Columbian ports will be shortened by 8,415 miles; from Victoria to Liverpool by 6,046 miles. At the present time British Columbian vessels sail but

(To be continued.)

VITAL QUESTION OF RATES

Position of the Ancient Order of United Workmen— Objections of Members Analysed

A recent despatch from Guelph indicates that the lodges of the Ancient Order of United Workmen in that city, and in Galt, Hespeler, Morriston, Rockwood, Acton, Georgetown, Erin, Hillsburg, Elora, Fergus, Drayton and Palmerston have protested against the action of the Grand Lodge, as to the raising of the rates upon the members who joined previously to 1905. They talk of procuring an injunction to block the increased rates until after another Grand Lodge session.

An injunction could probably be procured by which the increased assessments now ordered for October 1st, could be discussed in a special session to be held in September or October, but such action would tend only to disaster.

Death Calls Greater Than Receipts.

For several months, the death calls have exceeded the receipts from assessments. For the month of April the payments were \$104,738.70, while call No. 4 produced only \$81,803.35, thus showing a shortage of \$22,905.35. Then came call No. 5 for May, producing \$80,224.05, while the payments took \$113,551.23, causing another shortage between those two important items, of \$33,327.18. To partly provide for this a transfer of \$30,000 was made from the reserve fund. That sum was far from sufficient to stem the tide of increased death claims. They continued to be unduly heavy. Then came the experience of the month of June, bringing, from call No. 6, only \$80,626.32 to meet death claims of \$110,188.75. Here was another deficit of \$29,562.43. Then again reserve fund was resorted to, and a further sum of \$102,623.83 transferred to the beneficiary fund. The result of these calls upon the reserve fund is that whereas in May it was \$1,514,802.26, yet notwithstanding about twenty items of interest received on debentures, it now stands at \$1,387,940.02. No doubt the experience of the hot month of July will bring a further depletion.

As a result of the alarming state of things which had developed during the first few months of the year, an adjourned meeting of the Grand Lodge of Ontario was held in Toronto on June 21st. At this meeting a report was received from Mr. Frank Sanderson, the well-known consulting actuary, relative to the state of the Order, financially speaking, as requested by the regular session of a few months previously. There was a long discussion and many were asked questions. The resolution recommending a call for extra assessments upon the older members was adopted almost unanimously. It was to take effect on and after October 1st, 1912. But another most important point was ignored by the Grand Lodge, namely, the providing of a separate fund of at least \$175,000 as being the amount needed, along with the interest thereon and future additions year by year, to provide for the \$6,145,000 of outstanding certificates on the lives of those who have joined since 1905, and who are paying a higher rate than was charged previously to all members.

The amount of insurance in force on December 31st last was reported as \$56,770,500, so that about \$50,000,000 is held by the older members, who joined before 1905, and it is upon this amount that the excessive death calls are falling. Those

little farther going to Liverpool than to New York, because they must sail round the easternmost point of Brazil, Pernambuco, which is almost equidistant from these two ports on either side the Atlantic."

Three Zones on the Pacific.

Professor J. F. Johnson stated at a United States Government enquiry that there were three zones on the Pacific to which different conditions governing traffic applied. From Balboa south about 1,500 miles, he said, the Canal was certain to get all of the traffic destined for the west coast and for Europe. Throughout a zone 1,000 miles further south the Canal was practically sure of the trade with the United States and the west coast generally, but was not sure of the trade with Europe. From Valparaiso south the trade might or might not go around the Horn. In the first zone the question of tolls would have no weight, no matter how high they might be, within reasonable limits. In the second zone the amount of the tolls would affect the European trade considerably. In the third zone they would have to be decidedly low in order to have the Canal capture the trade at all.

who hold that large portion of the total have never paid adequate rates. For instance, joining at age 30, 40 and 50 they paid, until 1905, \$0.75, \$0.90 and \$1.00 per month, per \$1,000, whereas those who joined after 1905 have been paying \$1.16, \$1.72 and \$2.05 per month. Foolishly, and contrary to the repeated advice of *The Monetary Times* when the increased rates were adopted in 1905, the old members were thereafter assessed upon their ages at joining instead of at their attained ages. Hence the reserve fund, which was \$683,981 in 1905 has grown up very slowly during the past six years, compared with what it would have done if the holders of the \$62,529,000 of certificates then in force, had each been called upon to pay higher rates due to their ages in 1905, as should have been done. Even if that had been done at that time, there would still have been a large shortage produced by the millions of money paid out before that time, upon the death of thousands of members from whom only about half the proper rates had been collected. A similar shortage still exists, and can never be repaired, because so many of the members are so bitterly opposed to paying even the mild provisions of Mr. Sanderson's lucid report.

As To Extra Assessments.

The newer members, (joining since 1905), stubbornly refuse to pay the needful extra assessments with which to provide the \$175,000 of special reserve needed at the back of their certificates; and the old members are aghast at the prospect of having to pay nearly double their former inadequate rates, every month after October 1st. Even these two recommendations of Mr. Sanderson, if fully carried out, would not bring back a single dollar of the deficient payments made by the thousands whose membership was, or will be, terminated by their death from the inception of the ill-fated concern up to October 1st. Hence, if the lodges in the Guelph or any other district, have any complaint to make, it ought to be on account of the Grand Lodge having failed to call extra assessments from those who joined since 1905, with which to cover the \$175,000 of their own deficiency. As to the living pre-1905 members, they should cheerfully pay the rates due to their ages in 1905. Most of them are now old men, and therefore the burden will probably not continue to oppress them for many years to come, whether or not the Ancient Order of United Workmen of Ontario, continues to exist ten years longer.

On the recommendation of Messrs. Stone & Webster Company it was decided by the Saskatoon city council to accept the tender of the St. Louis Car Company for twelve new single-truck street cars.

The Molsons Bank has made the following changes in its staff: Mr. W. H. Draper, inspector, has been appointed superintendent of branches; Mr. E. W. Waud, assistant inspector, has been made inspector, and Mr. Thomas Carlisle, accountant at Toronto branch, has been appointed an assistant inspector at Montreal.

Alderman L. A. Lapointe, of Montreal, has introduced in the city council the necessary preliminaries preparatory to going to the Legislature for power to increase the city's rate of interest from 4 to 5 per cent. He would then issue loans in ten-dollar negotiable bonds to the public of Montreal and the province. The alderman says this system was in vogue in Paris, and on one occasion a loan was oversubscribed eighty-two times.

LIFE UNDERWRITERS AT MONTREAL

Insurance Men from all parts of the Dominion will meet in Annual Convention next week.

The convention of the Dominion Life Underwriters' Association will be held at Montreal next week. Insurance officers and agents from all parts of the country are to meet and discuss the progress and problems of their growing business. The life insurance profession

HON. W. T. WHITE,

Minister of Finance, who will speak at the Life Insurance banquet at Montreal. The Dominion Insurance Department comes under Mr. White's jurisdiction.

has obtained a high degree of efficiency in Canada, and its conduct has reached a satisfactory standard. The importance of life insurance, its application and management in a new country cannot be too strongly emphasized. The population of Canada is increasing rapidly through the medium of immigration. A considerable proportion of the people from the old countries are not insured, largely because conditions in those lands have made it impossible to consider the purchase of anything but the barest necessities. In Canada there is sufficient margin between earning power and the cost of living to place life insurance among the necessities.

Only a small proportion of the insurable in this country are insured. That fact affords a vast field for enterprise on the part of life insurance companies, their management, and agents. With so great a scope for expansion, it behooves insurance directors, head office and field men always to keep their profession above suspicion, to educate the public respecting the benefits of life insurance, and to give generally a well-founded impression that life insurance is one of the most necessary and one of the best investments extant. These and other desirable objects are those of the Dominion Life Underwriters' Association.

It is no small business which is represented by the members of that extensive association. The net amount of life insurance in force in Canada last year totalled \$950,000,000, an increase of \$100,000,000 over the previous year. The number of policies in force on December 31st, 1911, was 1,335,047. The amount of new and taken-up policies during the twelve months of 1911 was \$177,821,000, representing 418,812 policies and premiums of \$31,619,000. Claims, including matured endowments, were paid last year amounting to \$11,000,000.

Admittedly, there is some room for improvement in the conduct of the life insurance business in this

country. On the other hand, during the past few years its standard has been raised to a very high level. The abuses which had become habits among the field men, such as rebating, misrepresentation, and the twisting of policyholders from one company to another, have almost disappeared. There is now far greater co-operation and sympathy between the head office and the agent. Better systems prevail in headquarters and in the field. The calibre of the men representing life insurance companies has greatly improved. Much of this is due to the efforts of the Dominion Life Underwriters' Association, the progress of which since its inception has been rapid and its success remarkable. *The Monetary Times* extends to the delegates its best wishes for another excellent annual convention.

CONVENTION PROGRAMME

Important Business Sessions Will Occupy Two Days
—Discussions and Addresses

A lengthy programme has been arranged for the Dominion Life Underwriters' Association convention next week at Montreal. Here it is in full:

Wednesday, August 21st.—Social with reception by members Montreal Association. Addresses of Welcome and Replies: Mayor of Montreal; Arthur B. Wood, actuary Sun Life Assurance Company of Canada; H. H. Kay, president Montreal Association; J. C. Tory, M.P.P., president Canadian Life Underwriters of Quebec. Replies: H. C. Cox, chairman Executive Committee; L. Brackett Bishop, president National Association of Life Underwriters, Chicago, Ill.

First Day of Convention.—Thursday, August 22nd.
—9.00 a.m.: Assembling of members and signing of register. 9.30 a.m.: Opening of Convention, Prayer, Roll Call, President's Address, Secretary's Report, Treasurer's Report, Report of Executive Committee; Report of Special

A. HOMER VIPOND,

A well-known Montreal Insurance man, who will hand over the Presidential Reins of the Dominion Life Underwriters' Association, after an unusually successful year.

Committees: Finance Committee, Advisory Committee, Transportation Committee, Committee to act in conjunction with Committee from Life Officers' Association, Committee to revise Constitution and By-Laws, Committee on Public-

ity. 11.30 a.m.: Address, L. Brackett Bishop, of Chicago, president National Association of Life Underwriters. (Photo of Convention.)

Thursday afternoon. — 2.30 p.m.: Appointment of Nomination Committee, Reading of letters of regret, etc., Five-minute discussion on "Is a pension for long service desirable?" "What are the best means of retaining agents with the company?" (In charge of W. G. Keddie, Ottawa). 4.00 p.m.: Address, "Life Insurance and Social Welfare," Mr. Haley Fiske, New York; Award of prize offered by Mr. George H. Allen and reading of Essay, subject, "Building an Agency."

Thursday evening, August 22nd. — Banquet, Windsor Hotel; speakers, Hon. W. T. White, George A. Somerville, vice-president Life Officers' Association; Hon. George P. Graham; Hon. S. P. Stearns.

Second Day of Convention.—Friday, August 23, 9.30 to 12.30 a.m.—9.30 a.m.: Discussion on Executive Committee's Report, Discussion on report of Committee to Revise Constitution, New Business. 11.00 a.m.: Five minute topic, in charge of E. R. Machun, St. John, N.B., subject, "Insurance Literature and Advertising," (a) To what extent should circulars be used in canvassing? (b) Newspaper Advertising, (c) How can Local Associations best interest the Press in Insurance information? Presentation of Association cup and reading of prize essay, subject, "A practical plan of co-operative publicity."

2.30 to 5.30 p.m.—2.30 p.m.: Five minute topic in charge of E. W. Owen, Calgary, subject, "How best to increase our business by adopting new forms," (a) Partnership or corporation insurance, (b) Income Insurance. 4.00 p.m.: Report of Nominating Committee, Election of Officers, Selection of next place of meeting; Award of cup offered by J. R. Reid for the Association showing the largest per cent. of increase in membership; Award of gold fob presented to the member proposing the largest number of new members, by Mr. Vipond; Award of cup offered by Mr. R. J. Stuart, of Toronto, for prize essay, subject, "The service rendered by the Life Underwriters' Association to the public and its members."

Third Day of Convention.—Saturday, August 24th.—Conclusion of business sessions. Drive around the city.

HON. GEORGE P. GRAHAM,

Who will be one of the speakers at the banquet of Canada's Life Insurance Men.

FOR THE LIFE UNDERWRITERS AT MONTREAL.

The Monetary Times will be pleased to place at the disposal of all resident and visiting delegates to the Life Underwriters' Convention at Montreal, its large and convenient branch offices at Rooms 617 and 628 Transportation Building. These offices are in the heart of the business and financial section of Montreal and in close touch with the convention rooms. A file of The Monetary Times, facilities for correspondence, etc., have been provided and delegates are invited to make every reasonable use of the offices.

FOR LIFE INSURANCE MEN.

The following articles in The Monetary Times this week will be of special interest to the delegates attending the annual convention of the Dominion Life Underwriters' Association at Montreal:—

LIFE INSURANCE IN ITALY

Brief Explanation of the Latest Government Monopoly

—Position of the Companies

By the law enacted in April the Italian Government created a State institution, the object of which is to transact every form of life insurance, as a monopoly. This national insurance institute, with its head office in Rome, will be a corporate body and will be autonomous. It is true that the insurance policies which it grants will be guaranteed by the State, but this guarantee has only a subsidiary and complementary character, taking effect only in case the funds at the disposal of the Institute should prove insufficient to meet its obligations towards policyholders. The chief object of this new law is to obtain by means of the monopoly of life insurance new funds for the State, and especially to benefit the National Thrift Bank by the profits accruing from this monopoly. All workmen, whether industrial or agricultural, may be registered with this bank if they do not pay any State tax exceeding thirty francs per annum.

Council of Nine Members.

The principal executive authorities of the Institute will be a council of nine members (five of them State functionaries), whose duties will be to establish the fundamental rules of the Institute, the premium tariffs, the administration and investment of the funds, etc.—a permanent committee of three members, chosen from among the members of the council—a general director, who will represent the Institute and control its technical and administrative branches—and, lastly, the syndics, who must audit its accounts and supervise its general working. The administrative and technical officers will not be on the same footing as Government employees except as regards the provisions of the Penal Code respecting public officials and the law concerning civil servants who fail in the observance of official secrecy; these employees will be engaged by contract for a specified period.

The expenses of the establishment and management during the first years will be defrayed by the State Treasury, which will open a current account with the Institute for a sum of 5,000,000 francs. The law also allows for the investment of the reserve funds in, besides Government securities, other securities guaranteed by the State and other forms of investment not directly connected with agriculture, also in bonds issued by institutions authorized to exercise land credit in Italy.

Private Life Insurance Companies.

Whilst the ordinary private life insurance companies may continue to act for ten years from the nineteenth day after the new law comes into force (the date of its coming into force will be fixed by regulations shortly to be published), on the other hand, tontine societies are forbidden by law, and they must be liquidated within a month from the coming into force of the new law. This provision, which the last Ministry had already proposed, is for the advantage of the rural classes because the tontine societies recruited their members in the small centres and villages, promising benefits for which in reality they offered but small guarantee. Among the transitory provisions of the new law, those are particularly interesting which determine the conditions under which the ordinary insurance companies will be authorized to continue their business. With a view to arouse the spirit of thrift in the small centres and more distant and humble villages of Italy, the law grants the Institute power to employ as agents notaries, communal secretaries and post office officials. As usual with private insurance societies, agriculturists insured in the Institute may obtain from it loans on their own policies.

The full text of the new law, in English, may be examined at The Monetary Times' office.

"CANADIAN MEN AND WOMEN OF THE TIME."

In an attractive and substantial binding, the second edition of Dr. Morgan's indispensable reference book, "Canadian Men and Women of the Time," containing 7,900 terse, biographical sketches is now available.

The volume adds to the reputation of Dr. Morgan as a capable chronicler of the Dominion's celebrities and events, and if there are omissions they are unnoticeable.

Indeed the work presents a wonderful array of evidence bearing on the Dominion's extensive growth, upon its remarkable progress in all branches of human thought and activity. "Canadian Men and Women of the Time" deserves all the success it may and will achieve.

"Canadian Men and Women of the Time." J. Morgan, M.A., LL.D., D.C.L., F.R.C.S., \$5.00 net. Published by W. Briggs, Toronto.

INDUSTRIAL INSURANCE ASSISTS ORDINARY AGENTS.

Reasons why the life underwriters should welcome the vast army of industrial men, and why industrial men should join forces with such an esteemed body of men as form the Life Underwriters' Association of Canada, were the divisions of an interesting paper given before the London, Ontario, Life Underwriters' Association, by Mr. R. J. Newton, who said in part:—

"The principle underlying ordinary insurance, namely; protection and provision for the future, was long ago recognized, but, while embracing the upper and middle classes of society, this form entirely excluded the great mass of working men and women who were not in a position to pay the necessary premiums

"The education in life insurance principles received by the masses has been such that to-day industrial men can feel it an honor to represent almost any company doing business along these lines, and far from interfering with the work of the life underwriters of the older companies, we industrial men feel you owe us some measure of acknowledge for this vast educational work, which undoubtedly has given you greater scope for your own individual work.

"There was never a time in the history of the world when it was easier to write insurance than to-day, but we must have it clean and gotten by clean methods. You cannot always keep out the crook, but you can at least associate yourselves with honorable men and so disassociate yourselves from dishonorable men. Let it be known that you belong to a profession and are a representative of a body of men banded together to secure the greatest good, alike to the policyholder, the company you represent and your fellow agents."

ROOSEVELT AND THE PANAMA CANAL.

Presidential candidate Roosevelt has strong views as to the duty of the United States to respect the Hay-Pauncefote treaty. "In international affairs," he said at Chicago, "this country should behave toward other nations exactly as an honorable private citizen behaves toward other private citizens. We should do no wrong to any nation, weak or strong, and we should submit to no wrong. Above all, we should never in any treaty make any promise which we do not intend in good faith to fulfill.

"We have a perfect right to permit our coastwise traffic (with which there can be no competition by the merchant marine of any foreign nation—so that there is no discrimination against any foreign marine) to pass through that canal on any terms we choose, and I personally think that no toll should be charged on such traffic. Moreover, in time of war, where all treaties between warring nations, save those connected with the management of the war, at once lapse, the canal would of course be open to the use of our warships and closed to warships of the nation with which we were engaged in hostilities. But at all times the canal should be opened on equal terms to the ships of all nations, including our own, engaged in international commerce. That was the understanding of the treaty when it was adopted, and the United States must always, as a matter of honorable obligation and with scrupulous nicety, live up to every understanding which she has entered into with any foreign power.

"The question that has arisen over the right of this Nation to charge tolls on the canal vividly illustrates the folly and iniquity of making treaties which cannot and ought not to be kept. As a people there is no lesson we more need to learn than the lesson not in an outburst of emotionalism to make a treaty that ought not to be, and could not be, kept; and the further lesson that, when we do make a treaty, we must soberly live up to it as long as changed conditions do not warrant the serious step of denouncing it. If we had been so unwise as to adopt the general arbitration treaties a few months ago, we would now be bound to arbitrate the question of our right to free our own coastwise traffic from canal tolls; and at any future time we might have found ourselves obliged to arbitrate the question whether, in the event of war, we could keep the canal open to our own war vessels and closed to those of our foes. There could be no better illustration of the extreme un wisdom of entering into international agreements without paying heed to the question of keeping them. On the other hand, we deliberately, and with our eyes open, and after ample consideration and discussion, agreed to treat all merchant ships on the same basis; it was partly because of this agreement that there was no question raised by foreign nations as to our digging and fortifying the canal; and, having given our word, we must keep it. When the American people make a promise, that promise must and will be kept."

The Canadian Bank of Commerce has opened a branch at Prince Arthur and Park Avenues, Montreal, under the management of Mr. J. B. Beach.

VANCOUVER AND THE PANAMA CANAL PROTEST

Premier McBride Says Dominion Must Deal with Matter—Land Settlement—Vancouver Terminal Company's Scheme

(Staff Correspondence.)

Vancouver, August 10th.

Direct action may probably be taken by the Vancouver board of trade as a protest against the action of the United States Senate in discriminating against ships of other nations as regards tolls for passing through the Panama Canal, in contravention of treaty rights. Within a few weeks, what is termed the Flying Legion will come from San Francisco to this city to boom the exposition to be held in the city of the golden gate to celebrate the opening of the canal. It was proposed to receive them in true Western style, but since the announcement of the selfish action of the American Senate there is a distinct feeling that a strong protest should be made. The president of the board of trade has expressed himself publicly in favor of practically ignoring the visit of the Flying Legion and of British Columbia withdrawing altogether from any recognition of the 1915 exposition. Premier McBride has been communicated with, but he says it is a matter for the Dominion to deal with. Vancouver as a shipping port is particularly interested in any action having to bear on the traffic through the canal, and it was proposed to do everything possible to further the proposed exposition and anything that would boom the canal. Not only the president of the board of trade voices his protest, but more than one citizen, questioned by The Monetary Times, says Vancouver and all other cities north of the forty-ninth parallel should take a decisive stand against this discrimination. It was proposed at first to call a special meeting of the board of trade to discuss the matter, but instead it will be left to the next regular meeting, in the first week in September, and by that time it will be seen just what will be really decided upon.

Distinct Land Settlement Policy Lacking.

Before the Progress Club this week, Archbishop McNeill spoke of the great necessity of land settlement as a bulwark against the tide of depression, whenever it may come. He suggested that if war should break out in Europe, Vancouver and British Columbia would suffer, as money would stop coming this way. If people were on the land, the country would not be so much affected. The progress club has an active land settlement committee which is doing what it can to attract the agriculturist and horticulturist.

What Has Already Been Done.

Land settlement has occupied considerable space at times, but little of a practical nature has been done. The Salvation Army has co-operated with the provincial government and has placed many people directly where they will help themselves and be of benefit to the province. Real estate men have, perhaps, in an indirect way, been responsible for some settlement, for in disposing of farm lands they have reached many desirable people in the middle states. But there has been lacking a distinct government policy tending to build up the rural districts. It was expected that as the population grew the farming population would expand in proportion, but the urban growth has exceeded the rural. The Canadian Pacific Railway is doing considerable to having settlers placed on Vancouver Island. An arrival from that part of the province this week remarked on the steady growth that is to be seen all along the railway there.

Land Development Company.

In East Kootenay, Mr. Peter Lund, managing director of the Crow's Nest Pass Lumber Company, has organized the Land Development Company, which has for its object the acquiring of logged-over lands, clear them of stumps and irrigate them, and dispose of them to people desiring small holdings. It is a move to utilize the land after the timber is gone, and already Mr. Lund has over 300 acres in crop as a demonstration of what can be accomplished. Logged-over land on the coast is not so suitable for cultivation as that in the interior, but Mr. Lund's idea might well be carried out in other parts of the province with advantage.

Vancouver city council has been asked to consider the proposition of the Vancouver Terminals Company, which desires concessions from the government in regard to tide flats in False Creek, under the Granville Street bridge, and on Spanish Bank, along the north shore of Point Grey. This scheme has been talked of at times, but definite details have only now been placed before the public. It is proposed to reclaim land both on the flats and on the Spanish bank and construct wharves and railways which will afford ample facilities for shipping and transportation.

Since this announcement was made Mr. H. H. Stevens, M.P., has publicly stated that he will oppose the granting of rights to any private concern which may tie up any area on the waterfront.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended August 9th:—Coniagas, 415,876; McKinley-Darragh, 138,036; Nipissing, 217,646; La Rose, 169,552; Buffalo, 63,000; Trethewey, 58,700; Cobalt Lake, 65,900; Cobalt Townsite, 61,000; Temiskaming, 63,704; total, 1,253,414 pounds, or 626 tons. The total shipments since January 1st are now 26,882,106 pounds, or 13,441 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

BRITISH AMERICAN TRUST COMPANY, LIMITED.

The report just issued by the British American Trust Company, Limited, shows a surplus of \$100,000 and \$4,167 carried to the reserve and contingent fund, \$6,500 being reserved for dividend. The total assets amount to \$619,850 of this ordinary loans total \$293,233. Of the statement, Messrs. Kendall, Sewell & Company, chartered accountants, say, "We have examined the balance sheet together with the books of the company, also the securities representing the investments and certify that in our opinion the balance sheet shows the position of the company at June 29th, 1912." The statement generally is a good one.

FIRE INSURANCE RATES IN HALIFAX.

The following memorandum has been issued by the Nova Scotia board of fire underwriters relative to fire insurance rates in the city of Halifax.

"The Nova Scotia board of fire underwriters, having decided to prepare a new specific rate for the city of Halifax, will make changes in the rates on schedule rated mercantile risks and proportionately to rates on risks endangered by such.

"These charges will be added to the final rates of such risks, and in the event of the civic authorities carrying out the improvement called for, to the satisfaction of this board, an allowance or deduction will be made in the rates on such stated risks corresponding to the charge made for specific item which may have been satisfactorily improved.

"That until an independent report is secured by the city on the water supply system and its recommendations carried out, 25 cents.

"That until an 80-foot turntable aerial truck is obtained and a ladder division of 8 men, (call men) provided, 5 cents.

"Until the engineers of steam fire engines are permanently employed (sleeping in the engine houses) twenty more men added to the strength of the department, and the fire department horses are utilized for fire department purposes only, and under the control of the fire chief, 10 cents."

PUBLIC RESPONSIBLE FOR DIRTY NOTES.

Parliamentary and public censure of the chartered banks in connection with their circulation of notes is not deserved. In the majority of instances, our banks are not to blame for the filthy condition of some of the notes which fall into the hands of the fastidious. The majority of men and women, when distributing money in payment of purchases made, invariably select the soiled bills wherewith to settle, and the recipient being equally anxious to get rid of same, the dirty note is thus kept in circulation, states the Canadian Bankers' Journal. If those who quarrel with our currency could trace the history of a bank note from its birth to its final destruction by fire, they would find no reason for government intervention on behalf of clean money. The best proof of honest effort on the part of our chartered banks to provide the country with clean money is to be found in the records of circulation kept by the Canadian Bankers' Association. Examination of the monthly reports issued to the Government and to the chartered banks shows that during the year 1911, notes condemned as unfit for further circulation, and therefore, destroyed, amounted to \$33,086,335.

Further comment seems unnecessary. The public and not the banks, are responsible for keeping dirty notes in circulation in the Dominion of Canada.

Mr. R. H. Edmonds, of the Canadian Bank of Commerce, Belleville, has been appointed manager of the Dresden, Ontario, branch in succession to Mr. W. H. Green, who has received the appointment of manager at Tillsonburg, Ont.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Woodstock, Ont.—August 13.—Battler bridge destroyed. Loss, \$7,000. Origin, supposed incendiary.

Cobourg, Ont.—August 8.—Dr. Jones' barn. Loss unknown. Origin, supposed tramp.

Sydney, N.S.—Ingonish Catholic Church. Loss, \$10,000. Origin unknown.

Queensborough, B.C.—August 7.—Boarding house, &c. Loss, \$5,000. Origin unknown.

Port Albert, Ont.—August 6.—Mr. J. Culbert's barn. Loss unknown. Origin, lightning.

Amherst, N.S.—August 9.—Mr. T. J. Copp's residence. Loss \$300. Origin, defective chimney.

New Westminster, B.C.—August 7.—Mr. F. R. Anderson's bungalow. Loss and origin unknown.

Howell, Sask.—August 6.—Messrs. Pitchko Brothers' general store. Loss, \$6,000. Origin unknown.

South Vancouver, B.C.—August 5.—Six fires caused \$2,300 worth of damage during the last two weeks.

Valleyfield, Que.—August 9.—Dominion Cotton Mills Company's stables. Loss, \$15,000. Origin unknown.

Welland, Ont.—August 9.—Residence on Messrs. Morris and Wellington's farm. Loss and origin unknown.

Montreal, Que.—August 7.—Montreal Cotton and Wool Waste Company's premises. Loss and origin unknown.

Halifax, N.S.—August 8.—Mr. W. White's residence, barn and outbuildings, Noel Road, destroyed. Loss and origin unknown.

London, Ont.—August 6.—Mr. H. Rapson's cottage. Loss, \$5. Insurance, London Assurance Corporation, \$550. Origin, explosion of gasoline stove.

Prince Rupert, B.C.—A forest fire is reported by Mr. W. C. Gladwin, supervisor of mainland fire wardens of the province, to have burned a quantity of railroad ties, 70 miles east of Prince Rupert, and given the Grand Trunk Pacific and government men an all-day fight. The damage to timber was slight.

Belleville, Ont.—August 10.—Messrs. Peck and Will's sash and door factory. Loss, machinery \$12,000, buildings \$6,000. Insurance, Dominion Insurance Company and other non-tariff companies, \$2,850. Origin, hot journal.

August 10.—Government armory. Loss, \$200. No insurance. Origin, from factory fire.

Peterboro, Ont.—July 30.—Quaker Oats Company, Limited. Loss, stock and machinery, \$500; building, \$100. No insurance. Origin, short circuit in power line.

August 7.—Peterborough Mattress Company. Loss, stock, \$200; buildings, \$500. No insurance on building. Origin, spark from machinery.

Winnipeg, Man.—August 8.—Mr. W. Bortuzzis restaurant, 289 Market Street. Loss, \$125. Origin unknown.

August 8.—Rear 1134 Sherburn Street. Loss and origin unknown.

August 7.—Mr. B. Levin's warehouse and residence, 91 Lusted Street. Loss, \$5,400 on dwelling, and furniture \$1,300. Insurance, \$1,000 with Colonial Fire Assurance Company.

St. John, N.B.—August 4.—Mr. Patterson's garage, In-diantown. Loss slight. Origin, gasoline.

Mr. H. McBeath's residence, Queen Street. Loss and origin unknown.

Mr. P. Dolan's residence, Carleton Street. Loss unknown. Origin, upset lamp.

Messrs. William Lewis and Sons' Bolt and Nut Works, Britain Street. Loss slight. Origin, burning ashes.

Granby, Que.—August 12.—Mayer Thomas box factory. Loss, \$100,000. Insurance amounted to \$54,000, divided among the following companies:—Guardian, \$9,250; Northern, \$7,500; London and Lancashire, \$4,750; North British and Mercantile, \$4,700; Union, \$3,200; Liverpool and London and Globe, \$3,500; Norwich Union, \$4,250; Hartford, \$4,250; Fidelity Fire, \$1,700; Aetna, \$1,600; German-American, \$1,600; New York Underwriters, \$1,250; Springfield, \$1,250; Employers' Liability, \$1,000; North American, \$1,000; and the Union of Paris, \$2,000. Origin unknown.

Toronto, Ont.—August 8.—Two stables, 1237-9 Bloor Street. Loss, \$1,500, partially insured. Origin, cigarette stub. A valuable horse was burned.

August 15.—Messrs. Patterson Company's roofing supplies premises. Loss, \$10,000. Origin, unknown.

August 8.—649 Lansdowne Avenue. Loss \$25. Origin, sparks.

79 Robinson Street. Loss \$10. Origin, burning rubbish. 138 Front Street West. Loss \$10. Origin, spilled boiling wax.

Hamilton, Ont.—August 4.—8 Cannon Street East. Loss, contents \$20, building \$400. Insurance, contents \$150, building, \$1,250, with Norwich Union and Anglo American companies. Origin, supposed smoking in bed.

August 7.—Laundry, 318 James Street North. Loss \$8. Insured with Economical Insurance Company. Origin, spark from stock.

August 8.—645 King Street East. Loss, stock \$100, building \$175. Insured with London, Liverpool and Globe and German American companies. Origin, defective flue.

CANADIAN PACIFIC TO MAKE STOCK ISSUE.

As predicted in The Monetary Times several weeks ago, the Canadian Pacific will make a new stock issue. The company's present stock is \$200,000,000, and application has been made to the Dominion Government to increase it to \$260,000,000. The new issue of stock which the market expects shortly will likely be \$50,000,000. That would mean an allotment of one share of new stock to every four shares of old stock now held. The price will probably be around 175, or \$100 per share below the present market price.

The last allotment of new stock was made in January of this year when \$18,000,000 was issued at 150. There are still two payments to be made on this stock, on August 16 and October 18, respectively. It is unlikely that the new issue will be made until these payments are made.

The last occasion on which the authorized capital was raised was on October 8, 1908, when the shareholders authorized an increase from \$150,000,000 to \$200,000,000.

EDMONTON FINDS MUCH TO DO.

During the last week in July a party of about fifty Edmonton manufacturers and wholesalers made a seven day trip by special train through a considerable portion of Edmonton's tributary territory, travelling nearly 2,100 miles, covering seven lines. With the exception of a very few localities, limited in area, the party found crop conditions uniformly satisfactory; and with the excellent weather conditions now prevailing, there is every reason to expect an abundant harvest of high grade grain. With a continuance of moderately fine weather, harvest will be fairly early. In those districts where prospects appeared least favorable, the crop will be reasonably satisfactory. Everywhere general conditions appeared satisfactory and evidences of development and prosperity were everywhere apparent.

The Grand Trunk Pacific Railway during the month announced the completion of their plans for the erection of a passenger depot at the head of McDougall Avenue. This station, which will be four blocks north of the site of the big hotel to be erected by that company, will be of handsome design, will provide six tracks, and is estimated to cost \$400,000.

The Canadian Pacific Railway is also actively pushing forward work on its Edmonton terminals, preparatory to the opening of traffic to the north side upon completion of the great high level bridge, work on which is being pushed with all possible energy.

The Municipal Census Commissioner has announced, as a result of the enumeration made on 1st June, that the population of Edmonton on that date was 53,383. This figure includes some 2,400 transients. In 1901 the population was 2,625, and in 1906 it was 11,173.

Mr. E. F. Garrow, who has been connected with the British America Assurance Company since 1892, and has for the past three years been manager at the company's branch at Winnipeg, Man., has been appointed secretary of the company at the head office to succeed Mr. P. H. Sims, who recently resigned after twenty years' service. The vacancy at Winnipeg was occasioned by Mr. Garrow's promotion has been filled by the appointment of Mr. F. T. Bryers, for some years on the home office staff, as branch manager.

Mr. Harold Franks, a member of the brokerage firm of Messrs. Osler & Hammond, has been elected a member of the Toronto Stock Exchange. Mr. Franks has been with Messrs. Osler & Hammond for about ten years.

Mr. Lewis Parker, manager at Calgary for the Anchor Fire and Marine Insurance Company, died recently at the family residence, 1815 Seventh Street West from pneumonia. Mr. Parker went to Calgary from Toronto about four years ago. He was born in England in 1873. He commenced his career in an insurance office in England in 1894. His wife, who was Miss Mabel I. Lewis, of Toronto, and one son survive.

NEW INCORPORATIONS

Trust Company for Fort George—Million Dollar Engineering Company at Vancouver

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Yorkton.**—Yorkton Nurseries, \$100,000.
- Consort.**—Consort Hotel Company, \$30,000.
- Stettler.**—A. Cochrane & Company, \$35,000.
- Eyebrow.**—The Western Hotel Company, \$9,000.
- Wadena.**—The Wadena Realty Company, \$150,000.
- Bassano.**—The Bassano Brick Company, \$10,000.
- Cranmer.**—The Farm Supply Company, \$10,000.
- Vegreville.**—Vegreville Hardware Company, \$25,000.
- Red Deer.**—Red Deer Machinery Company, \$200,000.
- Fort George.**—Fort George Trust Company, \$1,000,000.
- Outlook.**—The Outlook Brick & Investment Company, \$25,000.
- Prince Albert.**—The Prince Albert Fruit Company, \$50,000.
- Halkirk.**—The Halkirk Farmers' Elevator Company, \$20,000.
- Battle Lake.**—The T. & S. Lumber & Trading Company, \$10,000.
- Seven Persons.**—The Farmers Grain & Supply Company, \$10,000.
- Champion.**—Thyrza Co-operative Farming Company, \$10,000.
- Athabasca Landing.**—The Northern Distributing Company, \$25,000.
- Norwich.**—S. Allen, \$200,000. C. E. Allen, E. W. Howell and P. L. Howell.
- Regina.**—Arcola Electric Light & Power Company, \$15,000. Regina Book Shop, \$100,000.
- Cobalt.**—J. C. McNabb & Company, \$40,000. J. McNabb, G. Mitchell, and W. Harmer, Cobalt.
- Brantford.**—Keeton Motors, \$200,000. F. M. Keeton, W. G. Houck, and W. J. Verity, Brantford.
- Victoria.**—Dominion Carton & Printing Company, \$25,000. Vancouver Island Motor Company, \$25,000.
- Edmunston.**—L'Assumption, Limitee, \$10,000. M. D. Cormier, J. A. Ratte, P. H. Laporte, Edmunston.
- Springbank.**—Springside Cottagers' Association. A. T. Laing, W. Mansell, and T. W. Gibson, Toronto.
- Medicine Hat.**—Canadian Fire Proof Manufacturing Company, \$300,000. Gas Power Land Company, \$50,000.
- Lorrainville.**—Caza, Bellehumeur and Compagnie, \$9,000. A. J. Aubin, B. Murphy, Ville-Marie, Z. Caza, Lorrainville.
- Wallaceburg.**—The Wallaceburg Knitting Company, \$40,000. D. A. Gordon, E. Warner, and E. B. Snively, Wallaceburg.
- Millerton.**—Millerton Extract Company, \$98,000. J. W. Miller, New Castle; T. C. Miller, Derby; V. Burrell Shewinagan.

Lapalme, I. Laberge, and H. Malo, Beloeil.

"Of the \$1,000,000 we have invested in mortgages in Vancouver I am proud to say there is not one dollar of interest or principal in default. I am now considering additional applications, and expect we shall increase our loans here by two or three hundred thousand dollars within the next six months," recently said Mr. L. Goldman, of Toronto, vice-president and managing director of the North American Life Assurance Company while on the Coast.

OLD AGE PENSIONS IN FRANCE

Failure of Scheme Reported—Government Discovers a Weak Place in Bill

Old age pensions have been in force in France for two years, and, according to the Paris correspondent of the London Daily Mail, they have proved a flat failure, chiefly because the French people resent the necessity of having to go before an official and declare the amount of wages they receive. In Germany, the pension principle has gone forward, although it has been turned into a measure of public charity, toward which the French experiment is steadily drifting. The one feature of the German bill that has saved it from the fate of the French law is its compulsory feature. Employers are liable to a fine or imprisonment if their employees do not conform to the provisions of the Act. In self-defence, therefore, the German employers have made the measure something of a success. In France the responsibility has been placed upon the employees, and they have failed to rise to the occasion.

Payments Made by Means of Stamps.

Introduced in 1910, the French Pension Bill came into effect one year ago. Working people not 65 years old and earning a maximum of \$600 a year were forced to insure themselves by contributing to the government something less than \$2 a year. Their employers were required to add an equal amount, and the State promised to contribute a trifle less than \$15. As with the British scheme, payments are made by means of stamps affixed to the workman's card on each pay-day. Payments may be made through fraternal societies and trades unions also. The measure was introduced and made law and was hailed as a great piece of social legislation. Nobody in France, it would appear, could be in ignorance of the provisions of the Act, seeing the publicity that was given to it. Yet, to the astonishment of those responsible for the bill the public seemed to take no interest in it. Even those who were within a few months of the age of 65, who would need to contribute merely a few shillings to take advantage of the opportunity of drawing a pension for the rest of their days, were indifferent.

Many Modifications and Additions.

The act was a failure, and the government was forced to make some alterations, with a view of making it more popular. The simplest method seemed to be to increase the amount of the state contribution, and so it was advanced to about \$20. The public, however, seemed to pay little attention to this concession, and out of 18,000,000 people who were entitled to insure themselves, only about 2,750,000 fulfilled the conditions of the law. The government was driven to make further modifications in the provisions of the act, and hit upon the scheme of extending for another year the time within which the people could pay up their back dues, and thus take advantage of the act. This extension of time expired a fortnight or so ago. Even then the people had not shown any particular disposition to come forward, and a few days ago a further extension was granted them, and they now have until the first of next year to enter into their inheritance. Seeing that the act has been operative for nearly two years, it is not necessary to say anything further in proof of its absolute failure to appeal to the public.

Authorities and Average Citizen's Affairs.

The Mail's correspondent thinks that the chief reason for the failure of the act is to be found in the strong aversion of the average citizen to let the authorities pry into his affairs to find out the amount of his income. The servants, who form a large percentage of the small investor class in France, are against the proposal. "What!" they exclaim. "Give part of our wages to the state? Never!" Those of them who are frugal declare that they have already made their own arrangements for old age, and they would not trust the government with a penny of their savings, which they fear might be foolishly invested or sunk in some scheme of which they disapprove. The very people whom the politicians who framed the bill and pushed it through hoped to benefit are those who are now holding aloof from it.

Employer and Employee.

Probably had the German bill been more closely copied, and the employer been made responsible for the collection of the premiums, the French act might have been more popular, but the French measure failed in this respect, and merely threatens to fine servants who do not comply with its provisions. After the measure had been in force for some time the government realized this weakness, and sought to improve matters by ordering the employer to deduct from the weekly wages of his servants the amount of the premiums due on the insurance measure. The employers, however, resisted, and the latest court decision is to the effect

that they cannot be obliged to do more than to call the attention of their employees to the act. It would appear that the experiment is to be written down as a failure unless the government makes further changes and largely increases the amount of its own contribution.

GENERAL MANAGER OF BANK OF NEW BRUNSWICK.

Mr. Charles H. Easson, who will shortly assume the general managership of the Bank of New Brunswick is a keen

C. H. Easson.

and capable banker. He is a native of Bridgetown, N.S., and entered the service of the Bank of Nova Scotia there twenty-five years ago. Later he was manager at Bridgetown, as well as at North Sydney, New Glasgow and Ottawa, before going to St. John for seven years.

LIABILITY OF INSURANCE AGENT.

The Court of Appeals at Louisville, Ky., recently decided an important case in which the agent had issued a policy of fire insurance knowing that other insurance was carried, but withheld this information from the company. In this case it was held that the knowledge of the agent was not necessarily the knowledge of the company. The case was that of Saylor vs. Commonwealth, and the findings of the court are thus summarized:

First.—A local insurance agent can be convicted for obtaining money under false pretenses by falsely representing to his company that the policy it had issued was the only insurance on the property destroyed, when he knew there was other insurance that had been collected, and the company did not know this fact, and induced by the false statement of the agent, the company was influenced to settle the loss.

Second.—Where a policy provided that if there was other insurance on the property it should be void, the knowledge of the agent that there was other insurance will not bar the company from the right to rely on the clause in its policy to defeat the recovery of the insurance when the agent in pursuance of a conspiracy and to practice a fraud represented to the company that there was no other insurance on the property. The fraud of the agent and the property owner will take the case out of the rule charging the company with notice of the knowledge of its agent.

Third.—An indictment for obtaining money under false pretenses that charged in one count that its agent entered into a conspiracy with a property owner to defraud the company, and in pursuance of this conspiracy falsely represented after the property was destroyed by fire that there was no other insurance on it, and in another that he presented to the company a false estimate of the cost of replacing the loss purporting to have been signed by a carpenter, and yet in another assisted the property owner in procuring an affidavit that there was no other insurance, was not objectionable on the ground that it charged three distinct offenses.

Fourth.—An indictment may set out in separate counts the different modes and manners in which the offense was charged and committed.

MONTREAL COMPANIES

Quebec Railway, Light, Heat and Power Statement—
New Power Development—Millers and the
Wheat Crop

Monetary Times Office,

Montreal, August 15th.

The announcement has been made that the Quebec Railway, Light, Heat and Power Company will show a satisfactory increase in earnings in its annual financial report. It is stated, apparently in a semi-official manner, that the following will be the result:—

	1911.	1912.	Increase or decrease.
Gross earnings	\$1,280,126	\$1,505,000	+ \$284,874
Operating expenses ...	661,907	733,000	+ 71,093
Net earnings	618,219	842,000	+ 213,781
Fixed charges, and div...	656,319	620,000	— 36,319
Organization expenses ..	10,681		
Extraordinary Income ..	111,109		
Surplus	62,328	212,000	

As the capital stock of the company is \$10,000,000 it will be seen that the surplus indicated is equal to 2½%. The above comparison fails to indicate the real improvement in the Quebec Railway, Light, Heat and Power Company. Included in the extraordinary income mentioned above for last year was \$100,000 which was not earned by the company itself but by its subsidiaries, previous to July 1st, 1910, at which date the amalgamated company began business. In reality, therefore, the surplus of \$62,328 might have been shown as a deficit of \$26,991 on the year's business, being \$37,672, less the organization expenses of \$10,681.

The situation, therefore, is that instead of going practically \$27,000 behind, as was the case last year, the company will be \$213,781 ahead.

The dividend payments amounted practically to \$100,000 per quarter. As the dividend was passed some few months ago, these payments will no longer be necessary. Two of these payments were made during the past year, so that had the company not made them, the surplus would have been increased by about \$200,000. Assuming that above figures are correct, it is manifest that the situation in Quebec Railway, Light, Heat and Power has improved.

Power Possibilities at Carillon.

Another new power development in the vicinity of Montreal is being discussed. The site of the proposed development is Carillon, about sixty miles up the Ottawa River from Montreal. Carillon is the terminal point of the Ottawa River Navigation Company. Navigation is uninterrupted, save for canals and locks, from Montreal to Carillon. Here, however, passengers westward bound are compelled to leave the boat and take the train, the cause of the interruption being the rapids or falls of Carillon, and the famous old dam. This dam took some five years to build and cost some \$3,000,000.

For many years, a great deal of power has been going to waste at this point. Estimates on the amount of power vary very greatly, some placing it as high as 150,000 horsepower. This estimate, however, is not generally credited. In the estimate made for the commission of conservation, the Carillon rapids are credited with being able to supply 26,000 horsepower from the present possible head of 13.5 feet, but it is added that with the river canalized, and with the water control which is included in the Georgian Bay canal scheme, a head of 40 feet with a total of 200,000 horsepower can be developed.

Mr. Henry Myles, formerly president of the Montreal board of trade, is at the head of the company which proposes to develop the falls. It is claimed that there will be no difficulty in getting the capital, and that the power can be readily sold in the city of Montreal.

Expectations May Not Be Realized.

Financial and commercial circles in Montreal are a little disappointed over the growing conviction that the Western crops may be smaller than at first predicted. A month ago no one was found to dispute the statement that the crop would amount to 250,000,000 bushels. Even yet this prediction is frequently referred to as being sufficiently correct. A few weeks ago, however, on what seemed to be good authority, the estimate was reduced to 220,000,000 bushels. One week ago, The Monetary Times interviewed a well-informed Manitoba miller who expressed the view that he would be pleased if the crop was 210,000,000 bushels. His view rather seemed to be that 200,000,000 bushels would be nearer.

During the past week, Mr. S. A. McGaw, vice-president and general manager of the Western Canada Flour Mills Company, visited the city. His estimate was 180,000,000

bushels. In fact, Mr. McGaw expressed the view that even 180,000,000 bushels would be a good result.

Colonel Labelle, general manager of the St. Lawrence Milling Company, being asked what his view was, stated that the crop would probably be about the same size as last year; it might even be less. The value of the crop, however, would be largely in excess of that of a year ago, if present indications as regards quality were realized. His advices from the West were very encouraging as to quality but not so much as to quantity.

Probably Two Hundred Million Bushels.

Mr. W. W. Hutchison, vice-president of the Lake of the Woods Milling Company, would not commit himself to any prediction as to details at this early date. The crop was still a long way from being harvested and much might take place in the meantime either to its advantage or disadvantage. He, however, had been expecting that a crop of somewhere in the vicinity of 205,000,000 bushels was indicated. Lately, however, he had reduced this and in a general way had reckoned on 190,000,000 bushels. The encouraging feature of the crop lay more in quality than quantity, advices encouraging the view that the quality would be good, unless the weather during the coming two weeks is very unfavorable.

Mr. W. A. Black, vice-president and managing director of the Ogilvie Flour Mills, said that harvesting was not under way as yet save in a few places, and that it would not be general for a week or more.

From the foregoing it is reasonably evident that the biggest millers of Manitoba wheat are not expecting a crop of more than 200,000,000 bushels.

Evidently this year's crop is likely to be of about the same volume of last year. The official estimate a year ago was somewhere around 183,000,000 bushels, but millers are of the opinion that it actually turned out about 190,000,000 bushels, and it seems not unlikely that this year's crop may reach that figure. Even this will keep the lake boats and the railways busy, and will call for a large bank circulation this fall.

A TYPICAL UNITED STATES OPINION.

The New York World says:—"It is said in Washington that President Taft will sign the Panama tolls bill if it is presented to him. We find this almost incredible. Both Senate and House have passed a bill which breaks a formal treaty of the United States. They simply have not yet agreed upon all the provisions in conference. So near are we to an indelible disgrace!

"We are not, as some apologists of dishonor say, outwitted in the Hay-Pauncefote treaty. We secured on favorable terms the abandonment by Great Britain of prior treaty claims upon a canal. It was a good and sensible bargain for both nations, for its basis was mutual good-feeling and growing friendship.

"The excuse that the annexation of Panama territory ends our treaty obligations is worthy the ethics of a Police Court shyster. The present treaty, negotiated by Mr. Taft's predecessor and ratified by the Senate, which voted on a Black Friday to break its faith, provides that 'no change of territorial sovereignty or of the international relations of the country or countries' traversed by the canal shall affect 'the obligations of the high contracting powers.' Language could not be more clear. Supposing this outrageous measure passed and signed—what next?

"Great Britain would have an excellent case to carry to The Hague International Court. Our jingo legislators have looked as far ahead as that. We will not arbitrate, they say, a question so vitally affecting the nation's honor. Strip off the lofty words! They mean: 'The only way we could keep so bad a case would be to stay out of court.' Shyster practice again; advising the defendant to run away!

"To break this treaty at the call of private greed must eventually mean turning our backs upon the noble record of the United States as a leader in the cause of international arbitration and the peace of the peoples. The World has gladly praised President Taft's services to this cause. Has not Washington report slandered him in assuming that he will sign a bill so infamous that it is incapable even of plausible defence in the peace court of the nations?"

General passenger agent W. P. Hinton, of the Grand Trunk Pacific Railway, says that such good progress is being made with the construction work that the line will be completed from Winnipeg to Prince Rupert by the end of 1914. There is at present a gap of 100 miles between the western end of the line in Yellowhead Pass and the eastern end of the completed line from Prince Arthur. Mr. Hinton says the Grand Trunk Pacific will do its share in the movement of this season's grain crops. He estimates that the Western farmers should have \$75,000,000 more to spend from this year's crop than they had from the yield last year.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hudson Bay Company.—Application has been made in London by the Hudson's Bay Company, Limited, for the listing of 200,000 five per cent. preference shares of \$25 each.

La Banque Internationale du Canada.—The annual meeting of the La Banque Internationale du Canada has been adjourned till September 3rd in order to permit reports to be prepared.

Duluth-Superior Traction Company.—The earnings of the Duluth-Superior Traction Company for the first week in August showed an increase of \$17 over those of the same week in 1911, amounting to \$23,887.

Black Lake Asbestos Company.—The tender agreed upon by the bondholders and stockholders of the Black Lake Asbestos Company was the only one received within the prescribed time, and as a result they will have control of the company and will proceed with the reorganization scheme.

Montreal Tramways Company.—The securities of the Montreal Tramways Company—bonds, debenture stock and common stock, will be called for the first time on the Montreal Stock Exchange to-day. The securities to be listed are 20,007 shares of common stock, \$16,000,000 debenture stock, and \$10,445,000 bonds.

Spanish River Pulp and Paper Company.—The Spanish River-Ontario Pulp merger will be finally consummated this week, when the stock of the latter will be finally exchanged for that of the former on a basis of three shares for two. The capital of the combined companies will then stand as follows:—

Bonds	\$4,000,000
Preferred	2,250,000
Common	3,000,000

The \$3,000,000 Spanish common retires the original Ontario Pulp common.

Brazilian Traction Company.—The exchange of Rio and Sao Paulo shares for the proposed Brazilian Traction Company's shares has progressed to a point which is said to leave no doubt of the success of the holding company plan. English and foreign shareholders were prompt in changing their shares, but it is only within the last week that Canadian shareholders have shown much disposition to respond to the invitation of the Rio and Sao Paulo directors. The rush at Toronto last week was such that the bank handling the shares got behind in the issuing of deposit receipts, but this difficulty has been remedied, and depositors are now receiving their receipts the same day as they deposit their shares.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail Smelter for the week ending August 2nd, from July 1st to date, are as follows:—

	Week end. Aug. 2nd.	July to date.
Centre Star	3,155	15,821
Sullivan	715	2,883
Le Roi	846	4,376
Molly Gibson	81	409
Richmond-Eureka	31	122
Other mines	970	5,271
Totals	5,798	29,882

Lake Superior Corporation.—The steel mills of the corporation are in good condition, and the machinery and properties are in the best of repair. The company owns its own ore and coal properties, and at present has under construction the Algoma Central and Hudson Bay Railroad. This line will be completed this fall, and will increase the transportation facilities. Revenues derived from this road will add greatly to the earning power of the company. Negotiations have been under way in London for the issuance of \$1,300,000 5 per cent. bonds of the Algoma Steel Corporation, which is in connection with the recent financing of the steel plants of the Lake Superior Corporation.

The prospects for earning full interest on the \$3,000,000 second income 5 per cent. bonds seem bright. The date for payment on these bonds is October 1st, and, according to a director of the company, the payment is almost assured.

Dominion Sawmills, Limited.—The first mortgage debenture holders may act independently of other interests in connection with the reorganization scheme.

A correspondent, Mr. William F. Watts, who is an original holder of £500 6 per cent. debentures, writes to the London Economist regarding the Dominion Sawmills reorganization as follows: "In the scheme of reorganiza-

tion nothing is said about the unpaid coupon due July 1st. I consider this should be made a first charge on profits along with the 5 per cent. which we are asked to accept in lieu of the original 6 per cent. from July 1st.

"It is said that 'reorganization' is needful because of 'over-capitalization.' This latter word simply means the vendors had too much, and this 'too much' was provided by the 6 per cent. debenture-holders, who believed the statements in the prospectus on the faith of the names attached to the valuation and of the directors..

"Early in this year I caused special enquiries to be made in British Columbia, and, among other things, I am told: 'The purchase of the various properties now owned by the company involved an outlay of over \$1,000,000.' The debenture issue was originally £800,000, or \$4,000,000, increased to £930,000. Well may you speak of 'watered stock.'

"For the sake of the good name of Canada and of those connected with the flotation, I venture to think the vendors, or vendors and directors, should refund to debenture-holders a percentage of the issue, or give a guarantee for the due payment of interest."

Maple Leaf Milling Company, Limited.—The Maple Leaf Milling Company, Limited, a consolidation of the Maple Leaf Flour Mills Company and the Hedley Shaw Milling Company, formed in the spring of 1910, has issued its financial report for year ended March 31st, 1912. The profit and loss account shows trading profits, for the year, of \$280,036.02, which, after allowing a full year's dividend on the preferred stock of \$175,000, leaves a balance of \$105,036.02 available on the common stock. This is equal to 4.20 per cent. earned on the common stock. The success of the company's fiscal year may be seen in a contrast between the balance at credit of profit and loss brought forward for the previous year and that carried forward from the year now closed. The amount brought forward was only \$6,059.03, compared with \$111,095.05 carried forward from the year ended March 31st, 1912. Profit and loss surplus is \$111,095.05 compared with \$6,059.03 a year ago. The amount available for dividends was equal to 11.20 per cent. on the outstanding preferred stock to meet a seven per cent. dividend on that stock. "After a tour of inspection of the crops throughout the prairie provinces I have come to Vancouver to take up the question of securing a site for a large flour mill our company contemplates erecting here or in the vicinity. With the early opening of the Panama Canal and the rapid strides being made by China and Japan, I expect to see Greater Vancouver become the centre of a large grain milling industry," recently said Mr. Charles W. Band, of the Maple Leaf Milling Company, of which he is a director. It owns flour mills at Brandon, Kenora and Port Colborne, Ont., with a daily output of 9,000 barrels.

Mr. Band stated that there would be no delay in establishing a flour mill on this coast as soon as he secured a suitable site.

Canadian Pacific Railway.—The Canadian Pacific Railway Company has issued a preliminary statement of income for the year ended June 30th, 1912, which compares with the previous year as follows:—

	1912.	1911.	1910.
Gross earnings	\$123,319,541	\$104,167,808	\$94,989,490
Oper. expenses	80,021,293	67,467,978	61,149,534
Net earnings	43,298,243	36,699,830	33,839,956
† Other income	1,104,449	1,118,350	909,235
Total	44,402,692	37,818,180	34,749,191
Fixed charges	10,524,937	10,011,071	9,916,940
Surplus	33,877,754	27,807,109	24,832,251
S. S. replacement and pension fund	1,125,000	1,080,000	980,000
Surplus	32,752,754	26,727,109	23,852,251
Dividends	15,192,235	14,853,867	12,382,112
Surplus	*17,560,519	11,873,242	11,470,139

† Includes only net earnings of steamships in excess of amount included in gross earnings.

* Surplus does not include special income from interest on land sales and from other extraneous assets, which amounted to \$5,158,585 in 1912. In 1911 this amounted to \$6,602,205, and in 1910 to \$5,481,825.

The forthcoming annual report of the Canadian Pacific Railway will contain a map of the system, drawn on a more comprehensive scale than any of the charts heretofore issued with the annual reports. On the new map will be shown double tracks, lines over which the company has running rights and lines projected for construction, while the names of most of the smaller stations and flag stations will be eliminated entirely, so as to present a clear picture of the system and the important cities and junction points. The company will make a new stock issue.

DEPOSIT INSURANCE

Wisconsin Bankers' Association Formulates Scheme of Limited Mutual Organization

The special committee appointed at the convention of the Wisconsin Bankers' Association in 1911 to formulate a plan for the mutual insurance of bank deposits, has submitted its report. The suggested plan of the committee has been printed in pamphlet form, with explanatory notes in a parallel column. The plan begins with a suggestion for an organization to be called the "Bank Deposit Limited Mutual Insurance Company," with headquarters at Madison. Any state or national bank or trust company shall be entitled to membership, subject to the approval of the board of directors, who may postpone the date at which an application automatically takes effect.

Contribution to Surplus Clause.

A contribution to the surplus by each bank that is a policyholder or member, is provided for by law, as follows:

"Subject to the conditions of this sub-section, any mutual insurance company may borrow money without discount or the payment of commissions, and upon receiving the full amount of the principal to be used solely for the business of insurance, may issue its notes, to be known as surplus notes, which shall fully recite said conditions. Except as herein provided, such notes and indebtedness shall not be a liability or claim against any of the assets of the company. The principal shall be payable only when the amount of the surplus of the company over all liabilities is double that of such principal then unpaid. The interest shall only be payable from the surplus and shall not exceed such sum as may be fixed nor in any case ten per centum per annum. On a dissolution of the company, the principal and interest shall be payable from the surplus. The amount thereof outstanding with the unpaid interest shall be stated in each annual report."

Insurance Covers Full Amount of Deposit.

Each bank policyholder advances one-half of one per cent. on the amount of its policy, or equal to its average deposits, to provide a surplus fund. For this advance the bank receives the note of the insurance company, drawing three per cent., which the bank can carry in its assets—the proceeds being left on deposit with that bank by the insurance company.

Depositors holding other securities for their deposits are not to be insured.

The insurance covers the full amount of the deposit, except in instances where deposits exceed amount of insurance permitted by law, and where interest in excess of three per cent. is paid by bank. Only thirty banks in the state have deposits in excess of an amount that could be covered by the proposed insurance.

In Case of Failure.

In case of the failure of an insured bank, payment shall be made to the depositors within thirty days after an order has been made or approved by the commissioner of banking; or, in case of a national bank, the comptroller of the currency, for the liquidation of said bank, according to law; or whenever, prior to any such order for liquidation the commissioner for banking or the comptroller of the currency, upon insolvency or suspension of any bank, shall order payment to be made.

It is provided that the average amount of insurance shall be the average amount of deposits for the calendar year, determined from the five published statements required by law, excluding, however, deposits otherwise secured; and, for the purpose of computing premium payments, shall not be less than the amount of capital stock or greater than the maximum insurance permitted.

The annual premium paid by the insured banks will be twenty-five cents per \$100 on the average amount of the insurance.

Cancellation of a policy by the bank insured is only permitted after all the depositors have been notified and given an opportunity to withdraw their deposits if they so desire.

The Toronto detective department has issued a statement warning the public here of the circulation of a large number of bogus one and two dollar Dominion bills. The citizens of Hamilton are also being warned.

Insurance rates on the St. Lawrence route will not be lowered. Hon. G. E. Foster discussed this question in London with underwriters. "If the statistics of collisions and losses on the St. Lawrence route materially better themselves," he said in an interview at Ottawa, "the probability is the rates will come down, but the present probability is the rates will remain the same or will be even higher. The Government will certainly do all it can to better the present situation."

INDUSTRIAL INSURANCE.

Problem of Lapses—Figures of Companies Doing Business in Canada—Some Practical Suggestions

The question of lapses is a continual problem for life insurance companies. While new policies were issued by Canadian life companies during 1911, valued at \$125,000,000, lapses accounted for nearly \$40,000,000. The lapses of British companies doing business in Canada last year totalled \$1,650,000, and their new policies \$7,000,000. The figures of the American companies were \$24,888,000, and their new policies \$63,000,000. The amount in force at the beginning of the year held by Canadian, British and American companies were \$575,000,000, \$48,000,000 and \$242,000,000 respectively.

One of the insurance companies pamphlets states that the best way to prevent lapses is to follow closely the rule of careful selection of risks in the canvass for new business. If the person canvassed is the right kind of person, that is to say, a person in good health, of good habits and able to pay the premiums, the chances are remote that such a one, when insured, will allow the policy to lapse. On the contrary, wise enough to see and to realize that the policy is a valuable contract and becomes more valuable the older it grows, the holder will not let it die unless compelled to do so by extremely adverse circumstances. Hence the great importance of making the original canvass thorough and complete. Business put upon the books that way seldom lapses.

To Prevent Abnormal Lapsing.

"Another way to prevent abnormal lapsing," continues this counsellor, "and that is all for which we are contending, it being admitted from the start that lapsing to a normal degree is to be expected as one of the unavoidable and, in the case of mortality lapses, natural features of our business—is to keep as closely in touch with policyholders as possible. Watched with care, any tendency on their part to lapse will be quickly discovered. Then is the time to take pains to point out the unwisdom and the danger of lapsing."

"There are other things to consider. The agent owes it to himself, to the policyholder and to the company, to do everything in his power to prevent lapses, and when they do occur through causes other than death or physical impairment, to revive them. It is not merely the privilege and the business opportunity of the agent, but his plain duty to do his utmost to minimize the lapse evil. The caring for the debit in a dutiful, wise and prudent way, conscientiously and persistently pursued, can not fail of being beneficial to all three parties concerned—the policyholder, the company and the agent himself."

Figures of Canadian Companies.

The lapse ratio in industrial insurance is, as is well known, high. Here are some figures of the four companies writing industrial insurance in Canada. They are culled from the government blue book for the year 1911:—

Company.	Amount in force Jan. 1, 1911.	New policies issued.	Lapses.
London Life ...	\$ 7,864,709	\$ 4,035,729	\$ 3,014,000
Union Life	15,612,165	17,981,502	12,290,980
Metropolitan ...	46,199,059	15,108,608	8,902,075
Prudential	11,388,120	11,592,891	8,268,223

What a Canvasser Says.

A letter from an industrial insurance canvasser says: "My idea, from practical experience, is, that on calling upon a family that have signified their intention of dropping the insurance, we should first of all impress upon the party or parties interested that they cannot appreciate the value of their contracts. To prove it have them bring forth the policy, and with them go over the attractive features and the clauses the policy contains. This will excite new interest, as there are but few people who know the real contents of their contracts. Thus explained, the policy will be much more likely to remain in force. It will change the indifferent holder into a satisfied and contented one. If assistants and agents throughout the field were closely instructed to give the above plan their strict attention, there would positively be a reduction of lapses."

Creditors and shareholders of the Hudson's Bay and Pacific Railway Development Company have nominated an official receiver and Sir W. E. Peat for the liquidatorship. Under the compulsory winding-up order the registrar will first appoint an official receiver. It is said that the company's history really consisted of repeated attempts to borrow money. It was successful in borrowing a little, but had to pay a big price for it, says a Canadian Associated dispatch from London.

INSURANCE COMPANIES' ASSETS AND INVESTMENTS

Life Insurance Corporations Doing Business in Canada Have One Hundred and Twenty Millions in Bonds and Debentures

The Canadian, British and American insurance companies have large aggregate assets in Canada. Those of the fire companies, for instance, amount to more than \$54,000,000; the accident, guarantee, burglary, steam boiler and similar insurance companies, approximately, \$5,000,000; and the life insurance companies doing business in Canada, \$275,000,000. Of the Canadian fire companies' assets amounting to \$14,000,000, stocks account for \$1,514,000, and bonds and debentures for \$6,834,000. Cash on hand and in bank total \$1,513,000, and loans on real estate, \$1,050,000. The British companies transacting fire insurance in Canada have total assets in this country of \$34,258,000. Loans on real estate is the biggest item contributing to that amount; they aggregate \$15,752,000. Their bonds and debentures amount to \$12,724,000; stocks, \$67,000; and cash, \$1,347,000.

The American fire companies have small assets in Canada amounting to \$5,175,000. The bulk of this, viz., \$4,028,000 is in bonds and debentures. These figures include those of the Union Assurance Society, of Paris, France, the only company doing business in Canada under a Dominion license which cannot be classified as Canadian, British or American. It has \$55,295 invested in bonds and debentures in Canada. In the assets of Canadian fire companies, real estate amounts to \$967,000, and in those of British companies \$2,396,000. The American companies hold no real estate in the Dominion.

Assets of Miscellaneous Companies.

The total assets of the corporations doing miscellaneous insurance in Canada amount to \$5,589,000, bonds and debentures accounting for \$3,105,000. Only four of the eighteen companies engaged in this class of business have real estate included in their assets, the total being \$198,108. Five companies have loans aggregating \$86,531 on real estate. Four companies have nearly \$1,000,000 invested in stocks.

The Canadian life insurance companies have real estate valued at \$7,945,156 among their total assets of \$190,717,000. Their loans on real estate amount to \$63,565,000 and loans on collaterals, \$2,389,178. Cash loans and premium obligations on policies in force are \$22,960,000. Their cash on hand and in banks aggregates \$2,492,000. The total assets in Canada of British companies doing life insurance in this country amounts to \$29,751,000. Loans on real estate account for \$10,127,000; loans and collaterals, \$135,000; and cash loans and premium obligations on policies in force, \$1,897,000. The cash on hand and in banks or deposited with the Dominion Government totals \$147,262.

Have Little Real Estate.

The American life companies doing business in the Dominion have nearly twice the volume of assets in Canada as those of the British companies, viz., \$54,749,000. Their loans on real estate approximate \$3,142,000. Cash loans and premium obligations on policies in force amount to \$6,561,000. They have no loans on collaterals. Only one of the sixteen American companies holds real estate in Canada, the Metropolitan Life, which has \$58,682. Three of the fifteen British companies have \$643,405 in Canadian real estate.

The bond, debenture and stock holdings of the life insurance companies doing business in Canada under Dominion charters may be tabulated as follows:

Companies.	Bonds and Debentures.	Stocks.
Canadian	\$68,475,565	\$14,328,471
British	16,166,671	151,984
American	43,045,386	18,000

Important Market Factor.

Our life insurance companies, therefore, are an important factor in the Canadian investment field, the above figures showing that at the end of last year these corporations had invested in bonds, debentures and stocks in Canada no less than \$142,186,077.

The statement in the government blue book, showing the movement of securities of Canadian life companies during the six months ended December 31st, 1911, indicates that the life insurance companies made the following purchases of bonds and debentures:

Securities.	Par Value.	Price Paid.
Provincial	\$ 75,733	\$ 74,143
Miscellaneous	114,950	113,810
Industrial	734,733	622,558
Municipal	1,134,434	1,145,853
Railway, light, power, etc...	4,940,570	4,538,292

These figures show that the life insurance companies were strong supporters of the municipal bond market and also of industrial and railroad bonds. They made purchases, too, of stocks with a par value of \$249,310, paying therefor \$388,088. Their real estate purchases totalled \$390,273.

The other side of the ledger is shown in the following table giving details of the bonds and debentures sold during the same six months' period:

Securities.	Par Value.	Price Recvd.
Industrial	\$ 8,000	\$ 8,190
Municipals	444,827	441,956
Railway, light, power, etc...	1,336,420	1,211,838

The companies sold stocks with a par value of \$310,150, receiving therefor \$349,049. They also disposed of real estate amounting to \$160,985, having paid \$100,870 for it previously.

STOCK OF FISHERIES COMPANY OFFERED.

A maritime stock offering has been placed on the market by Messrs. F. B. McCurdy & Company, Halifax, in the shape of a block at par of \$200,000 7 per cent. cumulative preferred stock of the North Atlantic Fisheries, Limited, with a bonus of 40 per cent. common stock. The company has authorized capital of \$4,000,000, of which \$1,000,000 is issued. The \$1,000,000 authorized preferred cumulative stock is redeemable at the rate of 110 per cent. of par and accrued dividend. There is also \$1,000,000 common stock. Half of each is issued.

The objects of the company are to operate cold storage plants, curing and canning factories; to carry on business as dealers in fresh, smoked and canned fish, from the Atlantic fisheries; and to buy and sell bait and other merchandise commonly used by fishermen. The North Atlantic Fisheries, Limited, has been organized for the purpose of acquiring as a going concern, the Halifax Cold Storage Company, Limited, adding largely to the working capital and extending the plants and business.

The Halifax Cold Storage Company was established in 1906 for the purpose of supplying cold storage room at Halifax for the produce and provision trade, and bait for fishermen, as well as providing space and facilities for the company's own fresh fish and provision trade. A plant has also been built, and is operated at Port Hawkesbury, N.S.

The company's plants have a capacity for handling 20,000,000 lbs. of fish per annum, equivalent to 1,000 carloads of 20,000 lbs. to the car. The business of the company has outgrown the capacity of the plants, and it has become necessary to increase the facilities. With this end in view additional property has been purchased at Halifax, and it is intended to ultimately double the capacity of this plant.

The North Atlantic Fisheries, Limited, will have the following sources of profit:—Selling fresh fish wholesale; making and selling various kinds of manufactured products, such as boneless fish, bloaters, kippers, etc.; selling bait and ice to local and bank fishermen, and selling cold storage facilities to importers and exporters of provisions.

The earnings of the Halifax Cold Storage Company for the last fiscal year were \$35,155, and have shown a gradual increase. This is seen from the following table:—

1910	\$20,395
1911	24,465
1912	35,155

The above table shows the actual net profits and does not include the sums paid by the company as interest on borrowed capital. With this interest included, the trading profits for the last three years as certified by the company's auditor, were as follows:—For 1910, \$21,845.88; for 1911, \$26,039.27; and for the year ending April 30th, 1912, \$39,605.26.

In taking over the Halifax Cold Storage Company, Limited, as a going concern, over \$225,000 additional working capital will be added to the business. In this connection it is to be noted that the net earnings of the Halifax Cold Storage Company, Limited, as shown by the company's last financial statement, are more than sufficient to pay the dividends on the total preferred stock now being issued by the North Atlantic Fisheries, Limited.

The directors are:—Messrs. Arthur Boutilier, president and general manager; H. N. Wallace, banker; O. E. Smith, president Nova Scotia Car Works, Limited; R. A. Corbett, of Messrs. G. S. Campbell & Company; Dr. C. F. Fraser, director, Eastern Trust Company; Thomas Notting, barrister; and F. B. McCurdy, M.P., banker, all of Halifax.

The following Canadian issues have been listed:—Canadian Western Natural Gas, Light, Heat & Power, £811,642 sterling fives; city of Edmonton, £595,100 sterling four and halves; Southern Alberta Land, 47,392 shares, £1 each; Western Canada Trust, 20,000 5 per cent. cumulative preference shares, £10 each.

Life Insurance Policies Purchased in Canada Last Year

Of 414,596 life insurance policies purchased in Canada last year, valued at \$195,446,780, the most popular apparently was the straight life, of which, 234,899, valued at \$128,623,232 were issued. Endowment policies sold in Canada last year numbered 106,210, valued at \$36,499,945. Term and all other policies accounted for the remainder, viz.: 73,487 with a value of \$29,246,270. Of the life policies the American companies issued twice as many as the Canadian companies, although their aggregate value was half that of the fewer policies of our own companies. American companies issued about 58,000 endowment policies while the Canadian companies sold 46,000. The value of the former was \$12,000,000 and of the latter \$23,000,000. The Canadian companies disposed of 70,064 term and other policies valued at \$21,950,272, the British and American companies being responsible for the small balance making up the total under that heading. Interesting details culled from the government bluebooks are given below :—

LIFE INSURANCE IN FORCE.

The total amount of life insurance in force in Canada at the end of last year was \$963,695,809, represented by 1,334,714 policies. These were divided with the Canadian companies as follows:—

Companies.	Policies in force.	
	Number.	Amount.
Canadian	619,178	\$639,292,042
British	24,031	51,751,405
American	691,505	272,652,362
	1,334,714	\$963,695,809

The Canadian companies have a strong lead. Bonus additions on December 31st, 1911, amounted to \$9,218,811. Of that sum, \$5,818,167 was credited to Canadian companies, a little more than \$2,000,000 to British companies, and a trifle less than \$1,000,000 to American companies. The values of the policies in force at the end of last year were divided as follows:—

Companies.	Term and all other.		
	Life.	Endowment.	
Canadian	\$445,813,547	\$148,104,447	\$39,555,881
British	29,865,054	17,136,793	2,287,152
American	175,062,663	76,557,531	19,553,930

There is little doubt as to the most popular style of policy.

SUCCESSFUL AGENT MUST BE A SALESMAN.

Mr. F. W. Tasney, of Chicago, western manager of the ordinary department of the Prudential, in a recent address said:

"Education in general, elaborate training and a large equipment of information seem often to be handicaps to an insurance solicitor. Above all things he needs to be a salesman. The fighting is done by the fellow, not with heavy artillery but in light marching order. The vest pocket rate book is the gatling gun of the profession. Going to the hip pocket for a rate book is dangerous in some parts of the country. A solicitor at times should throw open his coat and show that he is not armed. Two solicitors tackled a Swede, one with charts showing assets and liabilities, the other with a compendium of rates, policy contracts and what not. After an hour or so the Swede asked: 'What you want me to buy, book or map?' The successful solicitor should know when to quit and when to go. He must not do all the talking. He must know he has something good to sell, he must have faith in the company that puts out the goods, and he must be thoroughly acquainted with the merits of both."

SOME BIG LIFE INSURANCE FIGURES

Life insurance in New York State, the home of the famous Armstrong law, has assumed large proportions. According to the latest report of the State Insurance Department, assets were \$3,942,144,356, an increase over the previous year of \$248,896,028, of this increase \$115,933,292 being in New York state companies. The liabilities of the various companies, excluding gross surplus and special funds, were \$3,727,340,150, of which \$2,181,200,699 was in New York companies. The gross surplus and special funds amounted to \$214,804,206, of which \$78,946,053 was in New York companies.

The total income was \$754,533,218, of which \$395,736,673 was in New York companies, an increase over 1910 of \$7,028,108, the total gross increase for all companies being \$37,880,482. The disbursements for the year are shown to have been \$526,742,699, of which \$390,098,215 was paid to policyholders, while the cost of management, including dividends to stockholders, was \$136,644,484.

New York companies issued 389,628 "ordinary" policies in 1911, insuring \$686,677,019, as against 382,041 policies issued in 1910, insuring \$687,006,384. Companies of other states in 1911 issued 421,834 policies, insuring \$891,160,230, while in 1910 they issued 364,987 policies, insuring \$757,834,872. Compared with 1910, it appears that there were 64,434 more policies issued last year and the amount of insurance written increased \$142,004,993. There were 40,980 more policies terminated in 1911 than in 1910, and \$82,315,168 more insurance.

The total number of "ordinary" policies in force on December 31, 1911, was 6,621,386, insuring \$12,802,989,204, an increase in policies over 1910 of 345,195 and in insurance \$682,141,142. The amount of "industrial" insurance in force was \$3,109,098,003, an increase over the previous year of \$201,282,613, making a total increase in insurance in force for both classes of business of \$883,423,755.

The business in force in the state of New York and transacted therein during the past year by all life insurance companies of this and other states including "industrial" business was as follows: Policies in force 6,111,581, insuring \$2,723,293,369; policies issued 938,486, insuring \$392,342,650; an increase in insurance in force of \$160,240,904 over 1910 and an increase in insurance written and paid for of \$29,078,869.

The total receipts of the Department for the fiscal year ended September 30th, 1911, were \$604,585; the total expenditures were \$301,673; an excess of receipts over expenditures of \$302,912.

The par value of the securities, held on deposit by the Department on December 31st, 1911, belonging to the various insurance companies required by law to make such deposits, was \$33,720,710.

LIFE AGENTS MUST PUT IN A FULL DAY.

The New York Insurance department, in a circular letter, announces the stand it has taken regarding part-time men engaged in the life insurance business:

"This department realizes that the ranks of life insurance solicitors must, from time to time, be recruited from men who have previously been otherwise engaged, and that it is sometimes impracticable to sever the earlier business connections until it has been ascertained whether the occupation of a life insurance solicitor can be exclusively embarked on. In the case of men who can establish a strong prima facie case we shall be disposed, by the issuance of an experimental license for one year, to give the applicant every opportunity to make his choice definitely. In all such cases, however, it must be borne constantly in mind that the business of soliciting life insurance is one which calls for a high degree of professional efficiency and training, and that in the long run it can only be conducted properly by those who devote their entire time to it."

COMPULSORY INVESTMENT OF LIFE INSURANCE RESERVES.

Mr. Alfred Hurrell, attorney for the Association of Life Insurance Presidents, delivered an address before the South Carolina Bankers' Association on "The Call for Investments." He declared that reputation as a banking asset is as essential to a state as it is to an individual, and urged the enactment of fair, conservative laws as the best means of attracting outside money, saying that compulsory investment legislation repelled capital. On this point he said:

"Many cases could be cited, did time permit, to illustrate what I mean when I say that the attitude of the people of a state is one of the determining factors in influencing capital to come or stay away. A concrete example of this truth, occurring within life insurance circles, is furnished by the history and results of certain legislation in Texas. I refer to the statute of that state commonly known as the Robertson Compulsory Investment law. Here was a legislative attempt, as the name of the act implies, to compel investments in local securities, to use legalized force in the gentle art of marketing its promises to pay. Not content with the steady but sure processes of the law of supply and demand, and a sturdy reliance on the value and attractiveness of its resources to influence favorably and in a natural way the flow of capital to it, the state embarked upon a coercive policy which its advocates claimed would increase the volume of investments at once. Let us see what happened.

"The requirements of the law immediately forced twenty-three of the best life insurance companies in the country out of the state. This action pleased the stock jobber and the insurance company promoter, as it gave them the opportunity which they very thoroughly improved, to reap a golden harvest in the fields thus vacated. The politicians, however, not realizing in their blindness that they were killing the goose that laid the golden egg, in their impulsive desire to gather them all at one fell swoop, and who had not really intended to give the state such adverse advertising as these withdrawals did give it, set up the hue and cry that the action of the companies was not taken in good faith, but in a spirit of revenge and retaliation. They could not see what has been seen more clearly since, that the question was national, not local, and that the companies could not temporize with such a law in one state unless they could live and successfully operate under it in every state in the Union, were this same law adopted. With the exit of the companies went the greatest opportunity Texas ever had of enjoying a strong, steady, and what would have been an increasing flow of money to it for its development. Instead of realizing what it had, the state deliberately blocked the channel through which investments were coming to it, and deflected the current into the nearby states of Oklahoma and Louisiana and elsewhere."

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Vancouver, B.C.—The False Creek \$600,000 by-law was passed.

Brantford, Ont.—Brantford city council passed a by-law to expend \$14,000 on the widening of local dykes.

Newmarket, Ont.—Up to August 28th for \$28,000 5 per cent. 30-year debentures. J. E. Hughes, clerk, Newmarket.

Outlook, Sask.—Up to August 19th for \$15,000 5 per cent. 30-year debentures. A. Moore, secretary-treasurer Outlook.

Imperial, Sask.—Tenders are called for \$15,000 6 per cent. 15-year waterworks debentures. J. G. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

Stettler, Alta.—Until August 22nd for \$10,800 5½ per cent. 20-year waterworks, and \$4,000 5½ per cent. 20-year electric light debentures. R. Dick Ballantyne, secretary-treasurer.

Duck Lake, Sask.—Until August 31st for \$4,000 5½ per cent. 20-year, and \$6,000 5½ per cent. 20-year Government guaranteed general debentures. F. Hopwood, secretary-treasurer.

Bassano, Alta.—Up to September 16th for \$150,000 5 per cent. 30-year water and sewer debentures. Geo. B. R. Bond, secretary-treasurer, Bassano. (Official advertisement appears on another page.)

Carleton County, Ont.—Up to Tuesday, August 20th, 1912, for the purchase of \$20,000 county of Carleton, Ont., bonds, to be issued on second day of September, 1912. C. McNab, county clerk, Ottawa.

Ottawa, Ont.—Until August 29th for \$12,000 40-year, \$727,000 30-year, and \$292,429.99 20-year debentures; interest, 4 per cent. Charles Hopewell, mayor. (Official advertisement appears on another page.)

Windsor, N.S.—Up to August 28th for \$10,000 debentures bearing interest at the rate of five per cent. per annum, payable half-yearly and redeemable in thirty years. J. C. Geldart, clerk and treasurer, Windsor.

Forest, Ont.—A by-law providing for the raising of \$30,000 for installing a waterworks system is to be submitted to local ratepayers. Another proposal is to take over the electric plant and run it under municipal ownership.

Montreal, Que.—Up to September 12th for \$500,000 4 per cent. 30-year bonds of Montreal city Protestant board of school commissioners. C. J. Binmore, secretary-treasurer, Montreal. (Official advertisement appears on another page.)

Neepawa, Man.—Up to August 30th for \$100,000 4½ per cent. 30-years waterworks and sewers debentures, and \$2,693 5 per cent. 20-years. J. W. Bradley, secretary-treasurer, Neepawa.

Taber, Alta.—Four by-laws were carried, and were for the following purposes:—\$4,000 for remodelling the old school building; \$3,000 for laying plank sidewalks; \$3,000 for improvements at the ball grounds for the use of the Agricultural Society; and \$3,000 for grading certain streets.

Chilliwack, B.C.—Up to September 3rd for following 5 per cent. 40-year debentures: Waterworks, \$100,000; high school, \$25,000; macadamizing, \$30,500; drainage, \$3,500; city hall, \$2,500; fire hall, \$1,000. D. E. Carleton, city clerk, Chilliwack. (Official advertisement appears on another page.)

Saskatoon, Sask.—By-laws ratifying the agreement made between the city and the Quaker Oats Company, and the one authorizing the expenditure by the city of \$85,000 for the purchase of property for them, and the by-laws for city hall furniture, \$15,000, and Nutana Hill paving, \$55,000 were passed.

Montreal, Que.—The Protestant Hospital for the Insane invite tenders for \$185,000 of debentures of \$1,000 each, bearing interest at the rate of four and one-half per cent. per annum, principal and interest being guaranteed by the provincial government for a term of twenty years. J. Brown, secretary, Montreal.

St. Thomas, Ont.—The city council has decided to submit five industrial propositions to the ratepayers for their approval. They are as follows:

St. Thomas Biscuit Company, to erect \$60,000 biscuit and cardboard box factory and employ 100 hands, for loan of \$35,000 for ten years, and fixed assessment of \$5,000. Erie Iron Works, manufacturers of farm implements and hardware specialties, to enlarge and improve factory and increase number of hands from 20 to 50, in return for loan of \$15,000 and fixed assessment of \$5,000. Mr. E. E. Donovan, of London, to locate \$32,000 shoe factory, for loan of \$12,000. Mr. A. J. Strough, of Gallion, Ohio, to erect factory for manufacture of steel grave vaults in return for free site and fixed assessment of \$2,000. Local capitalists, to erect cold-storage plant, for fixed assessment of \$2,000.

LIFE COMPANIES' ASSETS

Large Number of Millionaire Insurance Organizations
in Canada and the United States

Millionaire insurance organizations of all classes operating in the United States and Canada now number three hundred and sixteen, judging them by the volume of assets held. The list recently presented in the Insurance Press covers the entire number, and is arranged in order of magnitude. The large life companies head the list, no fewer than twenty-two of them coming ahead of the first fire insurance company. The largest life insurance company in this respect possesses more than \$680,000,000 of assets, while in fire insurance the leader has but \$32,000,000. Casualty companies, excluding those which also transact a life business, are headed by one with nearly \$10,500,000 occupying the fifty-sixth place. Some fraternal orders occupy prominent positions, the largest being in thirty-fourth place with approximately \$19,000,000, while three others individually possess more than \$10,000,000.

Nearly all Life Insurance.

An interesting feature is presented in the summation showing a grand total of more than \$5,000,000,000, over 80 per cent. of which is credited to life insurance.

99 Life companies	\$4,317,180,612
114 American fire and marine companies..	500,028,973
35 Fraternal orders	129,758,908
36 Foreign fire and marine companies ..	124,509,113
32 Casualty companies	110,131,665
316 Total	\$5,181,619,271

The first twenty companies are as follows:—

Bank.	Name of Company.	Assets.	Class of Business.
1.	New York Life, N.Y.	\$684,684,686	Life.
2.	Mutual Life, N.Y.	587,130,263	Life.
3.	Equitable Life, N.Y.	503,867,097	Life.
4.	†Metropolitan Life, N.Y. ...	352,785,890	Life.
5.	Northwestern Mutual, Wis..	285,575,219	Life.
6.	†Prudential Ins. Co., N.Y....	258,824,978	Life.
7.	Mutual Benefit, N.J.	147,292,307	Life.
8.	Penn Mutual, Pa.	126,487,055	Life.
9.	°Aetna Life, Conn.	104,755,535	Life.
10.	Union Central, Ohio	87,237,923	Life.
11.	†John Hancock, Mass.	82,831,246	Life.
12.	°Travelers, Conn.	79,924,203	Life.
13.	Provident L. & T., Pa.	77,783,777	Life.
14.	Connecticut Mutual, Conn..	68,842,200	Life.
15.	Massachusetts Mutual, Mass.	64,730,642	Life.
16.	New England Mutual, Mass.	58,440,119	Life.
17.	National Life, Vt.	53,443,227	Life.
18.	Germania Life, N.Y.	46,786,132	Life.
19.	Canada Life, Can.	44,257,341	Life.
20.	Sun Life, Can.	43,900,886	Life.

How Canadian Companies Stand.

The Independent Order of Foresters, Canada, is rated thirty-fourth on the list and the Mutual Life of Canada thirty-fifth. Other Canadian companies are given in the list as follows:—Thirty-nine, Confederation Life; 42, Manufacturers' Life; 45, North American Life; 57, Great West Life; 75, Imperial Life; 110, Federal Life; 117, Canadian Order of Foresters; 125, London Life; 161, Dominion Life; 165, Excelsior Life; 167, Western; 208, National Life; 211, Society des Artisans; 214, British-America; 216, Northern Life; 218, Ancient Order United Workmen; 229, Union Life; 233, Home Life; 256, Continental Life; 310, Guarantee Company of North America.

Mr. W. J. Chalis, the London secretary of the Western Canada Land Company, the Southern Alberta Land Company, and the Canadian Wheat Lands, Limited, has been visiting Edmonton in connection with the business of the companies. He will conduct a party of British capitalists over the province during August and September.

FIRE INSURANCE COMPANY—A strong financial company in Calgary controlling a large volume of good business, wishes to obtain the general agency of a Board Company. Address P.O. Box 1236, Calgary, Alta.

WANTED—A British Fire Insurance Company requires at Toronto a capable clerk with knowledge of casualty business: good prospects. Apply, stating age, qualifications and salary expected to Box 70, The Monetary Times Office, Toronto.

RAILWAY DEVELOPMENT IN THE KOOTENAY

Electric Power for Rossland Branch—Improvement of the Through Crow's Nest Route

(Special Correspondence).

Nelson, B.C., August 12th.

The announcement of the West Kootenay Power & Light Company, that it will install a third unit in its main plant at Upper Bonnington Falls, below Nelson, to be in a position to furnish electric power to the Canadian Pacific Railway when the latter electrifies its Rossland branch, is one of the numerous ways in which the construction activity of the railway company in the Kootenay is reflected. The plant is hydraulically developed for 32,000 horse-power, and electrically developed for 16,000 horse-power at present. The change to electricity for motive power on the Rossland branch, it is generally believed, is to be the first step in the application of this agent throughout the system in the mountains.

Preceding this change, for the last two years the Canadian Pacific Railway has been steadily improving the whole system tributary to the Crow's Nest branch, and shortly the through route portions will be of a standard equal to the main line.

To Be Standard Gauge.

The construction in the Slocan, which is to extend the Slocan system over the summit and down to Kootenay Lake, is nearing completion. On the Kootenay Lake section, the old Kaslo & Slocan line of the Great Northern has been re-opened temporarily as a narrow gauge line, to take in supplies and bring out ore. Next season the entire system will be standard gauge. The Canadian Pacific Railway, it is just announced, will construct ore docks at Kalso, the port of that region, and the silver-lead ore of the section will be conveyed in barges to Nelson, where it will be transferred to rail for transport to the Trail smelter.

The steel hull for the new Kootenay Lake steamer has arrived from the yards of the Polson Iron Works, Toronto, in five cars, and 150 men are now at work in the Nelson yards on this \$200,000 boat, which next year will take its place in the through service.

Short Line to Coast.

Overshadowing any of these evidences of the railway company's intentions with regard to this territory is the rate at which the short line is being pushed through toward the Coast. In eight months, at the present rate of construction, the extension of the present Boundary branch, which now is operated to Midway, will be completed to Penticton, on Okanagan Lake. In thirteen months or less there will be connection with Merritt, the present terminus of the Nicola branch from the main line. On the date that that connection is established, the through Crow's Nest route will be diverted at Nelson to the Boundary branch, when a direct train service between Nelson and Vancouver will be inaugurated. This will be the third route between these termini, and will be much shorter than either the Arrow Lakes route or the Great Northern route.

This revolutionary programme requires practically but a year for its completion, and in all essentials the new Crow's Nest through route will be in existence and operation. When the Lethbridge-Weyburn cut-off on the prairie, and the Merritt-Hope cut-off near the Coast range are completed, the Crow's Nest route will originate at Winnipeg, and it will be at least a co-ordinate route with the main line.

WESTERN LIFE INSURANCE COMPANY.

The statement issued by the Western Life Insurance showing receipts and expenditures to June 30th, 1912, shows total assets of \$112,000, which includes \$15,850 invested in first mortgages. The satisfactory surplus over all liabilities amounts to \$37,440. Total liabilities are \$74,560.

The following is a summary of business obtained:—

	Amount.	Premiums.
Total applications received	\$949,500.00	\$31,770.30
Total applications declined	65,000.00	2,544.95
Total applications deferred	5,000.00	114.50
Total business issued	\$879,500.00	\$29,110.85
Decreases and increases	12,500.00	380.70
	\$867,000.00	\$28,730.15
Less terminations	15,500.00	668.10
Gross amount in force	\$851,500.00	\$28,062.05
Amount re-insured	100,000.00	1,263.50
Total amount at risk	\$751,500.00	\$26,798.55

PROSPECTS BRIGHT IN CALGARY

New Bank Premises—Interurban Railway Financing—More Ready-made Farms

(Special correspondence.)

August 12th.

Bankers say that money for all legitimate purposes is available. Manufacturers and wholesalers are doing a big volume of business and construction work is active. A second branch office of the Canadian Bank of Commerce, which will be used entirely by the bank and its office staff, is to be erected at the corner of 12th Avenue and 1st Street West.

For thirty years there has stood at the corner of 8th Avenue and Centre Street the Royal Hotel. With its passing as an old landmark the Merchants Bank proposes to erect on the site a central office building at a cost of \$400,000.

Calgary's Interurban Railway is making progress notwithstanding more than the usual number of vexatious delays. The Dominion Railway Commission has sanctioned its proposal to float bonds to the extent of \$2,000,000, and officers of the company are preparing to visit the London money market to dispose of these. In the meantime preparatory work is being done so that as soon as the financial arrangements are completed the line from Calgary to Carbon may be put into immediate operation.

Two Hundred Million Cubic Feet Available.

Two more wells have been acquired by the Canadian Western Natural Gas, Light, Heat and Power Company. Each well is rated under test at 18,000,000 cubic feet, so that 200,000,000 cubic feet of gas is the quantity now available each day for distribution.

Hydraulic work is being utilized to terrace a portion of the hilly bank of the Elbow River in conformity with the plan of the owners who are laying out a new residential subdivision. Water from the city mains, with pressure intensified to 200 lbs. by a two-stage centrifugal pump, is directed against the hill. About 1,000 cubic yards per night are being washed down through the flumes into the old river channel.

Extending Ready-Made Farm Scheme.

A contract for 150 more sets of buildings for the Canadian Pacific ready-made farms has been awarded to a local firm at a price in the neighborhood of \$115,000. These farms are sold with buildings, fencing and some land in crop to settlers with small capital who are especially selected in the British Isles.

A contract for fifty houses for the first of the Canadian Pacific employees at the Ogden locomotive and car shops in this city has been given to the Westinghouse, Church, Kerr Company, of New York.

HELPS TO DECREASE FIRE LOSS.

"At the present price of building material, fireproof construction can be erected at a cost not to exceed 10 or 15 per cent. more than non-fireproof, and when we consider that a fireproof building deteriorates about one-ninth of 1 per cent. per year as compared to 4 per cent. for ordinary buildings; that they rent better and that money can be borrowed on them on better terms; that they are vermin-proof, cooler in summer and warmer in winter, it would certainly seem a part of wisdom and self-interest to adopt a better method in every case when the building is to be of a permanent character, stated Mr. P. H. Bevier, in an address at Orange, N.J.

"When a man builds a house in the country it may be that he has a right to jeopardize his own life and property and those of his family, and gamble with the insurance companies, but there is no question that the owner of property in a city or town has no right to erect a structure that will be a menace to the safety of the property of the adjacent owner. This principle is clearly recognized in practice, and many of the smaller cities are adopting building codes requiring fireproof construction throughout a certain portion of the business section, and semi-fireproof buildings in less congested districts.

"If one-half of the money spent by American cities for fire losses was spent for better building construction, the annual loss by fire would soon begin to decrease. Improvement along the line of better construction can only come gradually. It can and should be hastened in thickly settled communities by stringent building laws. City officials must be awakened to their responsibilities and the individual shown that his own pecuniary interests lie in lessening the fire waste. Old buildings cannot be torn down at once and rebuilt, but we can see to it that no more fire traps shall be built where they are a menace to other structures."

MUNICIPAL FINANCING ACTIVE

Option Given on Macleod's Debentures—Prince Rupert May Sell More Treasury Notes

Mr. Ben H. Morgan, of London, England, has been given an option until October 31 on \$325,000 worth of 5% bonds of Macleod, Alta. The debentures are for local improvements but will not be voted on until August 30th. The option is at 92½.

Prince Rupert is arranging to sell further treasury certificates. It has already placed this spring in London £200,000 3-year notes at 5 per cent. The money is required for the completion of the hydro-electric project.

Westmount Makes Short Loan.

The recommendation of the Finance Committee to borrow \$250,000 from the Bank of Montreal for six months at 5 per cent. was adopted by the Westmount Council. Inscribed stock will be also be issued in place of bonds for £100,000, authorized to be issued under a previous by-law.

Alderman Brown reported to the Medicine Hat council that he had spoken to Mr. Balfour of the Union Bank at Winnipeg, who had agreed to give the council a loan of \$300,000. Mr. Balfour had wired the local manager of the Union Bank to forward a full statement of the affairs of the city. This had been done, and was considered satisfactory. Mr. Balfour had then sent word to Mr. Hopper, giving his decision that the council could get the \$300,000.

Calgary Treasurer Issues Warning.

A note of warning was sounded by City Treasurer T. S. Burns, in a communication handed to the finance committee of the Calgary City Council. He said that his warnings to the heads of the different city departments that economy should be practised as much as possible had not been heeded. He based his statements particularly on a report of the city engineer which showed that the contracts let for 1912, mostly for street work, totalled \$1,501,982. The city treasurer said that about 3,000 men were in the employ of the city, and that the fortnightly pay roll was \$124,000, the highest mark yet reached in Calgary.

The city treasurer mentioned that he had no assurance from the Bank of Montreal that the city would be advanced \$1,500,000 for which it had asked, pending the sale of debentures on the London money market.

In the case of \$750,000 worth of the securities, sold through the Bank of Montreal to Messrs. Stimson and Company for a New York client of the latter firm. The coupons of the Calgary bonds heretofore have always read payable to the Bank of Montreal in Montreal, Toronto, Calgary, London, England, and New York. As practically all heretofore have been disposed of in London, no objection was found to this wording. It was found advisable, however, to sell \$750,000 worth of the securities to Messrs. Stimson and Company.

Wording on Bonds Changed.

When that company came to deliver the bonds to their client the client raised objections on the score that the Bank of Montreal did not actually have a branch bank in New York, but only an office there. The objection delayed the sale and to satisfy the buyer, the matter was taken up with the Calgary officials.

Acting for city solicitor Moffat, Mr. James Muir, barrister, left for Edmonton to arrange to have the bonds altered to delete the wording, "London, England, and New York, U.S.A.," and validated by an order of the lieutenant-governor-in-council.

A representative of Messrs. Wood, Gundy Company, bond brokers, submitted a new offer for the whole of Lethbridge's bond issue, which the council was not inclined to accept. The bond house representative will be quoted certain prices on the whole and also a part of the \$753,000 issue, and if satisfactory, the city may within a few days effect a sale of its bonds.

Hamilton's Expenditures.

City Treasurer Leckie has issued a statement of Hamilton's expenditures from January to the end of July. It shows that all departments are provided for at present, but care will have to be exercised if a deficit is to be prevented.

The appropriation for the administration of criminal justice is running rather low, considering that there is another five months to go, and that only \$2,680.40 remains out of the original appropriation of \$14,000. However, even if there is a deficit in this department, a saving in some other department will even it up. The big increase in the expenses of the construction of waterworks is not a deficit, as this will be provided for in next year's debentures, but at the same time all departments are being urged to exercise the greatest care for the remaining five months of the year.

Edmonton civic officials are already considering how best to raise the money required for next year's work. The amount required for civic work in 1913 will be greatly in excess of that used this year if plans at present under way are carried out. If it is found that the money market is too tight it may be necessary for Edmonton to go without many improvements owing to the lack of funds. If this condition arises it will not be because the city has reached its borrowing limit or that its security is impaired, but merely because it will be impossible to raise the money in the London market.

The civic revenue of Montreal for the year 1911 exceeds that of 1910 by \$1,000,000, according to the city treasurer's statement.

The debt of the city, including a loan of \$7,000,000, placed in the hands of financial agents in London for issue, amounts to \$55,500,000.

The total revenue of the year was \$7,656,833. This is almost double the revenue of ten years ago.

The Montreal Tramway Company gave the city on its earnings \$336,295.

The interest charges are very high, the city having paid out in 1911 on its debt \$2,096,033.

Over a million was given to the Catholic and Protestant School Boards for education. This is raised by a special tax on property.

Under a new by-law Montreal's borrowing powers are reduced from 15 per cent. to 12 per cent. of the yearly increase in assessable properties and the city must also provide a sinking fund for all future permanent loans.

Vancouver Sells Large Block.

The city of Vancouver has accepted an offer of 93 net for \$1,590,000 debentures, made by the city's London agents, Messrs. Brown, Shipley and Company.

WILL NOT PERMIT ATTACKS ON REPUTABLE COMPANIES.

Insurance Commissioner Done, of Utah, resents any attempt by agents of life insurance companies to cast doubt, by innuendo or otherwise, upon the solvency or integrity of competing companies, as a reflection upon the efficiency of his office by permitting companies which are insolvent or approaching insolvency to operate in the state. Accordingly he has issued the following manifesto:

"It has recently come to the attention of the Insurance Department that a few life insurance agents have been casting doubt, chiefly by innuendo, on the solvency and integrity of legal reserve companies, authorized to do business in Utah. Also that in their zeal for business they are making unfair and misleading comparisons with other companies as to expenses of management, dividend payments, interest earnings and other elements, using such statements as guarantees of future profits to policyholders, to the disadvantage of competing companies and agents. In some instances policyholders have been disturbed and dissatisfied by such representations, the lapsing of policies and dissatisfaction in life insurance as an institution resulting therefrom. Notice is hereby served that the Commissioner of Insurance resents, as a reflection on the efficiency of his office, intimations that he is permitting legal reserve companies to operate in the state which are insolvent or approaching insolvency. He will hold any agent responsible for statements authenticated to him as coming from such agent, and will visit the full penalty on offenders upon presentation of due proof. The ruling is hereby made that when the agent of a company casts discredit and doubt on competing companies, and arouses dissatisfaction in the minds of present or prospective policyholders, especially to the extent of destroying faith in the solvency of legal reserve insurance companies, such act constitutes misrepresentations as defined in Section 48 of the insurance code. The penalty is revocation of license and turning of the offending agent over to the courts for prosecution and punishment."

Mr. W. E. Woods, special commissioner of the London Chamber of Commerce in Australia, expressed the opinion in Vancouver last week that there must necessarily be some sort of reciprocal agreement between Canada and the United States and certainly foodstuffs should be given free entry into each country from the other.

The Dominion Government has let the contract for the new State-owned elevator to be erected at Port Arthur. The successful tenderers are: Messrs. Barnet and McQueen, of Minneapolis, whose contract price was \$1,170,500. The new elevator will be the same size as the Grand Trunk Pacific elevator, and it will have a capacity of three and a quarter million bushels. The work is to be completed by September 15th, 1913.

OFFERING OF \$200,000

NORTH ATLANTIC FISHERIES LIMITED

7 PER CENT. PREFERRED CUMULATIVE STOCK

At Par and Accrued Dividend with 40 per cent. Common Stock Bonus

Purposes of Company

The North Atlantic Fisheries, Limited, has been organized for the purpose of acquiring as a going concern, the Halifax Cold Storage Company, Limited, adding largely to the working capital and extending the plants and business.

The object of the Company is to operate cold storage plants, curing and canning factories, to carry on business as dealers in fresh, smoked and canned fish, from the Atlantic Fisheries, and to buy and sell bait and other merchandise commonly used by fishermen.

Permanency of Business

A business which supplies the necessities of life, is ordinarily regarded as being the most permanent. When well managed, it is one of the most profitable undertakings. Fish is a food, pure, clean and wholesome, at the same time it is one of the cheapest, and well within the reach of every consumer. This gives a permanency and strength to the business of the North Atlantic Fisheries, Limited.

Source of Supply

The fishing industry has been a source of great wealth to the people of Nova Scotia, and it is to be noted that this Province produced in 1910 \$10,119,243 worth of fish, or 33 per cent. of the total value of fish caught in Canadian waters. The North Atlantic Ocean contains a greater variety of fish, and the quality is generally regarded as being finer and more valuable than that caught in other waters.

All the Company's buying stations and plants are admirably situated for receiving large supplies of fresh fish from extensive central fishing grounds, and for transferring the product by railway refrigerator cars to points of consumption, thus enabling the fish to reach the consumer in the best possible condition.

Market for Products

The growing market in Canada, especially in the West, is a guarantee that the products of the Company can be disposed of to advantage. The fish of the Halifax Cold Storage Company is sold as far west at Seattle, Vancouver and Victoria.

An idea of the growth of sales in the territory west of New Brunswick can be found when it is stated that in the year ending April 30th, 1907, the total was \$22,076, and in 1912, \$219,524, nearly a ten-fold increase.

In taking over the Halifax Cold Storage Company, Limited, as a going concern, over \$225,000 additional working capital will be added to the business. In this connection it is to be noted that the net earnings of the Halifax Cold Storage Company, Limited, as shown by the Company's last financial statement, are more than sufficient to pay the dividends on the total preferred stock now being issued by the North Atlantic Fisheries, Limited. This does not make any allowance for the increased profits which should be derived from the increased working capital.

With the addition of the working capital now being provided, and the enlarged business, the President estimates that the annual profits should not be less than \$60,000.00, and that they should show a gradual increase from year to year.

Complete prospectus and application forms will be supplied upon request to

F. B. McCURDY & CO.

Members Montreal Stock Exchange

Halifax, St. John, Montreal, Sherbrooke, Kingston,
Charlottetown, Sydney, and St. John's, Nfld.

Properties

The Company's property embraces two wharf properties on the east side of Lower Water Street, Halifax, N.S., admirably adapted to the Company's requirements, with Warehouses, Cold Storage Plant and Boiler House and Engine Room. These plants are modern in construction, but have already become too small to meet the demands of the business. It is planned to spend a large amount of money in extending these cold storage facilities.

In addition to the properties at Halifax, the Company owns a modern cold storage and fish curing plant at Port Hawkesbury.

Management

The President and General Manager, Mr. Arthur Boutilier, has contracted to serve the Company for a term of five years. Mr. Boutilier has grown up in the fish business, and is thoroughly familiar with every department. He is recognized as one of the most successful fish men in Canada. He will have with him on the Board of Directors, the under-mentioned men of wide and practical business experience, who are well qualified to advise in matters of general policy:—

Arthur Boutilier, President and General Manager	Halifax
H. N. Wallace, Banker	Halifax
O. E. Smith, President Nova Scotia Car Works, Limited	Halifax
R. A. Corbett, of G. S. Campbell & Company	Halifax
Dr. C. F. Fraser, Director Eastern Trust Company	Halifax
Thomas Notting, Barrister	Halifax
F. B. McCurdy, M.P., Banker	Halifax

Profits

The earnings of the Halifax Cold Storage Company for the last fiscal year were \$35,155.00, and have shown a gradual increase. This is seen from the following table:—

1910	\$20,395
1911	24,465
1912	35,155

The above table shows the actual net profits and does not include the sums paid by the Company as interest on borrowed capital. With this interest included, the trading profits for the last three years, as certified by the Company's auditor, were as follows:— For 1910, \$21,845.88; for 1911, \$26,039.27, and for the year ending April 30th, 1912, \$39,605.26.

GOVERNMENT SALE PRINCE RUPERT LOTS

Acting under instructions from the Government of British Columbia, I will hold an auction sale of Prince Rupert lots on Wednesday, August 28th, 1912. The sale will be held at Prince Rupert, beginning at 3 p.m., and continuing on Thursday, the 29th.

The lots to be offered will be in sections 1, 5, 6, 7 and 8, about three hundred in all, and will comprise some of the choicest lots on the townsite.

Take Canadian Pacific Railway steamer from Vancouver August 24th, or Grand Trunk Pacific steamer August 26th. Fare each way, including meals and berth, \$18.

It will pay you to attend this sale.

If you cannot come yourself, send a representative. For further information apply to

C. D. RAND, Agent.

Head Office: VANCOUVER, B.C. Branch Office: PRINCE RUPERT, B.C.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of July, 1912, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper; and Robert Musgrave Coates and William George Flood, solicitors' clerks; all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To underwrite, subscribe for, purchase or otherwise acquire and hold either as principal or agent, and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in the bonds or debentures, stocks, shares or other securities of any government or municipal or school corporation or of any bank or of any other duly incorporated company or companies or corporation or corporations; (b) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (e) To construct, maintain, alter, make, work or operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighbourhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and

all kinds of natural products and by-products thereof; (k) To issue and allot as fully paid-up shares of the company hereby incorporated, in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same, or any part thereof, in bonds or debentures of this company; (l) To draw, make, accept, endorse, discount and execute promissory notes, bills of exchange, warrants, and other negotiable or transferable instruments; (m) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company, and necessary to enable the company to profitably carry on its undertaking; (n) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (o) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (p) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (q) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (u) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (v) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Brazilian Traction Light and Power Company, Limited" with a capital stock of one hundred and twenty million dollars, divided into 1,200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State, of Canada, this 12th day of July, 1912.

THOMAS MULVEY,
Under-Secretary of State.

TRUSTEE FOR THE BONDHOLDERS—THE ROYAL TRUST COMPANY**DESCRIPTION OF BONDS**

The total authorized issue of bonds is \$500,000, all of which are now issued. The bonds are dated 2nd July, 1912, and mature 2nd July, 1937; they bear coupons for interest at 6% per annum, payable half-yearly on the 2nd January and 2nd July in each year, at the Bank of Montreal, Montreal and Toronto, where the principal is also payable.

The bonds are in denominations of \$500 and \$1,000. They may be registered as to principal at the Head Office of the Company in Montreal.

Under the trust deed the present issue represents a closed mortgage on all the properties of the Company, including, of course, the new plant and construction provided for in the trust deed from the proceeds of sale of bonds.

Among other things this corporation has for its objects the purchase of agreements for sale and mortgages; to buy and sell real estate as agents for private investors; to operate and manage any property acquired by the company in the course of its business. Its primary object is, however, the investing of its funds in Canada at higher rates of interest than can be obtained by the single investor, and to provide a safe channel through which English and Eastern capital may be safely invested.

AS AN INVESTMENT

The stock of the Anglo-Canadian Mortgage Investment Corporation, Limited, ensures safety and profit. Managed by directors of high financial standing, it offers the highest possible security for all funds and business which may be entrusted to its care.

Complete prospectus, forms of application for stock, &c., may be secured from H. DAVISON PICKETT, Sec.-Treasurer.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

CHILLIWACK, BRITISH COLUMBIA.

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m. of September 3rd, for the following 5 per cent. 40-year debentures: Waterworks, \$100,000; High School, \$25,000; Macadamizing, \$30,500; Drainage, \$3,500; City Hall, \$2,500; and Fire Hall, \$1,000. For further particulars apply to

D. E. CARLETON,
City Clerk.

Full particulars will be given upon application.

C. J. BINMORE,
Secretary-Treasurer,
197 Peel Street, Montreal.

HAVE CEASED TO DO BUSINESS.

Eight life insurance companies have ceased to transact new business in Canada. Under section 102 of the Insurance Act they are entitled to transact all business connected with policies existing at March 31st, 1878. Their deposits are applicable to those policies subject to the provisions of the statute. The companies in question are:—The Connecticut Mutual Life Insurance Company, Hartford, Conn.; Edinburgh Life Assurance Company, Life Association of Scotland, National Life Insurance Company of the United States of America, North Western Mutual Life Insurance Company, Milwaukee, Wis., Phoenix Mutual Life Insurance Company, Hartford, Conn., Scottish Amicable Life Assurance Society, and Scottish Provident Institution.

The par value of the total amount of the deposits of these companies with the Receiver-General at Ottawa is \$912,377. and the accepted value \$870,041.

The license of the Richmond and Drummond Fire Insurance Company expired on August 1st, 1910, and has not been renewed. Its outstanding policies have been reinsured with the Union Assurance Society merged in the Commercial Union Assurance Company, Limited. Securities to the par value of \$5,000 are held by the Receiver-General to cover outstanding claims. The remainder of the deposit has been released to the company.

The license of the Canadian Guardian Life Insurance Company expired on May 1st, 1911, and has not been renewed. On that date, there was issued to the company, a modified license under the provisions of Section 41 of the Insurance Act, 1910, permitting it to transact business relating to its existing contracts, but prohibiting the transaction of any new

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Bassano, Alta.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, July 17th, 1912.

business. This license expired on March 31st, 1912. The company gave notice that it would apply for the release of its deposit on July 15th, 1912, and filed with the department the list of its policies which have not been transferred or surrendered.

NEW AMERICAN MORTALITY TABLE.

The special committee of the Actuarial Society of America appointed to consider the question of preparing a new American mortality table has made a report. It is pointed out that it is impossible to undertake such a work at present on account of the medico-actuarial investigation now going on, but the promise is held out that the work may be undertaken in the future if the life companies will furnish the data and bear the expense.

While admitting the desirability of constructing a new table, the committee state that it would not greatly affect present premium charges, and would undoubtedly call for higher reserves.

From several quarters during the past few years have come the suggestions that a new mortality table should be constructed. The Insurance Commissioners' Convention formally endorsed the idea, and the appointment of the special committee was the response of the Actuarial Society.

While there can be no doubt that a new American mortality table constructed from the experience of the United States and Canadian companies would be valuable and important as an up-to-date mortality table, it would not likely bring about any reduction in the cost to policyholders, and can wait until the present important work of the Society is out of the way.

EFFICIENT FIRE PROTECTION.

Insurance rates are usually looked upon somewhat askance, some men even think they cannot afford to insure, or that it is poor economy, stated Fjre Chief Heath, of Saskatoon, in a paper before the seventh annual convention of the Western Canada Firemen's Association. They should realize that they cannot afford not to insure, if they are to protect themselves—a blind trust in luck and providence will not go far to avoid fire, nor to replace losses which occur through destruction of property. A fire department which has attained and maintains a maximum of efficiency is a protection to the

citizens as well as to insurance companies, and is also a direct monetary saving to citizens and municipality. Five minutes gained at the commencement of a fire is worth more than an hour after the fire had reached a certain stage. Where you find a fire department equipped with all the latest, most modern and approved fire equipment, alarm systems, machinery, tools, hose apparatus, etc., and with a strong discipline the whole brought up to a stage of expertness and promptitude, ready for any contingency, you will find that the insurance companies are in duty bound to recognize the advanced stage at which you have arrived and to cut your insurance rates accordingly.

Great Northwest Investments, Limited, aim to be classed as the most conservative advisers to investors in western real estate, and to make absolutely no statements which are not based strictly upon ascertained facts. This Company's Service Department is prepared to act, without charge, in any advisory capacity to investors in western property.

Our booklet on "Real Estate Investments in the Canadian West" is sent free on request.

ROLLAND PAPER BONDS

Half a Million Offered—Bond Conditions in Europe Discussed by Banker

The present has been one of the most active summer seasons for new bond issues. Another industrial is offered this week, Messrs. C. Meredith and Company placing on the market a block of \$500,000 six per cent. first mortgage bonds of the Rolland Paper Company, Limited. They are offering these bonds at par and accrued interest. The Rolland Paper Company was established in 1883 and has developed into one of the best known manufacturers of high grade paper in Canada. The company have specialized on the finer and more expensive makes of paper, and have an increasing demand for their output.

Part of the proceeds of the bond issues will be devoted to enlarging the company's plant at St. Adele and to provide for future development. The total assets of the company amount to more than three times the bond issue. The net earnings for the past two years and a half average over \$87,000 per annum. The decision of the Rolland Paper Company to enlarge their plant is in keeping with the general policy of expansion.

Santiago Electric Issue.

A block of 6 per cent. first mortgage sinking fund gold bonds of the Santiago Electric Light and Traction Company will be offered privately. This company was incorporated in 1906, in accordance with the laws of the Republic of Cuba, for the purpose of improving the lighting facilities and providing much-needed street railway transportation in the city of Santiago de Cuba, the second largest city of the island, with a population of 55,000. The bonds will be offered simultaneously in the United States by Messrs. Speyer and Company, and Lawrence Turnure and Company, and in England and Canada by the Royal Securities Corporation, Limited.

Decline of Government Bonds.

Discussing the conditions abroad a prominent United States banker, who is just returned from Europe, says:—"The bonds of European governments have greatly declined during the past 15 years. The average decline in market value of the French, English, Belgium, Danish, Dutch, Norwegian, Prussian, Swedish and Swiss Government bonds from August 1897, to April, 1912, was about 19 per cent. The cause of this great depreciation in market value is not the want of confidence of the investing public, but the enormous increase in the amount of bonds created. The European government debts alone increased during the period above named approximately \$5,700,000,000. The percentage of increase was 66 per cent. in Germany; 47 per cent. in Russia; 26 per cent. in Austria-Hungary; 39 per cent. in Spain; and 60 per cent. in Belgium. In France the national debt was lessened. The average percentage of increase taking all the European countries was 23 per cent.

World's Bond Output.

"Augmenting this increase in European Government debts is the bond output of the countries of the world outside of Europe, which go chiefly to the financial cities of Europe for funds. It is estimated that the private investors of Europe from 1897 to 1912 absorbed in new securities from countries outside of Europe the enormous sum of \$48,600,000,000. All these demands for money have more than absorbed the natural increase of the wealth of the country, so that a materially higher rate of interest is being paid to secure funds, and a similar condition exists in this country. The facts are that a materially higher rate of interest is ruling over the world than was the case of fifteen years ago, and with this general condition existing in the principal financial centres of Europe we cannot expect a decrease in the rates of interest in this country, at least for some time to come."

TORONTO'S BOND SALE

Mayor Talks of Six Per Cent. Bank Rate, and Says Brazil Offered Five Per Cent. for Loan

Toronto will have to pay more for its loans in future, is the statement of Mayor Geary upon his return from England. "The market," he says, "was congested with Canadian securities, and we had trouble to get what we thought a fair price for our bonds. We could have sold them if we had wanted to take a low enough figure. The money market has not been so tight in years. Consols are down to the lowest point in history. There is talk of a Bank of England rate of six per cent. before the end of the year. Many of the issues floated are in the hands of the underwriters yet.

Congestion is Temporary.

"There is no relief immediately in sight, but after the turn of the year things may be normal. It is only a temporary congestion and will right itself in time. British investors are now securing higher rates of interest from other countries, and we cannot expect to secure our money at rates below the market. Canadian municipalities have been accustomed to securing their money at what has become almost a fixed rate, but we will have to make up our minds to pay more.

"Canadian credit is good in London despite the fact that a number of cities have found it difficult to float loans. A temporary congestion of securities in London, and a desire to secure money at low rates were responsible for our failure to secure all we wanted.

"We got the same terms as the Government of Belgium, namely, 4½ per cent. The Government of Brazil offered 5 per cent. for a loan."

Against Fiscal Agents.

Mayor Geary is opposed to the suggestion that the city should have regular fiscal agents in London. He doubts the advisability of the step, stating that he does not believe anyone could have looked after the city's interests better than Mr. Coady.

JULY COBALT ORE SHIPMENTS.

The following are the shipments from Cobalt Station during the month of July:—

Mine.	Tons.
Beaver	38.7
Buffalo	114.5
Chambers-Ferland	31.7
Cobalt Lake	91.6
Cobalt Townsite	144.3
Casey Cobalt	102.3
Coniagas	137.3
Crown Reserve	21.4
Hudson Bay	96.8
Kerr Lake	60.5
La Rose	152.6
McKinley	348.7
Nipissing	170.7
O'Brien	69.8
Temiskaming	61.8
Trethewey	26.5
Right-of-Way	26.5

Total 1,669.5

The total shipments for June were 1,750.8.

CANADIAN PACIFIC'S STOCK ISSUE

The announcement that the Canadian Pacific Railway Company will ask authority to increase its capital stock by \$60,000,000, has aroused the discussion which has invariably greeted similar announcements by the company. If we ignore sentimental considerations affecting both the corporation and the public, the present discussion seems to resolve itself into two questions—that of the method of financing and the matter of freight rates, particularly in the West.

The new stock issue will undoubtedly be issued above par, and probably under market price. The last issue was made at 150, and guesses as to the price of the coming issue vary from 160 to 175. The general argument is against selling the stock at less than the prevailing market price, it being contended that many millions of dollars are sacrificed, and that these should properly go into the company's treasury. In other words, the directors are said to issue considerably more new capital than would be necessary were they to sell it at the market price. As *The Monetary Times* has previously contended, the directors of the Canadian Pacific know better than any what they can and what they cannot do in the financial market. They recognize, too, that when one or more of the highest standing United States railroads tried to finance a new issue of stock on the market price plan, bearing the hall-mark of "soundness," they failed. This being so, it is scarcely likely that they themselves will succeed.

Regarding the sacrifice of the high market quotations reached by the Canadian Pacific Railway stock to-day, it is a moot question how much this enhanced valuation has been due to the recognition in the inves-

tor's mind of the very policy on the part of the management which in some quarters is deplored. It is a question also how that same high valuation would stand the shock of any radical departure from that policy. To put it in other words, much of this high valuation which the Canadian Pacific Railway is advised to preserve intact, and to reap the benefit, owes its existence to the knowledge by the public that the possession of shares entails certain rights—to obtain further shares at a price less than market. To this also attaches another consideration, namely, that original shareholders in the great Canadian transcontinental for years held on to a very dubious path, and that it is only fair, therefore, that they should receive some extra reward for their faith amid trying times. That, perhaps, is a little sentimental. A contented body of shareholders is a valuable asset for such a corporation as the Canadian Pacific Railway to possess, engaged in developing great areas of new country, and from time to time needing large amounts of cheap money. That is essentially practical. It is a matter for doubt whether the Canadian Pacific Railway is making any serious sacrifice of resources after all.

As to railroad earnings and lean years, against which even Canadian prosperity will not be proof, we will have bad years sooner or later. But the Canadian Pacific Railway have good ground for the belief, and most Canadians will probably share it, that even granting lean years, the development of the West has now reached such a point, and the country developed possesses such a gigantic area, and such multitudinous resources, that even when the reaction does come, a great transcontinental railroad will find enough to do to keep receipts up to a high degree of profitability, even though they should not show the wonderful elasticity of the last few years.

Respecting the demand, of Western Canada particularly, for lower freight rates, *The Monetary Times* feels that it is justified. The hearings by the Dominion Railway Commission will elicit facts and figures upon which a just order can be made—for it is not always safe to accept gossip as to high or low freight rates. The growth and prosperity of this country depend largely upon reasonable freight rates. We think that the Canadian Pacific Railway should recognize the claims of Western Canada and take voluntary action in this matter.

THE DOG DAYS OF AUGUST, 'SIXTY-NINE

Business and financial men say that activity has marked the present summer. It is true that, despite the fact we are in August, new bond and stock issues have persisted, factory extensions have continued, bank clearings are expanding, railroad earnings increasing, building construction proceeding. All this does not savour of the proverbial "dog days." What was happening at midsummer forty odd years ago? A glance at *The Monetary Times* of August, 1869, shows that there were many incidents even then to interrupt the smooth course of the summer vacation.

A Canadian bank manager, for instance, was operating extensively in the New York gold market, and "gored severely not a few of the bulls and bears." "The price of gold had been advancing steadily, until it reached 137 $\frac{3}{4}$, when the agent of a Canadian bank manager made forced sales of its sixty-day bills of exchange on London at $\frac{1}{8}$ to $\frac{1}{4}$ per cent. below the market quotations, and in round amounts to leading prime bankers, whom this speculative Canada agent had ascertained were about to ship specie to Europe. The Canada bank bills, being cheaper remittance than specie, took its place, and the banks, at the last moment, withdrew the specie they would otherwise have shipped." Of this incident, *The Monetary Times* writer said: "We can scarcely afford to chuckle over the tale of the dray drawn pretentiously on Wall Street, when we remember that Canadian money was its load. The laugh might be rather turned against us if the mock shipment failed in its object."

The stock market reports in 1869 reflected activity, for the season of the year. A large business was being done in most of the leading stocks, and as a rule at advancing prices. For all good securities, the demand exceeded the supply. Here is the report of the Toronto market:—

"There were limited sales of Montreal Bank at 160 $\frac{1}{2}$ to 162; British Bank enquired for at 104 $\frac{1}{2}$, but none in the market; there were considerable sales of Ontario at 96 to 96 $\frac{1}{4}$, and buyers still ask for it at the latter rate; there were small sales of Toronto Bank at 123, and that price would still be paid. Early in the week a brisk demand arose for Royal Canadian, and sales were made at 50 $\frac{1}{2}$ to 12 and 51 $\frac{1}{2}$. There are now buyers at 52, with no stock in the market.

"Large transactions in Commerce at 103, 103 $\frac{1}{2}$, 103 $\frac{3}{4}$ and 104. Gore is asked for at quoted rates, but none offers. Merchants' has been sold at 104 $\frac{1}{2}$ and 105. There are buyers of Quebec at par. Molsons' is nominal at 109 to 110. Buyers offer 99 $\frac{1}{2}$ for City Bank, but sellers want par. Du Peuple is in demand at 109, but no sellers. Nationale would command 107 $\frac{1}{2}$, but none on the market. Jacques Cartier is enquired for at 107 $\frac{1}{2}$. Sales of Union at 105 are reported. Toronto Gas is in demand at 108.

"British America Assurance has been largely dealt in at 55 $\frac{1}{2}$, 56 and 56 $\frac{1}{2}$, and there are still buyers at the latter rate. Buyers have advanced their offers to 119 for Western Building Society, but there is no stock procurable. Freehold is sought at 118 $\frac{1}{2}$; a small lot sold at 120. Sellers want 133 for Montreal Telegraph; there have been small sales at 132. Large sales of Canada Landed Credit have been advanced to 82. There

are no Canada debentures in market. Dominion stock is heavy at 107. City of Toronto debentures have been sold to pay 7 per cent. interest, and are still in demand."

Just as to-day, so in August, 1869—they were speculating as to what the wheat crop would be. In view of our legitimate anticipations this year, it is almost amusing to read *The Monetary Times'* report of that date: "The most gloomy accounts are from the newer and recently productive sections of the country, and the most favorable from the older sections. The boot seems fairly to have got on the other foot. Three years ago, no wheat worth talking about could be found near Toronto, because of the midge, while the north-western section of Ontario grew it in great abundance, and knew nothing of that pest; now it is unknown here, except by recollection, while there it is dealing deadly destruction over a wide area. With so much wet there must be, and is, rust, with plenty of it. A large breadth was sown, and, taking all in all, a fine crop will be reaped; but not so large as was estimated a month ago, by the most reliable authorities. Probably before all is over there will be still less than we now expect." This estimate was at least conservative!

The burning topic of reciprocity was also in mind 43 years ago. The editor of *The Monetary Times* then wrote: "Many of the writers for the press of the United States are fond of harping on the subject of the annexation of Canada to the republic which overshadows us with its greatness. They break out, again and again, in threadbare hyperbole over their greatness, and our littleness, their progress, and our inertness, and express their astonishment at our stupid indifference to the glory we might achieve. The advantage of reciprocal trade will be conceded by all of us, and we do not deny but some parts of the Dominion would benefit greatly by such an arrangement as the old reciprocity treaty was based upon. But it has been shown that we can get on very comfortably without reciprocity, and, after an experience of several years, we find that our prosperity is not dependent on their forbearance or our existence endangered by their hostile tariffs. The closing of old channels of trade did affect various branches of industry, but, taking everything into consideration, we cannot consider that the lesson of self-reliance was too dearly purchased. We did not know our own strength, and the various provinces which now constitute the Dominion were as distinctly separated as if they lay in different quarters of the globe. Political economy has in it little of what is called sentiment, but a desire for nationality begot confederation, produced sentimental results which cannot be ignored, and which the political economist, as well as others, must acknowledge."

The prospectuses of two peat companies appeared in our issues in those early days. They were the Ontario Peat Company, with capital of \$120,000, owning lands in the county of Welland, and the Anglo-American Peat Company, capitalized at \$200,000. The latter company stated that "for domestic purposes, peat is equal to wood or coal," an assertion which has not yet been proved in the forty years which have elapsed.

The Intercolonial Railway Commissioners, Messrs. A. Walsh, E. B. Chandler, C. J. Brydges and A. W. McLean, called for tenders for five sections of the line in August, 1869. The Albion Hotel at Montreal added eighty rooms to the house, and thus became "one of the largest establishments in Canada." On August 26th, 1869, the Bank of England rate was 2 $\frac{1}{2}$ per cent. Counterfeit Provincial Bank and Bank of Commerce bills were in circulation in Canada. Mr. Robert H. Grey, of 43 Yonge Street, Toronto, that year advertised himself as "a manufacturer of hooped skirts and crinoline steels." A wholesale tobacconist's premises are on that site to-day.

But to realize really how far away we are from those days, we have only to look at the price of pro-

visions on August 12th, 1869. *The Monetary Times* then reported dairy butter at 13½ to 15 cents per pound, smoked hams at 7 cents per pound, and packed eggs at 15 cents per dozen!

CROP OUTLOOK

The outlook for the Western crop is good, but the early estimates of 250,000,000 down to 200,000,000 bushels, made by certain prophets, must be dismissed. From numerous reports received by *The Monetary Times*, it would seem that the crop, with fair weather conditions, should total about 185,000,000 bushels. If that grades satisfactorily—and there are good prospects—we should feel well satisfied.

The latest official bulletin from Ottawa, compiled from data supplied by correspondents in all parts of the Dominion at the end of July, states that good rains which fell generally throughout Canada during July have improved the outlook, and on July 31st the condition of all grain crops was favorable, with the exception of fall wheat in Ontario and in Alberta, where this crop never fully recovered from the effects of the exceptionally severe winter. Fall sown wheat represents, however, only a comparatively small proportion, viz., 7 per cent., of the total area under wheat. The condition of spring wheat is 83 per cent. of the standard for the whole of Canada; it is above 90 in the two extreme provinces of Prince Edward Island and British Columbia, and between 80 and 90 in each of the other provinces, excepting Ontario, where it is just below 80, and in Quebec, where it falls to 70. Oats, barley, rye, mixed grains and flaxseed are all marked above 80 for Canada as a whole, and for each province except Quebec the range is between 80 and 90, and in certain cases even above 90.

In Quebec the condition is lower, being between 70 and 80. Buckwheat in the Maritime provinces shows over 85; but in Ontario and Quebec the averages for this crop are, respectively, 75 and 73. Corn for husking is 70.37, and for fodder 73.19 for Canada, the condition being comparatively low in Ontario and Quebec owing to the cold and wet weather of the early part of the summer. The condition of potatoes, turnips, mangolds and other root crops is generally excellent, the figures being above 80 for Canada, and either approaching or exceeding 90 in the North-west provinces and in British Columbia. Only in Quebec are the prospects unfavorable, the condition being little above 70.

Hay and clover crops are excellent upon the whole, Quebec being again the exception. The condition is especially high in the North-west provinces and in British Columbia. Sugar beets are given as 77.17 in Ontario and 86.50 in Alberta. The Canadian crop situation at the end of July may, therefore, be summarized as generally favorable, giving neither the exceptionally favorable promise of this time last year nor the equally exceptionally unfavorable promise of the year before. In Quebec the condition of all crops is below that of the other eight provinces.

A preliminary estimate of the yield per acre of fall wheat is 21.48 bushels as the average for the total effective area of 781,000 acres in the four provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. This indicates a total yield of 16,773,300 bushels as compared with the final figures of 1911, viz.: 26,014,000 bushels from 1,172,119 acres. The average yield per acre of hay and clover is placed at 1.45 ton, giving upon an area of 7,633,600 acres a total production of 11,038,000 tons. Alfalfa, with an average yield per acre of 1.59 ton, shows an estimated total production of 177,300 tons from 111,300 acres. The first estimates of 1911 gave 12,694,000 tons hay and clover and 227,900 tons alfalfa.

There are also good prospects for the fruit crops throughout the Dominion. The estimated quantity of apples this year in Canada and the United States is

40,000,000 barrels, a gain of 7,000,000 barrels over 1911. The British Columbia apple crop will be particularly plentiful, Ontario coming a close second. The Nova Scotia crop will also be fine. Altogether the crop outlook is satisfactory.

SMALL CHANGE

The worst known case of watered stock is probably this year's summer.

* * * *

The cost of living declined two points in July, a drop not loud enough to be heard.

* * * *

Skrzycki is the name of one of the accused Detroit aldermen. The consonants have it.

* * * *

A Calgary shoe shiner has become heir to \$100,000, another example of the value of elbow grease.

* * * *

The Astor baby has started life with \$3,000,000 and a general calculation as to what it would yield invested in good Canadian securities.

* * * *

The Democrats have passed the wool tariff revision bill, despite the President's veto. Incidentally, they think it means also the passing of the President.

* * * *

A writer with the Northern Ontario excursionists, says: "A pleasant and profitable day was spent among the silver mines of Cobalt"—evidently a case of souvenir high-grading.

* * * *

The president of La Rose Mining Company states that the corporation's surplus remains uninvested. As a correspondent writes, "There is little chance of Mr. D. Lorne McGibbon it away."

* * * *

The Ontario provincial police have issued a warning to farmers to be cautious as to what they sign. There is too much carelessness with signatures these days and the warning may well be made general.

* * * *

Controller T. L. Church, Toronto, says he has no more chance of being appointed a Hydro-Electric commissioner than the Governor of Peru. At last the controller's eyes, usually dimmed to things as they are, has seen hydro-electric light.

* * * *

Sir Frank Wills, Lord Mayor of Bristol, in an interview at Montreal, remarked that the Toronto hotels were the worst in the world, and not to be compared even with those in German East Africa. We merely record this as an opinion of the be-knighted.

* * * *

A German in Montreal fostering trade with Canada; another Dutch mortgage company to invest money here; British capital proposing to exploit Northern Ontario; a Montreal man to bring a party of Boers to settle in the Peace River region—that is a little of our cosmopolitan news this week.

* * * *

"Thirty men, claiming to be farmers, arrived on the Makura from Vancouver yesterday. They contemplate making their homes here. The only reason given for change of residence, was the severity of the Canadian climate." So reads a report from Mr. W. A. Beddoe, Canadian Trade Commissioner at Auckland, New Zealand. As the remaining 7,204,808 of us get nearly 200,000,000 bushels of wheat this year from Western Canada, we will be obliged to love the thirty less and the severity of the climate more.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

VI.—THE CANAL AND THE RAILROADS

Certain reductions in railroad rates should occur as the result of the Panama Canal's entrance in the commercial arena. At this time, none of the roads have given definite indication as to how they will meet the new competition. The transportation captains are not likely to hurry to announce changes. Professor Emory R. Johnson, of the Pennsylvania University, says it is not to be expected that the Canal will bring about the general reconstruction of transcontinental railroad rates. The rail rate structures will be maintained after the Canal is opened, and railway officials will wait to see how traffic moves. If they find that the Canal route is getting a large share of the through business, some readjustment of through rail rates will necessarily be made. The extent to which the transcontinental rate structures will be modified will depend upon the Supreme Court's interpretation of the fourth section of the interstate commerce act. There will be no general rate warfare started by the railroads against the steamship lines; the railroads will have too much at stake; warfare will be too costly. It is much more probable that several of the transcontinental railroad systems will do what the Southern Pacific is certain to do—that is, establish steamship lines between the two seaboard.

Steamers Operated by Railroads.

The steamship lines operated through the Canal by the railroads may be expected to carry traffic at profitable rates and to supplement the services of all-rail lines. It will probably be in the public interest to permit the railroads to establish as many steamship lines as they may wish to operate from coast to coast. If it should be necessary to regulate the services of the coastwise carriers, in order to maintain fair competition between railway and independent coastwise lines, the jurisdiction of the United States Interstate Commerce Commission may readily be extended over carriers by water between the two seaboard of the United States.

President Howard Elliott, of the Northern Pacific Railroad, looks for a large increase of water-borne freight, but is not disposed to think the transcontinental lines will suffer, as they will increase their freight transportation for a long distance within the coast zones.

Views of Canadian Railroad Men.

Mr. Henry L. Stimson, the United States Secretary of War, has cited as one of the main benefits which the United States expects from the Canal, its effect on transcontinental rates. What do the Canadian railroad men say? Briefly, they think that:—

- (1) Some readjustment of their traffic is inevitable.
- (2) They will be able to meet the changed conditions.
- (3) That any losses caused by readjustment will be counterbalanced by the stimulation of railroad business through the upbuilding of the Western provinces.
- (4) The most northerly roads especially will derive a direct benefit from the Canal.
- (5) Large traffic will go westward to the Coast, and this business will be encouraged by the Canadian Transcontinental railroads.
- (6) That new steamship associations or services, in connection with the Canadian railroads, will be created.

These matters are sufficiently important to quote interviews with the representatives of the various Cana-

dian companies. "The opening of the Panama Canal will affect the traffic of the Canadian transcontinental lines as well as the systems crossing the United States from the Atlantic to the Pacific," said Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, "but I do not apprehend any serious loss of net revenue. The rail rates between the coast and coast are governed to an important extent by the cost of transportation via the all-water route, with the result that a considerable portion of the through traffic is not particularly profitable. The redistribution of goods from jobbing centres on the Pacific Coast yields better returns, and, if the use of the Panama Canal has the effect of building up and strengthening these coast cities as distributing points, with the more rapid development of the country tributary to the coast that should result, the railway lines will participate in the advantage."

Regarding connections between Canadian and United States lines, he says: "I doubt if there is anything to encourage further extensions and connections across the international boundary. These extensions coming from the south must depend upon one or other of the large Canadian lines for support, whose paramount interests are in other directions."

Grand Trunk Pacific Railway.

Mr. William McNab, principal assistant engineer of the Grand Trunk Railway, who has visited the Canal, thinks it is obvious that the most northerly transcontinental railroads especially will derive a direct benefit from the Canal. "The wheat fields of Western Canada," he reminds us, "are practically only beginning business, and at no far distant date will be a main source of supply of breadstuffs for not only Europe, but for the Southern States and West Indies as well. The problem of handling the fall crops in one direction within a reasonable time will then be felt. The Grand Trunk Pacific with its low gradients will be in a position to distribute its business to advantage, and take westward from Saskatchewan and Alberta a fair share of the agricultural output of these provinces for shipment via Prince Rupert and the Canal."

At Prince Rupert, the northernmost transcontinental terminal, the late President Hays of the Grand Trunk stated that his line was preparing steamships and elevator capacity to ship 100,000,000 bushels of Canadian wheat a year round the world through Panama. "We have the lowest mountain grades in America," he added. "We have a sixty-foot harbor which nature made, and which we do not need to dredge, and we have a sea-front which never freezes over as the wheat harbors of Eastern Canada freeze. We already have the finest Alaska steamers on the Pacific; and by the time Panama opens we will have ocean freighters between Prince Rupert and Liverpool through the Canal."

New Views of New President.

An entirely different view is taken by Mr. E. J. Chamberlain president of the Grand Trunk. In a recent interview in Montreal he expressed the opinion that very little Canadian traffic would go by the Panama Canal route. He also said that the Grand Trunk Pacific has not contemplated running a line of steamships from Prince Rupert to Europe via the Canal.

Regarding the transportation of grain, he remarked that the whole of the Canadian crop of last year would have had to be dried before it could be transported by such a hot route as the Panama Canal, where the temperature ran to as high as 120 in the shade. The present route was much cooler, and, therefore, more desirable, and the trans-shipping of the grain at Fort William, Georgian Bay, Montreal, or other outlets all had the effect of drying it. The Canadian farmer wanted to market his grain as soon as it was threshed; he could not wait to dry and store it.

Sir William MacKenzie, president of the Canadian Northern Railway, has stated that his and the other Canadian railroads were making provision for the read-

justing of their traffic and for the capture of the larger trade which would undoubtedly come. A San Francisco paper not long ago reported that Sir Donald Mann had made a definite announcement that the Canadian Northern Railway Company would establish a Pacific line of steamers between Canada and Australia and China, as well as trading between Western Canada and Europe via the Panama Canal. This has not been confirmed, but Mr. D. B. Hanna, the third vice-president of the road, says: "It is obvious that when our Transcontinental is completed, and connection made with the Pacific Coast, consideration will be given by the company to the establishing of a Pacific line of steamers or a working alliance with an existing service."

The general belief of the Canadian railway authorities is that the Canal will enter as an important factor into the question of wheat and other transportation. That there will be a watershed of traffic between East and West is probable, but this division need not imply a shrinkage of earnings on the Eastern tracks, seeing that more wheat is being every year raised by the increasing number of settlers. Where this watershed will be, cannot be determined yet. The Canal and railroad rates will settle that question.

(To be continued.)

A WAVERING PRESIDENT

"President Taft closed a day of conference on the Panama Canal bill with a special message to Congress suggesting the passage of legislation which would permit American ships to travel the Canal toll free, and which would also allow foreign nations to test the legality of this provision by suits in the United States courts."

The above despatch from Washington is another demonstration of politics as they are in the United States capital. President Taft knows well that the legislation he proposes does not obliterate the fact that the Panama Canal bill is a repudiation of the Hay-Pauncefote Treaty. Besides that, the Senate on Tuesday voted against the President's proposal, as outlined above. It is doubtful, too, whether any foreign nations would desire to test the legality of the discriminatory clause of the bill by suits in the United States courts, especially if the procedure in those courts is as startling as in the United States House, the Senate and the White House.

There is one consolation in the whole affair. The Panama Canal bill has Democratic parents, who desire their child to help a relative into the armchair of the nation's chief executive.

PRICES TAKE A DOWNWARD MOVEMENT.

After an almost continuous advance for the past twelve months the Department of Labor's index number dropped two points in July, standing at 134.8 as compared with 138.9 in June, and 126.9 in July, 1911. The chief decreases during July were in fruits and vegetables, grains and fodders, fish, animals and meats, increases being recorded in hides, leathers, boots and shoes, metals, fuel, lumber and furniture. Some two hundred and fifty articles, selected to represent Canadian production and consumption, are included in the calculation by which a comparison is made of wholesale prices at the present time with the average price prevailing during the decade, 1890-1899.

The Natural Resources Security Company, Limited, Vancouver, B.C., has issued an attractive booklet regarding Fort George. As there has been a certain amount of controversy with regard to this new town, the material in the booklet should enable the reader to form judgment as to the past accomplishments, the present position and the future prospects of the place. The photos in the booklet illustrate development in the business portion of the town. Large numbers of residences have been erected principally to the west of the townsite and others are under construction.

DUTCH MONEY IN CANADA

Oldest Dutch Mortgage Company in United States Will Enter the Dominion

The oldest Dutch mortgage company working in the United States, the Nederlandsch Amerikaansche Land Maatschappij, has issued a circular to its shareholders proposing a change in the by-laws in order to enable it to extend its sphere of operations to Canada. This is significant, inasmuch as it illustrates the drift of Dutch capital to the Canadian West, where heavy amounts of Dutch money have been loaned out in the last few years.

Help of Dutch Money.

From a national point of view there is some inconvenience in this movement, which tends to upbuild new countries with the help of Dutch money, whilst at the same time rates in Holland are rising in consequence of the fact that the heavy investment in mortgage bonds of the oversea mortgage companies leaves less money available for the home needs. Mostly in consequence of this phenomenon, the rate at which mortgage companies are loaning out money in Holland has risen $\frac{1}{2}$ to 1 per cent. in the last few years, investors no longer being prepared to buy mortgage bonds giving the low yield which was customary before, seeing that they can easily make 5 per cent. on mortgage bonds of the oversea institutions. Should it turn out, one day or another, that investments are not being made over there on conservative lines, hard times may occur for many investors on this side, as the public is hardly discriminating between the various banks which are practising this field of investment.

Many Companies in Canada.

A large amount of Dutch money has been placed in Canada in the purchase of agricultural land and in mortgages during recent years. The following list of the Dutch companies now doing business in Canada is taken from "Capital Investments in Canada," a volume published by The Monetary Times:—

Name of Company.	Amount of Capital.	Head Office.	Nature of Business.
Rotterdam Canadian Mortgage Company ..	2,500,000 (gulden)	Rotterdam	Mortgages
Netherlands Transatlantic Mortgage Company ..	2,500,000 (gulden)	Amsterdam	Mortgages
Holland Canada Mortgage Company	100,000 (gulden)	The Hague	Mortgages
Netherlands Canada Mortgage Company		Groningen	Mortgages
Canada Mortgage Bank.	2,500,000 (gulden)	Rotterdam	Mortgages
Nederlandsch Canadesche Mortgage Bank.	50,000 (gulden)	Groningen	Mortgages

There are good prospects of further capital from this source.

SASKATCHEWAN BRANCH OF CREDIT MEN.

The Canadian Credit Men's Association has opened a Saskatchewan branch with headquarters at Regina. Mr. Ferguson, who is manager of the Regina office, has had a long experience as a practical credit man and has been one of the directors of the Winnipeg Association. Mr. Ferguson recognizes the possibilities before the Association and its Saskatchewan branch. The local board consists of the following:—Messrs. S. C. Burton of Cameron and Heap, Limited, president; J. W. Peart, of Peart Brothers Hardware Company, 1st vice-president; F. Hocking, of Campbell, Wilson and Smith; E. H. Anderson, Amherst Shoe Company; Geo. Harold, Cockshutt Plow Company, Limited; E. B. Stevens, Cameron and Heap, Limited; T. B. Patton, Kerr-Patton Coal Company, Limited, directors.

Messrs. A. E. Ames and Company, Toronto, have issued a new edition of their annual "Investors' Reference," revised to July 1st, 1912. It is an unusually useful booklet.

Messrs. Twohy Brothers, railway contractors of Spokane, secured the contract at \$10,000,000 for construction of 125 miles of road between Kamloops, B.C., and Yellowstone Pass, constituting part of the main line of the Canadian Northern from Edmonton and Vancouver. The contract includes some of the heaviest work on the line, and in the Yellowstone Pass country seven tunnels are required.

T. C. BOVILLE,

Deputy Minister of Finance

JULY BANK STATEMENT

Satisfactory Midsummer Document Shows Expansion in Important Items—Total Deposits Continue Large.

	July, 1911.	June, 1912.	July, 1912.	Year's inc.	Month's inc. or dec.
Deposits on demand	\$316,973,780	\$373,500,189	\$372,012,494	+ 17.3	— 0.3
Deposits after notice	570,789,435	631,317,687	640,592,345	+ 12.2	+ 1.4
Current loans in Canada	723,765,358	848,940,089	852,256,651	+ 17.7	+ 1.5
Current loans elsewhere	32,870,114	34,254,568	35,741,998	+ 8.7	+ 4.3
Call loans in Canada	65,339,288	68,701,855	70,407,734	+ 7.7	+ 2.4
Call loans elsewhere	104,009,030	120,569,812	117,961,437	+ 13.4	— 2.1
Circulation	89,018,079	102,011,848	95,827,534	+ 7.6	— 6.0

The above are the principal changes in the statement of the chartered banks for July. The three decreases during the month were in demand deposits, call loans out of Canada, and circulation, the declines being 0.3, 2.1 and 6 per cent. respectively. Circulation exhibits the largest drop, about \$8,000,000, but that item to-day is \$7,000,000, or 7.6 greater than a year ago. The largest increase, 4.3 per cent., was in current loans out of Canada. Domestic call loans gained 2.4 per cent. and domestic current loans 1.5 per cent. After notice, deposits increased 1.4 per cent. Every item shows a large increase over the figures of the previous year. The two greatest gains are in demand deposits and current loans in Canada, both of which appreciated during the twelve months by more than 17 per cent. Foreign call loans gained 13.4 per cent., and deposits after notice 12.2 per cent.

The following table gives a record of domestic loans during the past thirteen months:

Loans.	Current in Canada.	Call in Canada.
1911—July	\$723,765,358	\$65,339,288
August	734,683,962	65,106,110
September	749,007,607	67,717,991
October	768,492,008	69,088,467
November	770,356,419	72,033,493
December	774,900,172	72,640,526
1912—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734

Since July, 1911, there has been a steady increase in current loans in Canada. This fact, in view of the conservative attitude of our banks in regard to credit, has pleasing significance. Current loans to-day are greater by \$129,000,000 than in July, 1911. Call loans in Canada have varied during the past twelve months from \$65,000,000 to \$72,000,000. Last month it was higher at \$70,407,000 than during any month since February. The highest point reached during the past thirteen months was in December, 1911, when domestic call loans totalled \$72,640,000.

The table at the foot of this page shows the loan record of the Canadian chartered banks both in and out of Canada.

Current loans in Canada have appreciated in the past four years by no less than \$227,000,000, or 43 per cent. They have exhibited a steady increase since July, 1909, gaining about \$100,000,000 a year. Call loans in Canada have grown from \$40,000,000 to \$70,000,000 in the same period, a gain of \$30,000,000, or 75 per cent. Those who make use of this department of the bank apparently have little cause

of complaint. Current loans out of Canada have changed since July, 1908, from \$23,000,000 to \$35,000,000 last month, an increase of \$12,000,000, or 52 per cent. Call loans out of Canada are to-day \$63,000,000 greater than in July, 1908, the change representing an increase of 114 per cent. This item has not varied greatly since 1909, the July amount never being less than \$102,000,000 or more than \$118,000,000.

The following table gives a record of deposits for the past thirteen months:

	On demand.	After notice.
1911—July	\$316,973,780	\$570,789,435
August	311,111,668	575,740,956
September	313,584,893	577,591,045
October	331,953,562	586,451,045
November	341,712,265	588,942,142
December	335,020,693	591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345

Since July last year, demand deposits have gained \$56,000,000. Five times during the thirteen months' period this item has exhibited a decrease. Deposits after notice have gained in the same time approximately \$70,000,000 and have not once shown a decline during the period under review. The deposits record of the Canadian chartered banks is one of the remarkable features of our banking growth. It is clearly indicated in the following table:

July.	On demand.	After notice.	Demand.
1908	\$164,791,398	\$402,964,565	\$ 567,755,963
1909	222,555,749	466,337,816	688,893,565
1910	251,638,522	538,384,371	790,022,893
1911	316,973,780	570,789,435	887,763,215
1912	372,012,494	640,592,345	1,012,604,839

Demand deposits have increased from approximately \$165,000,000 to \$372,000,000, a gain of \$207,000,000, or 119 per cent. Deposits after notice have changed from \$403,000,000 to \$640,000,000. This is an increase of \$237,000,000, or 58 per cent. The total deposits last month still maintained a record above the billion dollar mark, the figures being \$1,012,000,000, as compared with \$867,000,000 in July, 1908. That is a gain since then of \$445,000,000, or 78 per cent.

The entire bank statement may be regarded as a satisfactory mid-summer document.

	July, 1908.	July, 1909.	July, 1910.	July, 1911.	July, 1912.
Current loans in Canada	\$525,271,185	\$539,821,041	\$653,008,336	\$723,765,358	\$852,256,651
Current elsewhere	23,153,095	32,753,385	40,267,390	32,870,114	35,741,998
Call in Canada	40,467,165	54,603,054	60,081,256	65,339,288	70,407,734
Call elsewhere	54,915,935	114,685,537	102,436,037	104,009,030	117,961,437

ALBERTA'S CROP ESTIMATE.

The following is the official estimate of the acreage under crop and the yield in Alberta for 1912:—

	Acres.	Bushels.
Winter wheat	127,200	2,607,600
Spring wheat	855,000	18,040,500
Oats	1,106,000	35,880,000
Barley	282,200	6,958,060
Flax	96,050	576,300
Rye	17,725	354,500

Total grain 2,554,775 64,416,960

The town of Macleod, Alta., has sold eighteen hundred of its lots to Mr. Ben. H. Morgan, representing capitalists in London, England, the price involved totalling six hundred and fifty thousand dollars. Macleod owned its town-site, and up to this sale had some twenty-one hundred lots left. It has decided to reserve one lot in six, and the British investor was given three years to dispose of thirteen hundred at the present assessed value, less twenty-five per cent. There has been some opposition to the deal, especially to the three years' option. The investor is going to place the land on the British market, and is under obligation to advertise it extensively and to do all possible to send population and industries to Macleod in order to make his investment good.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

St. Catharines, Ont.—The by-law to supply the village of Port Dalhousie with hydro-electric power for lighting purposes was carried.

Coldstream S.D., No. 435, Man.—Until September 1st for \$1,500 6 per cent. 10-year debentures. D. McCurdy, secretary-treasurer, Franklin.

Harriston, Ont.—The town council has decided to submit to the ratepayers a by-law providing for the raising of \$12,000 for an electric light system.

Raymore, Sask.—A by-law whereby it is proposed to raise \$5,500 by debentures to purchase a fire engine and build a fire hall and town hall, was carried.

Taber, Alta.—Tenders are called for \$28,000 5 per cent. 10 and 20-year debentures. G. C. Millar, secretary-treasurer. (Official advertisement appears on another page).

Watrous, Sask.—Until September 9th for \$83,000 40-year 5½ per cent. debentures. J. Gaye, secretary-treasurer. (Official advertisement appears on another page).

Northumberland County, N.B.—Until September 9th for \$35,000 20-year 5 per cent. bonds. E. P. Williston, secretary-treasurer Northumberland County, Newcastle, N.B.

Kerrobert, Sask.—The town of Kerrobert passed a by-law to the amount of \$82,000 for the purpose of installing a waterworks system and building and equipping a fire hall.

Melita, Man.—Until September 10th for \$6,000 5 per cent. 20-year debentures for school purposes. R. Love, secretary-treasurer. (Official advertisement appears on another page).

Welland, Ont.—Until September 9th for \$75,000 waterworks, 30-year debentures, and \$29,598.63 sewers and walks 10-year debentures; interest 4½ per cent. J. H. Burgar, town treasurer. (Official advertisement appears on another page).

Duck Lake, Sask.—Until August 31st for \$4,000 5½ per cent. 20-year, and \$6,000 5½ per cent. 20-year Government guaranteed general debentures. F. Hopwood, secretary-treasurer.

Olds S.D., No. 235, Alta.—Tenders are called for \$30,000 5 per cent. 30-year school debentures. J. F. Grant, secretary-treasurer, Olds, Alta. (Official advertisement appears on another page).

Kamloops, B.C.—Ald. Crawford gave notice at a recent council meeting that he would introduce two water system by-laws and the electric light by-law for \$250,000, \$90,000 and \$65,000 respectively.

Montreal, Que.—Up to September 12th for \$500,000 4 per cent. 30-year bonds of Montreal city Protestant board of school commissioners. C. J. Binmore, secretary-treasurer, Montreal. (Official advertisement appears on another page).

(Continued on Page 350.)

HOW OUR MANUFACTURES HAVE GROWN.

The census of the manufactures of Canada taken last year for the calendar year 1910 as now compiled gives the following comparative statistics, compared with those of the census of 1901 for the calendar year 1900, viz.:

	1910	1900	Increase	Increase p.c.
Establishments	19,202	14,650	4,552	31.07
Capital	\$1,245,018,881	\$446,916,487	798,102,394	178.58
Employees	511,844	339,173	172,671	50.91
Salaries and Wages ..	\$240,494,996	\$113,249,350	\$127,245,646	112.36
Materials	\$600,822,791	266,527,858	334,294,933	125.42
Products	\$1,164,695,032	\$481,053,375	\$683,641,657	142.11

The capital employed in manufactures increased during the decade by 178.58 per cent. and the value of products by 142.11 per cent. The number of establishments employing five hands and over last year was 19,202, being an increase of 4,552 in the decade.

The mines branch of the government department of mines states that its demonstration of the commercial possibilities of peat as a fuel in Canada has been successfully completed, and that henceforth the activities of the branch would be applied in another direction, probably the economic production and testing of fuel, concerning which the department already has a man in the west. The peat industry in Canada will now become a matter of private enterprise. There are two big plants under construction, one at Alfred, Ont., and another at Farnham, Que., which are expected to supply Ottawa and Montreal and possibly other cities with cheap fuel. Their capacity is about 30,000 tons per year.

NEWS AND NOTES

Lethbridge, Alberta, now has a street car system.

Mr. A. M. Nichol has been appointed as publicity commissioner for Regina.

The Dominion Bond Company has increased its capital stock from \$500,000 to \$1,000,000.

The capital stock of Improved Realities, Limited, has been increased from \$100,000 to \$200,000.

A by-law to raise \$25,000 debentures for cement sidewalks, was defeated at Orillia, Ont., by three votes.

The application for the amalgamation of the Traders and Royal Banks came up yesterday for consideration by the treasury board.

Mr. F. B. McCurdy & Company, of Halifax, Montreal, etc., have opened an office in the Rideau Club Building, Wellington Street, Ottawa, and Mr. H. B. Cassils has been appointed as manager.

A Dominion license has been granted La Compagnie d'Assurance Generale Contre l'incende, for the transaction of fire insurance. Mr. Joseph a Laurin, Montreal, has been appointed chief agent.

The membership of the Toronto Stock Exchange has been increased from fifty to fifty-five. Heretofore all the seats on the exchange have been sold and the increase will leave five seats in the treasury which will be sold as the demand arises. Mr. A. E. Osler, has made application for membership.

The interests representing the Labrador Pulp and Power Company have decided on a large pulp and paper enterprise, involving the increase of the capitalization of the company from three millions to fifteen millions of dollars, stated Mr. Robert H. Reid, of New York, vice-president of the company.

The Canadian Manufacturers Association will hold its annual general meeting at the Chateau Laurier, Ottawa, on September 24th, 25th, 26th, when proposals for modifying and simplifying the association's form of government will be submitted, and the policy of the association for 1912-3, etc., dealt with.

The Maritime board of trade concluded its eighteenth annual meeting on Thursday at Truro. The next meeting will be at Newcastle, N.B. Mr. Matthew Lodge, of Moncton, was elected president. Messrs. E. T. Higgs and H. J. Logan, of Charlottetown and Amherst respectively, were elected vice-presidents, and Mr. Thomas Williams, Moncton, is the secretary.

Representatives from various boards of trade at a meeting held at Prince Albert were unanimous in their desire to have a Northern Saskatchewan amalgamated board of trade organized as soon as possible, and at the meeting the following officers were elected, Mr. Sydney Smart, Melfort, president; Mr. G. R. Neilson, Shelbrook, vice-president; and Mr. Walter E. Gunn, secretary.

The negotiations concluded between the Canadian Pacific and the Commercial Telegraphers' Union resulted in a wage increase of approximately 10 per cent., two weeks' vacation with pay each year, and other improved working conditions, bringing the wage scale for commercial telegraphers to a point higher than that paid by any other telegraph company in United States or Canada.

Mr. E. G. Rykert has returned to Montreal from Europe. He has organized a syndicate of British and Continental capital to take over from the present holders of a large tract of land in the Peace River country. The total amount of land which will ultimately be taken over is about 800,000 acres, and the price will reach to nearly \$5,000,000. Scottish, English, Belgian, Dutch and French capital is interested, a particularly large proportion being Dutch.

DEBENTURES FOR SALE

NEEPAWA, MAN.

Town of Neepawa Waterworks and Sewers Debentures \$100,000 4½ per cent. in denominations of \$1,000 each, dated January 1st, 1912, repayable July 1st, 1941, at the Canadian Bank of Commerce, Neepawa. Interest coupons payable half-yearly. Issued under the authority of a special act passed by the Manitoba Legislature in 1911 and under By-law No. 448 of the Town of Neepawa passed on September 22nd, 1911. Correctness certified to by the Municipal Commissioner.

Town of Neepawa Local Improvement Debenture \$2,693.24 5 per cent. issued in one debenture under authority of By-law No. 459, passed by the Council of the Town of Neepawa on February 9th, 1912. Interest dates from January 1st, 1912, payable November 1st in each year for twenty years. Interest and Principal payable at the Canadian Bank of Commerce, Neepawa. Coupons attached.

CANADIAN PACIFIC FINANCING

Position as to Stock Issues—Value of Rights—Securities of Dominion Atlantic Railway to be Acquired

It is thought that \$20,000,000 or \$30,000,000 of the \$60,000,000 new Canadian Pacific stock issue to be authorized at the special meeting on October 2nd, will be offered before the close of this year. That amount would be sufficient to cope with the company's needs during 1913. The present authorization of common stock amounts to \$200,000,000, of which \$198,000,000 is issued and will be fully paid by October 18th next. The last issue of \$18,000,000 was made at 150. The new stock will probably be offered to shareholders at 165, 170 or 175.

If \$20,000,000 of new stock is offered for subscription it will mean that stockholders will be allowed to buy, at the special price to be named, one share of the new stock for each ten of the old they have. If the price is \$150, and it was the last time an offer was made, the "rights" at the present price of 2½ for the old stock, will be worth \$12.73; if it is \$165, as is considered more likely, the "rights" will be worth \$10.73; if it is \$175, as is not at all improbable, they will be worth \$9.82. That is, always providing that only \$20,000,000 will be next offered.

Reasons for Canadian Pacific Rise.

Canadian Pacific stock has risen rapidly during the past year. The rise of 65 points in the New York market price of the stock to 283, the new high record reached following the announcement of the new stock issue, has largely been due to the strong position in earnings and the new financing from time to time. While it is impossible to estimate accurately the value of the prospective new rights and while there is no basis afforded in the record of rights offered by Canadian Pacific during the past ten years, the Wall Street Journal has prepared the following interesting table in that connection:—

Year.	Rights.	Dividends %.	Dividends %.	Yield % on Average Price.
1911	8.33	10.0	18.33	7.57
1910		9.5	9.50	4.29
1909	9.56	7.0	16.56	9.36
1908	7.69	7.0	14.69	9.17
1907		7.0	7.00	4.21
1906	11.69	6.0	17.69	9.94
1905		6.0	6.00	3.89
1904	5.62	6.0	11.62	9.45
1903		5.5	5.50	4.33
1902	4.75	5.0	9.75	7.46
Av. 10 yrs.	4.76	6.9	11.66	6.96

Value of Rights.

On the basis of the average prices of these rights and the dividends paid over the indicated period, Canadian Pacific was an 11.66 per cent. stock. In cash dividends above, the stock showed an average yield of 4.31 per cent. on an average price of 160, a figure which compares with the yield on average price, over the same period, of two other stocks now on a 10 per cent. dividend basis, namely, Union Pacific, 5.44 per cent., and Lehigh Valley, 6.50 per cent.

As indicated in this comparison, rights have played a much more important part in determining the market valuation of Canadian Pacific than of the other two. On the average price of 160, cash dividends and rights together yielded approximately 6.96 per cent. Present indications are that the rights shortly to be offered will be worth more than the average market price of any previous subscription right.

To Acquire Dominion Atlantic Securities.

Stockholders will also be asked to authorize issuance of an additional amount of consolidated 4 per cent. debenture stock sufficient to take over the securities of the Dominion Atlantic Railway, now controlled by Canadian Pacific through ownership of a majority of common and preferred stock. Dominion Atlantic Railway is a system of about 248 miles of line, with its main line of 170 miles located between Windsor and Yarmouth, N.S. This road has outstanding at the present time £230,000 common stock, and £270,000 of 5 per cent. non-cumulative preferred stock. Its bonded debt consists of £500,000 first debenture 4s, due in 1944, £250,000 second debenture 4s, due 1956, and £257,200 extension debenture 4s, due in 1965. Of these securities, Canadian Pacific on June 30, 1911, owned £219,480 of common stock and £259,385 of preferred stock.

On June 30, 1911, Canadian Pacific had outstanding \$142,861,462 of consolidated 4 per cent. debenture stock. This amount was increased during the past fiscal year by approximately \$14,396,640 through the issuance of £6,000 per mile for 379 miles of new line construction and £800,000 for steamship construction, so that the present amount of this stock outstanding is roughly \$157,798,000.

MARKETING MUNICIPAL DEBENTURES

Edmonton's Secretary-Treasurer Discusses Respective Merits of Stock and Debentures

Mr. F. M. C. Crosskill, secretary-treasurer of Edmonton, discussed the marketing of debentures at the recent municipal convention. He stated his difficulty in getting an unbiased opinion respecting the question, as each man or firm likes to have loans put on the market in the form in which he or they have been accustomed to, or can best handle them. "For instance," said Mr. Crosskill, "brokers who are in the position to act as financial agents for a municipality are in favor of the issue of stock and of appointing a financial agent in England to look after the selling of the stock and payment of interest. Others again who apparently have had just as wide an experience advise keeping the debenture form. The two points urged in favor of stock are that any amount from £1 up can be sold to suit the purchaser, and for the security of having the stock registered in the purchaser's name; the latter point I do not think has much advantage over a bond, for any purchaser can have his bonds registered in his own name when they become as safe as stock. It is also a question whether it would be advisable to go to the extra expense in putting the loan on the market for the sake of the few who would want to purchase less than £100 which is the amount of the bonds usually put on the London market.

Might Influence Small Investor.

"These two points might influence the small investor who wants a permanent investment; on the other hand it would be no advantage to purchasers of large blocks of an issue to have them put up in small amounts and purchasers who buy with the intention of re-selling, which is very often the case, prefer not to have them registered in their names as it entails much more trouble when they come to dispose of them and it is to the large purchasers we have to look for a market. Then again, in issuing stock in £1 shares and up, what an enormous amount of labor is would entail in writing certificates and in registration. I am of the opinion that the cost of putting stock on the market and of paying the interest when due through a financial agent, which is the way it must be done, would more than offset any gain in price that we could hope to receive. There is also another objection to issuing stock and that is that the municipalities issuing are not able to sign their certificates which I think it is very desirable they should do; therefore I think that bearer bonds of say £100 each, which can be put on the market for competition of all the brokers, will be found to be much more advantageous and satisfactory to the municipality issuing them.

Forming of By-Laws.

"In issuing either bonds or stocks municipalities should be very particular to see that the by-laws authorizing the loan are properly drawn, also that all the other requirements of the Act, such as advertising, etc., are complied with, for no municipality can afford to have doubts cast upon the legality of their loans. Then also in issuing bonds it is very important to get as neat and attractive looking a bond as possible, for there is no doubt that the appearance of a bond goes a long way in securing a good price, besides being a splendid advertisement for a municipality. In smaller towns it would be better to have a uniform bond approved of by some of the larger brokers, or better still by the legislature in the case of larger cities such as Edmonton where our bonds are already established on the English market (I say English market advisedly for it is on it that we must depend for all of our larger loans); it is advisable not to change the form of debentures that are well known there, without some very good reasons. There is also another very important point to be remembered, that is in advertising for bids on an issue to give the fullest possible information and to allow plenty of time between the date on which the particulars of the loan are given out and the date of opening the tenders, in order to give all persons desiring to tender an opportunity to put in their offer. If municipalities would give particular attention to all these points and see that their towns are well advertised in all the financial centres as progressive and growing towns, there is no reason why they should not receive the highest price for their bonds."

A meeting for reorganizing the Castor, Alta., board of trade was held recently and the following officers elected: Honorary president, Mr. Carl Stettler; president, Mr. J. W. McBrine; vice-president, Mr. F. J. Turner; executive council, Messrs. J. J. McPherson, F. H. Whiteside, O. W. Collev, A. H. Illsey, C. A. Walter, S. L. Dörland, R. J. Dinning, G. R. D. Lvon, W. A. Parker, W. French; secretary-treasurer, Mr. L. B. Browne.

REGINA GETS GOVERNMENT LOAN

Montreal's Treasurer Does Not Favor Selling City Bonds to Citizens—Municipal Financing Criticized

The city of Regina has decided to accept the offer the Saskatchewan provincial government of a loan of \$500,000 to the city for use of those whose homes were destroyed by the cyclone. It was also reported by the civic finance committee that there are possibilities of securing the loan of a million dollars from the Dominion government.

No scheme of selling city loan debentures to the people of Montreal, as proposed by Alderman Lapointe, would be successful at the present time, is the view of Mr. Charles Arnoldi, city treasurer. Alderman Lapointe at a recent meeting of the council, proposed that the city obtain power to raise the interest rate to a maximum of five per cent. on its loans, and issue bonds as low as ten dollars, redeemable in forty years.

Mr. Arnoldi said that this plan might work well where there is a large population of people with considerable savings, and looking for safe opportunities of investment, but in Montreal he thought the public would not be much interested in such loans. Most moneyed men prefer to buy stock with a prospect of increasing in value and would not want to bother with a stationary stock as that of the city would be. Then as the discount rate is advancing the market value of this stock would be liable to decline and create dissatisfaction.

Money Wanted in a Hurry.

Mr. Arnoldi thought that when the city wanted a loan it did so in a hurry, as a rule, and only when the money was needed, so it could not afford to wait for a month, two months, or even six months, to sell its bonds. In offering it to the public in town, Mr. Arnoldi said, the city would have to open the sale of bonds months in advance of the time that the funds were wanted. It would therefore have to deposit the money in the bank until wanted. There it would be receiving two and a half per cent. interest, but at the same time, would be paying four and half to five per cent. for the loan, making a loss of two to two and a half per cent. while the loan was unused.

South Vancouver has received a letter from Messrs. Wood, Gundy and Company, the municipality's financial agents. After thanking the council for sending them a detailed statement as to the present expenditure on capital accounts, the fiscal agents say in part:

"We can quite understand you are very loath to lay off men who are dependent upon work undertaken by the municipality for a livelihood until such time as industries are located in the municipality and provide employment for them.

Not Sound Municipal Financing.

"This, we may say, is a feature in connection with Canadian municipalities that is so deprecated by Old Country financiers: There is a feeling on their part that in too many instances it is a case of the municipality having to borrow money to pay for works which they proceed with so that the laboring class within the municipality may be employed. This is not regarded as sound municipal financing.

"We are taking up the matter with our London office and are urging them to do the very best they can, and we shall advise you later as to the prospects of their getting out an additional amount, on the treasury certificates."

The clerk was instructed to send a copy of the following resolution in reply: "That the clerk reply to Messrs. Wood, Gundy and Company, fiscal agents, pointing out that our chief difficulty is in coping with our incoming population, providing streets, extending the water system, building new schools, etc.; also that we must insist on the full amount of certificates issued or the return of the portion not covered by present moneys advanced."

Vancouver's Debenture Sale.

As noted in last week's Monetary Times an offer for the purchase of Vancouver's debentures to the amount of \$1,500,000 at a price of 93 net has been received and accepted. The offer came from the city's financial agents in London, Messrs. Brown, Shipley and Company, and the sale of these debentures at the price quoted will enable the city to better its present financial state by the removal of the heavy overdraft now carried at the Bank of British North America.

The debentures to be sold comprise some of those authorized this year and the interest will date from August 1. Messrs. Brown, Shipley and Company some months ago disposed of about \$5,000,000 worth of bonds for the city. All sales through this company are for inscribed stock, the firm acting as the city's agents and guaranteeing a sale at a certain figure.

The Paris correspondent of the Boston News Bureau writes: The pilgrimage of the Canadian ministers to the homes of their French fathers was marked by every evidence

of sentimental regard on both sides. The ostensible object of the visit was to attempt to arrange a two-cent postage, the reduction of cable rate and other matters of an administrative nature. But really the most important motive of the appearance of Mr. Borden here was money, Canada wants money for the development of her new provinces and the Canadian ministers never allowed an opportunity to pass to enlarge on the wonderful resources of Canada waiting for capital to develop.

French Want Strong Guarantees.

Those French financiers who were sounded were not averse to the idea of sending their money to Canada, but—and here lies the crux of the matter—they require strong guarantees. The French investor is deserting fast the fixed rate, safe investment. He wants a larger return for his money, but not a larger risk.

"All the old-fashioned staid family investments, government stock, not merely, but even municipal loans, railroads and industrial shares have deteriorated from 10% to 40% during the last few years. If the Canadians want to dip into the French stocking at the present time they will have to evolve something very gilt-edged indeed. Mr. Borden and his colleagues made an excellent impression on their French confreres, and the French government is prepared to do anything in reason to assist in the development of Canada."

PANAMA CANAL BILL MAY HELP CANADIAN RAILWAY.

Without intending it, the Panama Canal bill in its present form may give enormous advantage to the Canadian Pacific Railway, thinks the Wall Street Journal. Ownership of ships by the railroads of the United States trading through the canal is extinguished, while the Interstate Commerce Commission is given power to regulate ships trading elsewhere so owned. But it is diplomatically impossible, on all construction of international law, for this country to decree the ownership of foreign vessels using the canal. This necessarily gives the Canadian Pacific an enormous advantage, in the ownership of its fleet, over the Southern Pacific or the New Haven, to say nothing of its competitors in the North-West with no ships at all.

This advantage would be emphasized by the possibility of retaliation by Canada in the matter of its own ships canals, which would not be subject to the question of discrimination in favor of our own coastwise trade through the Panama Canal. The American tonnage through the Canadian canals is 18,250,000, as against 1,118,000 for Canadian vessels. A preference to the latter would be of far-reaching consequence, and would, of course, help all the Canadian railways.

PACIFIC INVESTMENT CORPORATION.

A block of \$30,000 8 per cent. 8-year second mortgage bonds of the Pacific Investment Corporation, Limited, in \$100 units is being offered by Messrs. Wolverton and Company, Limited, Vancouver. The company's statement is as follows:—Estimated value of property, \$350,000. Total bonded debt:—First mortgage, \$60,000; present issue, \$50,000; total, \$110,000; margin of safety, \$210,000; maximum revenue possible from present rentals, \$45,000.

Actual annual revenue, \$43,761.60; less annual expenses, \$13,584.16; net revenue, \$30,176.44. Annual interest charges:—First mortgage, \$6,300; second mortgage, \$4,000; total, \$10,300.

Revenue over fixed charges, \$19,876.44.

A typographical error in the company's advertisement in The Monetary Times recently might have led those who did not analyze the statement closely to infer that the revenue necessary to provide the interest on these bonds is speculative. According to the figures, as correctly given above, the opposite is the case. The company's directors are as follows:—Messrs. N. Wolverton, B.A., LL.D., president; Nelson, B.C.; president; Wolverton & Company, Limited; president; Kootenay-Slocan Fruit Company, Limited; J. H. Kennedy, C.E., vice-president, chief engineer, Great Northern Railway in Canada; J. G. Leibert, Esq., architect and contractor; P. P. Brown, Esq., structural engineer; L. Buchanan, B.A., LL.B., barrister and solicitor; F. J. Hill, Esq., accountant; A. N. Wolverton, Esq., broker, manager Wolverton & Company, Limited, secretary-treasurer Kootenay-Slocan Fruit Company, Limited, all of Vancouver.

Contracts have just been let by the Montreal Transportation Company by which the Canadian canal trade will have the first electrically propelled merchant vessel ever built. The principle of propulsion for this vessel is identical with that of the "Gas Electric" railway car, of which an example was recently seen in Toronto on the line of the Canadian Northern.

DEVELOPMENT OF MONTREAL PORT

Autobus Company—Montreal Water and Power Company—Mr. Doble's New Position

The Harbor Commissioners of Montreal have in view a comprehensive plan for the development of that port, a plan, in fact, which involves the expenditure of many millions and the practical transformation of dockage facilities. When the commissioners took office some years ago, they paid immediate attention to future requirements as well as to those of that time. As a result they had the engineers prepare plans which they expected would take a dozen years to materialize. These plans are gradually developing as the work proceeds.

Among the objects of the commissioners is that of reducing the flow of water which now meets the ships coming up the current in front of the city. For that purpose they have considered plans by which much of the water will be diverted between St. Helen's Island and the south shore. The reduction of the current in the upper part of the harbor and the possible changing of the inlet to the Lachine Canal are under discussion.

The commissioners may likely construct a bridge to connect the city and the south shore. The city end of this bridge would apparently rest upon the end of a new pier to be built outward from the city. The other end would rest upon the west end of St. Helen's Island. From there to the south shore, the work will be a simple matter. By following this route, the difficulty of raising the bridge above the masts of incoming steamers disappears, as the vessels do not proceed so far upwards from the sea. Residents both of Montreal and of the south shore welcome the announcement. No doubt street car facilities will be provided.

Monetary Times Office,
Montreal, August 20th.

Having reached the point at which the city council was ready to accept the conditions of the autobus by-law, and, in fact, had accepted them, the whole matter has been side-tracked once more by an application for an injunction. This action was taken by one, Horatio Nelson Bray, and was entered in the courts shortly after the by-law had passed the city council. Mr. Bray's attorney pointed out that it was necessary that the mayor and city clerk sign the by-law before it could become effective, and asked that the usual forty-eight hours' notice, in presenting the application for the writ, in this instance, be not obligatory. The city attorney agreed that the bill would not be signed by the mayor or the city clerk before the case was heard in court.

Some of the claims made are that the city is not in a position to grant an exclusive franchise for any company for autobus traffic or to the Canadian Autobus Company in particular. The petitioner also claims that the city has not the right to accept the shares offered by the company in return for its franchise or to be represented on its board of directors. Furthermore, action to set aside the by-law granting the franchise is taken and the power of the city to adopt such a by-law is brought in question.

Question of Autonomy.

Some of the points would seem to bring into question much the same principle as is involved in the difficulty between North Toronto and the power company. Montreal has been carrying on considerable agitation to obtain autonomy and it may be taken for granted that this will add fuel to the agitation. While the wisdom of an exclusive franchise is to be questioned, the citizens are certainly in favor of the operation of the buses.

That the city of Montreal and the Montreal Water and Power Company will ever reach an understanding and come to terms appears doubtful. For several years negotiations have been in progress, but for some reason the deal seems to make little headway.

A few years ago the company appeared anxious to sell. Then the city appeared anxious to buy the company, and the matter reached the stage at which the city demanded the right to have a valuation of the company's plant made. This the company refused. The civic board of control suggested to the company that a board of arbitration be appointed to report upon a fair price, which report would not be binding upon either party.

This week the board of control received a reply from Mr. Edwin Hanson, on behalf of the company, refusing the suggestion and stating that in the opinion of the company no good purpose would be gained by any such board and that the arbitration provided for in the charter of the city should be sufficient. Consequently the matter stands over again.

While the city, as constituted until recently, received its water supply from the municipal plant, a number of outside municipalities received theirs from the Montreal Water and Power company. These municipalities have recently been made a part of the city and it is the opinion of all concerned that the water service could be much more satisfactory through the purchase of the private plant and its operation by the municipality.

Mr. Doble Assumes More Important Duties.

Mr. Arthur R. Doble, formerly secretary to Sir Edward Clouston, has become president of the Royal Securities Corporation, Sir Max Aitken having retired from that office in order to pay closer attention to other responsibilities assumed by him during the past year or two. Shortly after Mr. Doble's retirement from the Bank of Montreal some months ago and his visit to England, the rumor that he would join the Royal Securities Corporation in a prominent capacity, became current. It is now confirmed and Mr. Doble will take up his new office on September 15th.

The presence of Sir Max Aitken in the city was doubtless made the occasion of the official announcement. The latter has been connected with the Royal Securities Corporation for many years, being the founder of the institution and its counsellor and guide until it reached its present position of prominence in the financial world. It was through the Royal Securities Corporation that most of the Aitken deals were accomplished, such as the Canada Cement, the Canadian Car and Foundry, the Steel Company of Canada, and others, the institution leaping rapidly to the front rank of Canadian securities companies. It may be taken for granted in retiring from the position of president, Sir Max would be anxious to leave matters in the most capable hands available, so that the appointment of Mr. Doble to the office is sufficient evidence of the views of the late president.

Well-Known Montreal Man.

There are few better known men in Montreal financial circles than Mr. A. R. Doble. For twenty-five years he was connected with the Bank of Montreal, having entered the service of the institution in Toronto in 1887. After a few years he was sent to New York, where he remained for about eleven years. He was then appointed secretary of the general manager, which position he held for ten years. During this period, he, of necessity, came into touch with many financiers of prominence, and during late years he, himself, paid special attention to the financial arrangements of many of the large companies whose accounts were with the bank of Montreal. As secretary of the Mexican Light and Power Company he was through the thick of the fight with the Mexico tram interests. Later he became a director of the Western Canada Power and is on the board of the City Realty Company.

Mr. Doble is also a writer, and although he has never expended any great energy in this direction, his occasional contributions stamp him as having considerable ability in that direction. He is well known, too, in the sporting field and is a member of many social and sporting clubs, being commodore of the Royal St. Lawrence Yacht Club and a member of several of the boating clubs in the vicinity of Montreal as well as of the Auto and Aero Club, the St. James' Club, the Canadian Club and others.

WILL THERE BE A CAR SHORTAGE?

That a car shortage is imminent is the opinion of Mr. J. E. Walsh, transportation manager of the Canadian Manufacturers' Association. An estimate based on railroad figures of the past four years tends to show that shippers will be confronted with a car shortage of sixty thousand this year on the smallest possible estimate, and as great a deficit as 180,000 cars should the proportion be as high as it was in October, 1909.

Vice-President Bury, of the Canadian Pacific Railway, said that so much has been done in preparation for handling the crop by concentrating rolling stock and motive power, together with the earliness of the season, it is improbable that there will be any blockade.

A conference between representatives of the grain and railway commissions was held recently with regard to the distribution of cars for the crop moving. The distribution will probably be made under the direction of the grain commission.

CANADIAN BUTTER EXPORTS HAVE DECLINED

Last Year It Was Not Once in Sufficient Supply in the London Market to Secure an Official Quotation

Some striking figures regarding the decline of Canada as a butter exporter are given in the annual review of the imported dairy produce trade, published by an English house, Messrs. W. Weddel and Company. The review does not deal with one of the principal reasons for this decline, the rapidly appreciating home demand consequent upon the increasing population and growing purchasing power of the Dominion.

"The imports of butter from the British overseas dominions," says the review, "for the past year unfortunately again illustrate the uncertainty of supplies which necessarily attaches to enormous areas, like Australia, New Zealand and Canada, with their varied climates. The year which closed twelve months ago provided us from the British dominions with the heaviest import on record, viz., 61,023 tons, while in the twelve months just ended only 52,857 tons arrived. This check in the import is very disappointing, notwithstanding the similar experiences in the past. The successive and enormous increases in the two preceding years of 14,440 and 14,386 tons, respectively, encouraged hopes of still further progress; and the sudden decline of 8,166 tons must be regarded as a very great misfortune.

On the other hand it should not be overlooked that notwithstanding this decline, one-fourth of the butter imported into this country in the past year came from our kith and kin beyond the seas. A survey extending backwards for ten years shows the imports of British overseas butter to have more than doubled.

Canada is Dropping Out.

If the three sources from which this butter comes be examined, there is, however, another cause for regret in the fact that Canada, the nearest of the dominions to this country, is evidently dropping out of the trade. Ten years ago over 13,000 tons of Canadian butter came to this country, while twelve months ago the import had fallen to 776 tons. It is true this amount grew to nearly 3,000 tons in the past year; but the increase was due more to the excessively high prices ruling in the United Kingdom last autumn than to there being any real surplus of butter in Canada available for export. Canadians were tempted by the high prices to overship, but soon discovered that they had not enough left at home to supply their own requirements, and in the past winter had to import Australian and New Zealand butter in very large quantities, at higher prices than those they obtained for their own exports.

"For some time past every year has supplied sufficient evidence to prove that so far as butter is concerned, Canada is nearing the end of her export business. During last autumn, when she sent us 3,000 tons, it was principally to the ports of the Bristol channel and to Liverpool. On the London market, for the year ended with June, Canadian butter was not once in sufficient supply to secure an official quotation. In recent years Canadian butter has been imported into this country mainly for cold storing to supply our winter requirements. In the future these requirements will have to be filled from Australia and New Zealand by fresh landed goods. This will be an advantage to the home trade as well as to the Commonwealth and the Dominion of New Zealand, for however well butter may keep in cold store, it is not so palatable as when it is freshly made, and there is likely to be an increasing demand for the better article.

"An examination into the falling off in the imports of British dominion butter from other parts of the empire for the past year, reveals the fact that this misfortune is due solely to the droughts in Australia, which brought about reductions in the export from Queensland, New South Wales, Victoria and South Australia, amounting altogether to 10,718 tons. The increase of 2,221 tons from Canada and 331 tons from New Zealand reduced the net decrease to 8,166 tons."

British Dominion Cheese.

"It is greatly to be regretted that the British dominion imports of cheese are not following the same lines as the British dominion imports of butter, which in the past ten years have more than doubled. The real cause of the decline in imported British dominion cheese is somewhat paradoxical, for it is due to the progress and prosperity of one of these dominions, viz., Canada. That country is increasing in population so rapidly that it cannot keep up the supply of cheese to its home population and at the same time continue its exports to the United Kingdom. This development in Canada is bringing prosperity to the dominion of New Zealand, which is preparing to take over the business which Canada year by year is less able to carry on.

"In the past ten years Canadian imports have fallen off by 15,000 tons, while New Zealand imports have increased to the extent of 22,000 tons. The statements made in Canada by those who know the cheese trade there, that Canada will cease to export by the year 1916, though of an alarmist character, may have some foundation, in view of the enormous rate of increase in her population, mostly by immigration. New Zealand, therefore, will be acting prudently in preparing for probable developments in Canada. By erecting dual plants for butter and cheese she will be in the best position to meet all reasonable emergencies. Canada lies so close to the over-populated countries of Europe, and the means of access to her boundless areas of fertile soil are so cheap, that the stream of immigration will most probably steadily increase in volume, and the declining years of her export trade come much earlier than now seems probable."

Little Room for Improvement in Quality.

"For the last few years Canadian cheese has been so free from damage in transit that there can be very little room for further improvement in this direction. It is only the manufacture that offers opportunities for any further progress towards perfection, and the past year has not shown any wide field for criticism of a suggestive character on this point. Canadian shippers are every year more and more alive to the necessity of placing their cheese on our markets before the bulk of the New Zealand article arrives, which is in January. This will gradually do away with some of the expense of long storage in Canada, and at the same time prevent deterioration in quality in the stores there, and so give better satisfaction when it arrives in this country."

CANADIAN ANNUAL REVIEW OF PUBLIC AFFAIRS.

The establishment of an important annual work of national history and reference is one of the most difficult of tasks. Financially, it requires a considerable outlay, and librarians, collectors of books, experienced buyers and sellers of books, mindful of the days of ephemeral and hasty effort along this line, are usually doubtful of new annual publications. Hence it was that when Mr. J. Castell Hopkins projected his Canadian Annual Review of Public Affairs in 1901, at the beginning of this century, in a new country where local literature was not by any means a popular subject, success was far from certain.

Well-known men of great public spirit, however, took hold of the enterprise with a sincere conviction that the ideal of the author and his plan of dealing with Canada would, if realized, prove patriotic in effect, helpful to the country and useful to the public. Colonel James Mason, general manager of the Home Bank of Canada, Toronto; Lord Strathcona and Mount Royal, Colonel Sir Henry Pellatt, C.V.O., Senator George A. Cox, Messrs. Cawthra Mulock and A. E. Ames, of Toronto; Sir E. B. Osler, M.P., and Mr. R. Wilson-Smith, ex-Mayor of Montreal, were amongst the founders of the publication.

In this year 1912 11 volumes have been published; the confidence and patronage of the greater libraries of the world have been obtained and retained; the press of English-speaking countries recognize the work as the standard authority on Canadian contemporary history and progress; governments which desire information as to Canada, now purchase The Canadian Annual Review for reference and political data; public men everywhere in Canada recognize its authority and unique impartiality and, in this latter connection, various provincial governments, irrespective of their political complexion (as, for instance, the Liberal governments of Alberta and Saskatchewan and the Conservative government of Ontario, and sometimes that of Manitoba) supply the work to the members of their legislatures.

The 1911 issue, which has just appeared, teems with interesting information and contains, in its 700 pages, an elaborate, complete and impartial record of the reciprocity movement of that eventful year, the general elections and the formation of the new Borden government. There are altogether 100 sections covering every phase of Canadian history and progress during the year.—Canadian Annual Review of Public Affairs, by J. Castell Hopkins, F.S.S.; published by The Annual Review Publishing Company, Toronto. Price, cloth, \$3.50; morocco, \$4.50.

Algoma Life Underwriters' Association held its regular meeting at Sault Ste. Marie recently. Mr. T. B. Parkinson, honorary president of the Life Underwriters' Association of Canada, who was visiting the district, gave an interesting and profitable address on the benefits of the Life Underwriters' Association to both the agents and the public. Those present decided they would enter upon a canvass to increase the membership of the local association.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Montreal is curious to see how the Montreal Securities Auction, which is to hold its first sale on Thursday, will result. This auction has been organized by a broker, who has endeavored to obtain a special license from government for more than a year, and who has recently succeeded. The auction will be the first of its kind in Canada, although the United States is familiar with the method. No security dealt in on the regular exchanges will be accepted, so that there will be no interference with the regular channels of disposing of stocks.

The object of the auction is to sell securities for which there is no regular market, and which may yet have considerable merits. The hope is that by means of the transactions, values may be established in many securities which are now unsaleable, and upon which it is difficult or impossible to borrow money. It is not the intention of the organizer to deal in mining securities, and the offering of these, it is said, will be discouraged. It is likely that the procedure will be to advertise the stocks in advance of the sale in order that the prospective purchasers may investigate their merits and decide what they are prepared to pay. Should the experiment prove a success, auctions will be held at regular intervals. A somewhat unusual feature is that buyers do not pay any commission, the seller assuming this function. We are inclined to think that trunk loads of stock certificates will be resurrected for the auction sales.

Duluth-Superior.—Duluth-Superior earnings are again showing increases over last year. For the second week in August gross passenger earnings were \$23,418, an increase of \$486. For the year to date earnings have increased \$12,135.

Canadian Pacific Railway.—The Kingston and Pembroke Railway shareholders have authorized the leasing of the railway in perpetuity to the Canadian Pacific Railway Company, and in a short while it will be a part of the great system. The rates of the greatest line will have force on the branch road.

Dominion Steel Company.—The output of the Dominion Steel Company for July was : Pig-iron, 26,550 tons; ingots, 80,225 tons; blooms, 23,690; rails, 14,650; rods, 3,788. The total shipments were 21,911 tons. The company's plants are working at full capacity and the rail mills are stated to be particularly busy.

Crown Reserve Mining Company.—At the monthly meeting of the board of directors of the Crown Reserve Company, the usual dividend of 2 per cent. was declared, with a bonus of 3 per cent., making a total of 5 per cent. Mr. S. W. Cohen, the general manager, was present, and read several reports on the development of the McEnaney property. Work at the 400-foot level has just commenced, and is of a very encouraging nature. Col. Carson presided.

Canadian Car and Foundry Company.—The Canadian Car and Foundry Company has received from the Canadian Pacific Railway Company a six million dollar order for freight cars, probably the largest order ever given at one time in the Dominion for rolling stock by any railway company. The order is for seven thousand steel box cars to be delivered during the first half of next year. The officials of the Canadian Car and Foundry Company, Limited, state that they will have no trouble in filling at their Turcot works the order within the time specified in the contract.

Mexican Light and Power Company.—The following is a statement of earnings of the Mexican Light and Power Company for July, with comparisons:—

	1911.	1912.	Inc.
Gross earnings, July	\$ 648,510	\$ 731,066	\$ 82,556
Net earnings July	474,735	514,425	39,690
Aggregate gross earnings			
From Jan. 1	4,650,400	5,051,729	401,329
Aggregate net earnings			
from Jan. 1	2,900,106	3,602,753	702,647

Canada Cement Company.—Sir Max Aitken, who was intimately interested in the formation of this company, has arrived in Canada from England. Discussing the position of

the cement company, he said:—"Prices have been steadily reduced to the public. I have no right to speak on behalf of the company and am not connected with its management, yet I have every confidence that it will continue its present policy, and I am prepared to defend it on the ground of economy in eliminating selling costs and of reducing prices to the public. If it is a trust, the keystone of that trust is transportation, not tariff."

Brazilian Traction, Light and Power Company.—More than 60 per cent. of the Rio and Soa Paulo shares have been deposited to date. Referring to the clause in the circular which states that there must be a substantial majority of shares deposited, satisfactory to the board of the new Brazilian Traction Company, in order for the deal to go through, Sir William Mackenzie, says that while the board had not yet met to consider the matter, he is confident that the majority will be regarded as satisfactory when they do meet. The certificates of the new security will be given to holders of deposit receipts in due course after September 1st.

Dorchester Electric Company.—Under the management of Mr. W. T. Wilson, the Dorchester Electric Company has erected 1,200 of the 2,500 poles which the system will require throughout the city of Quebec and neighborhood. Besides this number the city will erect 350 ornamental poles, and the official announcement is made that the electric current will be turned on by the 20th of October next. The bond issue of the company is \$550,000, and the common stock, \$750,000, and after making a careful calculation of the probable earnings the statement is made that the entire supply has been sold, and that the bond interest and fixed charges can be provided for with a surplus for the common stock during the first year's operation.

British Canadian Lumber Company.—The statement of operations of British Canadian Lumber Corporation, Limited is as follows:—

	July, 1912.	Year to date
	Feet.	Feet.
Lumber—		
Manufactured	7,085,152	31,336,187
Sold	3,977,941	28,071,555

Aggregate net from			
Jan. 1	\$ 1,799,146	\$ 2,000,622	\$ 201,476

Marconi Wireless Company.—The sub-committee on wireless telegraphy, appointed by the Imperial Board of Trade to deal with the question of monopoly in wireless installations, has issued its report. It says the Marconi Company's claim to what amounts to a monopoly in this country regarding certain patents is disputed by Siemens Brothers and the Hisby Company, but both these companies are desirous of obtaining from the Marconi Company a license to use the Lodge patent. The sub-committee adds: "We can express no

opinion on the matters in dispute, but we have arrived at the conclusion that any British ship-owner dealing with the Marconi Company's competitors will do so at the risk of costly litigation, and, further, that as matters stand at present any effective competition with the Marconi Company in the supply of installations may be impracticable."

Bank of Nova Scotia.—Mr. H. A. Richardson, general manager of the Bank of Nova Scotia, has made the following statement:—

"The Bank of Nova Scotia issued \$1,000,000 new capital a year and a half ago at 268, and it was promptly taken up. The present issue of \$1,000,000, at 240, carries valuable rights to shareholders, which they will be quick to take advantage of, and I am quite satisfied that they will be only too glad to again avail themselves of the opportunity to add to their holdings of our stock, and that the present issue will be as promptly taken up as former issues."

"Indeed, although shareholders have just received notices of allotment, and have, as provided by the Bank Act, six months in which to determine whether they will accept their allotments, and the privilege of paying for the stock in ten monthly instalments, we have already had some of the new allotments paid for in full. The present issue is allotted at a lower rate than the previous one, owing to the desire of the bank to treat its shareholders more liberally now that it has a reserve of \$7,500,000 on a capital of \$4,000,000."

Canada Bread Company.—The annual report of the Canada Bread Company, shows that during the past year the company has expended considerable money on the extension of its plants. In Winnipeg, says Mr. Bredin in his report, an entire new plant is under construction at a cost of about \$200,000. In Toronto they are making extensions to two of their plants at a cost of about \$120,000, and in Montreal the company has commenced a reconstruction of its plant at a cost of about \$112,000. The company has purchased during the year six small businesses, four of them being in Winnipeg, one in Montreal and one in Toronto. The balance sheet shows cash in the banks available for extension of the business amounting to \$431,815.

Manufacturing profits were \$139,411, and bank interest earned \$26,327. After using \$68,750 for bond interest, and \$87,500 being placed in reserve for seven per cent. dividend on the preferred shares for one year, and allowing \$8,123 for loss on assets sold beneath appraisal values, there is a balance to carry forward of only \$1,365.

Some of the economies effected by the merging of the three big bakeries in Toronto are pointed out by Mr. Bredin, who says that these three firms had formerly 126 bread routes and 219 horses. Through reorganization these numbers have been reduced to 96 bread routes and 163 horses.

Bank of Ottawa.—The Bank of Ottawa will issue new stock to the par value of \$500,000, shareholders of record on August 31st being alone eligible to subscribe. The new issue will be placed on the market at 200 in the proportion of one share for every seven now held. The Bank of Ottawa has an authorized capital of \$5,000,000, but up to the present only \$3,500,000 had been issued.

The capital authorized in 1874 when the bank started its career was \$1,000,000, which became paid up in 1885. In September, 1891, there was an increase of \$50,000. In December, 1897, authority was given to increase the capital from \$1,500,000 to \$2,000,000.

A by-law was passed at the annual meeting on December 10th, 1902, authorizing an increase of the capital from \$2,000,000 to \$3,000,000 and again on December 11th, 1907, a further increase in the authorized capital to \$5,000,000 received the assent of the shareholders.

Allotments of capital stock have been made from time to time as follows:—Previous to 1885, \$1,000,000; October 31st, 1891, \$500,000 at 142½; September 30th, 1899, \$500,000 at 175; February 2nd, 1903, \$500,000 at 190; November 15th, 1905, \$500,000 at 200; November 30th, 1909, \$500,000 at 200—a total of \$3,500,000.

The Bank of Ottawa is paying a dividend of 11 per cent., and last year its net earnings, amounted to 17.01 per cent. on the paid-up capital.

The contract for the second section of the Hudson Bay Railway, for the 68 miles of the Hudson Bay Road between Thicket Portage and Split Lake, the tender of J. D. McArthur was accepted. The figure is \$1,825,000.

The first thing on the American Bankers' Association Detroit Convention programme, after registration, is a reception and buffet luncheon at the Burroughs Adding Machine Company's plant. This plant now makes 25,000 adding machines a year, sold to every line of business in every part of the world—a striking contrast with the time when the company first started out, expecting to sell only 5,000 or 6,000 machines to the large banks and then go out of business.

WESTMINSTER TRUST AND SAFE DEPOSIT COMPANY.

Several strong features are reflected in the eighth annual statement of the Westminster Trust and Safe Deposit Company, Limited, of New Westminster, B.C. The company's assets increased \$64,238 over the previous year, the earnings were large and a substantial dividend was paid.

During the year the subscribed capital has increased from \$322,200 to \$415,200, and the paid-up capital from \$287,046.23 to \$363,172.65, showing an increase for the year in the paid-up capital of \$76,126.42. Enough shares have been subscribed for to bring the subscribed capital up to the half-million mark. The earnings, after providing for expenses, interest and expenditures on new buildings, amount to \$54,219.66. Add to this the premiums on the shares sold of \$16,895, makes net gain for the year \$71,114.66, out of which there was paid a dividend of 10%, amounting to \$33,822.30, and transferred to reserve account the premium on shares \$16,895, besides \$33,105 out of profit and loss account, making an increase in the reserve of 50%, which now amounts to \$150,000. The company carry forward \$4,411.77 to credit of profit and loss account.

The company has established a fire and a life insurance company in connection with the trust business.

The company's profit and loss account is as follows:—

Balance at credit, April 30th, 1911	\$17,119.41
Net profit for year ended April 30th, 1912, after deducting cost of management, salaries, advertising, etc.	54,219.66
	\$71,339.07

This was appropriated as follows:—

Half-yearly dividends Nos. 15 and 16 at the rate of 10% per annum	\$33,822.30
Transferred to reserve fund	33,105.00
Balance carried forward	4,411.77
	\$71,339.07

At a meeting of the company's directors, following the eighth annual general meeting, the following officers were elected:—President, T. J. Trapp; 1st vice-president, Dr. A. J. Holmes; 2nd vice-president, W. J. Mathers; managing director, J. J. Jones; secretary-treasurer, J. A. Rennie.

TRADE OF CANADA WITH AUSTRALIA.

Mr. Bryce, the British Ambassador to the United States, in a speech at Melbourne, Australia, which country he is touring, discussed the possible expansion of trade between Canada and Australia. In the course of his peregrinations, he had always tried to make out what were the prospects of increasing trade between the dominions and foreign countries. He believed they might look forward to an increase of trade with Canada. While the trade of that country was considerable, it was not as large as it should be. He was glad they were contemplating further developments. He was sure that Australia produced a great deal of wool, which Canada wanted. And it was the same with fruit. The United States had been an immense producer of wheat, but was now so greatly increasing her manufacturing city population that she required her own wheat for home consumption. All the land which was of first-rate quality had been taken up. Irrigation would have to come to an end, and, therefore, the time was in sight when she would cease to be an exporting country for wheat. That was also important to Australia. It was true that Canada would step into the breach, but Australia should have a portion of the trade. Another point was the fact that the United States tariff was likely to be revised. That country had a high tariff upon wool, which had been got up in deference to the wool-grower, who thought that the raw material should be protected as well as the manufactured article. Whenever a demand was made by any particular person for a reduction on one article, there was always somebody ready to ask for a similar reduction on some other article; therefore the tariff was an extraordinary complicated business. There was a greater prospect now than there had been for a long time that there would be a substantial reduction in many articles, and one of the first was likely to be a reduction of the duty on wool. He ventured to believe that Australia might look forward to a reduction in that article which would very considerably increase the supply of wool to America. There was such an enormous consuming public there that even a comparatively small reduction of duty might mean a great deal to this country. However, he would not be surprised if there was quite a substantial reduction. He had also visited South America, and was delighted to see a number of Australian ships calling at their ports. If a better political order could be established in some of those countries there would be a tremendous demand for Australian coal.

ABITIBI PULP LIMITS SOLD

Montreal Men Make Successful Bid—General Development of Northern Ontario

Greater activity is evidenced in the development of Northern Ontario. Settlers are entering the country more rapidly, but are not likely to patronize that region in large numbers until the advent of ready made farms. Messrs. Shirley Ogilvie and F. H. Anson of Montreal, are the successful tenderers for the Abitibi pulp limit offered by the Ontario Government. The amount of the bonus to be paid to the government is \$5,000 per year, distributed over a period of twenty-one years, making \$105,000 from this source alone. This represents only the right to cut pulpwood and timber on the limit, which comprises 1,560 square miles, and entitles the successful tenderer to obtain a lease, upon the usual terms, of Iroquois and Couchiching Falls for power purposes.

Will Help new Settlers.

An additional undertaking, not required by the government, which Messrs. Ogilvie and Anson have inserted in their offer, is that during and after 1913 they will advance for the purpose of being expended or shall expend \$50,000 in preparing buildings and land for settlers in the neighborhood of Iroquois Falls. None of the land on the limit goes with the lease, so the conditions under which this money is to be expended will be decided by the Minister of Lands, Forests and Mines, although a lien will be retained on all property sold until the purchasers repay the amount on each farm in easy instalments.

The tenderers also agree to buy wood and agricultural products from the settlers and covenant to promote as far as in their power the development and settlement of the district.

Joint Stock Company to be Formed.

A joint stock company with a capital of \$1,500,000 is to be organized to carry out the enterprise.

An integral part of the scheme is the construction of a pulp mill costing, with equipment and machinery, not less than \$500,000, with a daily output of one hundred tons of pulp and the employment of two hundred and fifty-nine hands on an average for ten months in the year. This investment is distributed—\$100,000 during the first year; \$200,000 during the second year; and the balance during the third year. Cutting may commence on the limit so soon as \$100,000 is expended on the mill.

The successful tenderer is also under agreement to erect a paper mill on the order of the Lieutenant-Governor in Council, which shall have a capacity of one hundred tons of paper per day and shall turn out not less than seventy-five tons of paper per day.

System of Forest Industries.

Another likely development is the starting in Northern Ontario of a system of forest industries, employing trained men and operated upon lines that will mark a departure from the wasteful lumbering methods of the past. Negotiations are proceeding by which, it is expected, a large area in the north will be secured by private interests and devoted to the making of wood products that will utilize every inch of the trees from roots to top. With it will be carried on reforestation and the scientific culture of existing timber.

Mr. F. L. Barleedt, a British capitalist who controls similar industries in Germany and Russia and is interested largely in a number of enterprises in England is behind the project. Mr. Barleedt is in Toronto awaiting the outcome of the negotiations. Although a British citizen he is German born.

The Liverpool-Manitoba Assurance Company has received a Dominion license to transact fire insurance. Mr. J. Gardner Thompson, Montreal, has been appointed chief agent.

The South Vancouver School Board has awarded the contract for insuring four new brick schools and additions to present brick schools to the Cedar Cottage Realty Company at a rate of \$8.40 per thousand on a three years' fire insurance policy. The award was made conditional, on investigation proving that this company is financially able to carry out its obligations. The tender of eight dollars per thousand of a United States company was refused, because it did not have a provincial license to carry on business. After the tender had been awarded, Mr. W. J. Prowse, acting as spokesman for the other agents, asked the board if they were to understand that the board had let the full amount to untariffed companies without making any inquiries. On an answer being returned by trustee Whelpton, chairman of the board, that the contract had been let provided that the company satisfy the board, Mr. Prowse protested against the trustees coming to a decision without giving the representatives of the tariffed companies an opportunity to explain the financial standing of their respective companies.

NEW PRESIDENT OF THE UNION BANK OF CANADA.

In connection with the removal of the head office of the Union Bank of Canada from the city of Quebec to the city of Winnipeg, which transfer took place on July 1st, Mr. John Galt, Winnipeg, whose portrait is given below, was elected president of the bank.

Mr. Galt, was born in Montreal on September 29th, 1856, being the second son of the late Sir Alexander T. Galt, Finance Minister of Canada. He was educated at Bishop's College

JOHN GALT,

New President of the Union Bank of Canada.

School, Lennoxville, P.Q., and Gore's Landing and Gotha, Germany, receiving his first commercial training in the Bank of Montreal, in which institution he was employed for five years.

In partnership with Mr. G. F. Galt, his cousin, he formed the firm in Winnipeg, of Messrs. G. J. and J. Galt in 1882, which firm has continued in active business since that time, and has been, for practically all that period, one of the foremost wholesale grocery houses in the West.

In addition to occupying the position of president of the Union Bank of Canada, Mr. Galt is president of The Indemnity Exchange; vice-president of Blue Ribbon, Limited, and Wine and Spirit Vaults, Limited; a director of the Canadian Fire Insurance Company, of the Manitoba Gypsum Company, and is one of the advisory board of the Royal Trust Company, at Winnipeg.

With his intimate knowledge of the conditions of the country, obtained from long Western experience, Mr. Galt brings to the position of president of the Union Bank of Canada valuable assistance in the way of matured and sound judgment, which must necessarily be of great benefit to the institution.

DEBENTURES AWARDED.

Francis R.M.—\$12,000 5 per cent. 20 year, to Messrs. Curran Brothers, Regina.

Mortlach Village.—\$3,000 6 per cent. 15 year, to Messrs. Curran Brothers, Regina.

Viscount Village.—\$3,500 6 per cent. 15 year, to Messrs. Curran Brothers, Regina.

Hawarden Village.—\$4,000 7 per cent. 10 year, to Messrs. Curran Brothers, Regina.

Caledonia R.M.—\$12,000 5 per cent. 20 year, to Messrs. Curran Brothers, Regina.

Lucile S.D.—\$13,500 6 per cent. 20 year, to Messrs. Curran Brothers, Regina.

Goblentz Village.—\$1,500 6 per cent. 15 year, to Messrs. Curran Brothers, Regina.

Town of Battleford.—\$50,000 5 per cent. 20 year, to Messrs. Curran Brothers, Regina.

Battleford, Sask.—\$15,000 5 per cent. 25-year debentures, to the Alberta School Supply Company.

Carleton County, Ont.—\$20,000 5 per cent. 20 instalments, to Ontario Securities Company, Toronto.

Halton County, Ont.—\$180,000 4 per cent. 20 instalments, to Ontario Securities Company, Toronto.

NEW INCORPORATIONS.

Forty-one New Companies Have Obtained Provincial or Dominion Charters

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Stewart, B.C.—Harry Smith and Company, \$50,000.

Cranbrook B.C.—Cranbrook Brewing Company, \$10,000.

Nelson, B.C.—The Martin Life-Saving Device Company, \$50,000.

Victoria, B.C.—Grand Central Hotel, \$10,000. California Hotel, \$10,000.

New Westminster, B.C.—Canadian Wheel and Waggon Company, \$50,000.

Sarnia, Ont.—Valley Canning Company, \$40,000; D. C. Munro, Alvinston; A. I. McKinley, Sarnia.

Ravenscliffe, Ont.—Ravenscliffe Telephone Company, \$2,500; G. F. Richards, J. Patterson, A. C. May.

New Liskeard, Ont.—Watson Company, \$40,000; R. C. Watson, F. J. Bourne, M. F. Fairlie, Cobalt.

Massueville, Que.—La Compagnie Godbout, \$20,000; H. L. Cardin, E. Laferte, G. Laferte, T. Theberge, Massueville.

Fort William, Ont.—Fort William Starch Company, \$60,000; H. S. Osler, J. F. H. McCarthy, W. A. J. Case, Toronto.

Perth, Ont.—Andrew Jergens Company, \$300,000; A. Jergens, C. H. Geilfus, Cincinnati; S. R. Campbell, Philadelphia.

Sequin Falls, Ont.—Spence Lumber Company, \$40,000; W. H. Scheffer, R. Wilson, Toronto; E. F. Armstrong, Spence Township.

Thetford Mines, Que.—La Compagnie d'Exploration Minière du Laguenay, \$20,000; H. Z. Dumais, P. Halle, A. Halle, Thetford Mines.

Sault Ste. Marie, Ont.—Cleveland Trinidad Paving Company of Ontario, \$50,000; D. C. Bell, Cleveland; D. W. Lewis, J. B. Hale, Sault Ste. Marie.

London, Ont.—The Chisholm-Dunn Telephone Appliances, \$100,000; C. L. Chisholm, Marysville; T. N. Dunn, Strathroy; J. M. McEvoy, London.

Roxton Falls, Que.—La Culture du Ginseng et autres Plantes Medicinales des Cantons de l'est; \$45,000; W. Poirier, J. H. Provost, D. Turner, C. Brais, Roxton Falls.

Sherbrooke, Que.—G. Hamilton and Company, \$100,000; G. Hamilton, Montreal, J. E. Noel, T. Delisle, Sherbrooke. Sherbrooke City Lands Company Incorporated, \$35,000; P. J. Wolfe, J. P. Pothier, A. R. Wilson, Sherbrooke.

Vancouver.—Dickie's Grocery, \$10,000. The Vancouver Carriage and Implement Company, \$100,000. The Japan Torhoku Trust Company, \$100,000. Traders Lumber Company, \$50,000. Canadian Safety Containers, \$250,000.

Toronto.—Toronto Paper Manufacturing Company, \$1,000,000; A. Bicknell, G. B. Strathy, and H. E. McKittrick, Toronto. Crossley Motors, \$50,000; R. F. Rowlands, J. I. Sutcliffe, H. A. Munro, Toronto. Canada and West Indies Fruit & Sugar Company, \$10,000,000; E. B. Ryckman, H. Howitt, W. H. Cook, Toronto. Old Orchard Land Company, \$50,000; W. S. Dinnick, S. C. Smoke, R. M. Walton. Dominion School of Nursing and Massage, \$40,000; J. B. McMurrich, H. M. Smythe, R. J. Parke. Shea's Theatre Company, \$500,000; M. Shea, J. Kreitner, R. F. Schelling, Buffalo. Ontario Homes, \$500,000; J. E. Day, E. V. O'Sullivan, J. M. Adam, S. C. Arrell. Toronto Detective Agency, \$40,000; F. D. Bugar, A. G. Boake, A. J. Chapman. Writerpress Sales Company, \$60,000; S. D. Biggar, A. P. Vanfleet, F. F. Treleven, Hamilton.

Montreal.—The Industrial and Educational Press, \$150,000; A. A. Magee, H. J. Creswell and J. Coonan, Montreal. Daoust, Lalonde and Company, \$750,000; A. Leeours, A. Dubois, A. D. Seguin, Montreal. Extension Land Company, \$50,000; J. Bigras, H. Gohier, R. Jarry, Montreal. Consolidated Engineering Company, \$100,000; S. G. Dixon, J. M. Motle, and R. E. Allan, Montreal. Lorillard Refrigerator Company of Canada, \$40,000; W. W. Skinner, G. Hyde, and W. G. Pugsley, Montreal. Stanley Realities, \$400,000; C. J. Fleet, J. L. Reay, and L. M. Gamble, Montreal. Silicate Engineering Company of Canada, \$300,000; C. H. Cahan, O. B. MacCallum, and M. Lewis, Montreal. Salmon River Goldfields, \$140,000; A. Berthiaume, E. R. Dufresne, and E. Morin, Montreal. Saint Lawrence Political Association, Incorporated, \$10,000; H. L. Colle, M. J. Schofeld, and H. Bocal, Montreal.

PERSONAL NOTES

Mr. H. H. O'Flynn has been elected a member of the Toronto Stock Exchange.

Mr. Tancrede Bienvenu, general manager the Provincial Bank of Canada, has been elected on the board of Le Credit Foncier Franco-Canadien.

Mr. W. G. Brownlee, general transportation manager of the Grand Trunk Railway, having resigned his position, the office of general transportation manager has been abolished.

Mr. J. V. Dillabough, office engineer, district "F" of the National Transcontinental Railway, has resigned and will assume his duties in the same capacity with the Hudson Bay Railway.

Mr. E. P. Clement, K.C., president of the Mutual Life of Canada, and Mr. George Wegenast, general manager of the company are in Western Canada. They were met at Winnipeg by Mr. P. D. McKinnon, branch manager for Manitoba.

Mr. Roger Benard, of Paris, accompanied by a number of business friends, has made an extensive tour of Canada in the interests of a number of influential Parisian banking and financial houses, with a view of ascertaining the opportunities for the profitable investment of French capital in this country.

Hon. Walter Long, M.P., P.C., formerly Chief Secretary for Ireland, now visiting Canada, says he is looking forward with the keenest delight to revisiting the Dominion. It is 25 years since he was here before. He has unlimited admiration for the manner in which the Canadian people have worked out their own destiny and also for their loyalty to the Empire.

Mr. C. Hamilton Wickes, until recently His Majesty's Trade Commissioner for the Commonwealth of Australia, has arrived in England and will shortly proceed to Canada to take up the position of His Majesty's Trade Commissioner for that Dominion, with headquarters at Montreal. Mr. Wickes, it will be recalled, has succeeded Mr. Richard Grigg, who was appointed chief Canadian Trade Commissioner under the Dominion Government.

HELD MANY STOCKS.

The stocks held by the late Mr. S. Nordheimer, Toronto, totalled \$730,324, and included the following:—

	Shares.	Amount.
Bank of Commerce	200	\$22,200
Dominion Bank	100	22,800
Imperial Bank	128	20,248
Merchants Bank	36	6,948
Bank of Toronto	50	10,000
Bank of Hamilton	36	7,164
Traders Bank	110	18,480
Canada Landed and Investment Company	115	9,200
London and Canadian Loan and Investment Company	115	6,900
Toronto General Trusts Corporation	124	23,932
Canada Permanent Mortgage Company	14,554	270,704
Canadian Pacific Railway	110	20,095
Canadian General Electric	10,408	46,206
New Canadian General	140	7,450
Twin City Royal Transit Company	125	13,375
Sao Paulo Tramway	35	8,190
Richelieu and Ontario Navigation Company	66	7,746
Toronto Railway	100	14,100
Rio Janeiro Tramways	1,230	19,314
Electrical Development Company	125	10,000
Bell Telephone	120	19,560
Nordheimer Piano and Music Company	80	8,000
Foster, Armstrong Company, Berlin	550	55,000

Mr. Nordheimer had 7,634 shares of stock in different companies with no market value at present.

"There are two Canadian centres admirably suited for shipbuilding and they are Vancouver and Sydney. Both are easily accessible at all times of the year and have a coal supply handy. One is on the Atlantic and the other is on the Pacific and there is necessity for both," said Mr. James Vickers of Messrs. Vickers, Maxim and Company, in an interview at Vancouver.

BRIGHT OUTLOOK IN SOUTHERN ALBERTA

Crop Reports Good—Building Operations—Co-operation of Agricultural and Labor Interests

(Special correspondence.)

Calgary, August 19.

Another week of the crucial period has gone with crop conditions unchanged from the high percentage. Some rain and two cool days in this district will delay harvesting until the land dries out again, and on very heavy soil, retard ripening. Much of the fuss about acuteness of the labor situation, difficulty in securing machinery and shortness of binder twine may be set down very largely to personal inclination or bias. Everything is moving along all right. The promise of a record harvest has every appearance of being fulfilled. There are men coming, machinery and money here to handle the crop; the elevators have taken some new grain in already and the rolling stock of the railways is being distributed where it will do the most good. That the quantity of grain for market will be larger than ever is admitted, and the quality, if the weather will hold for a few days more, will also be of a much higher grading.

With a continuation of the fairly equable temperature prevailing now, there is little likelihood of either hail or frost. Altogether the situation is unreservedly hopeful. Farmers, elevator and railway officials, are being urged by the public bodies and newspapers to assist in every possible way the getting of the grain to market. The Calgary Board of Trade has a committee which gathered into statistics all the information available on the grain movement last year. Boiled down past the academic stage the recommendations, if any, based on this collated information, will probably be, to the farmer the oft repeated order to "Load your car quickly"; to the railway, "Start the car and keep it moving, and when unloaded return promptly."

Building Operations in Calgary.

In Calgary building operations continue not only unabated but increasing. Homes, warehouses, stores and office blocks follow in unflinching regularity. Except for the usual difficulty in securing structural steel, material is being laid down in adequate quantity. Plenty of labor is available but there is no very evident surplus. Anything which is not quickly absorbed locally is soon drawn to the railway construction camps or harvest fields. Approximately \$2,000,000 of municipal contract work is in hand, besides the very large undertakings of the corporation by day labor. Notwithstanding some difficulty in financing all this owing to the city commissioners' unwillingness to urge the sale of debentures on a quiet market, the improvements are progressing satisfactorily. Only absolute necessities of water, sewer and light will be undertaken for the remainder of the season, the commissioners preferring to keep on the safe side.

Wholesale and retail merchants express general satisfaction with conditions. They would like freer payments on goods going to the agricultural districts, but otherwise there is nothing to complain of.

Agricultural and Labor Interests.

There is in process of formation a provincial organization contemplating the co-operation of agricultural and labor interests. It will number among its members many of the United Farmers of Alberta, an association with more than 300 local unions, and possibly these same unions may affiliate in a body. The constitution sets forth that modern production of wealth, being a social process requiring the collective labor of the working classes to it in operation, it therefore follows that if labor is to permanently better its condition, it must achieve the social ownership and control of those means of production, transportation and distribution which are necessary to the well-being of society as a whole.

The objects the new association proposes to carry out are stimulating the work of education and organization; giving collective expression to legislative requirements; rendering such aid as is possible in the efforts of all organized workers affiliated for the betterment of their conditions and providing means for the circulation of information of importance to organized labor.

Calgary to Have Abattoir.

Early in October the public abattoir will be opened. This is the result of last winter's agitation and brings into operation the first public killing and cooling plant in the Dominion under municipal supervision. The modern equipment provides for handling 200 animals per day with a freezing room for 3,000 carcasses. A reduction plant will take care of the refuse. When this establishment is completed no killing may be done within the city limits except at the public and government-inspected abattoirs.

The exhibition of the Calgary Horticultural Society held this week has proved the surprise to many residents who have not hitherto recognized the possibilities of the city and province. Magnificent collections of flowers, plants, shrubs, fruits and vegetables were shown in great profusion, there being 200 entries more than a year ago. Beautiful flower gardens in the residential districts competed for the honor of the blue ribbon. Tender vegetables and small fruits, grown near the city on a commercial scale, among which were included strawberries, raspberries and currants, were an outstanding feature of the display.

NEW STOCK ISSUE.

A block of 500 shares of \$100 each of E. R. Watts and Son, Canada, Limited, is being offered for subscription. This company has a Dominion charter and authorized capital of \$200,000, of which \$100,000 is to be issued. An unusually complete prospectus has been issued in connection with this offering.

The house of E. R. Watts and Son was established in London, England, in 1857, for the manufacture of engineering, surveying, architectural, astronomical and other instruments, and has since enjoyed a wide reputation for reliability and excellence of manufacture that has gained for it orders from the chief departments of the Government of Great Britain, as well as Colonial and Foreign Governments and public and other institutions, and from surveyors and engineers all over the world. A branch of the London house with a complete repair shop, having skilled workmen specially selected from the London works, was established in Winnipeg in 1907, and later on in January, 1909, another branch was opened in Ottawa. Both branches quickly developed, and a large and profitable clientele has been secured in Eastern and Western Canada.

In order to meet the requirements of the development of the business it was found necessary to organize other branches from time to time, and to-day there are branches and agencies at Montreal, Toronto, Quebec, Halifax, St. John, N.B., Victoria, B.C., Edmonton, Regina, etc.

The object of the company will be to provide the present branches and agencies, as well as future ones, with adequate stock and repair facilities to meet the orders and demands of the business in Canada. The financial arrangements made for the new company will provide the capital required for the further development. The assets of the branches and agencies, after deducting all liabilities, amount to \$45,000. An agreement has been made with E. R. Watts and Son for the acquisition of these assets and the goodwill of their business in Canada; and these will be transferred to the new company as soon as the legal formalities are completed. The consideration for such transfer is to be the sum of \$60,000, of which \$45,000 shall be in payment of assets and \$15,000 for goodwill. Of the \$60,000 there will be \$20,000 to be paid in cash, and the balance, i.e., \$40,000 in paid up stock of the new company. It is estimated that \$40,000 will provide the company with ample capital for present requirements, and proposed developments.

The business, as a private concern, has been showing a net profit of 15 per cent. Under the organization of the new company and with the developments proposed, it is expected that a net profit of 20 per cent. can be produced.

The directors of the company are as follow: Mr. Frank C. Watts (senior partner E. R. Watts and Son, London, England, parent house, of which the Canadian business has until now been a branch); Hon. N. A. Belcourt, K.C., P.C., Ottawa, president A. E. Rea Company, Ottawa, Limited, and director in several important industrial and financial corporations; Messrs. Robert Bickerdike, M.P., Montreal, vice-president International Bank of Canada, director Western Assurance Company; G. H. Duggan, C.E., Montreal, vice-president and general manager Dominion Bridge Company, Limited; W. B. Russell, C.E., Toronto, late chief engineer Timiskaming and Northern Ontario Railway; Gilbert E. Tyler, manager E. R. Watts and Son, Winnipeg; and Percy W. Ward, manager E. R. Watts and Son, Ottawa.

At a meeting of the Boot and Shoe Manufacturers' Association of Ontario, which is affiliated with the Canadian Manufacturers' Association, held in Toronto, it was decided to advance the prices which have prevailed for the past season by from 10 to 15 per cent.

This month The Great-West Life Assurance Company reaches its twentieth anniversary. In August, 1892, the Great-West Life commenced business in the then sparsely settled West. The company's subsequent history is intimately linked with the developments of the Western provinces, and now holds a leading position amongst the strong financial institutions of the Dominion. The twentieth anniversary finds The Great-West Life with a business in force of over \$76,000,000, with assets exceeding \$11,000,000, and with over 34,000 policyholders.

MORTALITY EXPERIENCE

Time is Not Opportune for Proposed New American Table, Say the Actuarial Committee

A committee of the Actuarial Society of America, composed of Mr. Arthur Hunter as chairman, Messrs. John K. Gore and E. E. Rhodes, have reported on a proposal to compile a new American Experience Table of Mortality, to the effect that the time is not propitious for the task. In their report they say:

It is recognized that the Actuaries' Table is not well adapted to the mortality experience on insured lives in the United States and Canada, and that the American Experience Table is largely based on the data of one company and on the judgment of a single actuary, besides being an old experience. It has, however, served its purpose well, the reserves based upon being safe and not excessive, so far as present experience goes. The companies have known for many years that their experience, especially during the early years of insurance, has been more favorable than would be indicated by the American table, but advantage has been taken of this fact to meet a large part of the acquisition expenses out of the savings in mortality.

Lower Reserves are Unlikely.

There seems to be a widely prevalent impression that a new mortality table showing a lower death rate would result in lower reserves. Such a result, however, is unlikely. Let us assume that a new mortality table based upon the more recent experience of the companies in the United States and Canada on standard insured lives would show a death rate ranging from forty per cent. of the death rate according to the American table at the youngest age, to 90 per cent. at the older ages. It will be agreed, we think, that this reduction in the death rate would be, if anything, larger than could be reasonably expected. A comparison of this modified death rate with the death rate of the American table and with the death rate shown by the Om table, which represents the latest experience of British companies, would be as follows:

Age.	American.	British.	Modified American.
10	.00749	.00338	.00300
20	.00780	.00404	.00390
30	.00843	.00595	.00506
40	.00979	.00915	.00686
50	.01378	.01504	.01102
60	.02669	.02887	.02269
70	.06199	.06207	.05579
80	.14447	.13844	.13002
90	.45454	.30075	.40909

The figures in the last column are necessarily arbitrary, the object having been to obtain rates which are under those of both the American experience and the latest British experience.

Experience in Great Britain.

The experience in Great Britain has been that with each successive table, showing generally a lower rate of mortality, higher reserves in the aggregate have been required. It is evident, therefore, that a table of mortality showing a lower death rate than at the present American table would not for that reason require lower policy reserves.

Moreover, the adoption of a new table of mortality showing a lower death rate than the present table would not necessarily reduce the cost of insurance to the policyholders. This cost is determined by the expenses of management and by the death rate actually experienced, and not by the death rate shown in the table used for computing premiums and reserves. At the present time policyholders are receiving in the dividends credited to their policies the benefit of the death rate actually experienced, and this would not be affected by the adoption of a new mortality table. Among all companies, participating and non-participating, if lower net premiums were used the loadings would doubtless have to be increased, unless the margin of safety be possibly too greatly reduced. The resulting gross premiums would probably vary but little from those now charged.

Territory is Vast.

While the reasons for the preparation of a new mortality table of insured lives are many and important, certain conditions exist that will prevent such a table from being entirely satisfactory for all purposes for which it may be used.

For example, the territory to be covered is so vast that there are substantial differences in the death rates among selected lives in the various sections. It might happen, therefore, that small companies operating in less favorable localities would eventually become insolvent by using insuffi-

ciently loaded premium rates based upon the mortality on select lives in the United States and Canada.

Again, the determination of the number of years of experience that should be included in the investigation will be of the greatest importance. In view of the improvement in average longevity during the last thirty years the table of mortality would not represent present-day conditions if the companies should contribute data taken from their entire experience, for the heavier mortality of the earlier years would have a tendency to increase the death rates of the new table.

Mortality is Greater.

Still another difficulty arises from the fact that investigations separating the experience under terms whole life, limited payment life and endowment policies generally show that the mortality on low premium policies is relatively greater than on higher premium policies. A new table based largely upon the experience on policies on the higher premiums plans might not be suitable for a company whose business varied therefrom; for example, a company issuing the larger proportion of its business on term system.

OUTLOOK FOR FALL TRADE.

General trade conditions in Canada, according to Dun's reports from the leading trade centres, continue satisfactory, with all indications very encouraging for a fall and winter trade.

Montreal reports that retail trade is seasonably quiet, but the wholesale dry goods business is fairly active. Groceries are moving quite freely, and the outlook in the boot and shoe line promising. Prices of leather and hides continue to advance, and the tone in the iron and steel market is much stronger.

Retail trade at Quebec continues satisfactory for the season, and the movement of staples at wholesale is fairly well maintained. Local manufacturing plants are well employed, and prospects for continued activities are considered good.

The splendid crop outlook in Ontario and the three western provinces has stimulated the demand for all kinds of merchandise at Toronto, and wholesale distribution is quite active. There is a good enquiry for all staple lines, and prices are firm, with an advancing tendency in some instances. While retail business is seasonably quiet at Hamilton, improvement is looked for in the near future, as activity is well maintained in both wholesale and manufacturing lines.

In the Far West and North-West, steady progress is reported, with the rapid advance of crops toward maturity, and most lines report excellent prospects for an active fall and winter trade. Winnipeg reports that conditions continue favorable, with notable increase in the demand for jewelry, and advances in the prices of canned goods and leather.

At Regina all kinds of merchandise are moving freely, and a rapid expansion in building activity is noted. City retail trade is active at Edmonton this week, but there are some complaints regarding the weather.

The crop outlook in the vicinity of Calgary continues favorable, and no decrease can be noted in the volume of general trade. Wholesale merchants at Vancouver report a much larger business than at this time last year, and general conditions throughout British Columbia are eminently satisfactory.

MICE AS A CAUSE OF FIRE.

Those whose business it is to investigate the cause of fires, have for years held, that occasionally rats and mice would start fires by gnawing phosphorus matches. Mr. Lindback, the Manitoba Fire Commissioner, has had plenty of evidence to show that matches have been carried away by mice, as they have been found on both sides of their holes, chewed and broken. While it is unlikely these rodents would tackle matches while in a starving condition, it does not follow they will not carry them around in play or while nest building. In the composition of the ordinary match head is a certain amount of ground glass, the best material for trimming the teeth of rats and mice, which may explain the occasional gnawing of match heads and consequent ignition. On the other hand, the soft wood of the match stem lends itself readily to be converted into an excelsior for nest building. It is reasonable to suppose that mice will use chewed-up matches and carry them between floors and partitions for the building of their nests. Such nests have frequently been found.

A new board of trade has been formed at Huntingdon, B.C., with the following officers: Honorary president, Angus Campbell; president, W. R. Miller; vice-presidents, J. D. Taylor, M.P., C. H. Stuart Wade and George A. Gordon; secretary-treasurer, L. H. Peters.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

North Vancouver, B.C.—August 14.—Tent dwelling. Loss \$200. Origin unknown.

Guelph, Ont.—August 21.—Mr. A. E. Meyers' barn. Loss unknown. Origin lightning.

Kingston, Ont.—August 21.—Mr. J. A. Carruthers' residence. Loss and origin unknown.

Portage la Prairie, Man.—August 15.—Mr. W. J. Cooper's livery barn. Loss small. Origin unknown.

St. Sebastien, Que.—August 10.—Mr. T. Gervais' store and house. Loss \$14,000. Origin unknown.

Cornwall, Ont.—August 16.—Messrs. Phillips' barn. Loss \$7,000. Insurance \$5,000. Origin lightning.

Fredericton, N.B.—August 15.—Messrs. Dunham Brothers' sawmill. Loss \$5,000. No insurance. Origin unknown.

Delta, Ont.—August 17.—Mr. T. Harrison's residence. Loss and origin unknown. Four small children died in this fire.

St. Thomas, Ont.—August 16.—Mr. J. Farley's premises. Loss \$2,000. Mrs. M. F. Gilbert's barn. Loss \$200. Origin unknown.

Winnipeg, Man.—August 17.—Messrs. Sprague's lumber mill, Higgins Avenue East. Loss \$200. Insured. Origin, overheated wall.

Vancouver, B.C.—Messrs. Hatch Brothers' sash and door factory, corner Cedar Street and Fifth Avenue West. Loss \$45,000. Origin unknown.

Union Bay, B.C.—August 15.—The Grant and Mounce Sawmill; Canadian Collieries property. Loss, sawmill, \$20,000; Collieries, \$10,000. Origin unknown.

Toronto, Ont.—August 16.—Provincial Motor Company's sight-seeing car. Loss \$3,000. Origin, explosion in engine of car.

August 19.—Downie Pattern Company, and Lyqn James, 172 King Street West. Loss, James, \$1,000. Origin unknown.

Montreal, Que.—August 16.—A Brunswick Street boarding house. Loss and origin unknown.

August 17.—523 Ontario Street. Loss unknown. Origin, lighted candles.

August 19.—Hay loft of No. 16 fire station. Loss \$1,000. Origin, suspected incendiary.

ADDITIONAL INFORMATION CONCERNING RECENT FIRES

Valleyfield, Que.—Montreal Cotton Company's barn and stable. Loss, products \$10,200, buildings \$7,600. Insurance, stock \$4,500, buildings \$3,500, with Royal Insurance Company.

SIR MAX AITKEN ON CANADIAN BONDS.

Sir Max Aitken has been in Toronto and Montreal this week and has given interesting views respecting Canadian securities in London. He thinks that after a long period of prosperity there is a disposition to desert high-class securities and look for those which pay higher dividends. Toronto did not meet an isolated experience. It is the experience of all high-class securities in every colony and at home. As soon as a period of depression comes and the British investors meet with losses they will drop these higher interest bearing securities and the confidence in the higher class of securities will advance.

REPAIRING A DAMAGED MEMORY.

The Bank of Nova Scotia,
Ontario, August 16, 1912.

The Monetary Times,
Toronto, Ont.

Dear Sirs,—Please send me a copy of the Monetary Times for the 10th inst. I left mine on the street car before I had finished reading it, and do not wish to miss a copy.

(Signed) A. F. T.,
Manager.

QUEER FINANCE.

Editor, The Monetary Times:—

Sir,—On page 1081 of a publication headed "The Chronicle, Banking, Insurance and Finance," dated July 26, 1912, is printed:—"It appears that the Ontario Government will receive approximately \$60,000 in succession duties from the estate of the late John Curry, the well-known banker of Windsor. Mr. Curry's estate is valued at more than \$1,000,000. In this case, as in others, wherein large estates change hands through the decease of owners, a considerable amount of capital which has been producing revenue is turned over to the provincial authorities and straightway passes out of existence. In Canada, on the whole, a goodly sum of capital is each year destroyed or dissipated through the action of the Provincial Government in appropriating a portion of the estate of each rich man who dies with property in their jurisdiction. The capital so seized or appropriated is employed to meet the current expenses of governments."

Surely if "the capital is employed to meet the current expenses of government" it is neither "destroyed" nor "dissipated" but put into circulation at once and is so used in place of taxes which would otherwise have to be raised by some other method for the same purpose. The idea that capital, by changing hands, "goes out of existence," is absurd and it is surprising that any financial expert should promulgate it in modern times.

The morality of the method of any special form of taxation may be questioned, but so long as taxes are necessary and the expenses of governments continue, the particular methods of taxation are merely matters of comparison, whether it be on the poor man's cottage or the rich man's accumulations, even as the methods of accumulation may vary.

Yours, etc.,

Henry Lye.

Vancouver, B.C., 12th August, 1912.

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks of August 24th, 1911; August 15th and August 22nd, 1912, with percentage change:—

MANITOBA'S FIRE LOSSES

During the First Half Year, They Totalled Four Dollars Per Capita

"The fire losses on this continent from January 1, 1911, to July 1, 1912, are almost \$135,000,000, which means that if, in the next six months, the same record is kept up, the fire losses for 1912 will show that the people have again recklessly destroyed \$270,000,000 of property in the United States and Canada." Mr. Lindback, Manitoba's Fire Commissioner, makes this statement.

"Of these \$135,000,000 losses," he adds, "in the first six months of the year Canada must be charged with about \$15,000,000, of which Manitoba's share is one million, equal to a tax of \$4 on every man, woman and child in the province—while in England the same tax is not over 40 cents per capita.

"While the United States escape with a per capita loss of \$2.50, Canadians are taxing themselves \$3.50 per capita, at the rate we have been burning created values during these six months. After an analysis of the causes, it will be plain how utterly indifferent we are in regard to fire prevention.

Ignorance and Carelessness.

"On January 3rd the Excelsior Garage burned with a loss of some \$115,000, caused through ignorance and carelessness. On the 22nd of the same month a cold storage, with a loss of \$315,000, took fire at noon through carelessness.

"On March 9th a sash and door warehouse was destroyed, with a loss of seven lives and \$24,000, first, because of non-conformity to the city by-law, second, because of non-inspection by the proper city authorities, and, finally, because the two or three barrels of gasoline used in the warehouse per week were handled under the name of naphtha, and therefore not considered dangerous. On March 5 a fire started in a building on Main Street while the people were still in the office; loss, \$20,000; cause, carelessness with a lighted match.

"On April 23rd the Brown-Rutherford plant was destroyed by a spark from their smoke-stack falling in the sash and door warehouse during a very heavy wind, the fire getting beyond the fire department for want of sufficient water at the beginning of the blaze. Loss, \$250,000.

Warned as to Rubbish.

"On May 3rd fire started on the platform of a warehouse located on the Canadian Pacific Railway track by a spark from an engine falling in some rubbish on the platform, notwithstanding the parties had been frequently warned about removing such rubbish. Loss from this fire was \$34,000. To prove how little effect a lesson of this kind has, on June 20th another fire started under exactly similar conditions in what was left, but with less loss, because there was not so much to burn.

"On May 30th fire started in an unfurnished house on Home Street, causing a loss of \$20,000. At the time I suggested the need of a watchman in such buildings under construction, but with no results. Loss here about \$50,000.

"The province at large presents a similar record of indifference to fire prevention, although naturally a smaller money loss. But the fact to be deducted from the fire record is that while Canada and the continent generally have realized the need of prompt and drastic action where epidemics and diseases are in evidence, we are far behind in the work of fire prevention."

RECORDING PROPOSED CANADIAN LLOYDS AGENCY.

The London Times says:—"The question of forming a Canadian Lloyds (as advanced in The Globe's staff correspondence from Montreal) is viewed with sympathy by British underwriters, who are not at all alarmed over the proposal here. There is a feeling of slight resentment to be found at the suggestion that the underwriting community should not have made itself acquainted with the improvements effected in the St. Lawrence, and that consequently it should be treating vessels using the St. Lawrence route unfairly by quoting higher rates than for vessels engaged in trade with United States ports. There certainly appears to be no conceivable reason why underwriters should desire to penalize the Canadian route for advancement of the other. All their natural sympathies rather would incline them to take the opposite course were such possible. Underwriters recognize the fact that the Dominion Government may feel justified from the broad motive of encouraging Canadian industries in forwarding the establishment of a Canada Lloyds, but they maintain that if such an institution be started with the object of cutting present rates, the losses that must inevitably follow would have to be met by the Canadian people."

RAILROAD EARNINGS.

The following are the railroad earnings for the week ended August 7th:

	1911.	1912.	Increase or decrease.
C. P. R.	\$2,272,000	\$2,706,000	+ \$434,000
G. T. R.	1,017,982	1,109,682	+ 91,700
C. N. R.	332,500	407,300	+ 74,800
T. & N. O.	35,274	30,905	— 4,369
Halifax Electric	5,641	5,646	+ 5

The following are the railroad earnings for the week ended August 14th:

	1911.	1912.	Increase or decrease.
C. P. R.	\$2,205,000	\$2,677,000	+ \$472,000
G. T. R.	1,048,062	1,098,423	+ 50,361
C. N. R.	319,700	401,800	+ 82,100
T. & N. O.	36,830	29,838	— 6,992
Halifax Electric	5,714	6,486	+ 772

The accounts for the Grand Trunk Railway Company for the half-year to the 30th of June, 1912, show the following results:

Gross receipts	£3,834,300
Working expenses	2,793,300
Net receipts	£1,041,000
Deduct debit balance on account of rentals, outside operations and car mileage	33,500
Total net revenue	£1,007,500
Net revenue charges for the half-year, less credits	513,900
Balance	£ 493,600
Deduct Canada Atlantic deficiency for the half-year	£52,800
Detroit, Grand Haven & Milwaukee deficiency for half-year	50,700 103,500
Surplus	£ 390,100

This surplus of £390,100 added to the balance of £6,800 from December, 1911, makes a total amount of £396,900 available for dividend, which will admit of the payment of the full dividend for the half-year on the four per cent. guaranteed stock, and first and second preference stocks, leaving a balance of about £8,500 to be carried forward.

The accounts of the Grand Trunk Western Company for the year ending 30th of June, 1912, after providing for all fixed charges, including the debit-balance of £31,461, brought forward from the previous year, show a deficit of £16,144, which will be carried forward to the current year.

INDUSTRIAL ACCIDENTS.

During the month of July there were 108 fatal and 272 non-fatal accidents recorded by the Department of Labor. This is an increase of 46 fatal and 38 non-fatal accidents compared with the record for June, and an increase of 10 fatal and 73 non-fatal accidents compared with July, 1911. Accidents recorded in which more than two workmen were killed were, one as the result of a falling derrick at Kenogami, Que., on July 1st, by which seven men were killed; one by which four railway construction hands were killed by a premature explosion of dynamite on July 23, near Maberly, Ont.; one at Kenogami on July 25, by which four men were killed as the result of an explosion in a factory at Windsor Mills, Que., on July 8. Two workmen were electrocuted as the result of a falling pile driver coming in contact with live wires at Meaford, Ont., on July 8.

GUELPH LIFE UNDERWRITERS.

The following have been elected officers of the Guelph Life Underwriters' Association:—Hon. President, H. C. Cox; hon. vice-presidents, John A. Tory, J. F. Weston, A. Homer Vipond; president, F. B. Hilliard; vice-president, A. A. Black; secretary-treasurer, G. Powell Hamilton; executive committee, W. H. Hamilton, R. H. Bryden, W. J. Bell, and Joseph Lawson.

Mr. W. H. Hamilton was nominated as member of the Dominion executive committee. The annual meeting was changed by motion to January, and the next period made eighteen months. There will, therefore, not be another annual meeting until January, 1914.

The address by Mr. W. J. Bell upon the New Ontario Insurance was instructive.

WORLD'S CROP POSITION

General Yield May Not Be as Good as Last Year's—
Canada's Production

A cablegram received from the International Agricultural Institute, Rome, gives the following data concerning the 1912 cereal crops compared with those of 1911:—

	Estimated production 1912, Thous. of bush.	Production 1911, Thous. of bush.
Wheat—		
Prussia	90,471	86,265
Belgium	15,295	14,617
Bulgaria	63,750	72,005
Egypt	28,948	37,933
Barley—		
Prussia	81,128	71,703
Bulgaria	18,372	20,326
Denmark	25,655	24,656
Oats—		
Prussia	364,648	317,884
Belgium	38,933	38,921
Denmark	49,382	47,473
Corn—		
Spain	25,982	27,150
Egypt	76,448	47,143
Rye—		
Prussia	346,444	322,200
Belgium	22,518	23,090
Bulgaria	12,402	14,768
Denmark	18,020	19,729
Hungary	57,982	54,146

Condition of the corn crop in Roumania is 80 per cent. of the average. The condition of wheat crop is such as to predict a yield above the average. The condition of the cereal crop in Russia is such as to predict a yield above the average. Total production of wheat in the countries which have so far reported to the Institute is 96.7 per cent. of that of the same countries last year.

World's Wheat Production.

The estimate of the world's wheat production, 1912, just received by cable from the Dornbush and Broomhall crop reporting agencies:—

	Dornbush Production 1912, Thous. of bush.	Broomhall Production 1912, Thous. of bush.
France	328,000	320,000
Russia (73 governments) ..	640,000	640,000
Hungary	169,280	168,000
Austria	56,000	56,000
Croatia		16,000
Bosnia		2,400
Servia		13,600
European Turkey	136,000	
Italy	173,600	168,000
Germany	148,000	132,000
Spain and Portugal	122,880	149,600
Roumania	80,000	72,000
Bulgaria	56,000	56,000
Greece		4,000
Great Britain		56,000
United Kingdom	60,000	
Belgium		12,000
Holland and Belgium	20,720	
Switzerland		4,000
Sweden		7,000
Denmark		4,000
Rest of Europe	67,680	
Total Europe	2,058,160	

How Canada Is Figured.

The following table of countries, not in Europe, shows considerable variation in the estimates of the Canadian crop:—

Algeria	32,000	
Tunis	4,000	
Total Africa	62,640	
India	366,376	368,000
Japan		24,000
Rest of Asia	72,480	
Australasia	88,000	76,000
Argentina	176,000	170,000
Uruguay	10,000	8,000
Chili	18,000	14,000
Mexico	9,600	6,000
United States	680,000	680,000
Canada	224,000	210,000
Total America	1,117,600	
Total world's crop	3,765,256	3,472,600

CANADIAN PACIFIC'S EXPANSION

Large Construction Programme Ahead—Extension of
Steamships and Hotels Service

The increase in the capital of the Canadian Pacific Railway, noted in last week's Monetary Times, and which will shortly be made, again draws attention to a railroad which has loomed large in the international investment eye. The increase will be from \$200,000,000 to \$260,000,000. There is little doubt as to the need of increased funds by the Canadian Pacific. It has a long programme of construction ahead, the most important part of which, perhaps, is the double tracking of the road to the Pacific Coast. Both passenger and freight traffic is rapidly increasing, and within a few years there will be work and constant use for a double track. Expansion of the company's hotel and steamship services, both of which have proved remunerative and in both of which there is room for expansion, will probably occur.

Earnings Have Grown Rapidly.

While it was not intended, the news of the new stock issue became public shortly after the publication of the company's preliminary statement for the year ended June 30th. It shows record earnings and constitutes a fairly good index to trade conditions in Canada to-day. The gross earnings by the railway and its allied steamship lines, with the working expenses, for 1911-12 and the six preceding years are given below:—

	Earnings.	Expenses.
1911-12	\$123,319,541	\$80,021,298
1910-11	104,167,808	67,467,977
1909-10	94,989,490	61,149,534
1908-09	76,313,320	53,357,748
1907-08	71,384,173	49,591,807
1906-07	72,217,527	40,914,218
1905-06	61,669,758	38,696,445

In six years the operating income of the railway and its properties has doubled, the operating expenses having rather more than doubled. This showing has been made during a period of increased competition, and in face of a tendency to reduce rates, for carrying both passengers and freight.

Maintenance of Dividend.

The company's dividends have been steadily maintained and the shareholder naturally has every confidence in their maintenance. It would be a disaster beyond modern foresight that would cause the passing of the Canadian Pacific Railway dividend. Invariably, too, the company has been able to report a large surplus after the payment of all dividends. Commenting on that fact, the London Statist reminds us that the company could stand a shrinkage in its traffic and gross earnings of something like 25 per cent. before the profit would cease to be sufficient to provide the 10 per cent. dividend. A shrinkage of 25 per cent. in traffic and in earnings is a very large sum, and that to have a margin of this kind indicates the conservative manner in which the company's financial policy is controlled.

There is an idea that a further increase of dividend to a still higher basis than 10 per cent. may take place, but those persons who expect an increase in distribution would do well to remember that it is wiser to pay a dividend which the company can maintain in good and bad years alike, than to distribute a dividend which would have to be seriously cut in a time of depression, or which could not be maintained in a period of increased competition.

LABOR UNREST STILL ON THE INCREASE.

Industrial conditions were seriously disturbed by labor disputes during July; the number in existence in that month being considerably greater than the number existing during June. The number actually commencing, however, during July compares favorably with that of the previous month. In all forty-six disputes were reported to the Department, an increase of nine as compared with June, and an increase of twenty-eight as compared with July, 1911. About 17,000 employees were affected by these disputes as compared with 15,000 during June, and 19,000 during July, 1911. A termination of the Garment Workers' strike in Montreal occurred during July, which caused a resumption of operations by more than four thousand employees after nearly two months of idleness. Few of the disputes commencing during July were individually of serious consequence as factors in disturbing industrial conditions.

The Quebec Bank is negotiating for the purchase of a site on Sparks Street, Ottawa, as several other financial institutions have done.

At a subsequent meeting of the Directors, the following officers were elected: President, T. J. Trapp; 1st Vice-President, Dr. A. J. Holmes; 2nd Vice-President, W. J. Mathers; Managing Director, J. J. Jones; Secretary-Treasurer, J. A. Rennie.

DEBENTURES FOR SALE

CHILLIWACK, BRITISH COLUMBIA.

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m. of September 3rd, for the following 5 per cent. 40-year debentures: Waterworks, \$100,000; High School, \$25,000; Macadamizing, \$30,500; Drainage, \$3,500; City Hall, \$2,500; and Fire Hall, \$1,000. For further particulars apply to

D. E. CARLETON,
City Clerk.

MELITA, MAN.

Tenders will be received by the undersigned until Tuesday, September 10th, for \$6,000, 20-year, 5 per cent. school debentures.

ROBERT LOVE,
Secretary-Treasurer.

Melita, Man., August 13, 1912.

IMPERIAL, SASK.

Debentures for Sale.

Tenders will be received by the undersigned up to September 15, 1912, for the purchase of \$15,000 6 per cent. waterworks debentures, 15 years. Tenders to include bank charges and cost of printing debentures. Full particulars, together with further conditions, can be secured from

J. G. HOBMAN,
Secretary-Treasurer.
Imperial, Sask.,
July 26th, 1912.

SCHOOL BONDS FOR SALE.

Tenders addressed to the undersigned will be received up to nine o'clock a.m. of Thursday, September 12th, for the purchase of \$500,000 of 4 per cent. thirty-year bonds of the Protestant Board of School Commissioners of the City of Montreal.

Full particulars will be given upon application.

C. J. BINMORE,
Secretary-Treasurer,
197 Peel Street, Montreal.

\$1,031,929.99

CITY OF OTTAWA, ONTARIO.

Debentures for Sale.

Tenders addressed to "The Chairman, Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa until 3 p.m. on Thursday the 29th August, 1912, for the purchase of \$12,000.00 40 year debentures, \$727,500.00 30 years, and \$292,429.99 20 years.

They are all a liability of the City at large, and bear 4% interest, payable 1st January and 1st July.

Two separate tenders will be received, one for \$40,000.00 30 year debentures, and the other for the remainder of the debentures \$991,929.99.

All tenders must be on the official form. The tender for the \$40,000.00 debentures must be accompanied with an accepted cheque for \$1,000.00 and the tender for the \$991,929.99 debentures with an accepted cheque for \$5,000.00.

Accrued interest from 1st July, 1912, must be paid in addition to the price tendered.

The \$40,000.00 debentures are in \$1,000.00 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York or London, at the option of the purchaser, and in denominations to suit.

Delivery of the \$40,000.00 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Mayor.

Ottawa, 29th June, 1912.

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to 6 o'clock p.m. on the 31st day of August, 1912, for the purchase of \$6,000 5% per cent. Government Guaranteed General Debentures repayable in twenty equal annual payments with interest.

The highest or any Tender not necessarily accepted.

F. HOPWOOD,
Secretary-Treasurer.
Duck Lake,
July 22nd, 1912.

TOWN OF BASSANO, ALBERTA.

Tenders for Debentures.

Tenders will be received by the undersigned, marked "Tenders for Debentures" up to four o'clock p.m. on September 16th, 1912, for the purchase of \$150,000 30-year, 5 per cent. water and sewer debentures.

For full particulars apply to

GEO. B. R. BOND,
Secretary-Treasurer,
Bassano, Alta.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, July 17th, 1912.

SCHOOL DEBENTURES FOR SALE.

The Board of Trustees of Olds S.D., No. 235, Olds, Alta., is offering for sale thirty thousand dollars worth of School Debentures, said Debentures to be paid in thirty equal annual instalments and bearing interest at the rate of 5 per cent. per annum.

For further information apply to,

JAS. F. GRANT,
Secretary-Treasurer, Olds S.D., No. 235.
Olds, Alta.

DEBENTURES FOR SALE.

The municipality of the town of Taber offer for sale \$28,000 for five per cent. 10 and 20 year debentures. For information apply to the undersigned.

GEO. C. MILLAR,
Secretary-Treasurer.
Taber, Alberta.

TOWN OF DUCK LAKE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to 6 o'clock p.m. on the 31st day of August, 1912, for the purchase of \$4,000 5% per cent. Government Guaranteed General Debentures repayable in twenty equal annual payments with interest.

The highest or any Tender not necessarily accepted.

F. HOPWOOD,
Secretary-Treasurer.
Duck Lake,
July 22nd, 1912.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

(Continued from Page 342).

TENDERS FOR DEBENTURES.

TOWN OF WATROUS, SASK.

Tenders for the purchase of eighty-three thousand dollars (\$83,000) worth of debentures of the town of Watrous; maturing in forty years, with interest at 5½ per cent. per annum, will be received by the undersigned up to the 9th day of September, 1912, at 8 p.m.

RICHARD B. DAVIDSON,
Mayor.

or
JOS. GAYE,
Secretary-Treasurer.

TOWN OF WELLAND.

DEBENTURES FOR SALE.

Sealed tenders will be received by undersigned up to o'clock noon, September 9th, 1912, for \$75,000 Water Works Debentures; and \$29,598.63 Sewers and Walks Debentures, interest 4½ per cent. half-yearly, life of debentures, Water Works 30 years, Sewers and Walks 10 years.

Full particulars on application.

The highest or any tender not necessarily accepted.

J. H. BURGAR,
Town Treasurer,
Welland, Ont.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED.—A strong Board Company requires the services of a thoroughly competent and experienced Fire Insurance Inspector. Liberal salary and excellent opportunities for advancement will be given to suitable man. Applications will be received in strict confidence. Apply Box 17 Monetary Times.

WOLVERTON & CO, LTD.

Suite 704 Dominion Trust Building, Vancouver, B.C.

CHATHAM'S FIRE EQUIPMENT.

That the fire-fighting equipment now owned by Chatham is far from adequate, is shown in the report of the Underwriters' Association, on the recent inspection made in the city. The test made of the pressure with nine streams at the market square showed only 32 pounds. The discharge from the streams was 43 per cent. short of the requirements for cities the size of Chatham for fire purposes only. Commenting on the low pressure the inspector accounted it due in no small degree to the fact that one of the mains crossing the river is out of commission. Quite a number of recommendations for the purchase of new equipment are made. Chief among these is the purchase of a new engine of 800 gallons capacity per minute to replace the present one of 400 gallons. The purchase of an additional 400 feet of hose to bring it up to the standard requirements of 4,300 feet. The total carrying capacity for hose is only 2,000 feet, and this should be increased by another thousand. It is suggested that a combination chemical engine and hose wagon be secured for this purpose. The brigade should also be increased from seven fully paid men to not less than twelve, all of whom should be in constant attendance at the hall. Other recommendations, including the installation of fire alarm boxes in the business section, are made.

The annual meeting of the Dominion Association of Chartered Accountants will be held at Toronto on September 24th and 25th. Members of the seven provincial institutes will attend.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

NEW TRUST COMPANY FOR SASKATOON.

The organization of the Executors and Administrators Trust Company with head office at Moose Jaw, has been completed. There are at present fifteen directors of the company, and five others, the representatives of the foreign shareholders will be added. The company was incorporated by special act of the Saskatoon legislative assembly in the session of 1912, and is empowered to do a general trust business in all lines. It will pay particular attention to the trust funds on first mortgages in the province of Saskatchewan and to the execution of any trust whatever. All the directors are men of good standing in the community and men who know well the conditions in the proposed field of operations.

Stock of the company is being offered at par until September 1st. After that date, it will be sold at a premium.

The directors and officers are as follows:—President, J. Wright Sifton, superintendent of schools; vice-president, Henry Y. Smith, real estate broker; second vice-president, A. W. Irwin, financial agent; Richard Henry Clarke, merchant, president Clarkes Limited, director Moose Jaw Securities, Limited; Lewis M. Rosevear, lumber merchant, vice-president Union Securities, Limited, director Moose Jaw Securities, Limited; R. J. Gourlay, general manager Beaver Lumber Company; D. E. MacIntyre, financial agent; J. A. Caulder, managing director Saskatchewan Creamery, Limited; William F. Dunn, barrister, Caldwell, Dunn and Fraser; Herbert Snell, merchant, managing director Herbert Snell, Limited; J. Edward Caldwell, barrister, Caldwell, Dunn and Fraser, president Moose Jaw Securities, Limited; Norman Bellamy, merchant, Bellamy Furniture Company; Andrew Cunningham, gentleman; John McWatt, gentleman and managing director; Harry F. Stirk, president American Securities, Limited, managing director Moose Jaw Securities, Limited.

DOMINION'S CROP REPORT.

The Census and Statistics Department of the Dominion Government reports crop condition to the end of July as generally favorable, giving neither the exceptionally favorable promises of the same date last year, nor the equally exceptionally unfavorable promise of the year before. In Quebec the condition is below that of the other eight provinces.

The average conditions of spring wheat is 83 per cent. of standard for the whole of Canada—oats, barley, rye, and mixed grains, 80; corn, 70; potatoes and root crops, 80. Hay is in excellent condition. In every case Quebec is the exception to this high standing.

Fall wheat did not fully recover from the severe winter. For the provinces of Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia, the average yield of fall wheat will be 21.48 bushels per acre, indicating a total yield of 16,773,300 bushels from an effective area of 781,000 acres, as compared with 26,014,000 bushels from 1,172,119 acres as the final figures of 1911.

It is estimated that the total yield of hay and clover this year will be 11,038,000 tons and of alfalfa 177,300 tons. This is somewhat below the early estimates of the 1911 crop.

Sir Donald Mann estimates that the Canadian Northern Railway will be completed from coast to coast within eighteen months.

Prevention from fires arising from any cause is evidently the aim of Vancouver's fire department, and the following clause of a by-law is being advertised by the city: "No owner, occupant, or lessee of any building or any premises shall allow or permit moss, or any inflammable or combustible material or growth to accumulate, remain or grow upon the roof of any such building or premises."
